TRADE Gillette MARK
KNOWN THE WORLD OVER

Our Gratitude— And Expectations

As we look back over 1911, with its greatly increased sales of GILLETTE Safety Razors, we thank you heartily for your co-operation in bringing this about.

One result of the way the trade pushed the GILLETTE in 1911 is that we have been enabled, and practically compelled, to erect a new GILLETTE Building where we will have more room and better facilities for handling the growing business. This building is now nearly completed, so that we will soon be in a better position than ever to delight your customers with the super excellence of the GILLETTE Safety Razor.

We want, if possible, to make "The Razor of To-day" better than ever, and to advertise it still more vigorously. Can you, from your own experiences or those of your customers, point out any weaknesses in the razor itself or the way we advertise it? Your suggestions to our representative or by letter to ourselves will be more than welcome.

With Canada's growing population---more money than ever in the country---factory facilities for making even a better Gillette than before---and your continued enthusiastic co-operation, we are looking forward to 1912 with confidence that the Gillette will make more money for you and for us than it has ever done before.

The Gillette Safety Razor Co.
of Canada, Limited

A. A. Pitues.

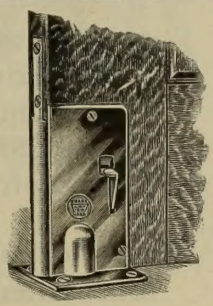
TRADE BUILDING

Have you a stock of Spring Hinges that have distinctive selling features which your salesmen can offer and which would make the prospective purchaser buy them and no other?



Chicago "Relax" Spring Hinges

are in great demand. They are substantial in construction and readily applied. The EXCLUSIVE FEATURE of spring action release, allowing the door to be placed at any desired position and automatically re-engaging when the door is closed, is of recognized merit and utility.

Send for Catalogue M 26. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

Chicago Spring Butt Company.

These Two

"YANKEE" TOOLS

are Catching the Mechanics

Quick Return No. 130

Same tool as the popular No. 30, but with a Spring inserted in the Handle to drive the spindle back quickly, ready for the next push. A great advantage for overhead work or where only one hand can be used. Takes all the Attachments used in the No. 30.

"YANKEE" Push Brace No. 75

Bores ⅜" holes in any kind of wood in half the time of a Bit-Brace and does it easier. Drives and draws screws---takes all the small tools and works in close quarters where a Bit-Brace cannot be used. Bearing down on the Handle drives it with that quick and easy motion of the "Yankee" Spiral Driver. ***These Are the Coming Tools.***

Better let your Jobber quote at once.

NORTH BROS. MFG. CO.

More Water for Less Money

¶ Would you pump water from a deep well for two cents per hour? That's what the "ECLIPSE PUMPER" does right along. Neither does its usefulness end there. The engine is easily disconnected from the pump and is all ready to turn the cream separator, run your grindstone or grind your feed, etc. The "ECLIPSE PUMPER" is a practical, guaranteed "Fairbanks-Morse Engine."

Every hardware dealer should carry them; and a letter to our nearest branch will bring you our catalogs and our special terms to agents.

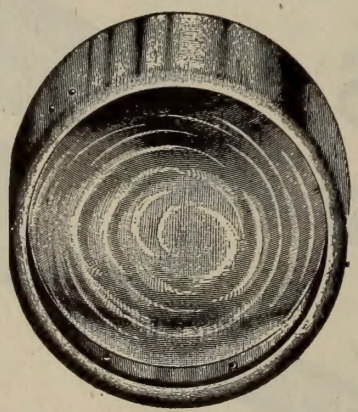
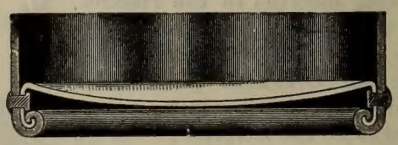
Montreal, Toronto, Winnipeg, Vancouver, Calgary, Saskatoon, St. John



S. M. P.
MILK CAN TRIMMINGS



COMPLETE SETS

Comprising one broad hoop roll-rim bottom, concave pattern; body hoop 6 inches wide, 20 gauge; top hoop 4 inches wide, 14 gauge; one cover; one pair malleable side handles; one pair steel top handles. If wanted with malleable top handles, 7 cts. per set extra list.

COMPLETE SETS

Gallons	10	15	20	25	30	40
Case Lots, sets	6	6	6	6	6	6

The roll-rim has no sharp turns, therefore the grain of the metal is not broken, and having a broad wearing surface on the bottom it cannot damage floors. Ample space is left between the bottom and the hoop for the insertion of the body of the can. It is the neatest and strongest in appearance and is supplied with concave bottoms. By examining the cut anyone can readly see that this style of construction makes it the strongest bottom ever produced. They do not cost any more than inferior bottoms. If you want to keep ahead of your competitors use S.M.P. Roll-rim Milk Can Bottoms.

THE ACME

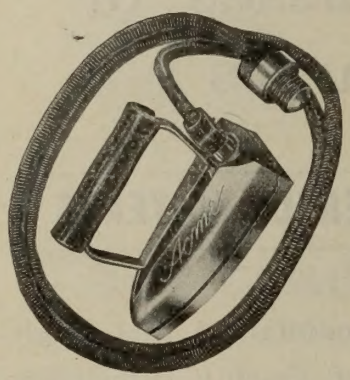
"Armored" Electric

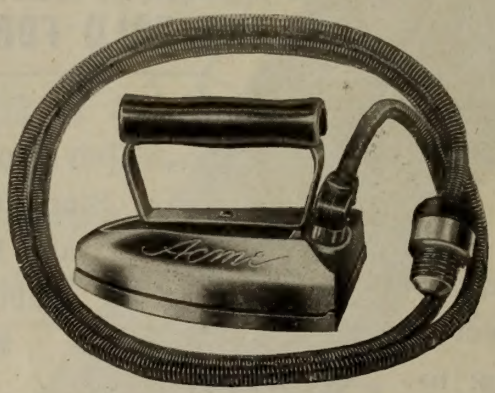
SAD IRONS

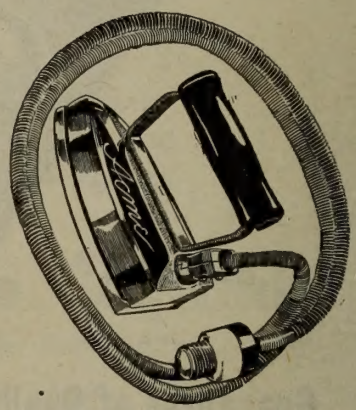
Perfectly Simple **The Best By Test** **Simply Perfect**

The "Acme"

when at the working temperature, will consume 500 Watts.







Investigate Before Buying

Write For Circulars

SPECIAL FEATURES

The handle carries a key which, when inserted through the top, locks the iron firmly together. It goes together and is taken apart by a twist of the wrist.

No Tools are necessary as there are **No Screws** used in the construction.

The heavily plated steel wire wound around the cord, protects it from wear, short bends or kinks. The cord inside the armor is the same grade that is used **Unprotected** on the most expensive irons.

Merchants---

Stock the "Acme" as they are the quickest irons made and are what the public are asking for. There is good money in this line. Send for a sample.

Note---

If the "Acme" costs no more than others, but is better than others, you certainly want it. How are you going to know if it is better? By reading other circulars first. Note what they claim are good features, and then compare what they have with the "Acme."

FROTHINGHAM & WORKMAN, LTD.

WHOLESALE HARDWARE AND METAL MERCHANTS

F.&W. MONTREAL - - CANADA F.&W.

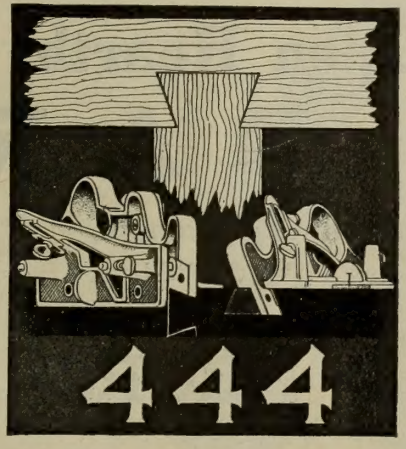
THE LATEST IS CAVERHILL LEARMONT & CO. FOR 1912

A DOVETAIL TONGUE and GROOVE PLANE

GROOVE.

The **No. 444** Plane will cut any Dovetail Groove where the width of the neck is more than one-quarter of an inch in width or where the depth of the groove is not more than three-quarters of an inch.

The design of the Plane takes care of the flare which is always twenty degrees, consequently the width of the bottom of the Groove does not have to be taken into consideration when one is laying out the work.



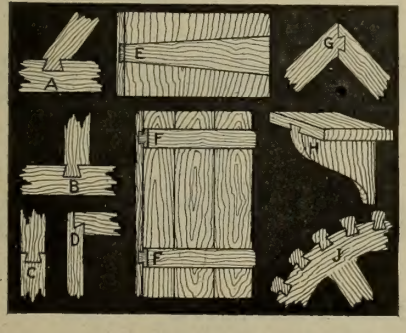
TONGUE.

The neck and depth dimensions of the Tongue are the same as those in the Groove. The two shoulders, however, may be of the same or different widths as desired up to five-eighths of an inch each.

Inasmuch as each side of both the Tongue and Groove are cut separately with the **No. 444** Plane, it is possible to make the sides of the joints either parallel or tapering.

SOME 444 WORK.

A Dovetail tongue and groove joint with the groove cut in the regular manner, and the tongue cut on a bevel, used for supports.



B Dovetail tongue and groove joint with unequal shoulders, or a joint with a regular groove, but where the tongue is offset.

C Dovetail tongue and groove joint as can very often be conveniently used when one is forming an end to end timber match.

D Dovetail tongue and groove half joint, frequently used by carpenters to a very great advantage in concealed nail work.

E Dovetail tongue and groove joint as applied to a flush key batten, where used in strengthening wide thin boards across the grain.

F Dovetail tongue and groove joint as it is very often used to construct a batten on doors made of several boards, etc.

G Dovetail tongue and groove joint where both the groove and tongue are cut on a beveled surface, making a strong corner.

H Dovetail tongue and groove joint shown in one of its most useful applications, that of a bracket supporting a shelf.

J Dovetail tongue and groove joint as applied to the setting of gear teeth around the outer rim of any gear pattern.

You cannot do better to increase your business among the carpenters than sell

THE COMPLETE SERVICE CANADIAN SCREW PLANT

What the Plant and its Product Means to you in Dollars for 1912

First, it means **Quality**. And just how we get quality the users of over 250 million Acme parts a year do not care. They know the parts fit the gage and they come back for more.

It means **Service** a little better than the ordinary. We will take your samples and drawings, figure you a cost and make the parts without delay. The machines are rapid and each job goes through as a unit. There is no waiting for the work ahead.

The Cost. Improved methods, enormous capacity and good factory system make it possible for us to offer you especially attractive prices on quantities of parts of a single size. All regular Cap and Sets Screws and Nuts carried in stock.

Now is the time for **you** to figure with us on a quantity basis and get our discounts. Give us a chance to prove the quality and service on your contract for 1912.

THE NATIONAL-ACME MANUFACTURING CO.

MONTREAL, St. Henri

Stanley Tools

This is a picture of our new Catalogue issued January 1st, 1912. It contains over 500 illustrations of STANLEY TOOLS, all of them made from new cuts and many showing new tools which our previous Catalogues did not contain. Among them are BREAST DRILLS, "JERSEY" VISES, and several new PLANES, as well as new lines of BIT BRACES, "ZIG ZAG" RULES and SCREW DRIVERS.

The method of showing the different lines of Tools in a condensed form, avoiding unnecessary repetition, at the same time more fully describing the various articles than in any previous Catalogue we have ever issued, is an original and valuable feature.

The different lines of tools are as far as possible listed in classes, and are so arranged that one opening of the book will show a complete line—an advantage we believe to both buyer and salesman.

It is 9½ inches wide by 11½ inches high—has a stiff board cover and is printed on a high grade of paper.

If you have not received same, we shall be pleased to forward one upon request.

STANDARD THE WORLD OVER

Stanley Rule & Level Co.

EVERY TOOL GUARANTEED

Are You Prepared to Handle the Spray Pump Trade?

RIGHT now, in your neighborhood, many of the more progressive fruit men are either overhauling their old spraying outfits or are preparing to buy new machines.

There will be more new sprayers purchased this year than ever before, because of the interest generated by the unusually high prices secured this year for sprayed fruit.

Our dealers and jobbers are stocking up, anticipating the biggest demand in their experience.

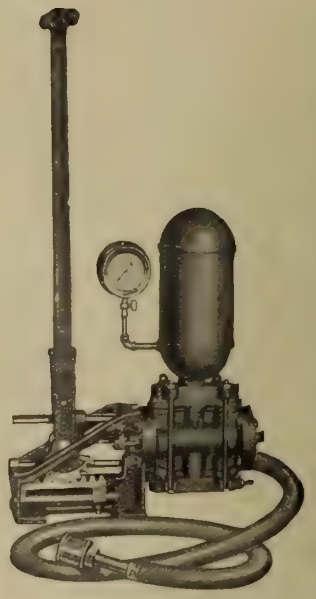

Fig. 763. Spray Pump. Can be operated by hand or by gasoline engine, according to the requirements of the user. Inexpensive.

Deming Sprayers

are made in 27 varieties—bucket, barrel, cart, knapsack, tank and power sprayers, also nozzles and other accessories.

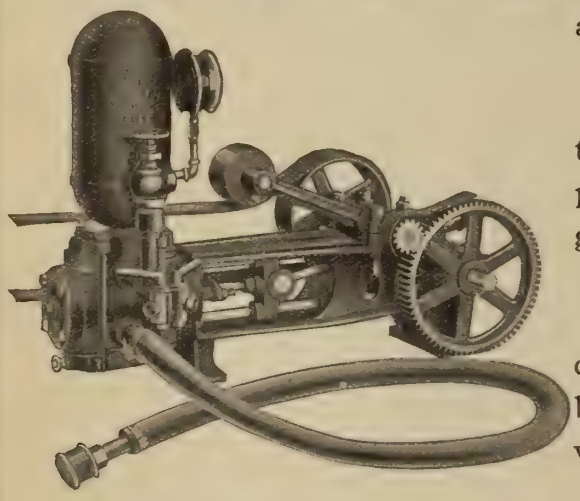

Fig. 765. Belt-Driven Spray Pump. Very powerful. Can be belted to any gasoline engine. Low priced.

So many farmers now own gasoline engines that there will be a heavy call for the belt-driven pump, Fig. 765—which can be belted to any gasoline engine.

We have a good proposition to make to dealers who expect to "look into" the sprayer business. Just tell us "I saw your ad in Hardware and Metal. Send full particulars."

Let us hear from you.

HUMIDITY and PROFIT

Under the above caption, "Hardware & Metal" of 23rd December published an article which is of vital interest to every Furnace dealer in these days of keen competition with Hot Water and Steam Heating propositions.

WHY NOT LEARN MORE ABOUT IT?

Dr. William F. Colbert, in an article in January "House & Garden" says: "In recent years the relative humidity of air in heated buildings has been the subject of lively discussion, but it is now accepted as a fact that the air in artificially heated buildings should be maintained at approximately the same percentage of relative humidity as the average percentage in the outdoor air. To do this it is necessary to use special air moistening apparatus. As usual, the school and corporation officials have been among the first to avail themselves of this knowledge. The experience of school and corporation officials points the way for the man building a house for himself and family, for he stands to profit by the saving in doctor's and druggist's bills in addition to the increased working efficiency of himself and his family."

Stewart W. Jameson, in his recent address before the Midland Club in Chicago, said: "Doctors tell us that a relative humidity of 60 or 65 per cent. is necessary to good healthful atmosphere. All our systems for residence work fail in this by a large per cent. The subject of humidity has been well discussed before this club. Many of you have thought as I would have done before I bought a couple of hygrometers, 'Oh, well, that doesn't apply to our heaters, we have a vapor pan.' But the hygrometer will tell you how far below normal your actual moisture falls. It is necessary for warm air furnaces, or any system, to supply more moisture to the heated air, and it is easier done with warm air than any other system of residence heating."

HERE IS YOUR OPPORTUNITY

Of course, we will tell you something about the "GOOD CHEER" WARM AIR FURNACE WITH CIRCLE WATERPAN, but our main object is to place in your hands the whole article on "Humidity in Living Rooms," written by Lillian S. Loveland, from which "Hardware & Metal" has quoted. Through the liberal use of the long distance phone and lettergrams we succeeded in securing several hundred copies of the magazine containing the article in question, and

We Have a Copy of the Magazine for You

The more sceptical you are on the subject of Humidity, the more pleased we shall be to hear from you.

Your request for a copy implies neither obligation nor expense, so fill in the coupon attached and mail it now.

It's mighty interesting reading.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. Today these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

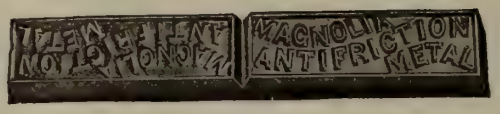
SAVES OIL



The writer of the following letter knows that every time an oil is used over again it loses some of its lubricating qualities, until finally it is entirely unfit for use.

We are trying to show Magnolia from a different view point in each monthly issue of our advertisements.

We have shown the **water test** by the U. S. Government; we also recently published a letter showing that Magnolia had been running sixteen years in a shaft bearing and of that time it **has run six years without a drop of lubrication** and it is still running.

We are able now to present a letter of recent date showing that the use of Magnolia effected a saving in oil of from one-third to one-half and we have quite a number of similar testimonials.

Magnolia Metal Co., New Athens, Ill.,

Gentlemen: Sept. 17th, 1911.

I have used Magnolia Metal for a good many years and I have never had a hot box or bearing and can say that it will outlast any other metal on the market to-day.

I have used from **1-3 to ½ less oil** where the Magnolia Metal has been used. I have **used the oil over and over again**, until it has been all used, without the least heating of bearing. I can safely recommend Magnolia Metal to all Engineers as the best and cheapest metal to use.

Respectfully,

JOHN J. JOHNSON, Engineer.

SOLD BY LEADING DEALERS EVERYWHERE OR BY

CAN WE HELP YOU

There are some hardware dealers living in this 20th Century who are still using 19th Century methods. They do not realize that Halifax is closer to Vancouver to-day than Montreal was to Toronto fifty years ago.

Twenty-five years ago it was a calamity for a merchant to lose a good clerk, for he knew it was practically impossible for him to get in touch with an experienced man. Such an idea as making a deal with a fellow hardware man a couple of hundred miles away either to buy a set of tinners' tools or to sell a second-hand counter or show case, did not seem practicable to even the most progressive hardware men. If a man wanted to sell his business he had to accept the highest price he could get from some one of his fellow townsmen, for no one else knew of the opportunity or had any means of finding out about it.

To-day the up-to-date dealer

CREATES HIS OPPORTUNITIES

He states his wants briefly in a "Hardware and Metal want ad." and in four days' time practically every hardware merchant, clerk, hardware manafacturer and traveler has read the proposition, and it seems reasonable that somewhere among the "blue noses" of the Maritimes or the pioneers of the boundless West someone will want just what he has to offer.

EVERY HARDWARE MERCHANT IN CANADA

can take advantage of our "want ad." page. Ask yourself:

Is there not some article I would be better without if I could get a fair price for it? If you cannot get a fair price for it by appealing to the trade throughout Canada you had better sell it for scrap

We can help you, but you must take the first step.

Surely it is worth 25c or 50c to find the one man in Canada whose wants dovetail into just what you have to offer.

RATES: *(payable in advance)* **2c per word first insertion. 1c per word subsequent insertions. Box Number, 5c additional each insertion.**

A Personal Chat With You About Ourselves

SOME INSIDE INFORMATION.

Twenty-three is not always an unlucky number. Hardware and Metal has just brought to a close the twenty-third year of its existence and celebrated it by making the biggest increase in revenue in its history.

The year 1912 promises even greater things as our staff is much stronger and more complete than it has ever been before.

For some years we have had in view the appointment of a British Columbia editor who would call personally on the hardware trade in that province, and also in those sections of Alberta and Saskatchewan not easily reached by our Winnipeg editor. The managing editor of one of the leading publications in British Columbia who is also familiar with the hardware trade, has resigned and will devote his whole time to calling on merchants in this extreme western part of Canada, and writing special articles on methods adopted by dealers in this section in which we already have 95 per cent. of the trade as regular subscribers.

H. C. Carson's series of articles on "Management of A Retail Business," which started in our December 30 issue, has already excited very favorable comment. Mr. Carson is an expert accountant and auditor who has had very wide experience in installing costs and book-keeping systems in businesses of all kinds. A prominent hardware jobber recently remarked that three-quarters of the failures and "near failures" amongst retail hardwaremen were due to lax methods of figuring costs and unsystematic methods of bookkeeping.

Our weekly market reports will continue to be as they always have been one of the strong features of the paper. When it is recalled that during the year 1912 turpentine reached the highest price mark ever recorded in Canada and then dropped almost to the lowest price on record, no further argument is needed to show that the market feature in itself makes our paper indispensable to every hardware dealer of any account in Canada.

We have now an editor in close touch with the trade in every section of Canada and there will be very few manufacturers and jobbers selling to the hardware trade who will not receive one or more calls from some one of our editors this year. They will not be able to make such a thorough canvass on the retail trade, but all classes of retail dealers will be called on, and they will comment on methods of the inefficient as well as the efficient. We feel it is only by keeping in close personal touch with manufacturers, jobbers and retailers, that we can make our paper of the most practical benefit to the trade.

The great growth and development of the MacLean Publishing Company, has necessitated some changes in touch with manufacturers, jobbers and retailers, that we the management. H. T. Hunter, who has been manager of HARDWARE AND METAL for over eight years, has been appointed Vice-President and General Manager of trade and technical papers. He will still be in close touch with HARDWARE AND METAL which will not therefore lose in any way the advantage of the experience and familiarity he has gained during the past decade with the hardware trade.

J. G. Lorriman, who has been editor has been appointed manager. Mr. Lorriman has had a wide experience with the Canadian hardware trade, first as traveler, then as sales and advertising manager of one of the largest sheet metal manufacturers in Canada. He spent three years as Montreal editor of HARDWARE AND METAL which brought him in close touch with the hardware trade in the east. As editor of the paper in Toronto, he has had an opportunity of studying conditions in Ontario and becoming familiar with leading hardware manufacturers, jobbers and retailers in this province. Mr. Lorriman is also a graduate of Toronto University.

T. B. Costain, who has been associate editor and who was for three years previous editor of the Guelph Evening Mercury, has been promoted to position of editor. Mr. Costain has been in training for this position for some time and can be counted on to give the trade some of the most practical articles they have ever read.

These changes and improvements and others we have in view, will make HARDWARE AND METAL in its field second to no trade newspaper in the world. It has to-day a more thorough paid circulation in its field than any other trade newspaper in America. We are determined to keep it in this position and according as our revenue increases will add new features which will make it even more closely read by all classes of the hardware trade and of course the more closely the paper is read the more valuable it becomes to its advertisers.

Next month a further announcement of interest to the trade will appear.

GOING TO MARKET.

In the early days of retailing in Canada it was customary for the hardware merchant to make one or two, or maybe four business trips a year to Toronto, Montreal, Winnipeg, or his nearest distributing centre. He would spend several days in visiting the manufacturers and wholesalers, looking through the sample rooms and placing his orders for the season. He called it "going to market."

This plan had its advantages, for it afforded the retailer three or four pleasant diversions during the year and gave him the opportunity of knowing personally the heads of the firms with whom he was doing business. But it also had its drawbacks. It encouraged heavy buying at infrequent intervals, which is no longer considered good business. And it narrowed the dealers' sources of supply.

There is a better way of "going to market' nowadays, and the opportunity comes fifty-two times during the year. It consists in studying the advertising pages of Hardware and Metal, which are always replete with ideas for buyers.

The majority of our advertisers change their copy every week and their space is always devoted to timely announcements and suggestions. In fact, the advertisements are really news of the utmost importance to every alert hardware buyer. Clerks will also find that Hardware and Metal's advertising pages can keep them thoroughly posted on the best talking points to use when making sales.

Good buying does not necessarily mean haggling over prices though, of course, it is important that the dealer should get his goods at a figure which will allow of a reasonable profit. But it is of far greater moment that the buyer should make a study of the entire field so as to know thoroughly the various sources of supply, and the merits of all the hardware lines on the market.

Making an Attractive Trim in Limited Space

No Need for Dealers to Despair of Accomplishing This—C. F. Ready Dressed a Fine Christmas Window Behind Glass Only Five Feet Wide—More Ingenuity is Necessary Than in Larger Windows, But the Results May be Well Nigh as Attractive—Taking Pictures of Trims by Electric Light.

Smith's Falls, Ontario.—Dealers there are who refuse to take an active interest in window dressing because they state the front of their stores are not suitable for this—they have not great expanses of glass behind which a wide variety of tasteful and attractive trims may be made.

These men are at a disadvantage. This cannot be gainsayed. It is impossible to do as much behind 30 square feet of glass as behind 80 square feet. But the smaller window offers greater opportunities to the window dresser in one sense. It enables him to use more ingenuity. It enables him to scheme and plan so that he may turn out an attractive trim in spite of his handicap.

Overcoming the Difficulty.

An example of what may be done in a small window is given by R. Hawkins, one of the local dealers. Mr. Hawkins appreciates a good trim for he has seen the results it brings. C. F. Ready, Mr. Hawkins' head clerk, knows the value of a window too, and he moreover takes a keen delight in arranging one. Therefore he has not given up because the glass area which he finds available is not large. He goes ahead and makes the best of this—and a mighty good best it is—a best which will cause those who have been doing nothing because their windows are small to feel, perhaps, smaller even than the windows

Cost Was Little Over a Dollar.

For Christmas Mr. Ready wanted to arrange a suitable trim, and after talking it over with Mr. Hawkins determined that it would be best to use in the display, cutlery, silverware and electrical goods. This settled it was next necessary to plan how these were to be shown, and Mr. Ready hit upon the scheme shown in the accompanying cut. Out of common packing boxes he arranged a platform with a pillar at each end. He bought black cloth, costing in all $1.25 to drape this, and then arranged the cutlery, the silverware, the lights and other electrical fixtures in a manner which made what the French would call a splendid "tout ensemble."

The $1.25, by the way, was the full cost of arranging this window. There was no other expenditure—except of time and brains. A cheap ad. at $1.25, an ad. that brought results despite the fact that the window was only five feet wide and three feet deep.

Overcoming the Shadows.

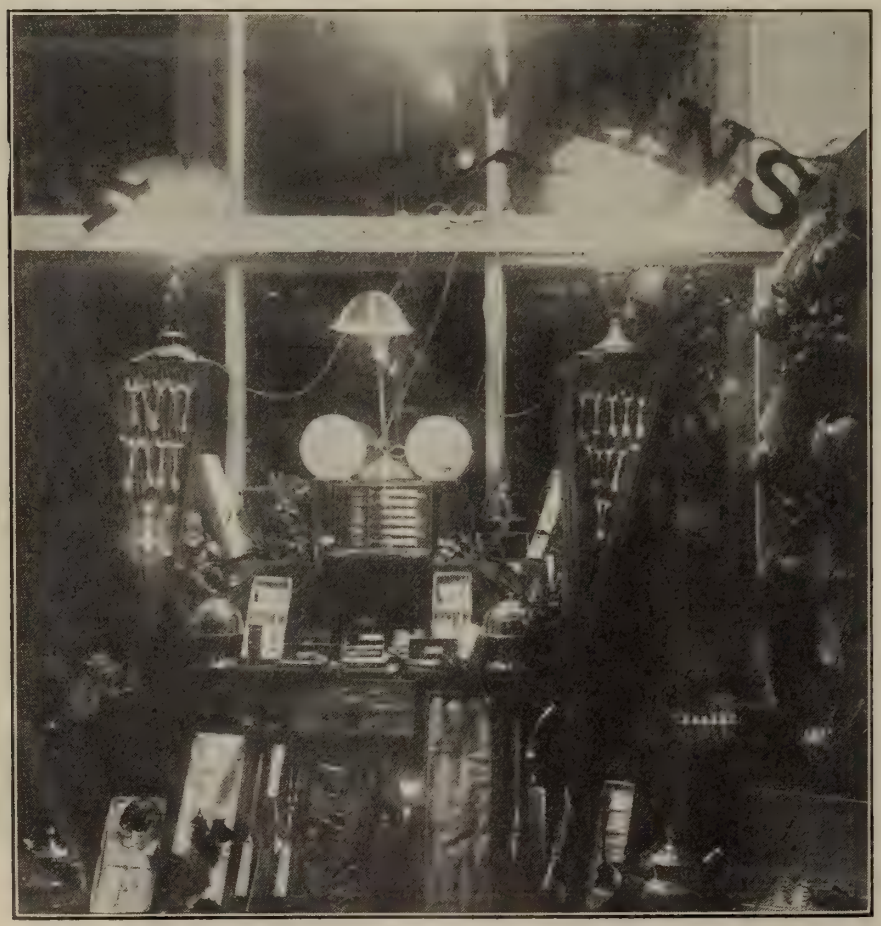
The picture, from which the accompanying cut was made is deserving of a word, for it shows a way out of a difficulty which many hardwaremen have thought insurmountable.

"I would like to have a picture taken of that window," a dealer will remark, "but the shadow from the buildings across the street makes that impossible. I have tried, and we have got nothing but reflections."

This picture was taken by electric light, which removed the danger of reflections. In all 640 candle powers were used while the exposure was being

ONE DIFFICULTY SOLVED.

The reason why many hardware dealers take no interest in the question of up-to-date window dressing is that they feel it to be beyond them. Their store windows are small and the cramped space within appears, at first glance, to veto any efforts at attractive window trimming. The objection, nevertheless, does not hold good. Some of the best hardware windows during the past season were arranged in most limited space. Hardware and Metal has described some of them recently and another one is illustrated in the accompanying article. May the lesson be driven home that any sized window can be converted into a strong factor in improving the store business. —Editor.



Picture of R. Hawkins' Christmas Window, Smith's Falls. Notice the wide variety of goods displayed in the limited space—and all without overcrowding.

made. For sixteen minutes the camera lense was opened before the window. Then the shutter was closed, and another big light was turned on, an additional four minute exposure then being made. The photographer was afraid that this last big light would cause such helation as would spoil the picture; he therefore arranged to have it burning only a part of the time.

Wise to Take Pictures.

By means such as these good pictures of practically any window may be secured. The pictures are worth while, for not only may they be used on circulars for advertising purposes, or to accompany newspaper advertisements, but they also encourage the window dresser. When a particularly good trim is secured it is good policy to have a picture of it taken.

This particular proof was used in a novel form of advertising, a lantern slide being made from it which enabled the window to be thrown upon the canvas at a moving picture theatre.

Sub-Executive Lay Plans for Convention

Programme at Guelph will be Modeled on Former Lines—Progressive Euchre Party will be held on Last Night—No Window Contest This Year—Exhibit Spaces Well Taken Up.

Toronto, December 29.—A meeting of the sub-executive committee of the Ontario Retail Hardware and Stove Dealers' Association was held here to-day to discuss plans for the convention next month at Guelph. Those present were president Chown, of Belleville; second vice-president Occomore, of Guelph; secretary Wrigley, of Toronto, and treasurer Caslor of Toronto. The programme was pretty well mapped out and arrangements were completed. The conclusions reached will be embodied in a letter and sent to the other members of the executive. If their approval is obtained, the work will then be proceeded with and the cost of a full executive meeting obviated.

Spaces Taken Up.

It was reported that, of the 110 spaces for rent in the manufacturers exhibit, 100 had already been taken up. There is every probability that the remainder will be taken. This insures a larger exhibit than the one last year at Peterboro. The accommodation in the Winter Fair building at Guelph is particularly well suited for exhibition purposes.

The Programme.

The programme proper of the convention will not differ in any radical degree from that of last year. The time during the regular convention sessions will be divided up in much the same way. It is intended to allow more time, if possible for the discussion of important topics.

One afternoon will be set aside for an open meeting. Manufacturers, jobbers and travelers will then have an opportunity of joining in the discussions in conjunction with the retail members. The topics taken up at that session will be largely of a general nature, embracing the relations of retailer to traveler and manufacturer. Some interesting debates are promised.

The Question Box session will be held in the evening as at Peterboro. Steps will be taken to get in a set of live questions for debate.

A Euchre Party.

The only real change in the programme is the decision to hold a progressive euchre party on the last night of the convention. This will take the place of the concert held last year and the banquets of previous years. It will be held in the city hall.

No Window Contest.

From the present outlook, there will be no window contest. The officers feel that the facilities in the city are not sufficient to make the contest spirited and for that reason they felt impelled to reach some other arrangement. It was decided to get W. J. Illsey, of Winnipeg, to attend the meeting and give a lecture on window dressing and practical demonstrations on the same subject. Just what part of the week this will take up has not yet been decided.

Topics to Be Introduced.

A number of live topics are to be introduced at the convention.

Parcels post will undoubtedly occupy considerable attention and it is highly probable that the association will take a firm stand on this matter.

The "Offensive Weapons Act," mutual fire insurance and other subjects of equal prominence will engage the attention of the members.

Good Accommodation.

The accommodation will be good so far as the Winter Fair building is concerned. Since it was decided to hold the convention at Guelph, the building has been enlarged. Free use is also allowed of the city hall which adjoins the fair building.

The hotel accommodation is also good. Guelph has had years of experience in handling the immense crowds which attend the Winter Fair and should be able to house the hardwaremen satisfactorily.

Hardwaremen in the Elections

Hardwaremen figured in the municipal elections to a large extent this year. The trade was represented in practically every election and a good percentage won their way into the winning column. The following list comprises some of the successful candidates:

In Toronto, F. McBrien headed the polls in Ward 6. Although a young man, Ald. McBrien has had quite a little municipal experience, and the size of his vote indicated the confidence that is placed in him by the electors. He received the largest vote for alderman in the city.

In Ward 2, Toronto, R. M. Yeomans, a master plumber, was elected as alderman.

Fred Chalcraft, of the Brantford Roofing Co., was elected as alderman in Brantford.

Edward J. Wanless, hardwareman, of Chatham, was elected as alderman well to the head of the poll.

A. D. Westman, a former hardwareman, was also elected as alderman in Chatham.

Fred W. Otton was elected as a member of the Board of Education in Barrie.

In Bracebridge, two hardwaremen were well to the front. G. W. Ecclestone was elected as mayor by acclamation, and Jas. Whitten was well to the head of the aldermanic poll.

S. Adolph, of Listowel, headed the poll for councillors.

M. S. Madole was elected alderman in Napanee. He headed the poll.

J. H. Christie was elected as reeve at Owen Sound.

D. Brocklebank was elected reeve at Arthur.

The trade was well represented in the Guelph elections. Sam Pinfold and Harry Occomore, hardwaremen, were elected as aldermen. A place was also secured on the municipal board by Harry Mahoney, master plumber.

A NOVEL GREETING.

A novel "credit memorandum" has been sent out by the Simonds Manufacturing Co. It reads:

Dear Sir,—We have this day credited your account as follows: For orders given to our several houses and salesmen, and for your good will, we thank you. May you live long and prosper. Simonds Canada Saw Co.

PUBLISHED EVERY SATURDAY.

A COMPREHENSIVE REVIEW.

It has been the custom of this paper each year to secure first hand information from Canadian manufacturers and wholesalers as to the condition of trade, particularly in regard to hardware. In pursuance of this custom an effort has been made during the past two weeks to glean information from all reliable sources as to business conditions during the past year and the prospects for the future. An article based on the information thus secured appears in this issue and subsequent articles, dealing with the subject, may appear in succeeding issues. It is felt that, with the facts which have been secured from the heads of the best firms in all lines of manufacture, we are in a position to speak authoritatively as to the results of last year's trade and the prospects for the twelve months ahead.

A significant result of the investigation conducted by this paper was that not one firm heard from failed to speak in laudatory terms of the business of the past year. In every case, also, fullest confidence was expressed with reference to the future. Not a single dissentient note was voiced. What surer indication could there be of the great prosperity which has manifested itself in every province of this great Dominion?

The consensus of opinion was that the greatest increase in business had been felt in the West. This opinion was not unanimous, however. One firm declared that it had found the east yielding a more permanent advance. All others conceded that the east had kept step and that the improvement in business was by no means local or provincial; that, on the contrary, prosperity seemed to be the prevailing condition in all sections.

HINTS ON STOCK-TAKING.

Readers will agree after carefully perusing the article by H. C. Carson in this issue, that the new series of talks on business management is going to prove a valuable and practical feature of Hardware and Metal. Mr. Carson gives advice on the making of the annual inventory which is worthy of closest consideration.

There can be no doubt that the inventory is often taken in a very loose and slipshod manner. Part of the work is, perhaps, entrusted to junior members of the staff whose chief consideration is to get their share of so laborious and undertaking done. Errors creep in and no particular pretense is made at thoroughness. Frequently also an effort is made to rush the work through in as short a time as possible and in this way again thoroughness is sacrificed to expediency. In such cases it is impossible to get anything like accurate totals and it is doubtful if any real good is accomplished.

Mr. Carson urges the necessity of doing everything as systematically as possible, in order to arrive at a fair valuation of the stock carried and to preclude all chance of disputes in case of fire, sale or other change. He likewise goes into detail with reference to methods of compilation, valuation, etc. What methods do you, Mr. Hardware Dealer, pursue? Are you thoroughly satisfied with your old system of valuing stock and making up stock lists? If not, you will glean much valuable information from the article in question. Read it closely in any case.

TIN AND ITS OPPORTUNITIES.

In the last few days tin has dropped in price remarkably. In the week the total decline has been £15, and buyers are wondering if the end is yet. That there will be a rapid rise, after the present slump has run its course, none doubt. They all accept this as a good time to buy, and are therefore only trying to buy at the lowest possible figure.

It is a ticklish subject, especially when tin is in question, but the opinion of one handler is worth quoting. "I have orderel 10 tons for immediate shipment and 10 tons for future," he said, "There may be a still further drop, but I do not intend to run too great a risk. Tin has now dropped £15. I think it is certain to rise at least to the old level so I would make a good profit buying now."

The argument seems sound. How often have the smaller buyers been cut out of all profit which such fluctuations as the present offer simply by wanting too much? It would be better to buy at a low level—even if not the lowest—and to sell at a high, than not to buy and sell at all. That motto which says all things come to him who waits, does not refer to operations in tin.

RECORD BREAKING CONTEST.

As expected, Hardware and Metal's annual Christmas window contest proved a record breaker. More contestants entered than ever before and the displays were, we believe, on a highr scale than in any previous year. The judging will take some little time and it will not be possible to announce the results for two weeks yet. It has been decided to select three well-known retail hardwaremen, one in Montreal, one in Winnipeg and one in Toronto, to act as judges and it will be necessary, therefore, to send all photographs received to each of the three men. We therefore crave the indulgence of the contestants, who will doubtless be anxious to hear the result, for the time required to put this system of judging into effect. The results will justify the delay.

INSURING THE INSURANCE.

"What's the use," ask some dealers. "What's the use of taking stock? I know practically everything I have on my shelves. My stock is not exceedingly large like that of some dealers in the big cities. What is the use, therefore, of me taking stock every year?"

Many reasons have already been given which should make this man—and he may still be considered as

plural—wake up. But an incident has just occurred which brings home once more the need of an annual inventory, no matter how small the stock carried.

After a recent fire, in which more than one merchant suffered, the insurance appraisers did their work. Then the policies were paid to all but one man. He had no statement to show what his stock had been. He had not taken stock for eight years. Because of this he was kept waiting. The other merchants could make their plans for the future. The one who for eight years had wondered what was the use of his contemporary's wasting so much energy stock-taking, was unable to make any definite plans. He was held up by the Insurance companies, who themeselves were held up because of his neglect.

"What's the use?" ask some dealers. Well, what's the use of insuring? If a stock is valuable enough to make insuring worth while then stock-taking is worth while to insure the insurance.

HOTEL ACCOMMODATION.

Complaint is loudly voiced by the Commercial Travelers' Association of Canada on the score of hotel accommodation, particularly in Ontario. It has been decided to send in a petition to the Ontario Government demanding that something be done to bring hotel accommodation in all districts up to a certain standard. They are prepared for all contingencies. If the petition is disregarded, the commercial men will demand a Royal Commission to investigate hotel conditions and may even go to the length of marching in a body to the Parliament buildings to voice their claims.

The traveling man has full reason to complain on this score. The discomforts of life on the road can only be appreciated by one who has tried it. Damp beds, poorly ventilated rooms and insufficient, poorly-cooked meals are the traveler's almost daily portion. Not even in the largest of metropolitan hotels has it been found possible to give absolute satisfaction, but when it comes down to the average country hostelry, the kind of service given is indeed execrable. The traveling man frequently has to pay high rates for accommodation of the most meagre kind.

It is indeed time that something was done to insure comfort and health to that highly useful and necessary member of society, the traveling salesman. Just what steps should be taken would rest with the provincial authorities. The question is one which merits the earnest consideration of the heads of license administration.

CO-OPERATION TO CREATE DEMAND.

Every now and then a croaker arises to remark that, "things are not what they once were." In hardware practically every dealer will admit this, but not in the sense the croaker meant. Things are not what they once were. They are better. The business has become more far-reaching. This necessitates greater effort, greater initiative, greater brains, but it means also greater profits.

It appears the manufacturer and the retailer must work together to get the best results. Take the remark of a Port Hope dealer to illustrate this. "Six or seven years ago," he said, "We had to carry about 5,000 lines. Now I have about 23,000 and my stock is not complete. I hate the new lines," he added, "there is profit in them but they require too much missionary work."

This missionary work, of course, is hard to avoid. New lines do mean hard work, but they mean also hard cash. The question, therefore, is not how to obviate the educational work, but how to make it profitable. Undoubtedly one of the best methods is for the manufacturer to supply the retailer with such literature as will enable him intelligently to advertise his goods. The average dealer is only too willing to put forth effort to create a demand for a new line, but he must have the knowledge which enables him to do this.

A new article is an asset to a wide-awake retailer. Those who make a specialty of tools say they can always sell a new pattern. But they must be ready to tell the mechanics of its peculiar use. It is so with goods of other styles, and so the manufacturer, to help himself, must help the retailer.

POINTED EDITORIALS.

Insure your insurance.

* * *

There was a good sprinkling of hardwaremen among the candidates aspiring to municipal office this year. A majority of them were successful.

* * *

The upward movement in turpentine has started on the primary markets. The spectacular performance of last year will not be repeated, however.

* * *

H. C. Carson gives some pointed and valuable advice in this issue on the matter of stock-taking. No reader should neglect to peruse his article carefully.

* * *

Some lines of paint specialties could be sold more readily during the winter than at any other time of year. But how many dealers accomplish this?

* * *

Hardware and Metal is starting the new year right. It begins the year in a new dress and with more advertising and better editorial matter than ever before.

* * *

The commercial travelers may march en masse to Queen's Park to demand that better hotel accommodation be provided. This is borrowing a leaf from the book of the suffragettes.

* * *

Why share in the financial worries of all your customers? Why strive to reach the goal? Profit by the hard and winding road of Credit when the shortcut Cash is both easy and sure to travel?

* * *

It should not be necessary to prove prosperity in this day of world-wide progress. Prosperity should be taken for granted. With civilization making such strides, any setbacks must necessarily be temporary and must result, either from trepidation or rash overconfidence.

* * *

Can belief in the future be carried too far? We do not think so. Rather, one is inclined to doubt if man in his most extravagant flights of fancy has ever succeeded in realizing the illimitable possibilities of succeeding centuries. When the most sleepy of nations, China, rouses itself from the sloth of ages and progresses from absolutism to democracy in a few years, can one afford to doubt any development, no matter how remote? Truly, "the world do move."

Past Year Was Marked by General Prosperity

Information Secured From Prominent Canadian Manufacturers Leaves no Doubt on That Score—Big Increases Were Registered, the West Contributing Large Share—General Optimism Felt as to the Future.

In pursuance of annual custom, Hardware and Metal has made a thorough investigation into business conditions in Canada during the past year. In order to secure full and authoritative information in this matter, a majority of the best known manufacturers and wholesalers have been approached and the opinions secured in this way, when considered together, give a clear conception of the conditions as they have actually existed.

It has not been a hard task to arrive at a conclusion from the evidence secured. Everything has pointed the one way. It is convincingly evident from the unvarying optimism of the replies received that Canada has emerged from a year of general and broad prosperity and is entering a period of even greater promise. There are no dissenters on either point. No industry has failed to reap its share of the prosperity that 1911 carried in its wake, and there are none who fail to estimate the future as full of the promise of unabated and complete activity. When it is considered that business men are prone to judge the future with a conservative eye and to express opinions in guarded terms, the confidence now so openly voiced can be accepted as significant of the fact that there is no cloud on the business horizon of Canada.

A Prosperous Year.

The first point on which information was secured, "How have you found conditions in your field in Canada during 1911," has brought a harvest of replies couched pretty much in the same terms. Some content themselves with the laconic but highly expressive answer, "never better." Others go into details. Space does not permit of all the replies being quoted. A quotation here and there from a few of the replies will suffice.

"The year 1911 has certainly been the most prosperous year we have ever experienced," stated the Canadian Fairbanks-Morse Co., Montreal. Our business has increased very largely in every section of the country."

The Pease Foundry Co., Toronto, report that "the volume of trade, especially fall trade, is larger than ever before."

The Gillette Safety Razor Co., Montreal, state that "the volume of trade compared with other years has shown a large increase and is greater, in proportion, than the business experienced by our home country in the States."

The International Varnish Co., Toronto, state that "our trade during the year 1911 in Canada has been very satisfactory. Our volume of business has increased largely over previous years."

The opinions cited have been gleaned from different fields and branches of industry and can be accepted as truly representative of opinion on that point.

Where Was the Increase?

In what part of the Dominion was the biggest increase felt?

Information on this point is not varied to any extent. Nine out of every ten firms, who have replied, state that the West has provided the biggest advance in business. It is conceded, however, that the east has done surprisingly well.

There are some firms who disagree with the general verdict. One firm replies to the following effect: "Our feeling is that, taking it all in all, the progress in the east has been a little greater than in the West, and that conditions there are a little more substantial than they are further West." Others assert that they found their best increase in Ontario; and in each case the firm thus replying has a business that embraces the whole of the Dominion in its scope.

It seems reasonable to adduce from this that, while the ratio of advance has been larger in the West, the East has kept pace pretty well and that the improvement in business has been general. The facts point a moral, however, for the manufacturer who has been inclined to neglect the opportunity of expanding to meet the Western demand. The business done in that section has been so phenomenally large that none can fail to grasp the great possibilities of the field.

Export Trade.

Has your export trade shown improvement during the year? was another question asked. From the replies received, one is forced to the conclusion that the Canadian hardware manufacturer is, as a general rule, too busy supplying the demands of the home market to seek wider markets abroad. There is, however, a growing tendency to cater to outside demand and some companies report that their export trade showed a substantial increase during the past year. The Gillette Safety Razor Co. state that "our export trade to New Zealand, Australia, and in fact, all of the Australasian ports, has shown a marked increase."

The condition which obtains pretty generally is summed up in a statement from the Toronto Silver Plate Co.: "The fact of the matter is that our home market trade has been so unusually large that we have rather been neglecting export trade, any orders for same being orders received by mail."

Prospects for Next Year.

Complete unanimity is shown on the score of the prospects for the coming year's business. The future looks roseate to all our correspondents. Opinions are expressed with few reservations. There are tangible evidences at hand of the confidence that manufacturers place in the future—new plants in course of erection, extensions, improvements of plant and product.

One firm states: "We anticipate an unusually large volume of business for 1912. It is usual for this company to shut down at the end of the year for stock taking, etc., but new orders have been coming in so freely that up to the time of writing only part of our factory is shut down. This speaks for itself." A paint company says: "In our judgment the outlook for the coming year is very encouraging."

A hardware specialty manufacturer says: "The prospects for the coming year are very bright indeed. We are able to speak with the greatest confidence regarding this as we have already booked and, in fact, shipped considerable goods. We find that the individual orders are larger than last year."

One manufacturer speaks with even greater enthusiasm:—

> "Our opinion as to the outlook for the coming year is that general trades, particularly those of the hardware and metal lines, and more particularly the building lines, will find that 1912 will represent an increase entirely unexpected. Others may not agree to this, but we, having a finger on the pulse of the consumer in general, feel quite assured that the coming year will exceed all expectations. In order to cope with the anticipated business, our company has seen fit to invest some $250,000 in a new manufacturing building, which is an indication of our faith in the coming prosperity of Canada."

Space does not permit further reference at this writing but we hope to quote further opinions from Canadian manufacturers in succeeding issues.

The Management of a Retail Business

No. 2—Stocktaking—Continued

By H. C. Carson, F.S.S.

It is unnecessary, and it would be useless, to attempt to set down any hard and fast rules of method in taking stock. The object to be attained is, of course, the same in all cases, but a certain plan might be adaptable to one class of business, and yet prove totally unsuited to some others. In no case, however, should the work be delegated to under-clerks, and, when possible, it should be undertaken by those highest in responsibility. This point would receive special emphasis in the event of an auditor being called in to make a report, or in settlement of a fire claim should such an occasion unfortunately arise. Nor should any old, half-used book be requisitioned in which to make the stock record. Suitable stock sheets, prepared for the purpose, may be obtained, at little cost, from almost any commercial stationer, and the use of these will serve to facilitate an intelligent classification of the stock, which is most desirable, though often overlooked. The use of ordinary lead pencil in making the record should be strongly discouraged. It presents too many opportunities for after-manipulations, and detracts from the permanent value of the document. Fountain pens are cheap now, and obviate former objections to ink, on the score of inconvenience, but failing ink, pencils that are indelible should be resorted to. When the stocktaking has been completed, the sheets should be arranged in classified sequence, then numbered consecutively, and locked in a binder procured for the purpose. The next step is to ascertain the value of the stock, and this should be carefully done, and just as carefully checked. The total of one sheet should not be carried forward to the next, and so on, until the grand total is made to appear at the foot of the last sheet. Such custom not only causes loss of time, but in the event of an error being found later, necessitates the correction of all the sheets following the error. The better plan is to bring the total of each sheet forward to a recapitulation sheet, each total being identified by the sheet number and the class of merchandise listed. The total of the recapitulation sheet will, of course, represent the total value of the stock, and should be certified correct, as to totals. Eacn individual sheet should likewise be signed as to calling out the stock, taking it down, inserting the prices and extending the values. None of these suggestions would entail any difficulty or hardship, and their adoption would not only prove a satisfaction to the owner whose desire is to ascertain his true position, but would enhance the credibility of the work in the eyes of the bank and creditors, and the auditor and fire underwriters as well.

The Value of the Stock.

It is appropriate to discuss here the principle that should be followed in pricing the stock. Opinions vary, somewhat, some claiming that market value should be taken, irrespective of cost, while others contend that the reverse process is the more correct. The writer adheres to the latter system for the reason that no matter how market values may fluctuate, neither profit nor loss can be determined prior to sale. A merchant with say 100,000 yards of cotton goods on hand, might feel tempted to take advantage of a rise of a cent per yard in market value, for that would mean an advance of $1,000 in the value of his stock. But if he shows the profit or rather gain, in this year's business, and prior to the sale of the goods, it follows that next year's business, during which the goods would be sold, would be deprived of its legitimate profit. Supposing further, that the market on these same cotton goods declined a cent per yard after January 1st, it likewise follows that the new year's business would be saddled with a loss of $1,000 at one stroke, and without the semblance of justification. There can be no question that as a general rule and under ordinary circumstances, actual cost, less an allowance for depreciation through shopwear or other causes, if such exist, should govern in the valuation of stock on hand.

What Constitutes Cost.

But what constitutes actual cost, is sometimes asked? In the opinion of the writer, the invoice of purchase, after deducting trade discount if any, and adding cost of freight, and drayage charges, would show the actual cost of goods. Discounts secured for cash should not be deducted from the cost, nor should railway charges for demurrage be added. The one is a reward earned through diligence, and the other a penalty suffered through negligence, and both constitute items of the current profit and loss account. Packing charges, which, in the case of chinaware or glassware, for instance, amounts to a serious item, are, of course, included in the invoice and form a legitimate part of the actual cost, but the cost of unpacking, if any, or of warehousing, have no proper place in the cost, and should be charged direct to the profit and loss account. Shortages and breakages, if not recovered from the shipper, should also be debited to profit and loss, and not to the cost of the remaining goods as is often done. It has been claimed by some authorities, and not without some show of reason and equity, that the cost of the buying department should be charged to the cost of the goods purchased, on the ground that economies are effected thereby, and the goods placed on the shelves at a lower cost than they otherwise would. The writer fails to see the conclusiveness of the argument, however, because, if lower prices are obtained then longer profits are made possible, and the profits should therefore bear the burden.

An Equipment Inventory.

With reference to fixtures and equipment, these should never be joined to the merchandise stocks, as is sometimes done. A separate inventory should be taken, and at a valuation, annually depreciated, until they reach a figure that would entail no loss in the event of realization of assets..

Bills Receivable and Payable.

The next talk will deal with bills and accounts, receivable and payable, and other assets and liabilities that usually find a place in the average balance sheet. Before closing this talk, however, it might not be amiss to suggest an easy method for ascertaining the value of goods purchased by the gross, with only the gross price available. The writer happened to enter a drug store one day and found a clerk laboring over the cost each of a stock of tooth brushes which had cost varying prices per gross. Here was his process:—Divide the gross price by 144 to ascertain the cost each, then multiply by the number of brushes to find the cost. For instance 9 brushes at $20. $20.00 ÷ 144 = 13 8-9 cents each. 13 8-9 × 9 = $1.25, cost of 9 brushes. A tedious process this, and likely to exhaust the patience and ruffle the temper of any stocktaker, if much of it had to be done. The following method is much simpler, and though not mathematically accurate, is sufficiently exact for all purposes—seven times 144 equals slightly over 1,000, therefore seven times the price per gross, divided by 1,000, equals the cost each. Seven times $20.00=$140.00. Move the deci-

mal to the left three more places, to divide by 1,000, and we have .140 or 14 cents each and $1.26, the cost of 9. The difference is so fractional as to be inconsequential, and the method involves only a slight mental effort. There are many quick methods of figuring, reference to which will be made from time to time in the course of these talks, and all of which will prove helpful in reducing the labor incident to the transaction of business.

Travelers Demand Better Hotel Accommodation

Will Present Petition to Ontario Government Signed by 8,000 Travelers—If that Fails Will Demand a Royal Commission—Election of Officers held.

Toronto, Dec. 29.—The annual meeting of the Commercial Travelers' Association of Canada, was held last evening in St. George's Hall. There was a large attendance and a number of matters of most vital importance were discussed. The chief interest hinged on the discussion of ways and means to improve the hotel accommodation throughout the country.

It was decided to put a petition in circulation calling on the Ontario Government to take some steps in this matter. It will be signed by nearly 8,000 commercial travelers, and will be presented to Hon. W. J. Hanna, provincial secretary, just as soon as the signatures can be obtained.

James Summers made the suggestion that the members get together and march in a body to the Parliament Buildings to make their demand for improved conditions. He felt that by doing so, they would be able to impress the Government with the necessity of action.

May Demand Commission.

A resolution was adopted that, should the petition be ignored as in the past, the members of the Commercial Travelers' Association demand that a Royal Commission be appointed to investigate hotel conditions and suggest steps for the protection of the health and lives of the traveling public in all municipalities, whether under local option or not.

The resolution was adopted unanimously, and it was quite evident from the discussion that traveling men feel very strongly on the matter. Better accommodation is a crying need.

W. H. Scott pointed out that the Government should adopt either of two policies. The hotels should be licensed and controlled direct by the Government, in which case it would be possible to insist on proper accommodation being given. The other course would be to pass legislation, which would make it necessary for all municipalities under local option to provide for the accommodation of the traveling public.

Officers Elected.

Officers were elected for the ensuing year as follows:—

President—Robt. Gemmell.

First Vice-President—S. Stirling.

Second Vice-President — James G. Cane.

Secretary—James Sargent.

Treasurer—E. Fielding.

Drummers Enjoy Song, Speech and Story

Snack Club Holds Annual Christmas Holiday Dinner—About Fifty in Attendance—President Geo. Smye the Toastmaster—Some of the Incidents.

ONCE upon a time— but before the stories begin it is necessary to say they were told by members of The Drummers' Snack. The occasion was their annual dinner at the Walker House, Toronto, last Friday evening. No further introduction is needed to express the intimation that there was a good time, not coming, but then and there.

* * *

William Algie, of Alton hamlet—"The Father of the Club"—is responsible for this appropriate 1911 yarn. Morning after the 21st—the September equinox, as he put it—Michael and Patrick met. Mike said to Pat: "Michael, did you vote aginst riciprocity?" "No," returned Patrick, "shure an' I did not." "Well, be jabers," said Michael, "somebody did."

Michael Malone spoke to the toast, "Manufacturing and Commercial Interests," and touched upon some important national questions, such as technical education, which he strongly favored, Canada's natural resources and her possibilities. "Make technical education as thorough and broadcast as the collection of taxes," he said, and that means it will have to be pretty thorough.

* * *

J. A. Willoughby, of Georgetown, Ont., the home secretary of the great and only annual Drummers' Snack outing, was there, and extended to the boys an advance welcome on their 1912 visit.

* * *

Here is another from Wm. Algie's story book: If our memory serves us right, it was about a Scotchman traveling from Edinburgh to Inverness. He handed some money through the wicket to a ticket clerk, who on passing back the piece of pasteboard, ventured the following information: "Change at Aberdeen." "No, sir," replied the traveler," eef you don't min' I'll tak' my change noo."

* * *

Charley Silver responded to toast to the Drummers' Snack Club. As he had been elected to the board of the Commercial Travelers' Association during the week, he was naturally quite elated and profusely thanked the Snack Club for their assistance. M. Matthews championed the cause of the ladies.

* * *

Speaking of talent among the drummers, one must not overlook Table 2. where the bagpipe band, led by Charley Smye, furnished fightin' music. Jack Wildfong and Geo. Campbell did parts of the skirlin'.

* * *

When Jack Wildfong's name was called for a song some decided to leave the room under the leadership of Sol Walters. But when Mr. Wildfong announced a recitation it was different. Those that came to scoff remained to listen. And it was something extra good—a medley.

* * *

Jack Charles looked the very picture of health in his patriotic Canadian song. Nothing seems a worry to him. W. Pringle and W. N. Shaver were other appreciated singers.

* * *

President Geo. Smye performed the arduous duties of toast master, ably assisted by Vice-President Billy Meen. In E. Jules Brazil, the club secured a premiere performer on the piano.

Veteran Figures in the Canadian Hardware Field

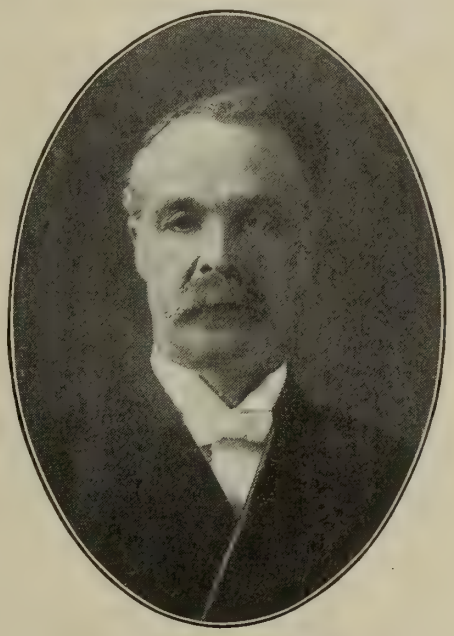
No. 2.—J. S. Bryson, New Westminster.

In the Canadian West, the term "veteran" does not have the same significance that it bears in the eastern provinces. It is applied to men who have been early in any one field. A man may be a veteran settler or a veteran hardwareman and yet lack the distinguishing mark of silvery locks. He may be one of the first men in his line in a certain community; and the community may not have a very extended history. On the other hand, a man seldom wins the right to that time honored title in the east until he is approaching the three score span. There are exceptions. But, as most communities are old established and all lines of activity equally so, the exceptions are few in number.

The term "veteran" when applied to J. S. Bryson, of New Westminster, B.C., seems a palpable misnomer. It can be applied only in a truly western sense. He is in the prime of life, hearty and vigorous, a hard worker and a prominent figure in the public life of New Westminster. Nevertheless, he has been in the hardware business for fourteen years and has become one of the best known men in the trade west of the Rockies.

Mr. Bryson is an old timer in New Westminster, so far as the modern inhabitant knows the word. He settled there nearly thirty years ago and, in the history of that wonderful country, the Canadian West, three decades is a long, long time. When a town can spring into existence overnight and grow to thriving proportions in a year or two, is it any wonder that the past seems farther away and the years are counted longer?

On his arrival in the Royal City, Mr. Bryson first worked as a carpenter. The go-ahead, bustling spirit of the West soon manifested itself in him, however, and in 1893 we find him organizing the Co-operative Cannery. He became president and treasurer of this company. Four years later, he decided to broaden the scope of his activities and very wisely decided that no better field offered than that of the hardware trade. He accordingly opened up shop in partnership with Mr. Hardman and they soon had a splendid footing. Mr. Bryson's former experiences in the mechanical and manufacturing lines enabled him to obtain an all-around, practical grasp of the hardware business and he "waxed prosperous." Five years after the store was opened, he bought out his partner and took his sons into partnership. It may create some surprise that a large



The term "veteran" when applied to J. S. Bryson, of New Westminster, B.C., seems a palpable misnomer. It can be applied only in a truly western sense.

and successful retail business could be built up in such a short time; however, it's the way of the West.

Mr. Bryson has ever been one of those enlightened men who believe that the duty of the citizen calls him to active participation in municipal conduct and control. He has served as an alderman for some years and for the past two has been chairman of the water committee.

Ald. Bryson is "in the limelight" just at present as a result of his recently announced candidacy for the New Westminster mayoralty. The announcement came as a Christmas surprise for his Liberal friends and it was, literally, hailed with acclaim. He is a staunch Liberal in politics. Any man who is a Liberal in B.C. just at present must be staunch. But that is neither here nor there. The present chief magistrate of the city of champion lacrosse teams, Mayor Lee, is a solid Conservative and it is figured that Ald. Bryson is about the only man capable of wresting the toga from him. Far be it from us to assert, or even to imply, that the party line is drawn in municipal politics in New Westminster. On the contrary, party considerations have been almost entirely eliminated. Still, Ald. Bryson has won many friends through his sincere advocacy of Liberal principles and by the steady, sure course he has steered through the shoals of municipal politics and they are now ready to pitch in and help him win out. Voting takes place next week and Ald. Bryson is conceded a good chance of having his name on top when the mayoralty majority is figured out.

When a hardwareman wins the respect and liking of competing hardwaremen, it can be taken for granted that he is fair and thoroughly trustworthy. J. S. Bryson has nothing but friends in the trade.

STORES ABOUT TO AMALGAMATE.

It now becomes known that S. H. Knox & Co., E. P. Charleton & Co., and Woolworth & Co., three concerns operating chains of five, ten and fifteen cent stores, are to unite. Their amalgamation under one head, which it is said will become a fact the first of February, will make one of the largest groups of stores now carrying on business. The proposed change in the management of these concerns is of great interest to the Hardware trade, for all these stores carry the cheaper lines of shelf hardware and a wide variety of tin and nickel ware.

S. H. Knox & Co. is the name which has been given to the stores operated in Ontario. Most of the five, ten and fifteen cent establishments in Quebec bear the name E. P. Charleton & Co., while Woolworth & Co. operate a chain in the United States. It is quite possible that after the amalgamation the store names will remain as at present, but there will be a central management and a central buying staff.

R. Cannable, of Buffalo, hardware buyer for the Woolworth stores, was in Montreal last week, visiting the five, ten and fifteen cent stores there. He also made hurried trips to a number of Quebec towns in which stores of these chains are operating. Mr. Cannable, it is understood, was merely looking over the situation, so that he will be conversant with it when the amalgamation is consummated.

Dropped Dead at Banquet.

Montreal.—The celebration of St. John's night by Montreal Masons was brought to a sad termination by the sudden death of Allan Austin, of the firm of Austin & Laverty. Mr. Austin who has not been in the best of health for some time, was eager to be with the Masons on their great night and so attended the banquet of the Royal Victoria lodge. The excitement of the evening proved too much, and Mr. Austin fell forward among his friends, dead.

Annual Conventions and Staff Reunions

ANNUAL RE-UNION OF TRAVELERS.

Montreal.—The directors of the Thos. Davidson Mfg. Co., of Montreal, were the hosts at an enjoyable luncheon held in the Windsor Hotel, December 28th. The occasion was the annual reunion of the travelers, about 30 representatives of this body having fore-gathered from all points of the compass.

After all had done full justice to the excellent menu provided, the vice-president T. C. Davidson, who (in the unavoidable absence of Jas. Davidson) acted as chairman, proposed the health of "The King" which was loyally honored.

Edward Goodwill made reference to the recent opening of a branch warehouse at 120 Duke St., Toronto, under the management of R. C. Warminton; this should prove a great convenience for the firm's customers in Toronto, and other Ontario points.

Almost all of the "Knights of the Grip" added their quota to the "feast of reason and flow of soul," each succeeding reminiscence serving to freshen the memory of another traveler who had some equally interesting tale to relate.

J. N. Warminton finally proposed the health of the president and directors.

The singing of Auld Lang Syne and the National Anthem brought a most enjoyable function to a close.

SHEET METAL PRODUCTS BANQUET.

Toronto.—The Sheet Metal Products Co. held their annual banquet on Thursday evening, Dec. 28, at the St. Charles Cafe.

After partaking of the good things provided a very interesting programme of toasts and songs was rendered which was heartily appreciated by the large number present, among whom were the Hon. A. E. Kemp, president of the company; W. A. Kemp, vice-president; W. J. Hayes, manager of the Montreal factory and F. S. Corrigan, manager of the MacDonald Plant, who presided.

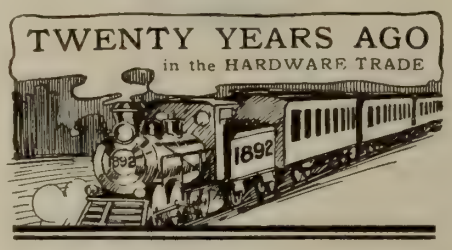
The hit of the evening was the excellent rendering of an original vocal selection entitled "The Gay Sales Manager" set to the tune of the Drum Major by Thos. Bell.

The verdict of all present at the close was that it was the most successful one yet held.

The toast list and menu were printed in very handsome form on heavy gray paper and contained excellent likenesses of the president and vice-president.

RAMSAY & SON CONFERENCE.

The conference of the selling staff of A. Ramsay & Son Co., held in Montreal last week, gave an opportunity for the heads of the concern to discuss plans with the travelers, all of whom had come in for the occasion. The general opinion expressed by these men was that the present year will see a bigger sale of paint than took place in 1911. During the conference a tour of inspection was made through the new plant, which is just now being completed.



The following items have been taken from the issue of January 2, 1892:

"Thos. Davidson & Co. have discontinued carrying a stock at Toronto and will now ship goods direct from Montreal. The same travelers will solicit orders as heretofore. A sample room has been opened by the firm at 54 Wellington Street east."

Editor's Note.—In another part of this issue, reference will be found to the fact that the Thos Davidson Co. have recently opened a Toronto branch office.

* * *

"J. H. O'Loane, hardware merchant, Ridgetown, was married last week to Miss Olive Wilson."

* * *

"Mr. G. L. Whitney, Woodstock, reports a good trade in stoves the past season and his tin work has been exceptionally good. On January 1st, his brother, C. M. Whitney, entered into partnership with him, he having sold out a business in the same line at Seaforth."

"A really good thing has been lately introduced by the Enterprise Manufacturing Co., of Philadelphia, Pa., which consists of a simple attachment for their meat cutters, by means of which a person is enabled to have a cutter and stuffer combined."

Editor's Note.—Readers will not need to be told that the Enterprise Manufacturing Co. are still counted among the largest of American hardware manufacturers.

SATURDAY SPECIALS.

Owen Sound, Jan. 2.—Christie Bros. are running a series of Saturday special sales. They have found this method a splendid one of attracting custom. People pay a visit to the store to look over the special line and they generally find something else as well that suits them. Saturday business has shown the good results.

Last week the special sale was in pocket knives, which were reduced to 30 cents. There was a big sale.

DINNER TO JOHN MITCHELL.

John Mitchell, who for some years past has been manager of the Toledo Scales Company at Montreal, has severed his connection with that company, and will permanently leave Montreal on January 5 next. He will go to take a position with the National Cash Register Company. A number of his friends have decided to give him a congratulatory and farewell dinner.

BY-LAW CARRIED.

Wallaceburg, Jan. 2.—The citizens of Wallaceburg yesterday endorsed by a majority of 352, the by-law to loan $20,000 to the Wallaceburg Glass Company, repayable in annual installments.

DISSOLVE PARTNERSHIP.

George F. Towle and H. F. Waters, who have formed the Winnipeg Tool & Forging Co., have dissolved partnership. The business will be carried on by the former.

APPOINTED MANAGER.

E. S. Sherwood has been appointed manager for Manitoba of the Dominion Wire Rope Co.

President Chown, of the Ontario Retail Hardware and Stove Dealers Association, was in Montreal on business last Thursday, afterwards coming on to Toronto.

A $75,000 warehouse is to be built at Toronto for Geo. J. Foy, Ltd.

The Canadian Amusement Co., Montreal, are to build the Gaiety Theatre at a cost of $100,000.

Interior Store Arrangement a Difficult Problem

How Bruce Hardware Co., West Toronto, Have Improved Their Facilities—An Effective Arrangement of Paints and Stoves—General Plan Proves a Success.

The hardware dealer has many problems to face, one of the most difficult being the question of store arrangement. The scope of the hardware business has widened to such an extent of late years that the stock is hard to house. There are a multitude of articles, many of the bulkiest nature, which must be stored and displayed. How to arrange this stock in such a form that all goods will be easily obtainable without at the same time turning the store into a junk shop, is the problem that faces the average hardwareman. If the dealer has limited store space at his disposal, the difficulty is intensified.

It is not to be wondered at that a good many hardware establishments look sadly cluttered up. Stoves, paints, harness goods, kitchen utensils, cutlery, in addition to the almost countless lines which can more strictly be termed "hardware," cannot very well be housed in a small store without creating congestion.

The problem of interior arrangement has been one to which hardwaremen have given much thought, therefore space economy has been studied closely. The result has been a distinct improvement in many respects, and, even in stores of limited capacity, it has been found possible to arrange large stocks in economical, sometimes in attractive, form.

Enlarged His Space.

A creditable arrangement is found in the newly enlarged store of the Bruce Hardware Co., West Toronto. For some years the store has been L shaped, with a front and side entrance, the corner space being occupied by a dealer in another line. R. J. Bruce found that he was cramped for space, and he accordingly acquired the corner property and decided to throw it all into one. The partitions were taken out and the interior was completely remodelled. Mr. Bruce has now laid out the interior of his new store according to advanced precepts. A study of the accompanying plan will show how well the space has been utilized.

A New Entrance.

In the first place, the front was changed and the main entrance placed at the corner. This doubled the front window capacity. There are, in addition, two side windows which can be used for display purposes.

The shelf hardware is stored along the left wall. Silent salesmen are stationed along that side, containing cutlery, knives, etc. This section contains a number of features, such as display stands and racks.

In the centre two long tables are stored with kitchen utensils.

Along the right wall the paint stock is found. Mr. Bruce carries a large paint stock, and believes in keeping it well sorted up. Shelves run right to the ceiling, and they are all kept well stocked up with neatly arranged tins, resplendent with fresh labels. Another row of paint shelves are found along the partition as marked in the plan. This arrangement is highly effective in creating a demand for paint. No one who enters the store can escape seeing the paint stock almost at a first glance. The very size of the stock impresses one with the importance of paint, and also with the fact that this particular firm must be selling a lot of it.

Stoves Displayed.

A line of stoves are displayed in front of the paint shelves. Here they are readily seen and can be inspected easily. There is plenty of space on both sides to permit of a careful examination of any stove shown.

In the rear of the store are the office and the household goods department.

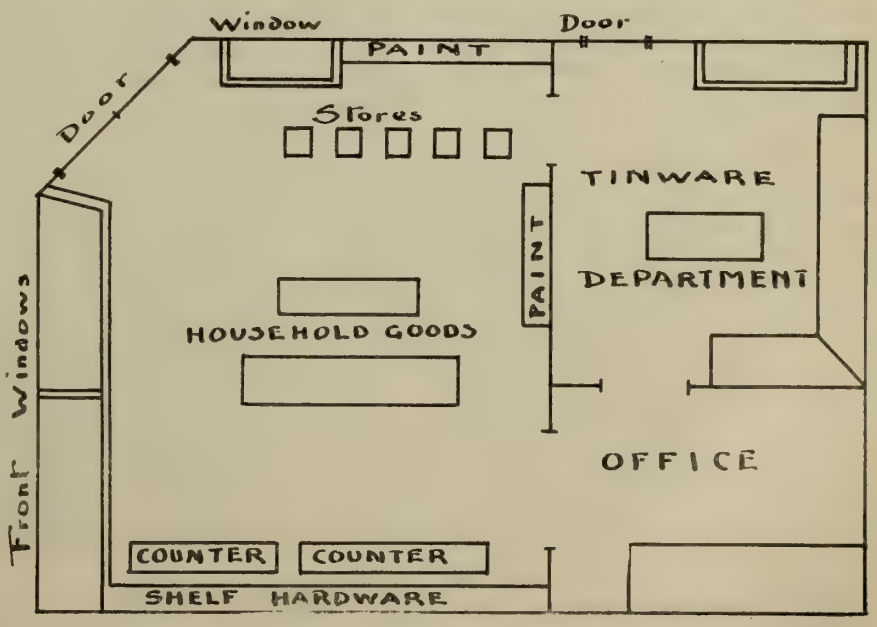
The arrangement, altogether, is highly effective. Good use has been made of the available space, and the store has a neat appearance. Without being over capacious it gives the impression almost of roominess. Every line is adequately displayed and there is no trace of crowding in any respect.

It might be mentioned that good use is being made of the splendid facilities for window displays. A Christmas trim was arranged in the front window by J. W. McMaster, which had special merit. The staff photographer of Hardware and Metal took a picture of this display, but, owing to the brightness of the day when the attempt was made, the reflection ruined the photograph.

AN AD. WHICH PAID FOR ITSELF BEFORE IT APPEARED.

Every advertisement which is of any good more than pays for itself, though the direct results may not be immediately traced.

The Sales Manager of a fine Christmas seller determined to make a final display to bring his goods to the attention of the present-buying public. He arranged for two-page spreads in some of the best known dailies. Then, before these appeared, he went to the jobbers and to a number of the retailers, telling them of the steps about to be taken to stimulate trade. Of course, they were familiar with the goods. They had handled them for some time. They knew their merits through Hardware and Metal advertising. So, when they were told of the heavy consumer advertising which would certainly bring a heavy demand, they decided that they must get a stock on hand which would enable them to supply this demand.



Plan showing interior arrangement of Bruce Hardware Co. store.

Progressive Methods of Hardware Retailing

Retail Firm Decides to Start on Cash Basis—Record Trade in Christmas Goods Reported from Various Sections—How One Firm Doubled their sales—A Good Series of Advertisements.

SERIES OF ADVERTISEMENTS.

The editor has received a series of advertisements used by the P. Hymmen Co., Berlin, during the Christmas season. They were first inserted in the daily papers, occupying full page space, and were then issued in bill form throughout that section. The series shows every evidence of having been carefully prepared ahead of time and planned for consecutive use. A distinct plan is apparent throughout the series.

The first ad of the series is headed "First News from the Christmas Store." and underneath we read:

> "You all know it is less than five weeks to Christmas. It's time to start shopping. It's time to make up the gift lists Start making purchases now so that you get the best of everything and avoid the haste of the last minute shopper. We are glad to set goods aside for later delivery."

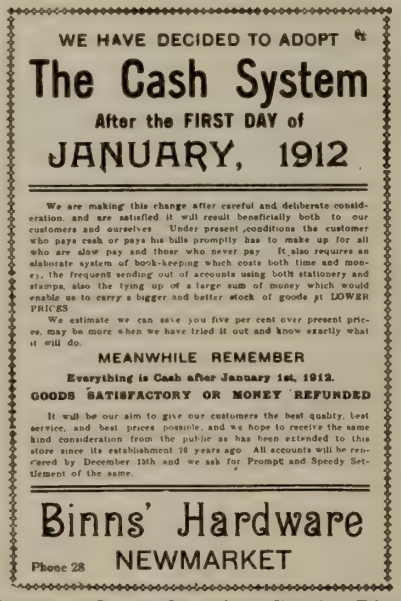
The second is headed "Gift Suggestions from Berlin's Toyland," and the statement noticed some distance below in black type "14 shopping days to Christmas," indicates that the firm endeavored to keep the public stirred up on the question of early buying. The other ads. in the series were issued shortly before the holiday. One is divided into sections under such headings as; "Gifts for Father," "Gifts for Young Men."

BEST ON RECORD.

St. John, N.B., Jan. 2.—"The best we ever had," is the reply given by practically every hardware dealer in this city, and in Moncton, Fredericton, and other places as well to the query as to how their business compared with other years, during the holiday season. All are well pleased with the results of their endeavors to secure as much of the trade as possible, particularly at Christmas time, and are looking forward with expectancy to what the New Year holds forth. At present the usual quiet which follows Christmas week prevails. Travelers for all houses are in the city assorting samples, but trade is expected to look brighter early in the new year. With most houses stock-taking will begin in a few days.

ON A CASH BASIS.

Newmarket, Jan. 2.—With the advent of the new year, G. A. Binns, has made an important change in his business methods. He is now doing business on a strictly cash basis, having been impelled to make this change after a very careful study of conditions. The business has been carried on for 20 years and, on casting back over the records, the proprietor decided that it would be to his advantage to change from credit to cash.



WE HAVE DECIDED TO ADOPT

The Cash System

After the FIRST DAY of

JANUARY, 1912

We are making this change after careful and deliberate consideration, and are satisfied it will result beneficially both to our customers and ourselves Under present conditions the customer who pays cash or pays his bills promptly has to make up for all who are slow pay and those who never pay. It also requires an elaborate system of book-keeping which costs both time and money, the frequent sending out of accounts using both stationery and stamps, also the tying up of a large sum of money which would enable us to carry a bigger and better stock of goods at LOWER PRICES

We estimate we can save you five per cent over present prices, may be more when we have tried it out and know exactly what it will do.

MEANWHILE REMEMBER

Everything is Cash after January 1st, 1912.

GOODS SATISFACTORY OR MONEY REFUNDED

It will be our aim to give our customers the best quality, best service, and best prices possible, and we hope to receive the same kind consideration from the public as has been extended to this store since its establishment 20 years ago All accounts will be rendered by December 15th and we ask for Prompt and Speedy Settlement of the same.

Binns' Hardware

Phone 28 NEWMARKET

Circular Sent Out by G. A. Binns, Announcing Change to Cash System.

The change was brought about very skilfully, and the customers of the store were given every opportunity to accustom themselves to it. Circulars were printed, announcing the change and giving the reasons for the same. These were sent out to all customers. and, in addition, were handed to people who entered the store. A large card with the announcement was placed in the store window where it would readily be seen.

All accounts were rendered by December 15 and prompt settlement of the same was requested.

It is too early as yet to say anything as to the results, but the proprietor is confident that it will prove a success in all respects.

SELLING CABINETS

Radville, Sask., Dec. 29. — Picketts & Schurman, proprietors of "The Quality Hardware Store," are making a speciality of kitchen cabinets. They are advertising extensively the fact that a cabinet "means the saving of miles of walking around a hot kitchen," adding that, "It means that you will keep food supplies fresh and full strength, and, that you will keep out dust, dirt, flies, mice and rats. There are a dozen conveniences about the cabinet which will mean more to your pocket book than you pay for the cabinet itself."

SILVERWARE SOLD OUT.

Peterboro, Jan. 1.—The Christmas rush is over and all unite in saying that the Christmas trade was the "best ever." The skate trade was probably the slowest, owing to the lack of ice.

The advertising campaign of the Peterboro Hardware Co., through the Christmas season proved a big business getter. Their silverware department was nearly depleted.

DOUBLED THEIR SALES.

New Liskeard, Dec. 28.—In the last issue of "Taylor's News," the Geo. Taylor Hardware Co. make an interesting announcement with reference to the results of their Christmas campaign. They say :

> "We thank our customers for their liberal patronage during Christmas week. We nearly doubled our sales over the previous year.
>
> "Our display windows assisted us greatly in doing this. We marked all the prices in plain figures on the goods displayed. We have always marked our prices this way on all goods in our store. We have nothing to conceal. We are trying to make the prices get us the business."

R. J. Walkem, Tottenham, made a special effort at Christmas business. His ads. were bright and showed that a high-class stock was carried.

Current News of Canadian Hardware Trade

A Fire Loss.

Moncton, Dec. 29.—Charles Elliott, hardwareman of this place, has suffered a loss by fire.

Takes Over Departments.

Aylmer, Ont.—Geo. Ellis has purchased the tinsmithing and plumbing departments of the business of J. Y. Smiley. He will continue in business in the old stand.

Complimentary Address.

Galt, Ont.—A complimentary address was presented to Reginald Curtis, of the Canadian Tap and Die Co., one of the oldest and most trusted employes of that firm.

Work is Started.

Guelph, Ont.—Construction work has been started on the new plant of the Guelph Stove Co. The plans call for a modern plant, comprising twelve departments of large size.

Died in Toronto.

Walkerton, Ont., December 30.—Thomas Barnett, who conducted a tinsmithing business here until three years ago, died in Toronto from an attack of pneumonia. He was buried here.

Into New Premises.

Minden, Ont.—S. W. Welch, hardware dealer of this place, has moved into his new premises opposite the post office. The store was opened during the last few days of the old year.

Fire in Oil Room.

Guelph, Ont.—Fire broke out in the oil room in the rear of the Guelph Hardware Co. store. Some delay occurred before the fire brigade arrived and damage to the extent of about $100 was done.

Gave a Dinner.

Waterloo, Ontario.—W. G. Weichel, M.P., who is also mayor of this place, tendered a complimentary dinner at the Commercial Hotel, Wednesday evening to the officials and members of the various governing bodies of Waterloo.

Opening New Store.

Orillia, Dec. 28.—Geo. J. Overend and Alex. P. Lowry intend opening a new hardware store in Vick's old stand, under the name of the City Hardware. They expect to be ready for business by February 1 and will carry a complete stock. The store is now being remodeled. Both members of the firm are life long residents of Orillia.

A Clearing Sale.

Ottawa.—W. G. Charleson, who recently purchased the store of C. P. Wright, on Rideau Street, is announcing a clearing sale of the hardware stock. He began the sale on Jan. 4 and will continue until he has disposed of everything.

Business Section Burned.

Golden City, Porcupine.—During a blinding snowstorm, with the thermometer registering 25 below zero, a fire broke out which wiped out practically the whole business section. Twenty buildings were destroyed, including all the stores, hotels and the theatre.

Re-opened After Fire.

Strassburg, Sask.—The fire in the hardware store of Rodger Bros., noted previously, did considerable damage. It started in the office from an overheated stove pipe. Everything in the office was burnt and a large amount of store goods damaged. The windows in the front were also broken. The store was opened next day, however, and a fire sale started.

Joins Dominion Steel.

Montreal.—R. B. Coulson, for a number of years selling agent for the Dominion Wire Manufacturing Company, has left Montreal for Sydney, to join the staff of the Dominion Steel Company. Shortly, Mr. Coulson, who is to have charge of the company's wire products department, will return to Montreal, for this city is to be his headquarters.

C. E. Woodley Dies.

Montreal.—C. E. T. Woodley, for fifteen years traveling representative of B. and S. H. Thompson, Montreal, died suddenly at Knowlton last Saturday morning. Mr. Woodley had left Montreal to spend New Year's with his son and daughter. He seemed in the best of health when he left, but after breakfast complained of illness and died within a few minutes. Mr. Woodley, who was 63 years of age, was well known and highly respected by all metal men in Canada.

Change in Firm.

Glen Ewen, Sask.—Charles Hames, who for the past year has been partner in the firm of Winteringham & Hames, hardware merchants, and has had charge of the tinshop, has withdrawn and the business will be carried on by W. W. Winteringham. The latter has secured the services of Stanley Riddell, of Oxbow, to take charge of the tinshop. Mr. Hames is visiting at his former home in Proton Station, Ontario, but expects to return to the West.

Big Deal Consummated.

Eemonton, Alta.—Marshall-Wells Hardware Co. have acquired the interests of John Sommerville & Sons in the Sommerville Hardware Co. The new offices will be: President, Seth Marshall, Duluth; vice-president, H. Annis, Winnipeg; secretary, C. M. Rice, treasurer, Frank B. Sommerville. The manager will be R. C. Hooper, who has had charge of the Marshall-Wells' office at Seattle. Sales manager will be F. L. Chandler, O. L. Jarrell, buyer and W. A. Riggs, retail manager.

The old name will be continued and it is understood that a couple of storeys will be added to the store building. The erection of a heavy goods warehouse is contemplated.

To Hold Banquet.

Montreal.—The Builders' Exchange of Montreal, is to hold a banquet of more than ordinary interest at the Windsor Hotel on January 9. A number of well known public men will speak, among them being: Hon. Dr. Thos. S. Sproule, Speaker of the House of Commons; Hon. T. W. Crothers, Minister of Labor; Hon. Louis P. Pelletier, Post Master General; Hon. L. A. Taschereau, Minister of Public Works and Labor, Quebec; Mayor Guerin, of Montreal, and C. C. Ballantyne, of the Montreal Harbor Commission.

Business Changes.

Ochre River, Man.—Schoff Bros., dealers in hardware, have been succeeded by S. P. Wilson.

Transcona, Man.—Campbell & Lozo have succeeded R. S. Campbell in the hardware business here.

Avonlea, Sask.—A hardware store has been opened here by the Munson Hardware Co.

Beatty, Sask.—A. A. Ferguson, local hardwareman has sold his business to Gerow Bros.

Churchbridge, Sask.—Arnason & Son, hardware and implement dealers, have dissolved partnership. The business will be continued by G. A. Arnason.

Macklin, Sask.—Graham Bros., hardware merchants, have dissolved partnership. O. A. Graham will continue the business.

Personal Notes.

E. Goodwill, manager of Thos. Davidson & Co., Montreal, spent the holiday at Caledonia Springs.

Mr. Dyde, of Winnipeg, hardware buyer for the Hudson's Bay Company, spent several days in Montreal this week placing orders.

R. A. Cowan, hardwareman of Courtright, and family, spent the holidays at Corunna, Ont.

Lesson 6--Short Course in Card Writing

The Brush Stroke Roman, One of the Most Speedy Styles of Letter in Practical Use—Sample Card Introducing Simple Form of Decoration — The Edwards Short-Cut Course.

By J. C. Edwards. Copyright, Canada, 1911.

This style of lettering, the brush stroke Roman, is considered one of the most speedily-made styles used to-day in modern card-writing. The slant style, which will be taught in a few lessons farther on, is the speediest, as the forward slant of the strokes has a decided tendency to promote greater speed. This lettering was executed with a No. 7 red sable brush (in albata), the corner of the brush being used to make the fine lines and the width for the strokes.

Correct Use of Brush.

Don't try to just touch one corner of the brush to the card. Draw the brush flat and use it as we have already indicated in previous lessons, and as shown in the corner picture on the lesson chart, but instead of using the T square, except for very long strokes, let the hand rest as shown in the picture at the upper left-hand corner and draw the brush (edgewise) from top to bottom by simply resting fingers very lightly.

Practice this stroke steadily for a while and you will find it comparatively easy. If you do not accomplish the results desired at first, try again and again. The hardest stroke of all, which you will come in contact with in this lesson, is the small horizontal stroke, as stroke 3 in A, stroke 1 in T, stroke 2 in L, and so on, but if you would persevere, always remember that the edge of the brush is used for the fine line and that you press it according to the width stroke you desire. The heavier you rest the brush the broader stroke you get, no matter whether it is the edge or width of the brush you use.

How to Add the Spurs.

There is one point in this lettering that the student will find quite hard to master at first, and that is the adding of the spurs to a fine line in such letters as A, N, M, V, W, X and Y. The corner of the brush alone being used (not the whole stroke, except for the horizontal stroke, as No. 5 in A and others).

In the letter A you commence to add the spurs with No. 4, using the left-hand corner of the brush and without lifting it from the card, draw the brush edgewise, as indicated by stroke 5, and finish up with the right-hand corner of the brush with stroke 6.

The addition of spurs to the broad stroke is comparatively easy, as the whole brush is used without danger of covering the edge with the opposite side of the brush that is not actually in use. In the letter B you will find with practice that you can accomplish great accuracy as well as speed. This also applies to such letters as P and they being composed of practically the same strokes as the B. The P is is really the first stroke of the B, with an enlarged second stroke; the R is a P with the addition of the No. 3 stroke, which may be made as shown in the plate or a straight stroke brought down on a slant and finished with spurs. The other letters are easily understood by close examination of the plate. The finished card illustrated here is a half-sheet (22x28 inches) and lettered entirely in brush stroke Roman capitals.

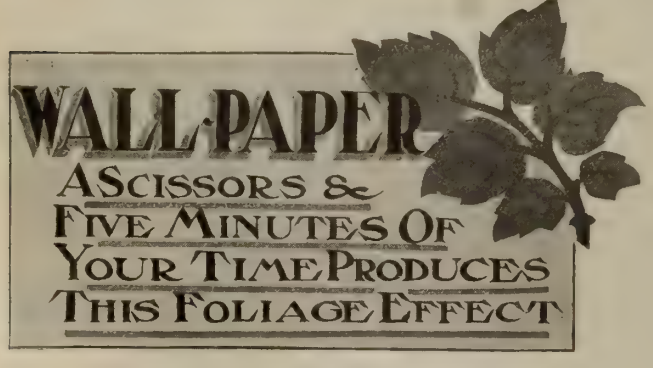
Simple Form of Decoration.

The display line, "WALLPAPER," is brought out more prominently by being shaded with a left-hand lower shade of grey; the reader is underlined with broad strokes of grey. We are here introducing the first and most simple form of decoration. The effect being accomplished by pasting a section of foliage cut from wallpaper, on one corner of the card and breaking the line border. This is easily executed and adds greatly to the appearance of a window card (not for interior display purposes).

The display line is lettered over it, giving the whole a more real pointed effect, which is, of course, desirable. The same brush was used for all the lettering on this card; the top line was made with two strokes of the brush for the wide parts of the letters.

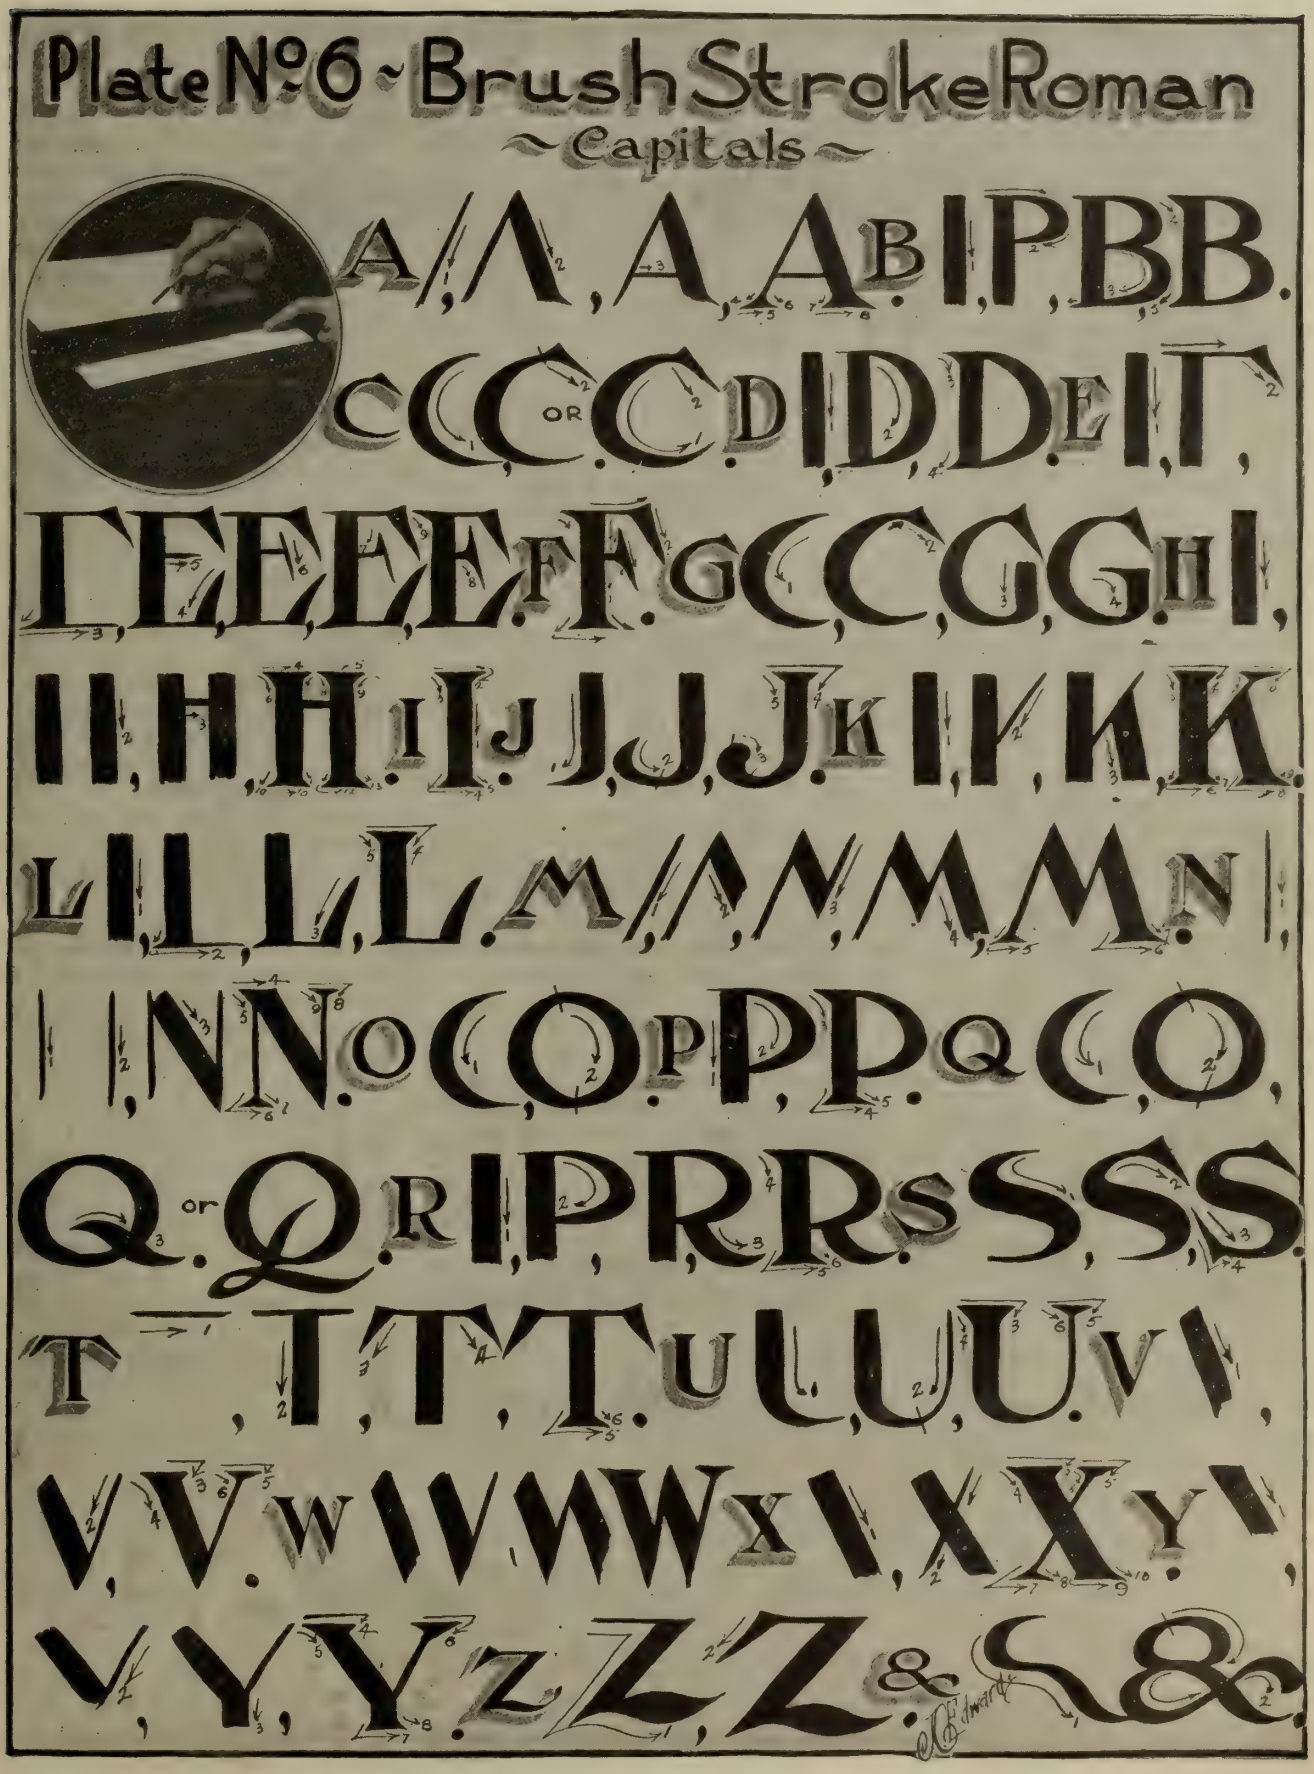
Try one of these cards, using any kind of an illustration or flower you wish, as long as it is in keeping with the inscription.

For any further information re the lesson or about brushes, outfits, etc., write to J. C. Edwards, the author, care MacLean Pub. Co., or to Hardware and Metal.



A show card showing simple but effective use of brush stroke Roman and neat ornamentation.

Showing position of brush in hand while lettering.



This plate is illustrative of the brush stroke Roman letter. For full instructions see accompanying article by J. C. Edwards.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Copper Ingot—Up 50 cents a cwt.
Copper Sheets—Up 1 cent a pound.
Tin—Down in England.

Toronto.

Tin—Down ½ cent.

MONTREAL.

Montreal, January 5.—Even those who for years have been accustomed to the vagaries of tin are surprised by the rapid changes which have come in this metal in the last few days. Fourteen English pounds the metal has dropped in the week, and it is not certain that the end is yet. The cause of this decline is being eagerly sought. A specific reason is a difficult thing to give, but on all hands the syndicate is credited with bringing about the drop.

Though tin has been so surprisingly active as to rather cause the other metals to sink into oblivion, yet these to have been far from uninteresting. Spelter has advanced a little. Copper has given evidence that the decline which has been predicted from time to time is not yet coming. Lead has been steady, while iron has shown a strong tone. Especially in Montreal is iron active. A general rise in price has not yet been effected, but it would appear this is bound to come shortly.

As all business, so metals have been quiet this week—that is, there have not been a great many sales. The metals themselves have been far from quiet, as will be seen from consulting a price sheet.

Tin on the Decline.

Tin.—Last week the general quotation in England was £206, now the metal is quoted at £191, a tremendous drop—one almost without parallel in the exciting history of tin. The decline is generally credited to operations of the syndicate which has for so long controlled the market. What the future will be is impossible to state definitely, but all things being considered, it would appear that tin is bound to rise again, and that this would be a good time to buy.

The syndicate at the present time has bought largely. Perhaps they are trying to get rid of some of their stock, or perhaps they are desirous of making handlers think they are doing this. However that may be, it is certain they are taking the price down by jumps. Tuesday it dropped £4. Wednesday there came a further decline of £10. Men who have been in the metal business in England for years refuse to predict the immediate future. They feel sure there will be a rise which will more than offset this drop, but they are not yet sure that the decline has run its course.

Whether it has or not this would seem a good time to buy. Even if the metal drops lower it will certainly rise again. A buyer is making a practically sure gain, the only question is how large a gain.

Lead.—This metal has been steady during the week. There has been no change in price, and little large buying.

High Prices Continue.

Copper.—The high prices continue. Indeed there has been a further advance during the week, an advance which has forced the handlers to raise the price of ingot metal another 50 cents a cwt., and to advance copper plates a cent a pound. There is considerable uncertainty about this market. Many think the present figure is too high, and that a decline is due. But they thought this last week, and instead of a decline there came an advance, though not a great one. The actual advance in the metal, it must be remembered, is not so great as that made by the small handlers. They have kept their prices as steady as possible, and not until this last increase came did they advance their prices at all correspondingly.

Spelter.—East St. Louis rose 5 cents on Wednesday, but this is of little importance to Montrealers or Canadians, as local prices are based more upon the European supply and these have remained largely steady. There is a good supply on hand now and the manufacturers are not suffering any inconvenience such as that experienced in November.

Pig Iron.—This has been a quiet metal, but now it appears that it is to be more active. Several large orders have been placed, and some dealers have had to be supplied with Scotch iron just brought out—iron upon which an extra freight of $2.60 has had to be paid.

TORONTO.

Toronto, Jan. 5.—The metal market is not particularly active at the present moment. Still there is as much business being done as usual at this time of year; in some lines considerably more. The smallness in the demand is due solely to the fact that the factories are taking stock and are therefore holding off ordering. Enquiries indicate that there is a good latent demand which will manifest itself in a very short time. Prospects are all for big business as soon as the work of the new year is actively embarked upon.

A Slump in Tin.

Tin.—This metal has occupied a foremost place in the minds of metal men during the past week. There has been a distinctly weaker tendency on the London markets, where the world's prices are set. Tin has dropped rapidly in price, due in all probability to the fact that the syndicate has been buying heavily. The price locally has dropped a half cent in consequence of the hammering down of London quotations. Demand for tin is not very heavy at the present time, although some good-sized orders have been placed.

Stronger Tendency.

Copper.—The copper situation verifies to the letter the predictions of those who have contended that the improvement was permanent and not temporary. There is a good demand and the price in some lines has gone up during the past week. Copper sheets have been advanced 1 cent a point. While no change has been made here in the price of ingot copper, advices from other points indicate that increases have been made. The prospect is for higher quotations here. In the meantime there is a fairly healthy demand.

Antimony.—Little business is being done in antimony, and the situation does not hold out much hope of immediate improvement.

Advances Pending.

Plates and Sheets.—Talk of advances in sheets and tinplates is heard. The price in England has advanced but not sufficiently to influence the local price. The tendency in the old country is so strongly upward, however, that it seems but a matter of time before an increase is made. Canada plates are firming up.

Lead.—The situation in lead is unchanged. There is some demand locally but interest on the whole has been on the wane during the past three weeks. Present indications do not point to further price changes. Stocks here are now of good size and all danger of further shortage seems to have vanished.

Spelter.—The demand for spelter is better and there are some indications of a strengthening in price. Stocks are satisfactory at present.

Pig Iron.—A good buying movement is developing in pig iron. Enquiries indicate large requirements on the part of buyers and some good-sized orders should be placed soon. Prices remain firm, as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

HARDWARE MARKETS

SLACK SEASON ARRIVES.

As usual at this time of year, the business in straight hardware lines is not heavy. Stock-taking is absorbing chief interest at the present moment. Good orders are being placed in some lines, however.

MONTREAL.

Montreal, Jan. 4.—These are quiet days in the hardware trade. The retailers are as busy as they care to be, for the majority of them are now hard at stock-taking, but the wholesalers who are nearly through with their annual reckoning are experiencing a lull. Christmas once over, a slack period is to be expected, and that period has started now. Business is being done, but it is going along quietly. There is no rush.

The weather has been against both wholesaler and retailer, but especially against the retailer. He has to buy before the consumers' demand has commenced. He has to anticipate that demand, and as every merchant knows, a demand depends upon many things. This year, for instance, dealers bought largely of skates, snow shoes, skiis and sleighs. They have sold largely too, but not nearly as large as was to be expected. The cause is not hard to find. It is not that the great outdoor games have lost their attractiveness to the young and the middle aged. The cause is the lack of suitable winter. Until this week there has been practically no skating, so the sale of skates naturally fell off. Until this week, the beautiful snow has been practically unknown. A few flurries there have been, but these did not last. Indeed there is but little snow in Montreal now, and none on the Mountain to make tobogganing and skiing possible.

All this means fewer demands for the winter goods which the dealers stocked more largely this year than ever. Of course the winter is young yet, and it is certain snow and cold weather will come; but the dealer will have to be particularly aggressive to avoid being left with a heavy stock of these winter sporting goods on his hand.

Nickel Ware Advances.

Household Goods.—Here the business is keeping up steadily, indeed this is a class of goods for which there is a splendid demand the year round. Nickel ware and Copper ware, such as is handled by practically every hardwareman nowadays, has been increased in price, this having been made necessary by reason of the steady advance in price of copper ingots. The advance is generally quoted at 5 per cent.

Early Spring Sales.

Seasonable Goods.—Weather strip is still in great demand, the wintry winds having brought people to see that they must close up those cracks through which the cold air rushes. Such articles as will be needed in early spring are also being sold by the jobbers. Sap spouts are being largely ordered. So are buckets and evaporators which will be used in the sugar bush in March.

Trade is Quiet.

Sporting Goods.—From a wholesale standpoint, activity has practically ceased. The dealers have large supplies on hand, and now their great anxiety is to dispose of these before the season changes to spring. The jobbers will in a few weeks forget all about winter, for then their travelers will start out with the summer goods, the baseball gloves and bats, the tennis rackets and the cricket bats.

Weather Causes Activity.

Lumber Supplies.—Here activity has not diminished. The camps are in full swing, and still supplies have to be taken in. Tar paper, for repairing old buildings and making new ones weather proof, is in large demand. Axes are still being bought. So are cross-cut saws, for though the open weather has been a handicap in may lines, it is an advantage in this, that it is enabling the farmers to do more work about their farms than is usually possible at this time. There has been more timber sawn and wood split on the back acres during the past few weeks than during any similar period for some years. Lumbermen's calks are also in great demand. These are necessary for moving about on the skids, and they will be more necessary for the river drivers which will start when the ice breaks up in the spring.

TORONTO.

Toronto, January 5.—Little business is being done in hardware but no one is complaining. The lull in business is giving the jobbers an opportunity to finish up their stock-taking. The travelers have startel out on the road again for a number of the wholesale houses but, as the retailers are also plunged into stock-taking, it is not anticipated that any great volume of business will be done for some time yet. Some booking is being done for spring shipment.

The mail orders during the past week have been fairly good. The rush of Christmas business has cleaned out stocks in some lines and the retailers have been compelled to order new supplies. This applies to a good many varieties of goods. These orders are of the small variety, just sufficient being needed to meet possible demands.

Seasonable Goods.—The cold weather has improved the demand for winter goods. Weather strip has been selling fairly well and there has been some demand for sleigh bells, robes, blankets, etc. Spring lines are always beginning to creep into notice. Some orders have alrealy been placed for spring delivery.

Dairy Supplies Start.

Household Goods.—There has beeen a good demand for all lines of household goods. Some dealers are already starting to stock up in dairy supplies. A few good orders have been placed for washing machines and wringers and even cream separators have been selling.

The only price development in this department is the advance in copper and nickelware announced on another page.

Demand Falls Off.

Builders' Hardware.—At last the volume of business in builders' hardware shows signs of falling off. Building is now pretty much at a standstill and the call for hardware supplies has practically ceased. Some sorting orders have been received during the week and a little spring business is being placed.

Heavy Hardware.—Spring business is being done in fairly good bulk. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7 1/8.

Skate Trade Revives.

Sporting Goods.—An unsatisfactory feature for some time back has been the holding off noticed in the skate trade. This has been due, of course, to the mild weather. Skates have not been selling as rapidly as usual at this time of year. The colder weather of the past few days has revived trade very considerably, however, and it is now believed that all lost ground will rapidly be regained. There is little doing in other branches of sporting goods although hockey supplies, toboggans and snowshoes are seasonably active. A few enquiries on the score of spring goods have been received.

Lumbering Supplies.—A few good orders have been placed this week for lumbering supplies, mostly from northern points. Cross-cut saws, logging chains, axes, etc., have been stripped out during the last few days.

The demand for cutlery, silverware, brass goods, etc., has not been large, but some orders have been filled. Stocks were pretty well cleaned out during the Christmas trade and sorting up is now in order.

Stoves, Furnaces and Cooking Accessories

Stove Guessing Contest Proved a Big Success

Business Improved as a Result and Seven Stoves were Sold on Day when Result Was Announced—Originality is needed in Working up Successful Stove Business.

To be thoroughly successful the retail stove dealer must possess a certain share of originality. The sale of a stove entails the display of a high degree of salesmanship and competition is always keen. It is, therefore, the man who evolves an original idea, who strikes a new note, to whom the biggest share of the business goes.

In no other line of business has more originality in devising selling plans been shown. Stove men scour the countryside for "prospects," insert wily advertisements in the newspapers, hold out new and striking inducements to get people to call at their stores. At least some stove dealers do The rank and file might be described as almost apathetic ; but the stove trade has found many brilliant exceptions to this general rule. Canadian dealers have shown originality and a great deal of energy in handling the stove trade during the fall season just passed. A few novel ideas have been worked out, some of which have been presented to readers of Hardware and Metal in recent issues.

A Guessing Contest.

One of the best ideas followed out this year was a guessing contest held by H. D. Moss of Renfrew. Mr. Moss placed one of his best ranges in his store window and announced that it would be given free to the person guessing nearest to the actual weight of the stove. All purchases of one dollar and over in the store entitled the buyer to a guess.

The idea was a courageous one, for it takes a lot of business to make up for the loss of a range. Mr. Moss found, however, that the results more than justified him in his venture. The offer created a lot of excitement, and practically every person in town called around to inspect the range. Mr. Moss had good reason to know that the contest had created interest, for the gusses poured in. People bought a dollar's worth of hardware for the ostensible purpose of having a try at the range.

Business Proved Brisk.

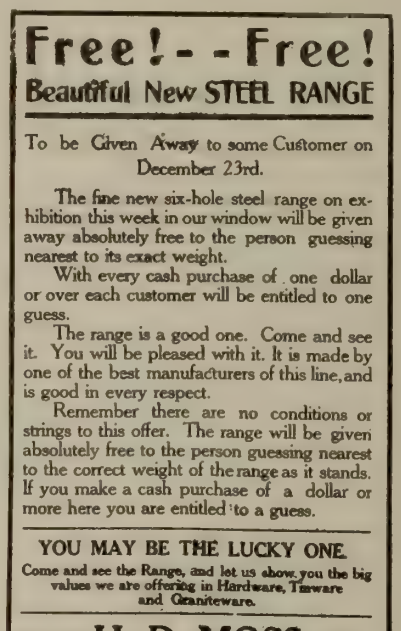
The effect was felt more directly in the stove department itself. Commenting an the results, Mr. Moss says :

"It certainly made a large increase in the stove department. The day the range was given away, we sold seven stoves, which I consider very good for this locality. During the month it increased our sales on the whole a large amount over the same month last year."

A Good Argument.

The effective writing of an advertisement is always a strong factor in promoting sales.. Smith & Schaefer, Bolton, advanced a well considered presentation of "stove facts" in a recent advertisement. They said :

"You can't have good cooking unless you have a good stove—and your stove is in use every day of the year. From past experience in the stove business we find there is a call for cheap stoves, but it is only limited, as the majority of the people are wise to the fact that the best is the cheapest and that a trifle more paid for a good article pays many times over in the end in service, to say nothing of the satisfaction of knowing you have the best there is."



Advertisement used by H. D. Moss, Renfrew, to announce terms of contest.

Going After Furnace Trade.

The Grandview Sheet Metal Works, Vancouver, have been making a vigorous effort to get the furnace trade of their section. They give a forceful talk in one of their recent advertisements :

OUR SYSTEM OF FURNACE INSTALLATION GUARANTEES :

FIRST — A correct layout of your wall pipes, registers and basement pipes, etc.

SECOND—Principles of installation that are simple and scientific, that give at once an abundant supply of pure, fresh, warm air.

THIRD—Our system takes all the cold air off floors and brings in the pure, sweet air from outside.

FOURTH—Our system allows no wasted heat to go up the chimney, only the obnoxious gases and smoke.

FIFTH — Our system saves nearly half your fuel bill—it's the most economical and fuel-saving system in vogue.

LASTLY — Talk it over with our "Furnace Expert." His advice is free.

A Stove Sale.

A ten-days' stove sale is being held at Westman's hardware store, London. It started on Tuesday of this week.

OPPOSITION TO PHONE RATES.

Winnipeg Merchants Say the New Tariffs Are an Imposition.

Winnepeg, Jan. 4. — (Special.) — The Retail Merchants' Association has come out against the new telephone tariffs as proposed by the telephone commission and seconded by the provincial ministry.

The chair was taken by President John Dyke and the meeting was simply a protest against the proposed rates. The unanimous opinion of the members as revealed in the many speeches and the warm endorsation given remarks condemanatory of the proposal was that the rates were an imposition and injurious to the best interests of business.

A motion that W. T. Devlin, J. B. Coyle, John Dyke and G. J. Hyndman be appointed to enquire into the peoposed rates and to report back at the earliest possible moment was carried unanimously. The next meeting will have the same business to consider and will be at the call of the president.

STOVE AND HEATING MARKETS

COPPER WARE ADVANCES.

The stove and heating market shows seasonable inactivity at the present time. Few orders are being placed, although a demand from one dealer for fifteen furnaces indicates that business is still stirring in that line. An advance of 5 per cent. has been declared in certain lines of copper and nickel ware. Higher quotations are forecasted in sheets.

MONTREAL.

Montreal, Jan. 4.—With the passing of the old year all thought of the business which is over has been put aside, and now all the manufacturers are planning for the future—for the spring which will be here in surprising short time. Travelers, after a week in the city, are on the road again, and they are sending in orders in good numbers. Many of these are for spring delivery, the indications being that the sale of stoves in the early months will be heavy.

Some changes in price have been noted this week. On Tuesday it was determined that an advance must be made in copper and nickel ware. Then a rise of a pound on the English market made it necessary that handlers here should advance the price of tin plates. The exact increase to be made here has not as yet been determined.

Canada Plates present a more pleasing front than for some time. There was a tendency toward weakness in this market, but of late the situation has changed. The demand in England has become greater and consequently prices have stiffened.

Little Activity Shown.

Ranges, Heaters and Furnaces—But little activity is being shown in these lines now. A fair number of ranges are still being sold, though nothing compared with those which were ordered from the manufacturer and sold by the retailer a month or more ago. Heaters are going somewhat better. Always there are those who procrastinate. Procrastination may be the thief of time, but it hardly robs stove men of their sales. Ever if a man delays his purchase until January the chill of winter is going to force him to buy.

Furnaces are undoubtedly quiet. A few are being installed in houses just reaching completion, but the great bulk of the business is over.

Increases Made.

Kitchen Furnishings.—Here a change in price has occurred as stated above. That this was coming has been known since copper began to soar. When the raw material from which a produce is made advances by leaps and bounds the finished product itself must advance. The rise may be put off for a time but it will come eventually.

The amount of the increase varies somewhat, according to the amount of copper used. Kettles have risen 5 per cent., tea pots and coffee pots 7½ per cent., and boilers 10 per cent.

Some dealers, having felt that this advance must come, have been ordering quite heavily, but the majority having good stocks on hand at the present time, have not wished to load up too heavily.

Are Going Higher.

Tin Plates, for which there is a heavy demand at present, are certain to be quoted higher in a few days. On Tuesday, the English market quotation jumped from £30 to £31. An advance like that cannot fail to bring a response here in Canada, for though the handlers may have a good supply on hand at the present time, they know that much of their future buying will have to be done at the advanced rate.

The steady climb of the tin has of course been responsible for the jump in price made by the plates. Tin climbed a few cents at a time. Tin plates remained steady until the ore became so high that an advance simply had to be made. There seems little likelihood of an immediate decline in tin, and so a drop in tin plates is not to be expected.

The local demand for plates comes principally from the small tinsmiths who are now working upon the milk cans and the sap pails for which there will be such a good call as soon as spring comes around.

Canada Plates are in fair demand, and the market, as has been said, has shown gaining strength. The slump which seemed imminent a month or so ago is not maturing.

TORONTO.

Toronto, January, 5.—Futher proofs are continually forthcoming of the pre-eminence of the past year in the point of stove sales. It is conceded on all hands that a record trade was done in practically all lines. Every manufacturer heard from has declared that business showed a distinct advance over any previous year. One stove man states that he believes he could have marketed the whole output of his foundry in the West had he cared to do so. There was undoubtedly a bigger demand than ever from the West, but it is equally true that the eastern half of the country showed almost a corresponding advance. The improvement was by no means centralized west of the Great Lakes.

Business is Slack.

Business has now fallen off very appreciably. Both manufacturer and retailer are too busy taking stock to pay much attention to current trade. Still there are a few orders coming in and it begins to look as though the new year would start off on a more active scale than 1911. Several good sized orders were placed this week for spring shipment.

Demand is Nominal.

In ranges and heaters, the demand is now nothing more than seasonable. A few sorting orders are being placed but demand for immediate shipment never exceeds two or three. The range trade, being more or less of an all year around variety, is better than that in heaters.

Big Furnace Order.

The furnace business is by no means at an end, however. There is still a fairly active demand. The arrival of severe weather this week will undoubtedly put a check to future business, as all buildings still unfinished will have to be rushed through. This will, possibly, create a certain temporary stimulus in demand followed by an almost complete cessation. One Toronto dealer placed an order for fifteen furnaces this week and stipulated delivery by the end of the week. It is believed that this constitutes a record order for this time of year.

Five Per Cent. Advance.

Kitchen Furnishings.—The feature of the market has been the advance in certain lines of copper and nickel ware. Owing to the sharp increase in the cost of copper plates, it has been found necessary to put out new quotations on these articles. The advance is approximately 5 per cent. The new discounts are:

Copper and nickel plates—47½ per cent.

Tea and coffee pots—42½ per cent.

Tea kettles and boiler plates—37½ per cent.

Advances Impending.

Sheets.—It is also likely that advances will materialize in the price of sheets and plates. An increase has been made of 50 shillings a ton on galvanized sheets in England and, while this is too small to affect the selling price here, it will tend to keep quotations firm and indicates the trend of the market. Canada plates are reported to be firm.

M. Weichel & Son, Elmira and Waterloo, issued a handsome calendar to their customers. Twenty-five hundred in all were sent out. The calendar was designed by one of the members of the firm and printed in a home office.

The Western Hardware Market Situation

Business is Slack Although the Severe Weather has Revived Trade in Stoves and Heaters—Travelers Starting Out on Road Again—No Price Change.

Winnipeg, Jan. 2.—Trade is reported to be quiet owing to various reasons. The retailers are busy taking stock and the travelers for the most part have not yet started out after the Christmas festivities. In addition, the weather has become bitterly cold and this has to some extent retarded business.

One outcome of the cold weather will be a rush business in stoves and heaters. It was thought that the possibilities of trade in these lines had been exhausted but the first touch of cold weather brought evidence that business was likely to be revived. Orders are now coming in and a large number of stoves will be shipped out to all points.

Local jobbers report that mail orders are holding up fairly well. No particular effort is being made for business just at present, however, as the arranging of stocks for spring shipment is well under way.

No price changes have been noted this week.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 3c.

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Wire.—Prices on wire barbed and annealed and plain are all open and prices cannot be quoted. All wholesalers are open to receive enquiries on wire and it is doubtful if there is much of a contrast in prices.

Paint and Oils.

No developments are reported on the paint and oil market. Prices remain firm.

Paints and Oils.—There is no change in the paint and oil situation this week and prices are holding steady at last week's quotations, namely, $1.05 for raw and $1.08 for boiled. Turpentine is holding steady and is quoted at 85c per gal. in bbls. and 95c in small lots.

TO BUILD IN NEW YORK.

The Yale & Towne Manufacturing Company have made arrangements with the firm of John Downey whereby the latter will erect, at Nos. 9 and 11 East 40th street, New York City, a building for the exclusive use of the company, under conditions which secure to it a long tenancy.

For many years the executive offices of the company, and its city store, have been located at No. 9 Murray street. The decision to move to an uptown location on the expiration of its present lease, May 1, 1913, is indicative of the general trend of business of many kinds which has produced such marked changes during the last few years in the district between 23rd and 42nd streets.

The new building will occupy a lot about 50 x 100 feet, and will be twelve stories in height. For the present several of the floors will be sublet to other tenants, but ultimately the company expects to occupy the entire building for its own uses.

CALENDAR RECEIVED.

A very handsome calendar has been received from the Canadian Logging Tool Co., Sault Ste. Marie. It represents two typical lumbermen riding logs down a fast stream with a log jam in the background.

Ludger Gravel, Montreal, have sent out a calendar which serves the double purpose of a catalogue. It contains illustrations of the many lines carried by the company.

Methods of Retailing Paints and Varnishes

Winter Sellers in the Paint Department

Floor Wax, Radiator and Stove Pipe Enamel Are particularly in demand—These Lines Should be Kept to the Front Right Through the Winter Months.

"No, I don't sell any paint in winter time," stated a hardwareman the other day, in response to a query. "Why? For the simple reason that people don't need paint in winter time."

Are you sure of that, Mr. Retailer? It may be that the need for paint—using that word in its strictest sense—is not felt often during the winter months. There are, however, a great many specialties in the paint department which are needed more during the winter time than at any other season of the year. How many dealers feature them?

The retailer in question did not. He quite candidly stated that his sales from December on were not heavy. If a customer came in and asked for a certain article in that line, he could probably meet the demand. But no effort was made to promote sales. And yet his store was situated conveniently to draw the trade of a high class residential section. In such a locality, there is bound to be a good demand the winter through for certain paint specialties. The benefit was being reaped by someone; not, however, by the dealer directly entitled to it.

Profitable Winter Specialties.

Consider for a moment just what these specialties are. The most direct effect of cold weather is to keep people indoors. The wear and tear on the floors is, therefore, heavier than at any other time. In a well-conducted household, scratched and worn floors are not tolerated and it is a foregone conclusion that the winter season will not be far advanced before a supply of floor paint, varnish and wax will be needed.

Wax will be found a particularly good selling line. The social season runs through the winter months and floor wax is needed both before and "after the ball." In passing, it might be remarked that a hardwareman in a small city where social events of importance were always forecasted in the society columns of the papers, worked up a big trade by sending suitable literature to every home where a dance or social event of any description was to be held. This trade was not confined to floor wax, but included all varieties of stains and varnishes for interior decoration.

To revert to our friend, the somnolent hardwareman, who, neglected entirely the opportunities of a good residential locality, it is probable that he lost quite a good sized sum by not looking after business in that one direction alone.

Radiator Enamel.

Enamel for radiators is another line which should sell briskly from the first fall of snow until the start of spring. Not only will it be needed in the many new houses now being finished up but practically every household more or less will require a supply. Radiator enamel cracks and peels off and becomes dull in the course of time and a new coating is needed practically every year in homes where absolute neatness is desired.

Stove pipe enamel is still another good line. Nothing will rust quicker than a stove pipe. No matter how dry the atmosphere and how zealous the attention paid with the duster, stove pipes can become quite shabby looking in no time. Ever stop to figure out, Mr. Retailer, how many yards of stove pipe there are in your neighborhood and what percentage is sadly in need of a fresh coating of enamel? There are no statistics available on the question but there would almost certainly be several miles of pipe and possibly half of it would be more or less the worse for wear. Think of it; an opportunity to sell enough enamel to cover, say, a mile and a half of stove pipe!

But how many can say that they have made any special effort in this line? Those countless sections of pipe go unpainted because both owner and local paint dealer are neglectful. If the dealer were to make some effort to stimulate interest in this most useful commodity, he would doubtless succeed in promoting a big demand.

Featuring Winter Lines.

With the possibility of working up a good trade in so many lines, the hardwareman cannot afford to shove his paint stock to the rear.

A position, sufficiently near the front of the store to command attention, should be given to the best selling lines at least. Some dealers obtain good results by using a table, placed in the centre of the store space, for such lines as floor filler, wax and enamel. A very effective display can be arranged, calculated to catch the eye of every shopper. Little space is thus occupied and there is the opportunity ever present of working up a good demand. Is it not worth it?

Crops Were Damaged But Paint Prospects Good

Manufacturers have been conferring with their salesmen—Some Speak Against the Land Craze which is now Noted in the West—They think thisMay Cause Trouble if it Continues, but Nothing Seems toBode Ill for the Coming Year's Business—Everything, in fact, Points to Much Building and Much Painting—Retailers Already Buying Largely.

At this time, when travellers are in from the West to take part in the conferences which are being held by so many concerns, the managers are having an excellent opportunity to discover the true conditions. The word they have received from the travellers has seemed to indicate that next Spring will see the commencement of a banner paint season, yet the travellers are not blind to some problems which they and the managers will have to face.

"There is absolutely no doubt," said one man who has just made a trip through the West, "that crops have suffered by reason of the cold and rainy weather. Some people are stating that no damage was done, but this is not so."

Yield of Poor Quality.

"I know of farms," he added, "where the yield ran thirty bushels to the acre; and yet the loss will be considerable for the grain is third or

fourth grade. It shriveled in the stalk. Had there been good weather to the last the crop would have been simply wonderful—the greatest the West has ever known. But as it is the profit in some sections is smaller than in other years."

Another traveller complains of the real estate craze now infecting the West. "Every second man you meet," he says, "will pull out a note book and start explaining all about some property which simply must double in value in a year. People of all kinds are investing in this way. Clerks, domestics—they are all taking land. This has not done any harm yet, but if the thing continues money may get so tight that many people will not have any funds to invest in erecting new buildings or in improving those which they now have."

Manufacturers Not Timorous.

Evidently this state of affairs has not yet come about. Neither has the sectional poorness of the harvest brought any serious financial embarrassment, which makes the manufacturers timorous. They want to know exactly how things stand out in the new provinces, but after taking into account those conditions which may be expected to make money a little tight in the spring, they yet expect a bigger year than ever before.

"I have just been through the West," stated one manufacturer to the Montreal editor of Hardware and Metal. "I have seen the real estate boom in the booming. I have seen the crops, and I know that some sections gave a smaller yield than was expected; but despite that there is a general spirit of optimism in the West. From what I saw I feel sure that there will be more building next year than there was this. That means a big demand for paint. The building is not all going to be done in the cities. Many of the farmers are getting on a more firm financial basis. They will continue to add to their buildings, and they will want paint for these. There is nothing small about the western farmer. When he does a thing he does it right."

Orders Promise Well.

Indeed the orders which are already coming from the western hardware men show that they have no great fear for the future. They are ordering paint in good quantities already. It is early yet, and the travelers have not made anything like a thorough canvass, but where they have gone they have found a ready sale, and everything seems to indicate that this happy condition of affairs will be continued.

Breaking Away From English Control

Canadian Linseed Situation not Now Dominated by the English Market—An Advance there Does Not Necessarily Bring About Corresponding Advance Here—Competition Among Canadian Crushers is the Principal Cause of this Free Action—English Competition Not Feared Now.

What is the future of Linseed?

Again this oil is forcing itself into the spot light. For a time the high prices diminished, and after the first wonder at the lower level had subsided, linseed was regarded with more or less indifference. But now there is another upward movement. Little of the oil is being bought, but nevertheless those who handle it are keenly interested in the present trend.

The movement is not without its surprising features, the greatest of which is this, that while the English market is generally regarded as the primary linseed market, yet it is not now completely controlling the situation in Canada.

This week's changes provides an example of this. On Wednesday Montreal handlers were quoting oil at 90 cents for raw, and at 93 for boiled, yet then English raw oil would have cost 93 cents laid down in Canada.

Competition the Cause.

The cause of the independence of the Canadian market is just a little hard to determine, but it is seemingly due to competition among the crushers. They are not members of a combine. They are pushing hard for business, and they will sell at as small a profit as is necessary in order to secure the business. There was a time when the crushers would fix the price just enough below that at which English oil could be brought to this country to make sure of the trade. But now they do not seem to watch the English market so closely. When it goes up, it does not necessarily follow that an immediate rise will be made in Canada.

Do Not Fear English Competition.

It is not that the Canadian crushers fear competition from England, and therefore keep their prices much lower. There was a time when English oil was regarded as superior, but that time is long past. Now the paint makers of the Dominion, all things being equal, take Canadian oil in preference to all others. As Canadian hard is considered the best of wheats, so Canadian flax seed is regarded as the best on the market.

English oil, at the present time, is rising rapidly, probably because of a somewhat smaller Plata crop than has been expected. Indications are that it will continue to rise. This, of course, will raise the price at which English oil can be laid down in Canada, and so will give the Canadian crushers an opportunity to jump their prices, and still be safe from competition from the English oil. But that this jump will come for any such reason is far from certain. Linseed is now climbing here, but more because of a somewhat limited supply of Canadian flax, and because of a good demand, than for any other reason.

An Independent Attitude.

Canadian crushers, indeed, have adopted an independent attitude. They fix the price of oil for Canada, and do not allow English producers to do this. The one manner, indeed, in which the English producers seem able to get mastery of the situation in the Dominion is to buy Canadian oil. If the English supply should become small enough to make this seem advisable, then the Canadian supply would be diminished and the price would naturally rise. That a scarcity in England should otherwise bring about a great advance here, is, under the present competitive conditions, unlikely. For various reasons Canadian oil will probably advance in the next few weeks, but the upward tendency does not seem likely to be so great as that being evidenced in England.

JOINS LOWE BROS.

J. W. Shorney, formerly vice-president of the Toronto Lead and Color Co., and for 26 years connected with that company, has joined the staff of Lowe Bros., Toronto. Old friends will be glad to hear that he will be calling on them. Mr. Shorney has become well-known in the trade during the years that he has been connected with it.

YEAR STARTS WELL.

Cleveland, O., Jan. 4.—The Iron Trade Review to-day says:—The new year opens with steel mills in the Pittsburgh district operating on very satisfactory schedules and with heavy tonnages on their books for delivery over the first half of the year. In the east mills are not so active and some in eastern Pennsylvania are operating at only 50 per cent. of capacity. Car orders have come out rather slowly and the rail market lags, but men high in the iron and steel trade express confidence that there will soon be very heavy buying by the railroads. December made a highly satisfactory showing in pig iron sales and in most finished lines. In some finished products, however, especially steel boiler tubes, there is very keen competition.

Yes, Sir! Every solitary Paint Need you can think of is well and profitably filled by the famous ML Line.

ML Paints—Made just a little better and more carefully than the next best paint—they stand the weather test wonderfully well. It pays to sell paints that last—your customers blame YOU when they don't.

ML Floorglaze—A self-varnishing finish in solid and transparent colors—that dries glass-hard over night. Has a non-scratchable, brilliant surface. Good for any paint use.

Elastilite Varnish—In a class by itself—so good that even amateurs get fine results. Sell it without a doubt that it will give perfect satisfaction, for any varnish use, indoors or out.

THERE'S a good proposition waiting at our office for aggressive dealers. There are samples of all our lines at all three of our depots. Get in touch with us. We are aggressive folk ourselves, believers in advertising and we take care of people who deal with us.

Imperial Varnish & Color Co., Limited

6 to 34 MORSE STREET, TORONTO

108 Princess Street, Winnipeg 524 Beatty Street, Vancouver

Is Your Paint Stock "Common" or "Preferred"?

A Dealer's paint stock has in reality two values; it has the invoice value and the selling value. The invoice value is common to every paint stock, but it is the high quality and well advertised paint stock that is preferred by the public.

A good paint not backed up by resultful advertising is common stock, paying only small dividends, while an extensively advertised paint without sufficient intrinsic value to warrant the public's continued preference, is common stock, that pays dividends only for a time. It is not a repeater and soon loses its charm with Hardware men, who are "business builders."

The selling plan of "**High Standard**" paint is complete. It provides the kind of advertising that will bring the people into your store and make the first purchase, and it also provides the kind of paint that will bring them in the second time when they have repeat orders to place. This prospectus of preferred paint stock is based on facts—investigate the truths before making a decision.

The public does not usually accept anything without first applying its test; it tests its gold before it grants the Karat mark; it tests its silver before it grants the Sterling mark; it tests its men before it gives unto them the seats of honor—just as every dealer should test his paint before offering it to his trade.

If you believe paint advertisements—then all paint is the best paint. If you demand the proof of test—then one paint only can be **best.** Lowe Brothers do not hope to interest you by salesmen's oratory efforts, but they do hope to convince you by an investigation of his tests, and a comparison of "selling helps."

Is this year's paint stock to be "common" or "preferred?"

LOWE BROTHERS, LIMITED

DAYTON NEW YORK BOSTON CHICAGO KANSAS CITY

PAINT AND OIL MARKETS

SHARP ADVANCES.

The feature of the oil market has been the sharp advance reported in some sections in linseed oil. The increases vary from 5 to 9 cents. Turpentine has also advanced 2 cents in Toronto. Business at this stage is small in practically all lines.

MONTREAL.

Montreal, Jan. 4.—Those weeks which come immediately after a holiday season, such as Christmas and New Years, are quiet in practically every line of trade. Nor is paint any exception. The demand is now frankly admitted to be small. Manufacturers are bending their energies to getting ready for the spring demand, while retailers are examining their stocks carefully, and considering what they had best stock. Orders are being given—the quietness is not stopping the travelers—but the orders in the great majority of cases call for spring delivery. This is the mid-season, the season when little paint is being sold, but when all are preparing for the heavy sale which it is confidently expected will come.

The week has not been without its price changes. Were the demand great these would cause some excitement, but as things are at present no great comment is being caused. Little linseed is being bought now. Turpentine, it is true, is in fair demand, but even in that line the activity is not great.

Higher Prices Ahead.

Those needing to buy linseed, however, would do well to consider the situation carefully. Early in the week the handlers determined to sell at 90 and 93 cents, which is a three cent advance on the low figures of 87 and 90, which obtained a week ago. But 90 and 93 cents is not considered high enough, and it is practically certain that the week end will see 93 and 96 as the recognized price. Indeed it would seem that linseed is to be high once more.

Orders Being Placed.

As far as mixed paints themselves go, all is quiet. But, as has been intimated, orders are being taken, and it is expected that these will come in greater numbers within a few weeks, for shortly the various manufacturing companies are to send out their annual catalogues.

Demand Keeps Up.

White Lead.—Perhaps the demand for this line is keeping up better than the demand for many of the other lines. A good deal of indoor work is being done, and for this white lead is needed. There have been no price changes, nor does it seem that there will be any alterations in the figures as now quoted, certainly not for some little time. The lead market has steadied, and when pig is not rising there is little likelihood that a rise will be made in the product, despite the fact that makers contend they have for years been selling this article too cheap.

Putty.—Just the usual quiet winter demand is noted.

English Prices Up.

Linseed Oil.—Sharp rises have been noted in England. There seems little doubt that the crushers there have come to feel some doubt about the Plata crop. Upon this they depend for a great part of the seed used, and it can only have been word that the supply is not as great as was expected which has brought about the present sharp advance. It may be that the rumors of a poor crop have been started as bull cards to boom the market. But this is hardly likely. Linseed is not an easy market to corner. It would appear rather that after investigation the English producers have really felt that the crop will be insufficient for their needs.

It is undoubtedly this feeling which has caused such a sharp advance in England, and which will likely bring an advance here.

Glass.—More has been sold this winter than usual, yet the business is now quiet and will remain quiet until spring.

Petroleum.—The spread of the electric current has not had the effect upon the sale of oil which might have been expected. The demand continues large, larger than ever, indeed. Retailers attribute much of this demand to the prevalence of coal oil heaters. These, they say, are to be found in many houses, and in them much oil is burned.

Turpentine.—This oil is fluctuating a good deal of late. Last week it was quoted generally at 72 cents. Then the supply in Savannah increased, and the price dropped to 70 cents. But there is a tendency to advance again, and 72 will likely be asked by many handlers.

TORONTO.

Toronto, January 5.—The situation in paint and oils has been featured by several sharp advances. Linseed oil started the new year with an increase of 9 cents and turpentine went up 2 cents. There is not a heavy demand in either line but all indications at present point to still higher quotations.

Business in all lines is pretty dull at present. The travelers have started out on the road but the fruits of their labor have not yet begun to show themselves and the mail orders are scattered and small. Some booking is being done but it is mostly for spring delivery. The retailers are for the most part busy with their yearly inventories and it is, therefore, highly probable that business will continue slack for some time yet.

A Sharp Advance.

Linseed Oil.—The price of linseed oil was advanced on January 1 to 95 cents for raw and 98 for boiled. This is nominally an increase of 9 cents but a good many jobbers had made a tentative advance of 4 cents a few days previous so that, in some cases at least, the increase is only 5 cents. The jump in price is credited purely and simply to the high cost of seed. The flax crop in the northwest proved a disappointment after all. Late frosts and delay in harvesting reduced the total yield very materially and seed is dearer than had been anticipated. The expectation locally is that still higher quotations will be found in linseed oil before long.

An Upward Trend.

Turpentine.—An advance of 2 cents has been made in turpentine and the selling price now stands at 73 cents. This is deemed to be low in view of conditions on the primary market. The price at Savannah has been steadily advancing and higher quotations are expected here in the not distant future. There is no reason to anticipate a stiff advance, however. The demand is still light locally.

No Advance Made.

White Lead.—The price of white lead has remained at the same figure despite the fact that an advance at the first of the year had been anticipated for a month back. Despite the pretty general assumption that a higher price would be fixed, those in a position to know express the opinion that there is not much likelihood of a future advance for some time. Pig lead has not been advancing lately and this will have a tendency to keep the price of white lead at present quotations. There has been a first class demand for white lead; in fact, this commodity has been selling better perhaps than any kindred lines.

A Lull at Last.

Glass.—There is a lull at last in the demand for glass. The colder weather has stopped outside work pretty largely and the call for glass for construction purposes has become very small.

Putty.—The same condition prevails with reference to putty. Business has now sunk to a low ebb. Standard putty is quoted as follows: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC

100% PURE PAINT

Gives the Dealer a Good Margin of Profit

You might very reasonably expect that such a high grade paint—70% pure white lead, 30% pure white zinc—would be "away up" in price.

It would be if we were not corroders of white lead.

We have our own white lead plant; we are the only paint makers in Canada that corrode their own white lead. We turn over the pure white lead (Brandram's BB. Genuine) from our Lead Department to our Paint Department at factory cost.

We have also our linseed oil refining plant and our dry color plant. This makes us sure of obtaining well matured Linseed Oil, and strong, permanent colors at lowest cost.

You can maintain "top of the market" selling price on B-H **"English" Paint,** because you are selling the highest grade paint in the field. You are largely independent of competition, because no other dealer in your town can offer a paint up to the standard of 70% pure white lead—30% pure white zinc—100% pure paint.

B-H **"English" Paint** is a good seller—big sales and good profits. High quality means pleased customers—and pleased customers more money in the cash drawer.

B-H "English" Paint will be sold in your town. If the agency is still open you have the opportunity of securing it. **Write to-day for 1912 price list and details of selling plans. Address our nearest office.**

BRANDRAM-HENDERSON LIMITED

Quality Talks

That's why many progressive dealers have taken hold of the

"MINERVA"
Paint Proposition

Quality of goods, plus the most effective selling helps ever supplied dealers, are what have made the "MINERVA" Proposition a genuine profit-producer.

Convince yourself by writing for details and ask for the names of agents to whom you can refer, who have found the "MINERVA" Paint Proposition a real help to them.

All "Minerva" Specialties are sold in full Imperial Measure Cans.

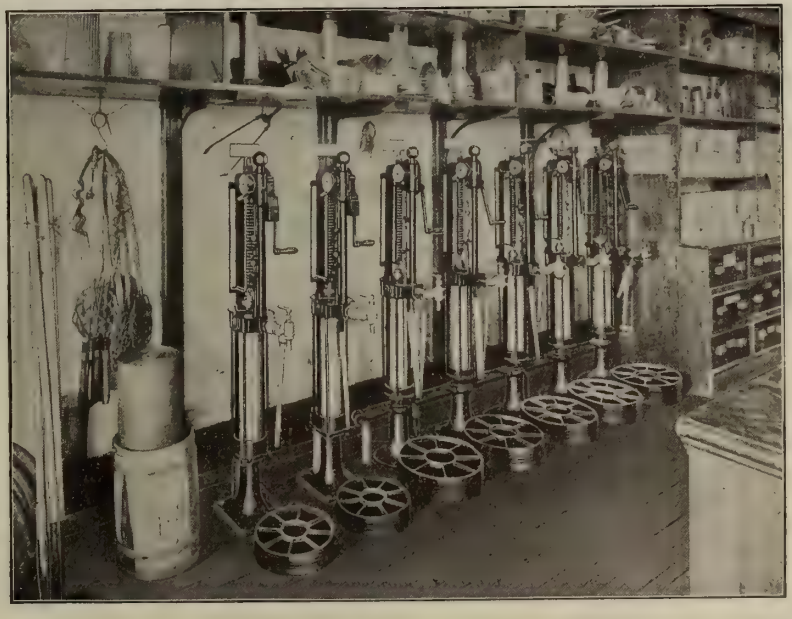
Pinchin, Johnson Co. (Canada) Limited

377-387 Carlaw Avenue

TORONTO

ESTABLISHED 1834

This Illustration was made from a photograph of a Bowser installation for Mr. Samuel Hobbs, 1434 Queen St. W., Toronto, Ont.



This system handles

Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

White Mountain, 5.c per lb.

Amatite ROOFING

AMATITE has a real mineral surface and therefore needs no painting.

There have been other ready roofings in the past which had a mineral surface, but they were not practical.

Amatite, however, is successful because the mineral matter is embedded in *pitch*. Pitch is very tough and has great adhesive power. Year after year these roofs will give faultless service without anybody giving a thought to them. This is the kind of roofing to have! The day of these smooth coated roofings that require a heavy coat of paint every year or two is past. They cost too much to maintain. More money can be spent on the paint alone during ten years than a new Amatite roof would cost.

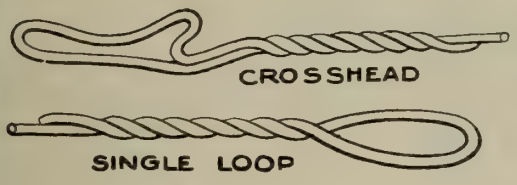
A free sample of Amatite Roofing and further information can be obtained by addressing the nearest office.

Everjet Elastic Paint. A very low-priced black paint—very tough and durable. Stands heat so well that it can be used on boilers. For wood or metal, ready roofings, fences, iron work, farm implements, tanks, etc.

THE PATERSON MANUFACTURING CO., Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B HALIFAX, N.S.

WIRE BALE TIES



Our wire, for baling hay, is made from the finest quality Bessemer Rods, and is 10 per cent. stronger than any other baling wire. This is a line that brings the dealer clean, satisfactory profits with every sale, as it is not the come-back kind. Get our prices and send us a trial order---we guarantee to satisfy. We also recommend our WIRE NAILS and STAPLES as inferior to none.

Paint for 1912

There will be more paint sold in 1912 than in all the years that have gone before. Let us help you to get a good big share of this trade. The old beaten paths are played out. People are tired of the played out paints, the cheap stuff that lasts for no time, the dear stuff that only hurts the pocket.

Ramsay's Paints

are your protection. They protect your guarantee, your reputation, your profit. There is profit in Ramsay's Paints, because the price is right, the quality is right. The man who won't pay the price for Ramsay's Paints doesn't want pure paints. If he wants pure paints he will take Ramsay's.

Ramsay's Paints for 1912---profit, protection, and success.

Stephens

"WA-KO-VER" Stains

Assure Highest Satisfaction

These standard quality stains have gained favor with many housewives as they have a remarkable toughness and elasticity and can be washed with soap and water without impairing the brilliancy of their finish.

Wa-Ko-Ver Stain does not cover up the natural beauty of the wood, but rather emphasizes the grain and imparts any desired effect.

WA-KO-VER is absolutely guaranteed to be just as we claim. The good profits will appeal to you.

Write for our color cards and prices.

A Bargain

must have two essentials in order to deserve the name—it must be useful and cheap.

Hardware and Metal

offers a real bargain in its Want Ad. Department. Here, at the lowest possible cost, you can place before the very persons most interested, **hardware men and men in the allied trades,** any respectable business proposition.

Here is Proof of the Value

SIXTY SWISS ARMY RIFLES, at $2.50 each. Box 920, HARDWARE AND METAL, Toronto. (48)

F. Y W. Braithwaite, Blind River, Ontario, who inserted this ad., says "It brought us replies from nearly every province of the Dominion."

The Cost was 39c

If you have any proposition, in which you consider hardware dealers, clerks or travellers would be interested, try a want ad. in

Filling Orders Promptly

Satisfactory service in the quick delivery of orders is an important consideration to busy merchants who need this service in extending their own business. Jobbers and dealers in every part of the Dominion are assured of prompt shipment of their orders for paint and varnish from our three large factories in Montreal, Toronto and Winnipeg. Orders for a case or a carload can be handled with equal facility and despatch. And remember that C. P. quality is the kind that extends sales and promotes large orders.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL

It is the central market place of the hardware trade throughout Canada.

There is always someone somewhere looking for just such proposition as you have to offer.

RATES (payable in advance) :—
2c. per word first insertion.
1c. per word subsequent insertion.
5c. additional each insertion when Box Number is required.

BUSINESS CHANCES

FOR SALE—Smart little hardware business; good turnover; stock about $4,500. Must be sold quick; owner going West. Box 593, HARDWARE AND METAL, oronto. (39tf)

FOR SALE—Hardware, stove and granite business. Established thirty years, doing a splendid business, stock will run about seven thousand and in fine shape. Yearly turnover twenty thousand; good store, can be rented or bought; fine farming country. This business will stand closest inspection. At rate on the dollar. Wish to retire. D. FERGUSON, Teeswater. (16tf)

FOR SALE — Hardware and Implement business in Saskatchewan. Turn-over $30,000 per year and increasing 30 % annually. No opposition for Hardware. Good paying proposition. Will sell with or without stock. Reason for selling—proprietor cannot handle with his other interests. Address Box 610, HARDWARE AND METAL, Toronto. (1)

FOR SALE—Hardware, stove and tinware business. Estaolished twenty-two years; doing a cash business last year of forty-five thousand: stock will run about eight to ten thousand. This is a money maker to a good live man. Good reasons for selling; splendid farming community. If interested would like to show you this business. Splendid store, can be rented or bought. O. B. HENRY & CO., Drayton, Ont. [1tf]

THRIVING HARDWARE BUSINESS FOR SALE consisting of shelf and heavy hardware, stoves, etc. Located in central part of Ontario; three railroads; turnover $50,000; stock $10,000, which is being reduced. Excellent chance to buy at rate on dollar. Retiring from business. Box 618, HARDWARE AND METAL, Toronto. (52tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25 % to 75 % of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited. Manufacturing Stationers, Toronto. (tf)

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

SITUATIONS VACANT

EXPERIENCED specialty salesman wanted; advertising experience desirable. This is a good position and offers splendid opportunity for advancement. State fully age, experience and salary expected. MACLEAN PUBLISHING CO., LTD., 143 University Avenue, Toronto. (tf)

SALESMAN WANTED.

THERE IS AN OPENING ON THE STAFF OF the Canadian Grocer for an experienced salesman with knowledge of the grocery trade. Advertising experience is desirable. This is a good position and offers splendid opportunity for advancement. State fully age, experience and salary expected. MACLEAN PUBLISHING CO., LTD., 143 University Avenue, Toronto. [1]

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THE YEAR we offer unusually good bargains in second-hand Typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. THE MONARCH TYPEWRITER CO., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE money you are now losing through not having a National Cash Register would pay its cost in a short time. Write us for proof. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

TECHNICAL BOOKS

Hardware and Metal
MONTREAL TORONTO WINNIPEG

Nature has solved the problem of distribution. It uses a multitude of agents to effect the distribution of its products.

Nature does not expect every seed to fall upon fallow ground and to take root. But, it achieves a profitable percentage upon its distribution. This is all that an advertiser has to do to reap a profitable harvest on his outlay.

It may sound incredulous to some dealers when we say the best season for selling paint is right now and will continue for the next six months.

Winter's chill, centers the family interest in the home and its decoration. No expense within the reach of the family pocket book will be spared to make home attractive and to allow the individual members to contribute their "labor of love."

There are some finishes about which the family needs a little education and is all that is necessary to turn your dull paint season into the busiest of the year.

Senour's Floor Paint and our high grade household paints are more in season now than at any other time.

To more familiarize the public with the use of our household paints we have prepared a series of advertisements for use in your daily papers.

These advertisements were produced at great expense and will bring a large volume of business to your store at the time you most need it.

We have many other ways of creating business for our dealers.

If you are a Martin-Senour dealer take advantage of this opportunity by stocking our seasonable goods, if not, ask us about our proposition today.

THE MARTIN-SENOUR CO., Limited

Pioneers Pure Paint

MONTREAL CHICAGO WINNIPEG

UNVARNISHED FACTS

DOUGALL VARNISH is the one varnish that will give perfect satisfaction.

Made under perfect conditions by the most experienced workmen, it has qualities which are not found elsewhere.

Dougall Varnish will cover more surface per gallon than any varnish made. When dry, it possesses a very high polish which it retains for a long time. Its lasting qualities are well known and it well deserves this description:

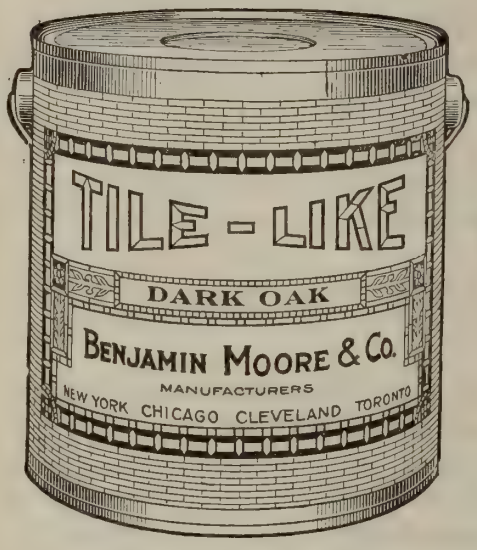
THE VARNISH THAT LASTS LONGEST.

The Dougall Varnish Co., Limited

J. S. N. Dougall, President

305 Manufacturers Street, - - - Montreal, Canada

ASSOCIATED WITH MURPHY VARNISH CO., U.S.A.



MOORE'S *Tile-Like*

is full of attractive selling points, and can be handled with profit by every hardwareman. "TILE-LIKE" is a colored **Varnish and Stain Combined,** and requires no stirring. No other varnish stain is so uniform in color as "TILE-LIKE," which has the added advantage of not hiding the grain of the wood.

Will not mar when used on floors, works easily, is slow in setting, and can be rubbed in 24 hours. Suitable for all kinds of interior woodwork. Buying "TILE-LIKE" means saving the cost of staining, and it will be found a high-grade varnish, the equal of any on the market.

GIVE "TILE-LIKE" THE PROMINENCE IT DESERVES.

Other MOORE Leaders are: Moorame1, Muresco, Floor Paint, Saniflat, House Colors, Impervo Varnish.

Write for Colour Cards and Prices.

NEW YORK CHICAGO CLEVELAND

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. pate nt No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-kn own and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	NAME OF BRAND
The Sherwin-Williams Co., Montreal, Canada	"Taxite"
International Varnish Co., Ltd., Toronto Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

When "CANADA" Cement is Specified

the builder is assured of uniform strength, fineness, color and setting qualities. Rigid tests, under the supervision of our general superintendent and general chemist, maintain this high standard of quality.

Each barrel is guaranteed to weigh full 350 pounds (gross) the maximum cement barrel weight.

Mills in all parts of Canada enable us to make prompt delivery.

Being in competition with, and controlled by the market for such materials as steel, wood, clay products and natural stone, the price of cement is governed by conditions. At present these permit of a high grade material at a very reasonable price.

Specify "Canada" Cement for buildings, bridges and concrete blocks, and be sure of satisfaction.

FIX UP YOUR CHIMNEYS

Even the best stove or furnace will be unsatisfactory if the chimney does not draw well. But the

"Zephyr Ventilator"

will give a good draft to any chimney. It will even allow the burning of soft coal in the stove, with good results.

We want you to sell the "Zephyr Ventilator" in your town. There is money in it, and the satisfaction that it gives will bring you new customers. **The "Zephyr"** cannot be excelled for ventilating the rooms of **Clubs, Steam Laundries,** etc. **The "Zephyr" makes high chimneys unnecessary.**

Montreal, Dec. 4th, 1905

J. W. Harris Mfg. Co., Ltd.
Montreal, Que.

Gentlemen:

It pleases me to be in a position to state that the "Zephyr" Ventilator placed on my chimney is giving me the greatest satisfaction.

The smoke which we used to have in the house has completely disappeared, owing to the good work of your "Zephyr" Ventilator.

I remain, gentlemen,
Yours truly,

The sweeper of quality

BISSELL'S
"Cyco" BALL BEARING

THE public is too well informed in regard to the merits of the Bissell sweeper to require any detailed description of the mechanical features that have placed our goods clearly beyond competition, and made the Bissell famous throughout the world. It is not how cheap, but how well we can construct a carpet sweeper, that has engaged our attention from the beginning, with the inevitable result that the Bissell sweeper is the recognized leader throughout the world wherever carpets and rugs are used. Our new Ball Bearing line marks the greatest advance in carpet sweeper construction up to this time and its universal favor with the trade and consumers alike is attested by the fact that four-fifths of our entire business of the past year is made up of Ball Bearing sweepers. Bissell's "Cyco" BALL BEARING is absolutely the only line of sweepers on the market sold at fixed retail prices that are rigidly enforced and that pay the dealer a good profit.

Your Drills Are Just As Important As The Most Expensive Part Of Your Plant

You cannot afford to slight the importance of your drills. It will pay you to study their efficiency with the view of making them do their part in the reduction of factory costs.

That "W & B" Diamond Drills will reduce cost and increase output is a fact which has been settled by comparative tests, conducted by satisfied customers. These tests have shown "W & B" Diamond Drills to be superior to all others.

To verify this you need only hold a watch on "W & B" Diamond Drills. We urge you to make this test for yourself.

Tools of Quality bear these marks

Tools bearing the "W & B" Diamond Trade Marks offer an insurance against inferior quality. The "W & B" Diamonds are a guarantee of quality. Be sure your dealer gives you Drills with these marks. Jobbers in all large cities will supply, or write us. *Ask for Catalogue 74 B.*

INCREASING WEALTH IN CANADA FAVORS THE SALE OF HIGH GRADE RIFLES

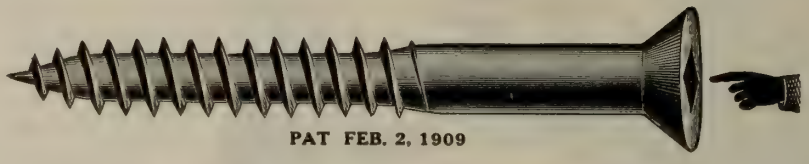
Don't be afraid to show the Ross "High Velocity" which retails at $75.00.

You may not appreciate the fact that there are a great many people in Canada who want the best and who are willing to pay for it.

The Ross "High Velocity" is the aristocrat of Sporting Rifles and is in the lead for power, mechanical perfection and style.

Discounts on application.

Ross Rifle Company **Quebec, Que.**



PAT FEB. 2, 1909

ROBERTSON SOCKET HEAD
WOOD SCREWS

Have a decided advantage over other styles of wood screws. By having a square hole, into the centre of which a specially designed screwdriver fits snugly, it does away with all possibility of slipping which often proves disastrous to the screw and wastes a considerable amount of the workman's time.

They will sell on sight—get our prices at once.

We also manufacture high-grade Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Send for catalog.

POINTS THAT SELL

Lowe Brothers

HIGH STANDARD

PAINT

Efficiency

This word efficiency punctures the "purity" bubble. A paint may be strictly pure from a chemical standpoint, and decidedly poor from a practical painting point of view. "High Standard" Paint gives best results—its supreme quality of all ingredients—its correctly proportioned formula—its minuteness of grind and its well-balanced cohesive and adhesive properties insure a surface coating that is uniform—far spreading and lasting.

Economy

True paint economy is measured not by price per gallon but by price per surface covered and years of wear. "High Standard" Paint, by its greater covering, hiding and lasting qualities, is the most economical paint. Its wear is gradual, leaving the surface in good condition for repainting. It excels in service any other paint (prepared or hand mixed lead and oil). We are ready and willing to prove this by performance rather than assertion.

Certainty

The most thorough, scientific and systematic factory methods tend to eliminate in Lowe Bros.' Plant the many paint-making mistakes common in most Paint Factories. Back of the making and testing of every batch of "High Standard" Paint is the brains of fifty years' experience. The result is a paint of ab-so-lute uniformity—one color like another—every gallon like the last — the allways reliable — always dependable "High Standard" Paint.

"He Who Serves Best Profits Most"

This aphorism is a truism. It's an undisputable fact. There is no getting away from it—there is no getting around it, under it, or over it. The only way to make money on a continuous business building plan is to serve best—deserve best. Add this slogan to your New Year's resolutions. Greater success awaits the dealer with the ***better*** paint line.

Think it over. You owe it to yourself—to your business, and to your customers to investigate this "High Standard" Proposition.

Action is the "winning beginning." When shall it be?

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any one of them will tell you Big Ben is the best selling alarm that's ever been put out.

In broken and dozen lots, $2.20 less 5%. In lots of 24, $2.10 less 5%.

The Western Clock Co., La Salle, Ill.

YOU can make sharpening stones one of your sellers if you handle Carborundum Sharpening-Stones. There is a customer in every user of edge tools—a Carborundum Sharpening Stone for every sharpening need—it's a stock that moves the year 'round—the demand is always growing. We do our share in meeting the call by producing a sharpening stone that gives a better edge in less time, that lasts longer, and doesn't fill or glaze—by creating the demand with national advertising—by aiding the dealer with advertising material, window displays, display cases, and other trade helps. The dealer can do his part by ordering a stock NOW and letting his customers know he is a Carborundum dealer.

Write for prices, discounts, catalogs, and complete details.

The Carborundum Company,

Niagara Falls, New York.

Branches in London, England.

THE LIGHTNING AND BLIZZARD

FREEZERS

stand ready to serve you in the same satisfactory manner in which they have served both trade and consumer for over a quarter of a century. The construction is of the same high class. They run easy, freeze quickly and take the smallest amount of ice and salt of any freezer made. The extensive advertising from season to season has created a permanent demand. They bring trade and help you keep it.

Better let your Jobber quote at once.

Let's Size Up the Situation

with a little common sense reasoning and a bit of money-making shrewdness.

Isn't it much better to have your Axe Order booked now for future shipment---prices guaranteed---and get all the goods ordered and just as ordered, than to wait until the season is on you before placing your order and perhaps pay more, suffer delay, and likely as not have the Sizes and Patterns most wanted "shorted" on the order, or substitutions made.

You Take Some Chances, But None to Lose

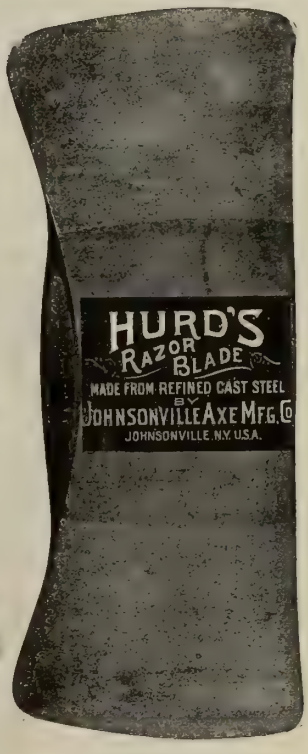
Therefore it is not a Gamble

If the prices advance, you make the advance, if they decline, you are protected and pay no more than if you had waited till the last minute.

Our Salesmen

are now out with an attractive sample line.

Have your fall requirements ready and talk the matter over with him, or submit them to us by mail.



We would especially draw your attention to our line of

HURD'S AXES

Their reputation is so well established that selling them is an easy task.

Remember This, that notwithstanding the **High Quality** and big demand for these axes, and their enviable reputation, the price is no higher, and in some cases lower than other axes which are not of the same high quality.

We have them in four finishes

Gold Bronze, Full Polished and Etched, Gun Metal and Fire Blue Finish. In all Popular Patterns, Styles and Weights.

Nicholson-made Files are the Standard of File Quality

The entire output of the Nicholson File Company in 1864 was 100 dozen per day. At the present time 16,000 dozen Nicholson-made Files are sold every day and shipped to all parts of the civilized world Unvarying good quality, coupled with progressive methods and strict specialization, is the cause.

In Canada these are the well-known factory brands made by the Nicholson File Company :—

"AMERICAN" "ARCADE" "GREAT WESTERN" "GLOBE"
"EAGLE" "McCLELLAN" "KEARNEY & FOOT" "J. B. SMITH"

Nearly every file user in Canada has a preference for one or more of these lines above all others. You can stake your reputation upon their absolutely uniform and satisfactory quality.

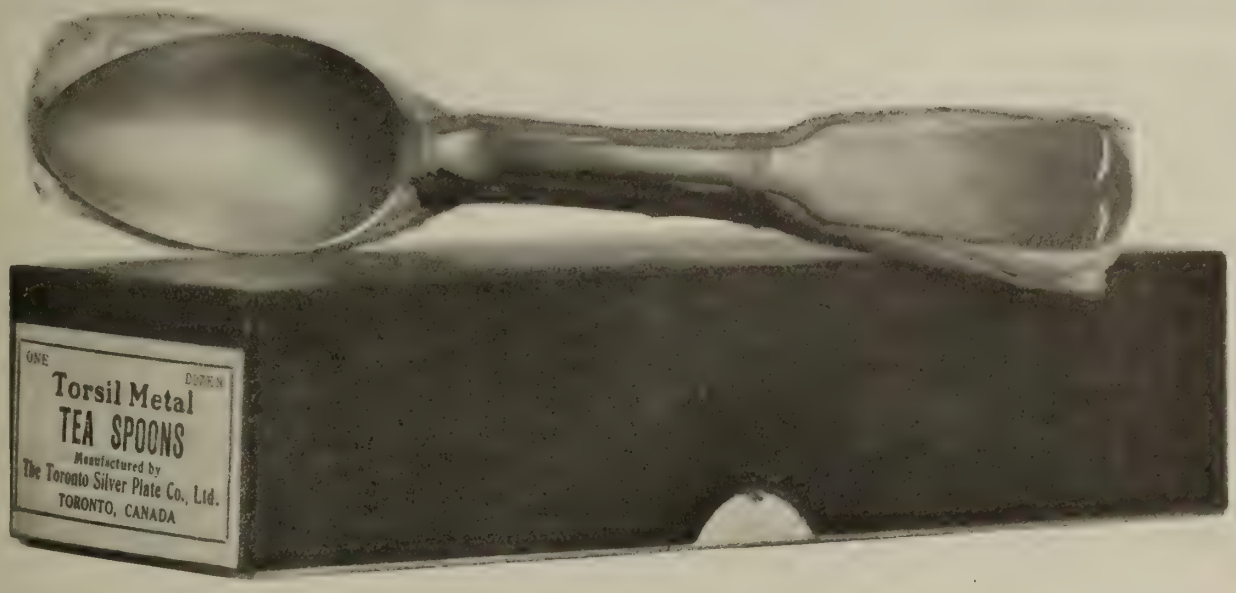
YOUR JOBBER KNOWS!

Nicholson File Co., (DOMINION WORKS) Port Hope, Ont.

TORSIL METAL

The Stamping of Torsil Metal on Spoons and Forks conforms with the Gold and Silver Marking Act

Tipped Pattern



Spoons and Forks made of Torsil Metal are guaranteed solid Metal throughout. Torsil Metal is a solid White Metal, exceptionally hard, combining durability and strength, no coating to wear off, will not rust, for hard usage will give perfect satisfaction, fully equal in quality and in some cases far superior to British, American or other Canadian made goods, and no higher in price.

For Hotels, Restaurants and family use, where customer does not wish to go to the expense of plated goods, Torsil Metal is without a parallel.

As there is no plate to wear off, any Silver Powder, Chalk or Electroine can be used to clean them; the more they are cleaned the whiter and more beautiful they become.

Torsil Metal Spoons and Forks are tied up in sets of six with olive green ribbon, packed one dozen in an olive green box and nicely labelled and plainly numbered.

If you cannot buy this line from your Jobber write us direct for our prices and a sample spoon; the sample spoon will not cost you anything, and we would like you to try it with a file and see how hard it is, and generally to compare it with any other similar line that you may be now handling.

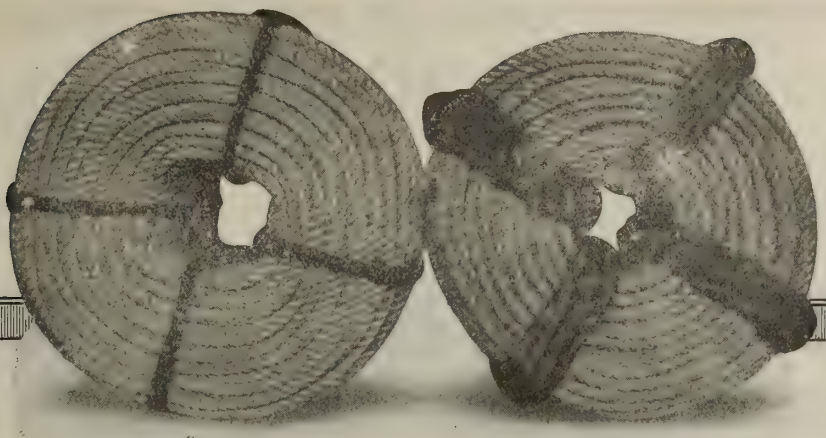
B. & S. H. THOMPSON & CO., Limited - MONTREAL

SOLE AGENTS FOR CANADA



"A"
PLYMOUTH MANILA

"B"
Rope sold as "MANILA"

Two Kinds of Manila Rope Always Available

One is very cheap rope — so poor in quality that it's expensive at any price; the other is very good rope — so strong and durable that it's always a good investment for your customers.

The difference is shown by this comparison of these two coils of one-half inch diam. rope; bought in an open market; stripped of coverings, photographed, and then tested. The coil marked "A" is —

PLYMOUTH ROPE
"The Rope You Can Trust"

"B" is some of the "so-called" Manila rope.

THE COMPARISON SHOWED:	"A"	"B"
Length of rope in coil of 97 lbs.	1250 ft.	1070 ft.
Weight of lashings	1 lb.	3 lbs
THE TEST PROVED:		
Weight per 10 ft. of rope	13⅜ oz.	14⅛ oz.
Strength at breaking point	2907 lbs.	1450 lbs.
(Use formula: Actual Strength ÷ Wt. per 10 ft. = Value)		
Comparative value ("A" worth 100%)	3477 or 100%	1642 or 47%

It is obvious that "A" is worth more than twice the value of a rope like "B". Yet PLYMOUTH costs but a very little more. Can you conscientiously offer your customers a rope like "B" when you can give them so much more for their money? PLYMOUTH makes good friends and customers for you. Ask your jobber about it.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. Today these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

"GOOD CHEER" Sidewall Registers

A line in four sizes, of uniform design throughout. Neat and tasteful pattern, and supplied in black japan, ordinary oxidized or full oxidized finish, with enamelled green fan. Our ordinary oxidized will about equal the more expensive full oxidized finish of other makes.

Positive acting fan—stays exactly where set, and when closed locks tight. No springs, etc., to weaken or loosen.

The price? It will pay you to inquire.

A full line of the above carried by The Jas. Stewart Mfg. Co., Limited, Winnipeg, Man.

The Jas. Stewart Manufacturing Co., Ltd.

Woodstock, Ontario

In This Hero Quality OILER

The following advantages are evident:

1. The Hero Standard Opening of 1½ inches is generous and ample.
2. The plate, being turned in at the mouth, presents a smooth doubled surface against the Washer, instead of the usual rough-cut edge, thus obviating any possibility of cutting it.
3. Double-Seamed Top and Bottom—no leaks.
4. Capacity—9½ ounces.

Can be furnished Copper-Plated or Enameled if desired.

Your Jobber has them.

No. 1100 (Straight Spout)
No. 1101 (Bent Spout)

HUMIDITY and PROFIT

Under the above caption, "Hardware & Metal" of 23rd December published an article which is of vital interest to every Furnace dealer in these days of keen competition with Hot Water and Steam Heating propositions.

WHY NOT LEARN MORE ABOUT IT?

Dr. William F. Colbert, in an article in January "House & Garden" says: "In recent years the relative humidity of air in heated buildings has been the subject of lively discussion, but it is now accepted as a fact that the air in artificially heated buildings should be maintained at approximately the same percentage of relative humidity as the average percentage in the outdoor air. To do this it is necessary to use special air moistening apparatus. As usual, the school and corporation officials have been among the first to avail themselves of this knowledge. The experience of school and corporation officials points the way for the man building a house for himself and family, for he stands to profit by the saving in doctor's and druggist's bills in addition to the increased working efficiency of himself and his family."

Stewart W. Jameson, in his recent address before the Midland Club in Chicago, said: "Doctors tell us that a relative humidity of 60 or 65 per cent. is necessary to good healthful atmosphere. All our systems for residence work fail in this by a large per cent. The subject of humidity has been well discussed before this club. Many of you have thought as I would have done before I bought a couple of hygrometers, 'Oh, well, that doesn't apply to our heaters, we have a vapor pan.' But the hygrometer will tell you how far below normal your actual moisture falls. It is necessary for warm air furnaces, or any system, to supply more moisture to the heated air, and it is easier done with warm air than any other system of residence heating."

HERE IS YOUR OPPORTUNITY

Of course, we will tell you something about the "GOOD CHEER" WARM AIR FURNACE WITH CIRCLE WATERPAN, but our main object is to place in your hands the whole article on "Humidity in Living Rooms," written by Lillian S. Loveland, from which "Hardware & Metal" has quoted. Through the liberal use of the long distance phone and lettergrams we succeeded in securing several hundred copies of the magazine containing the article in question, and

Securing Late Sale of Winter Sporting Goods

Mild Weather of the Christmas and New Year's Holidays Has Left Many Dealers With Heavy Stock of Skates and Other Winter Goods Upon Their Hands—Some are Using Advertisments to Stimulate Trade With Good Results—Many Others are Making Attractive Window Trims—All Might Well do This, for Winter Sporting Goods Lend Themselves to Window Dressing Particularly Well.

Something must be done to overcome the evil effects of the mild weather which was experienced practically all over Canada before and during the Christmas and New Year's holidays. Because of the lack of snow and the lack of frost, there was a great lack of trade in winter goods; and because of this hardwaremen now find themselves with large stocks of skates and other paraphernalia of winter sports upon their hands. What are they to do in order to get rid of their stock profitably ? It is a question which is interesting hundreds of dealers at this time.

With the coming of the new year came also a fair amount of snow, and frost in quite sufficient quantities. This condition of affairs may be expected to bring a good demand for the winter goods. Those who really need skates, snowshows, sweaters, skis, hockey sticks or similar goods, will get them now. At Christmas they did not buy, for they needed all their money then, and there was no great reason to make their purchases seeing the weather was unsuitable for outdoor sports. But now the conditions have changed, and purchases will be made.

Have to Persuade Some People.

If all the trade were done with people of this class the dealer would have little cause to worry. He would know that business had been delayed somewhat, but would also be aware that this would be made up in the course of a few weeks. This happy condition, however, is not the case. Those who want skates or some other article and are quite sure they want them are only a part of those with whom the hardwareman must deal. Another, and perhaps a larger class, is composed of those who had thought of getting new skates, sweaters, skis or snowshoes, but who, having gone this far without having any use far these articles, think that they will now be able to make last year's equipment do. "The season will be short, now," they argue to themselves. "It won't be worth my while getting those things. I'll use what I have this year and get a new outfit at the commencement of the next season."

An ad. used by a Montreal firm to emphasize the coming of a real winter.

Good Newspaper Advertising.

It is such people that the manager of the hardware store's sporting goods department must reach if he is to dispose of his stock at a good profit. He has to make these people see that he has something to offer which is still worth their while to consider. He has to make them see that the money outlay will not be too great.

Newspaper advertising is among the best methods of accomplishing this object, and this means is now being taken by R. & W. Kerr, Limited, of Montreal, a firm which deals largely in sporting goods. One of the ads used by this company is here reproduced. It will repay some study. At the top there is that picture of some enthusiasts enjoying an exhilarating slide—a picture which will at once attract the attention of the enthusiast. Then beneath comes the line : "Real Winter at Last." That, too, catches the eye. It makes the outdoor sport lover wish to get outdoors. He will read on. He will read about the various skis, of the ski boots, and of the pure wool sweaters. He is likely to think as he sees the price so frankly quoted : "Oh well it isn't such a lot, and I'll get a great deal of amusement for the outlay."

Suggests Other Goods.

This ad., by the way, though largely about skis, does not forget to suggest at the end that all other sporting goods are carried too. That is a wise clause, for it does not allow readers to forget that they may get their skates, hockey sticks, pucks, etc., in the same place as the skis and sweaters. This is a good ad. all around, one which will bring results, yet perhaps it might be made still better by the omission of the dividing line above : "Real Winter at Last." As it appeared in the paper, this line seemed to conclude the advertisement. At first sight, indeed, it seemed that the matter below told of the goods at another store.

The W. H. Scroggie Company has been advertising a cheap line of sweaters. Where these were bought is a question. It seems inconceivable that a boy's sweater coat can be sold at a profit for 75 cents, but evidently this

Ad. employed by W. H. Scroggie & Co., of Montreal, to secure sales of coat sweaters.

is possible. Something about the sweater and the price for which it may be secured is clearly set forth in the section of Scroggie's ad. devoted to the sporting department. It is a talk to the store's patrons which brought splendid results.

Using the Show Windows.

Many dealers are not advertising through the paper at all. Some are not advertising in any way, but a large number are not so forgetful of their opportunities. They are using their show windows to good effect. Of all goods, perhaps those used in winter sports lend themselves to a tasteful and attractive display the best. At this time, therefore, when many dealers find themselves a little better supplied with skates and similar lines than they could wish, they should take great care with their trims. Bring these lines forward. Make the people stop to examine. Show the price at which they may be secured. The sales will come, and the evil effects of a mild holiday season will be small indeed.

Growth in Canadian Export Trade Predicted

Home Manufacturers are Turning Their Attention More to Foreign Markets—Stove Manufacturer Suggests Co-operation in Reaching Other Parts of World—Later Information Confirms Reports of Prosperity Throughout Canada.

Further information has been secured during the past week on the points touched upon in an article in last issue, viz., the condition of trade in Canada during 1911 and the prospects for the year that is ahead. The replies received tend to strengthen the conclusions reached previously; for they express nothing but satisfaction with the past, and breathe unbounded optimism with regard to the future. New side lights on certain aspects of trade are cast by information thus secured. Particularly is this true with respect to export trade.

In this regard a suggestion from a stove manufacturer stands out prominently. In dealing with the problem of exporting Canadian made stoves, he says:

> "There are few Canadian stoves exported, but we believe a successful export trade could be done in South Africa, South America and China, if five or six stove firms would amalgamate and devote the products of the foundry, which has the most convenient location for shipping, to export business.
>
> "The writer has gone into this matter thoroughly, and has a good knowledge of the class of stoves required, but Canadian stove firms as a rule are so busy with their home market, that very little interest is taken in the matter, so that until conditions change we do not anticipate very much along this line."

Will Increase Soon.

Another firm in the paint and oil line, say: "Our export trade is at present in its infancy, though from the hearty recommendations which we have received from abroad, we believe that it is only a matter of a very short time before this trade will materially increase."

A hardware specialty manufacturer writes: "With reference to export trade, beg to say that it has increased considerably during 1911 and the general outlook, both in Canada and abroad, is very encouraging."

A manufacturer, who is close in touch with general industrial conditions sums up the situation as follows: "Canada is expanding too rapidly to enable home manufacturers to do much more than supply the home demands. Nevertheless, there is a distinct tendency to turn attention to the possibilities of foreign markets. I believe that the near future will see Canadian firms competing in the largest markets of the world. The effect will be good, as the product of our home industries will improve by coming into competition with the output of other countries."

A Banner Year.

Further tribute to the good results of the past year is paid by a Canadian hardware manufacturer, who says: "We have found the year 1911 very satisfactory, our turnover having been in excess of the preceding year. This is rather more than we expected, 1910 having been our banner year."

A manufacturer of brushes and paint specialties, says: "During the year 1911, the prices of various materials used in the paint trade were advanced, which, we believe, resulted in less painting being done. Notwithstanding this, the trade in paint brushes was good and, in fact, our sales increased very materially over the previous year and were far in excess of any year in our history. This increase was not experienced in any special part of Canada, but was general all over the Dominion, as our salesmen cover the country from the Atlantic to the Pacific Coast. Our increased trade has been almost entirely due to the growth of the country."

Twenty-five Per Cent.

A stove manufacturer gives a definite opinion on the extent of the growth of the stove industry during the past year. He says:

"Judging from the expansion of the West, the large increase in the number of firms who are handling stoves and also the new firms who have started manufacturing stoves, we think the total output for the year will probably show a 25 per cent. increase over 1910. Over one-half of this total increase should be credited to the Western provinces."

To sum it all up, one is deeply impressed with the unanimity expressed on all scores. It is quite manifest that the prosperity of the year has been shared in by all; it has not been confined to any one section of the country or any one industry.

"Hard times" never arrive unheralded. Depression does not fall like a bolt from the blue; on the contrary, there are forerunners which indicate that industrial conditions are not entirely healthy. Rumors of retrenchment, indefinite postponement of plans for expansion, cancellation of orders and slowness in meeting collections, bring into evidence the fact that lack of confidence prevails.

At the present time there is not a whisper to indicate that the present prosperous conditions are at all liable to terminate. None of the forerunners of depression are in evidence. It is, therefore, perfectly safe to predict that 1912 will be a banner year in the industrial history of the Dominion of Canada.

GOOD YEAR IN EAST.

Everyone admits, says the merchant, that the volume of trade in hardware was very large during 1911—some say very much the largest they have ever experienced. One firm told us that a few years ago they had some big contracts for cement which ran the sales of that year into quite a bit of money, but this year they were even better, and taking into consideration the difference in the character of the stock which made up the aggregate, the comparison was very much to the credit of 1911. It is quite easy to understand why the hardware business should have been good during 1911.

Selling Cement During the Winter Months

Cement Can be Used Even During the Most Severe Weather—This Fact Should be Used by Hardwaremen in Effecting Sales—Stocks Should be Laid in Early.

Cement is not a one-season commodity. It can be used fifty-two weeks in the year; consequently, it can be sold from one year's end to the other. This statement may prove somewhat of a surprise to some hardwaremen who, although they have handled cement in large quantity from the time that they first started in business, have taken it for granted that sales automatically ceased with the advent of winter weather.

There is a certain demand for cement right through the winter months. Interior building work continues, and this entails a call for supplies of cement. Mild spells arrive at intervals, and energetic contractors are bound to take advantage by rushing along construction work. Any cement manufacturer will tell you that sales during the winter go up with the mercury. Mild weather means a retail demand for cement and no dealer should be caught unprepared.

A Fallacy Exposed.

The impression has existed, and is probably still held by a good many hardware dealers, that cement cannot be used during cold weather. Practice has proven this to be entirely erroneous. It can be used when the temperature has gone very low.

To mix in cold weather, it should be used with hot water and hot sand and gravel, or hot stones. Some use salt in the water, but this is not regarded now as good practice, especially where steel reinforcement is used. Salt has a peculiar chemical action on some cement, and good results are not guaranteed. Particular care should be taken in selecting the material used for mixing. All sand, or gravel and stone burnt in heating should be removed.

protect cement during its initial set, by using straw or manure, or a heavy tarpaulin.

Using This Information.

These facts can be used to splendid advantage by hardwaremen. For instance, a farmer is anxious to do some construction work about his barn. He has plenty of time to do it during the winter, but is held back because he is under the impression that cement will not set when the weather is cold. If, on the next occasion that he visits a hardware store, the proprietor dissipates that impression, and proves to the farmer's satisfaction that he can use cement, no matter what the atmospheric conditions may be, he will purchase a supply at once.

The retail salesman cannot acquire too much practical knowledge of the goods he is selling; and, once acquired, the knowledge cannot be used too often. In the case of cement, hardwaremen should spare no effort to disseminate among customers, who might be classed as probable users of cement, the fact that it can be used to good advantage at all seasons of the year. Good sales are bound to result.

A Concrete Instance.

Specific instances might be quoted to prove that cement can be made a fairly active line in winter. Here is a case in point.

W. A. Rankin, Ottawa, does a splendid trade in building materials. Naturally, he sells a lot of cement. It has been his experience that cement sells more or less steadily the whole year around, and he keeps that line to the front. A representative of Hardware and Metal happened to be in his store about two weeks ago and saw ten bags of cement sold to one customer. It was extremely cold out at the time. Mr. Rankin stated that such sales were by no means unusual.

Stock Up Early.

It should be borne in mind that, even if sales were few and far between, it would still be necessary for the hardwareman to carry sufficient stock to meet cases of emergency. When the necessity arises in structural operations, the work cannot be held up for the want of cement. If the hardwareman who has been supplying the material for the work has neglected to keep cement in stock, the contractor will go elsewhere. There is a danger that he may never come back.

It is highly important, therefore, that hardware dealers should stock up early in the year. This recommendation cannot be made too strong. Supplies should be kept on hand at all stages of the year, but the spring stock should be secured without delay. Early delivery should be arranged for; the dealer who takes care of the requirements of the consumer, in season and out of season, can depend upon building up a large and consistent trade.

Stove Manufacturers Buy Motor Trucks

McClary Manufacturing Co., London, Add Four Machines to their Equipment—One Truck put to a Rigorous Test—New Transportation Facilities will Prove an Economy.

London, Jan. 8.—The McClary Manufacturing Company have just made an unusually large purchase of the kind—probably the most extensive in Canada, so far—of four motor trucks. These trucks will be used for the work of the Toronto, Montreal, Winnipeg and Vancouver branches of the firm. The ones for Montreal and Winnipeg are three-ton trucks, the others two-ton.

"It is a matter of better service with us, rather than economy, though that may result, too," said Mr. Gunn, McClary's buyer, when seen by Hardware and Metal at the head office here. "At the branches we have had a lot of carting done by transportation companies, and these trucks will to some extent replace the horse-drawn outfits. We have some long hauls to make; for instance, in Toronto we run out to the Junction, and there are long regular routes. Now a truck will do 30, 40 or 50 miles a day at this sort of work. We are hoping it will work out as a measure of economy, but we are desirous of providing the best possible service in any event."

In Montreal, where trips have to be made to the suburbs, it was pointed out more goods can be loaded on these trucks and the distance covered in less time, perhaps half the time, than with the horse-drawn lorry. The ordinary lorry can never be loaded to capacity, with horses as the motive power.

McClary employes will be the chauffeurs in each case if it can be so arranged.

Horse-drawn outfits are much more expensive to buy and maintain than in former years, and in a city the items of stabling, feed, harness, attendance, etc., come high.

It is interesting to note that one of the trucks brought to London as a sample gave a demonstration not on the programme. It was to be driven from London to Toronto, and Mr. Smith, of the McClary staff, suggested: "Why not take along a load of stoves that are going down there?"

"All right," said the motor truck people, and thus a practical test of a somewhat severe nature was undertaken.

The four cars are costing in the neighborhood of $18,000, and will undoubtedly be added to at some future date should the plan work out successfully in detail.

PUBLISHED EVERY SATURDAY.

KEEP UP THE GOOD WORK.

Many hardware dealers who do not attempt to get away from the regular routine or to rise above commonplace methods at any other time of year, develop into publicity agents of the highest order around the Christmas season. They plan aggressive campaigns, enlarge their stocks, advertise convincingly and arrange attractive window displays. But when the holiday excitement has subsided, they go back to the old order, neglect to keep their premises and windows attractive and soon discover that sales have relapsed to a mediocre standard.

It is conceded that the special efforts made at Christmas time pay well; but, strange to say, many dealers have failed to grasp the very obvious conclusion that what is good at one time, can be made equally profitable all the time. If attractive windows and striking advertisements can bring business along at one season, the same results can be obtained at all seasons. It does not pay to lag the year around and provide just one hard spurt near the finish. In fact, the more a dealer perseveres, the better the results will be. The continuity of interest that is aroused by consistent efforts is the strongest factor that a dealer can have in improving business. One good window deserves another; keep it up and the public begin to look for them, to take an interest in your work and to buy their hardware from you.

A share at least of the activity and energy, that the average merchant displays around Christmas, should be infused into his every-day methods. Do not let the good work lag. A lasting and profitable business was never yet constructed on the basis of occasional campaigns.

THE IMPORTANCE OF BUYING.

Books on salesmanship are now to be had by the dozen. There are correspondence courses on salesmanship; and some department stores have even founded schools, within their own walls, in which they teach selling. All this is good, yet it must not be forgotten that selling is only one end of any business. An important end it is, but an end which would be of no value were it not for the buying which comes first.

Buying, by many firms, is given the serious consideration which it deserves. But there are other business men who do not pay such attention to it. They study selling methods, but let the one who is selling to them arrange their stock selections.

If selling has to be studied, buying needs equally careful attention. Every day there is something to learn along this line. A man has to train himself to observe, and to draw conclusions from what he sees. An example may easily be given. For some months tin has been moving upward in price. Now tin plates have advanced to the large handler. The price put upon the plates when sold in moderate quantities has allowed a wide enough profit to render an immediate advance there unnecessary, but if tin plates go up again the small buyer will have to pay more for them. The situation is of a nature which must make the careful, studious, buyer consider if it would not be well to lay in a good stock now.

Copper is another metal which has been moving upward. From time to time it has been stated by market students that the rise must stop. But the rise has not, and now an advanced price has been fixed for nickel and copper ware, in the manufacture of which copper is used. Could the buyer have connected the rise of the metal with a rise in the utensils made from the metal, it would have been possible for him to lay in such a stock that he would later be able to sell to greater advantage.

No matter how small a man's business, it is undoubtedly well worth his while to study buying carefully.

CHANGE AD. COPY OFTEN.

Reference will be found in another column to the practice, unfortunately pretty general, of allowing advertisements to run beyond the time when they are reasonable and useful. For instance, pick up a newspaper to-day from any part of the country and you will will find a few Christmas advertisements still running. If you pursue your search sufficiently far afield, you will find merchants advertising hammocks, warm weather goods of all descriptions, articles which they could not sell at this time of year. Some of these delinquent advertisers are hardwaremen

The editor has a collection before him at the present moment of hardware advertisements clipped from newspapers in all parts of the Dominion. They are given up entirely to reviews of Christmas bargains and, quite apparently, have never been changed since they were first inserted a month or six weeks ago. A few choice specimens of almost ludicrous neglect have also come to hand. A hardwareman located in an Ontario town is advertising gas ranges for use "these warm days." Another dealer whose seat of business is located in Quebec is paying his hard earned money to talk to the subscribers of a weekly paper on the merits of screen doors.

A dealer who takes so little interest in his advertisements that he can forget them for six months or so, should not attempt to advertise. The use of newspaper space in the manner cited above serves one purpose only; to hold the firm up to ridicule. This is bad advertising of the very worst kind. Who would care to deal at a store where the laxity shown in so essential matter might possibly be indicative of the general policy?

Change your copy often. Do not allow it to continue until it becomes a joke at your expense.

THE TRAVELERS' PROTEST.

The protest of the traveling man on the score of hotel accommodation was referred to in our last issue. Later developments indicate that the movement is gaining weight. The petition is being largely signed and will

shortly be sent to the Ontario Government with many thousand names attached.

It should be distinctly understood that the protest is lodged on the score of accommodation in all sections of the province of Ontario. It should not be implied that the traveling man finds his lot a hard one only in the dry or the wet belt. He finds that conditions are open to improvement in practically all sections, whether liquid refreshment is tabooed or not.

The travelers feel that they want the support of everyone interested and are making an earnest effort to secure general endorsation.

LEARNING FROM THE PEOPLE.

Within the last few weeks the Psychological department of McGill University, Montreal, has been endeavoring to discover the opinion of the people generally upon newspapers and newspaper advertisements. To representative men slips have been sent, asking them to state what paper they like best. What feature of it especially appeals to them. What attention they give to advertisements. What advertisement attracts them most. Whether they like best display type or illustrations. These and several others questions.

The answers received must have been satisfactory, for this week the Psychological department has sent their list of questions to women, asking them to send in replies.

The exact object of this inquiry is not explained. Doubtless, though, it is to find what class of article and advertisement appeals to the various classes of readers. The information gained can hardly fail to be valuable if the answers are truthful. But therein lies the trouble. A man will calmly state that the high-class editorials of a certain paper greatly appeal to him, and yet he will turn eagerly to the sporting page when his young son is not looking.

But whatever the result of this inquiry, the fact that the inquiry is being made is significant. It indicates that the Canadian Universities are keeping up with the times. Institutions of learning themselves, they have learned that they must learn from the people. They have realized that their students must know the thoughts and feelings of those with whom they will later work, as well as the thoughts and feelings of those who lived many centuries before the daily paper had a place on the well-ordered door step.

THE WEAKNESS OF PRICE CUTTING.

It probably never occurs to the price cutter that in a great many cases he is reducing his price without helping sales along in the least degree. The average buyer is more or less ignorant on the matter of prices, except where common articles are concerned. When a specialty article is in question, the buyer has only a vague idea of what the price should be. Therefore, when the dealer is offering that line at a reduced figure, the customer does not know that he is paying less than he would elsewhere. In all probability, he would have quite cheerfully paid the regular price if it had been asked in the first place. Even if the goods were offered at cost, the customer would not properly appraise the inducement thus offered and would not, therefore, be any more inclined to buy.

Stock-taking should be done on a conservative basis. The inflation of values to make a good showing is a dangerous form of self deception, often creating a false sense of security.

POINTED EDITORIALS.

When stores adopt the early closing plan, customers soon get the early shopping habit.

* * *

Higher prices are predicted in glass. There is every reason to believe that the upward trend is permanent.

* * *

A Montreal dealer asserts that the present is a splendid time to push the sale of interior paints. Of this dealer, as of Abou Ben Adhem, we express the wish, "may his tribe increase."

* * *

Energy and ingenuity can accomplish splendid results even with the poorest of facilities. Why should any hardwareman despair of getting results from window displays because his window space is limited? Experience has proven that the best trims have sometimes been arranged in the smallest space.

* * *

Some hardware dealers strive to make their store premises and windows attractive during the Christmas season, but utterly neglect such matters at all other times of the year. Surely if it pays at the one time, it would pay the whole year around!

* * *

Exaggeration in advertisements has done more to undermine public confidence in the sincerity of business men than any other single cause. Study to avoid exaggeration in even its mildest forms. A plain unvarnished statement, with sincerity behind it, is better than a flamboyant assertion of fictitious claims.

* * *

It will certainly take a long time for the motor truck to effect the complete emancipation of the dray horse. Nevertheless, the change is coming; gasoline is triumphing over equine brawn. One cannot help but indulge in speculation as to what will become of Dobbin when the vogue of the horseless carriage reaches its height.

* * *

Canadians do not realize to the fullest the growth of the country until a glimpse is obtained of conditions as they existed two decades or more ago. The views of Andrew Carnegie, quoted in another column, cannot be accepted as indicative of the world's opinion twenty years ago, but it goes to show the strides Canada has taken since that time.

* * *

New Year resolutions, like laws, seem made to be broken. It is, of course, inevitable that the faults of years' standing should take some time in correcting. A man cannot break a bad habit at once; he will back-slide frequently before he gets that bad trait finally broken. The trouble is that he takes the first relapse as indicative of his inability to reform and falls back with relieved readiness into the old rut.

* * *

"Christmas is Coming," is the fact advertised by an Ontario hardwareman on January 4. A list of likely gifts follows. This is starting the 1912 Christmas season early with a vengeance. Or is it just another evidence of the forgetfulness which costs retail merchants good hard cash?

* * *

To prove that cement sells right through the winter months, it is not necessary to quote "concrete" cases. A number of striking instances, which serve as proofs, have come to hand recently, however.

The Management of a Retail Business

No. 3—STOCKTAKING—Continued

By H. C. Carson, F.S.S.

Our article of last week mostly concerned the question of stock-taking, with special reference to the valuation of goods, their depreciation, and other features, methods, and principles that should govern every serious attempt to ascertain the money worth of a business at a given time. The stock sheets, however, form only a part of the inventory. In reality, although not in name, the whole balance sheet is an inventory and consequently the other items, assets as well as liabilities, should be listed and valued.

Inasmuch as merchandise and fixtures, with which we have already dealt, belong to the asset side of the balance sheet, we had better adhere to this side for the present and first of all look into the question of accounts receivable. We will not discuss now the merits or demerits of cash or credit systems. There is much to be said on this point, and it will be reserved for an article later on in the series.

Charge Accounts Correctly.

The first thing that should be made sure is that all accounts have been properly charged, or credited as the case may be, up to the time of stock-taking. Sales made after the stock has been taken should not be posted to accounts receivable until after the balances have been struck, but if they are, care must be taken to deduct the cost value of such sales from the stock sheets, otherwise a false inflation would arise.

There are few merchants doing a credit business that do not sometimes make an error in extending credit, and when making the list of accounts, taken one by one from the ledger, the merchant should weigh the collectible value of each, taking all circumstances into consideration.

It is better to clasify them under three of four heads, using paper ruled with sufficient money columns for the purpose. By entering the ledger folio against each name considerable time may be saved from time to time in making reference to the ledger from the sheets. If three classifications are used they might be termed "good," "doubtful" and "bad," and if four classes are adopted, the "good" may usefully be divided into "prompt pay" and "slow pay."

Do Not Overestimate.

Very often the dealer will be in a quandry as to what class a certain account should be assigned. A safe rule to follow in this event is to place it in the lower class, that is, if he is debating in his mind whether it should be good or doubtful, make it the latter. If doubtful or bad, make it bad. The mere fact that the merchant himself admits of doubt is proof enough that this rule should be followed. The object, of course, is to get at the true worth as nearly as possible, and it is better to err on the side of conservatism rather than the reverse.

Having completed the list, and ascertained the total of each classification, the question arises as to what value should be placed upon them. The list of good accounts should, of course, go in at par. Doubtful accounts should be subject to a depreciated valuation determined by the merchant who knows, or should know, all the circumstances in connection with each account so listed. As for bad accounts, they should have no cash value in the balance sheet. Bills receivable, of course, should be subjected to the same mode of treatment as accounts receivable.

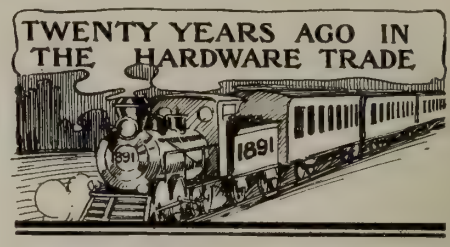
Serve as Good Reminder.

Besides serving the purposes of the merchant in preparing his balance sheet, these lists of accounts, made in duplicate, if necessary, can be made to serve as a tickler or reminder in the important work of collecting accounts. The doubtful list should call for immediate attention and efforts made forthwith by judicious means to turn the accounts into cash. The bad accounts should not be entirely discarded until every resource has been exhausted.

WANT BOUNTIES RESTORED.

Ottawa, Jan. 6.—A deputation representing the big steel interests, waited on the Government and again made the request that the bounties on pig iron be restored. The result of the interview has not been announced, but it is believed that the Government will postpone action until the Tariff Commission have completed their enquiries.

When in Ottawa a short time ago to press their claims, the steel men suggested a partial renewal of the bounties, pending an enquiry. They expressed the confident belief that when proposed extensions of the business and all things were taken into consideration, the Tariff Commission would be convinced that it would be in the interests of Canada to give increased protection, either in the way of a higher tariff or a renewal of all the old bounties. It is understood that arguments along similar lines were advanced to-day.



The following items were taken from the issue of January 9, 1892 :

"Mr. Miller, of Miller, Morse & Co., Winnipeg., spent the holidays among his old friends in Toronto, and he has a host of them. He is making extensive purchases for the coming season's trade."

Editor's Note.—It is not necessary to inform our readers that the house of Miller, Morse & Co. has become one of the largest in the Western wholesale hardware business.

* * *

"T. S. Simms & Co., broom and brush makers, St. John, N.B., have made a new departure. They employ about 80 hands, to whom they gave a dinner the other evening. After the banquet, Mr. Simms made an address, speaking in high terms of the efficiency and faithfulness of the staff."

Editor's Note.—T. S. Simms & Co. rank to-day among the foremost manufacturers in this line in Canada.

* * *

"Mr. Andrew Carnegie is nothing if not epigrammatic. To an enterprising citizen of Hamilton, Ontario, who wrote him in reference to the establishment of iron industries in Canada by American capital, Mr. Carnegie replied : — 'When the foreign colony of Canada recognizes its destiny and becomes part of the American Union, it will be time enough to consider the investment of capital there by Americans. This natural union of the English-speaking people of the continent would double the value of everything in Canada, including the men in Canada, in the opinion of yours truly,

" 'ANDREW CARNEGIE.' "

Editor's Note.—We trust that by this time Mr. Carnegie has changed his opinion. Canada has grown and prospered, and all ill-advised persons who considered it the destiny of this country to become a part of the American Union have long since discarded that chimera. What is more, American capital is now seeking the Canadian market and every day, more or less brings word of the establishment of the branch industry here of some American industrial concern.

Measures to Prevent Frosting of Windows

Most Well Known Expedients are Only Partially Successful—Montreal Man Suggests That Obsorption Method be Used—How Dealer Effects Desired Results by Outside Frame.

One of the questions uppermost in the mind of the retail dealer at the present time is the problem of keeping his store windows from freezing up. Unless some preventative measures are taken, frost will form on the plate glass and completely obscure the articles in the window from the view of passers-by. This means a loss to the merchant; a more serious loss than he may at first be inclined to think. A window whitened with frost has absolutely no selling power, and people enter the store only when they have some definite need. The loss can be measured by the use that the dealer makes of his store windows under normal conditions; but there will always be some loss, even for the most negligent in the matter of display.

It is a well-known fact that the frost is caused by the difference in temperature on the two sides of the glass. Moisture forms on the surface and this gradually freezes.

Some Common Devices.

There are a number of devices adopted by certain dealers with more or less success. Small openings above and below the plate glass serve to keep the atmosphere on both sides partially equalized, and thus prevent frosting to some extent. There are disadvantages, however, which make this expedient inadvisable in many cases.

Burning Gas Jet.

Another plan is to insert close to the window bottom a gas jet perforated with small holes an inch or so apart. When lighted the jets prevent the moisture from solidifying on the inside of the window. This method is an expensive one and never absolutely successful. In severe weather the upper part of the window will frost over and the glass will, of course, be found frozen up every morning.

An "Absorption Method."

S. M. C. Beck, of Montreal, contributes the following suggestion to Hardware and Metal.

"There are only two successful methods. One is very expensive and the other just the opposite—very cheap. The former is by agitating the air in the window with the electric fan, which, as can be seen, is an expensive method. The best way is by the 'absorption method' This is just removing the moisture from the air. This can be done with two inexpensive chemicals. The following is the formula, which can be made up by any person carefully following the simple directions.

Calcium chloride, 10 lbs. (Not chloride of lime).

Zinc chloride, 1 lb.

Place in a granite kettle on a hot stove and stir frequently for about an hour, or until it begins to stiffen, but is still thin enough to pour. In another room which must be a thoroughly dry place, eight or ten sheet-iron baking pans. Pour the mixture into the pans to a depth of about ¼ inch, and allow to cool. When it has set sufficiently, take a sharp knife and cut into small cubes of about ¼ inch in size. Loosen the compound from the pan and pass through a coarse sieve, breaking the large pieces with a hammer. This should be done before the compound is quite hard. Fill 16 ounce tins half full. Place covers on and seal apertures with paraffine wax until needed. When needed, remove cover and place box in window, or where the steam or cold moist air is. In from twelve to sixty hours, depending on the size of the window, the can will have absorbed all the moisture from the air. Then place the can on a hot stove, loosely covered, and evaporate the water until the compound is completely dry, when it will be ready for use again. It can be used over and over again, many times. It will require from three to four cans for each good sized window."

Made Outer Casing.

A Smith's Falls dealer has solved the problem by making a frame four feet high, which he places outside his window. This serves the purpose almost of a double window.

On first making this frame, he placed it on the inside of the plate glass. He then made a joint with putty at the top to prevent the leakage from running down between the plate glass and the frame. This leakage came from the top part of the plate glass, which was not top edge of the frame was beveled so covered by the short window added The that the water would the more rapidly run down, and be carried away in the usual manner at the bottom.

The putty warped away from the plate glass, however, and the plan did not work too well at first. The dealer then removed the frame to the outside and found that it kept the window quite clear of frost.

OUTSIDE COMPETITION.

Vancouver, B.C., Jan. 8.—Vancouver dealers in hardware supplies are now up against the proposition of tendering in competition with firms not having places of business here, and the fact that these firms are favored by the city council when the bid is the lowest. During the past year or so, many large railway and paving contracts have been let to Seattle and Portland firms, and these bring in their own men and supplies from across the line. This week, another instance was the letting of the contract of the extension of the Union Steamship Company's dock to O'Brien, McCaughet & Lemcke, of Seattle, who in all probability will buy their hardware from their own firms in Seattle. This week, too, the British firm of Balfour, Guthrie & Company was awarded the contract of supplying the steel pipe for the Seymour creek water main, their bid being $75,840. The tender of the Macdonald-Godson Company, a local concern, was only $1,200 higher, and it was pointed out that much of the work would be done in the factory at Barnet, on Burrard Inlet

Plan of double window used on lower section of the plate glass to prevent frost forming.

Veteran Figures in the Canadian Hardware Field

No. 3—L. J. A. Surveyer, Montreal.

Dr. J. A. Campbell, the London divine, famous for a new theology and a new way of expounding it, is said to have said that a business man cannot be honest. Dr. Campbell says he never said it—blames it on the reporters, in fact, as is the fashion nowadays. But had he said this, Louis Joseph Arthur Surveyer, of Montreal, would have been a living contradiction of the statement. For forty-six years, Mr. Surveyer has been in business for himself in Montreal, and during that time those who have bought from him and worked with him declare that his conduct, that his methods have ever been characterized by the most rigid honesty and the highest ideals. Must be a satisfactory record, that, after a lifetime's activity.

Has Prospered Greatly.

And just to prove that honesty is a mighty good policy, it may be remarked that Mr. Surveyer is pretty well furnished with this world's goods. Mr. Surveyer is not one who loves to talk of his possessions; but it is known that for the store in which he is doing business, and for the adjoining property, he has received and rejected an offer of $210,000. It is also known that Mr. Surveyer recently sold for $130,000, a block of land on St. Catherine St. W., which he bought six or seven years ago for $6,000. The wolf cannot be very near the door of this veteran hardwareman, yet he started business with a sum which did not greatly exceed $500.

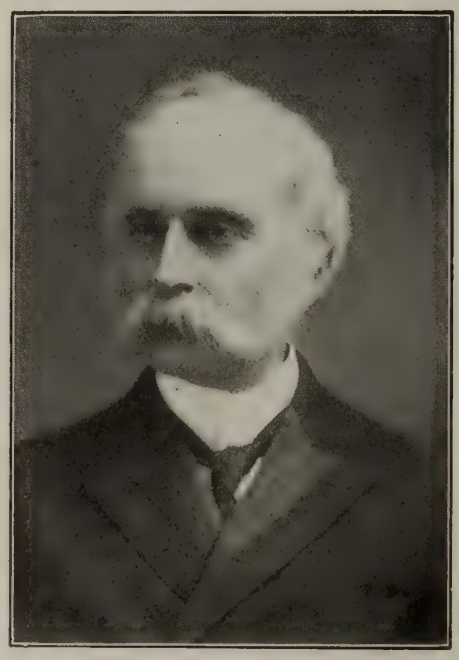
Not the Usual Start.

Probably this little biography should start with the statement that Mr. Surveyer was the son of poor, but honest parents. But then, this is a true sketch, and while the veteran hardwareman undoubtedly inherits his honesty, he also undoubtedly inherited some money. His father was a medical practitioner of Beauharnois, P.Q., and was able to give his son a fine education. He was also able to leave him some property, but this came later, after the son had made good for himself.

It was about seventy-one years ago that Mr. Surveyer started his activities, but not until he had nearly reached to manhood's years did he come to Montreal to stay. Then he entered the hardware field, working last with the late Thomas Davidson, head of the Thomas Davidson Manufacturing Co.

Started Up for Himself.

It was in 1866, that Mr. Surveyer conceived the idea of starting in business



L. J. A. Surveyer, of Montreal, would be a living contradiction of the statement that a business man cannot be honest, had Dr. Campbell really made the assertion.

for himself, and in that year he opened a store on Craig St., within a stone's throw of his present stand. Later, he moved to Notre Dame St., just across from the Court House. That is pretty far east now, but then it was the centre of a city which ended at St. Denis St. and didn't extend much further west than Guy St. Mr. Surveyer can tell some great tales of the early days in Montreal, but it is only upon rare occasions that he will do this.

One of this veteran merchant's memories of the early days is worth recounting here, for it gives the other side of that ever present, high cost of living argument. In that Notre Dame St. store kitchen utensils were sold that were made by hand. A kettle cost three times as much as now. Truly a cheering thought this, dimmed only by the remembrance that some of these kettles are in existance to-day, whereas, the cheaper kettles of last season—well, "where are the snows of yesterday ? "

Forty-six Years on the One Stand.

Forty-six years ago Mr. Surveyer moved to his present stand on St. Lawrence Main. His store is not of great size, but it contains some lines to be found in few other establishments. The years have brought no spirit of retrenchment to this man. He has been eager always for new ideas, for new articles to present to the people. In a changing city his store has remained constant, but the goods it contained have changed more rapidly than the surroundings.

Though just passed the three score years and ten, named as the allotted time of man, Mr. Surveyer still continues his active interest in the business. Ten o'clock sees him at his desk, 5.30 and he is still there. He leaves the active work to those he has gathered about him, but still he is present to supervise.

No Political Aspirations.

A man well nigh without a fad is this veteran. He is a Conservative in politics, and was once a regular attendant at Lafontaine Club. But the club has disbanded, and Mr. Surveyer has not gone elsewhere. He was several times asked to stand for political posts, but always he refused. The city government did not attract him. He stuck to his business, and his business prospered. One outside concern has benefited by Mr. Surveyer's interest, the Chambre de Commerce, of which he was vice-president.

As has been said, the heavy work of his business Mr. Surveyer is giving into other hands. He can now afford the time for trips to Europe, and he has the satisfaction of knowing that even when he finally retires, the hardware store of L. J. A. Surveyer, which has opened its doors on St. Lawrence Main for forty-six years, will not change its name. A young son is ready to take over the reins.

BY-LAW UPHELD.

Toronto, Jan. 6.—The early closing by-law of the village of Caledonia, which was attacked in a motion by Fristian Simpson, a merchant in that munipality, was upheld as perfectly valid by Mr. Justice Riddell in his judgment yesterday, dismissing the motion to quash the by-law. The grounds on which the motion was based were the alleged insufficiency of the petitions presented to the council for its passage. His Lordship finds, however, that the by-law was one which the council could pass without any petitions, and he expresses the opinion that the power given by the statute is not in any way diminished by the fact that wholly unnecessary petitions were filed.

Thomas Harling, sales manager of B. & S. H. Thompson, Montreal, was in Toronto on business this week.

Annual Conventions and Staff Reunions

RICHARDS-WILCOX BANQUET.

The Richards-Wilcox Manufacturing Co., Aurora, Ill., gave their annual banquet to their travelers December 29th, at Rayment's Banquet Hall. The tables, covered for fifty-three, were prettily decorated with flowers and handsome menu cards. A large framed photo of the enlarged factory hung conspicuously on the wall.

The guest of honor, Saunders Norvell of St. Louis, gave an instructive and very interesting address. A unique menu card, as well as poetic parodies on the travelers, was gotten up by C. W. Schuchardt, the company's advertising man. These verses, set to the music of "Every Little Movement," excited considerable applause.

The travelers of the above company cover the entire United States and Canada, and were much enthused to observe the big increase in the plant added this last year.

EEH-NIS-KIM COUNCIL.

Anyone happening to be in the vicinity of the Carborundum Company's plant at Niagara Falls, N.Y., one night last week would surely have thought that the place had been invaded by the returned spirits of the Indian warriors who once inhabited the banks of the Niagara river. Wierd, blanketed figures with painted faced, gaudy feather head-dresses, beaded buckskins and moccasined feet, flitted about among the shadows of the offices and warehouses. To the wail of the flageolet and the monotonous beat of the tom-toms, the shadowy figures gathered in the big council house and there were intitiated into the mysteries of the medicine lodge of Eeh-nis-kim. Eeh-nis-kim is an organization founded upon the customs and traditions of the American Indians. Its membership is composed of hardware dealers and clerks who handle Carborundum Sharpening Stones, and the numerous members of the Carborundun Company's sales force. The object of the orginazition is the promotion of fraternal relations between the hardware men and the Carborundum family, and to develop a clear understanding between the retailer, his clerks and the Carborundum Company along educational lines

Last week occurred the annual convention of the Carborundum hardware salesmen, and this particular occasion was made especially notable by the gathering of the first great council of Eeh-nis-kim. The salesmen were first admitted to the simpler mysteries of the order and decorated with the arrow, that conferred upon them the rank of brave. Afterwards, as they penetrated deeper into the mysterious secrets of the Medicine Lodge, they were raised in successive steps, first to the rank of warrior, and then to the rank of chief, each chief being declared the head of the tribe of retail hardware men in his particular territory. The ceremonies occupied three separate evenings.

Eeh-nis-kim is a comparatively new organization, and yet in an incredibly short space of time the membership has grown to very considerable proportions and applications are coming in on every mail from hardware men all over the country.

During the summer months it is intended to hold a Grand Council, at which all visiting members will be raised to the degree of medicine men. This council will be held in a big camp on the banks of the Niagara river, and will be thoroughly saturated with the atmosphere of Indian traditions and customs.

By "Mack."

It may be the season for making good resolutions for the new year that gave the inspiration contained in the store management articles which greeted our eyes in Hardware's last issue of the year. The illustration given of the merchant whose method of calculation was slowly bringing a good active business to the verge of extinction, revived in my mind many instances of corresponding self-deception by store keepers who have never learned to estimate costs and selling forms accurately. For men of this type the resolve to carry out the precepts laid down in the advisory essay to which I refer, should bring beneficial results at the end of the opening year. The mistakes, to which all are liable when developing a system of marking the goods at profitable prices, effects a vital centre in any business if it should be conceived upon an erroneous basis, for added to the self-injury there is the friction generated with others in the trade that arrive at different conclusions regarding the proper retail prices and discover the figures asked by their clerks are higher than the rival whose methods of accounting are devised on false ideas of percentage. Another topic which I note is to be dealt with in a special manner is the important annual event in every well ordered and managed hardware business of taking an inventory of stock. Perhaps the phantom shape of too much trouble causes a slackness in this duty, both to the business and to others and an annual statement is composed with the amount of stock inserted at any figure which the proprietor's judgment estimates. This evasion of the drudgery of stocktaking establishes a precedent which in its evil effects will be very apt to ramify through all departments of the business. It implies a want of thoroughness that is incompatible with success and the merchant unaccustomed to exerting himself in acquiring an exact knowledge of conditions at least once a year might adopt as one of his rules of business conduct for 1912, "To know all about my business," even if he has to endure an extra amount of labor. The class that are in easy financial circumstances are often, well perhaps not so often, but there are examples of which I know, who own building stock, etc., are delinquents that sometimes shun the responsibility of counting the stock and pricing and entering properly in the stock books. Even these old establishments decay under continued retrograde methods and the executors are surprised upon an accurate inventory being taken after the decease of the proprietors that the assets shrink very materially when the results are made known. One of the very hardest things to do in making an annual inventory is to set down the depreciation upon unsalable and shop stained goods. Fortunately in the hardware and metal business this exigency does not arise as frequently as in more perishable wares, and the largest proportion may be taken at cost price. But with all that is said and written regarding the application of scientific modern methods of store-keeping with the object in view of extracting returns in dividends upon capital regularly and reasonably large, there may be a few survivors of the historic days when the mathematics of the hardware guild embraced only one rule easily worked, which gave one hundred per cent. on everything, who will feebly drift, toward oblivion and refuse to conform to the demand for exact knowledge in all things pertaining to their own affairs.

Progressive Methods of Hardware Retailing

Moving Time Methods of a Pacific Coast Hardware Firm—Western Hardwareman Adopts East Method of Doing Business—Belated Christmas Ads. and the Harm They do.

ON CASH BASIS.

Halbrite, Sask., Jan. 8.—R. J. Fenwick, hardware and implement dealer of this place, started his business on a cash basis on November 1. Since that the new system has been in force in all departments.

At the present time, Mr. Fenwick is conducting a disposal sale of wagons and farm implements. Everything in stock in those lines is being cleared out at cost price. He is also advertising special inducements in the stove department.

SELLING SKATING BOOTS.

Vancouver, B.C.—The Fraser Hardware Co., Granville St., are endeavoring to improve their skate sales by carrying a stock of boots and shoes. In a recent advertisement, they say :

> "Our stock of skating boots is large. Any foot can be fitted. A great many young women are buying their skating boots here. For hockey players we have the——boots, the ——Lightning Hitch Hockey Boots and others."

The firm have been selling off their left over Christmas goods, offering the same at special prices. Brass goods, fireside fixtures, cutlery and sporting goods are being sold in large bulk.

EARLY CLOSING ADOPTED.

Wallaceburg, Ont.—The hardware merchants here have announced that, commencing on January 1, they will close their places of business at 6 p.m. every night except Saturday nights. This plan will be continued for four months, after which the hardwaremen will revert to the previous agreement under which they closed early three nights in a week. The announcement adds :

> "We do this that ourselves and clerks may have shorter hours of labor and increasing available time for recreation and domestic and social betterment. As our patrons will in no way be losers by this arrangement, we have confidence in their hearty co-operation."

The agreement is signed by J. W. Husband & Son, the J. C. Shaw Hardware Co., J. M. Smith, and Munroe & Zavitz.

MOVING TIME METHODS.

Victoria, B.C., Jan. 6.—The B. C. Hardware Co. expect to move into their new building on Fort St. by January 15. The store is now rapidly nearing completion. The site measures 30 x 110 feet, and the structure is three storeys high. The entire building will be utilized by the firm. It has cost close to $20,000 to erect. One feature of the place is that the floors will be absolutely clear from any posts or pillars. A large elevator has also been installed.

In the meantime, a series of special "slaughter sales" are being held, with the purpose of reducing stocks previous to moving. Each week a single article is picked out for sale and prices are reduced. Last week a special effort was made to clear out graniteware, and large discounts were offered. This week the same thing is being done with brushes.

As a special inducement, a range valued at $120 was offered as a premium. Every cash sale of $2 commanded a coupon and, on a certain date fixed, a draw was held and the holder of the winning coupon received the range. The result of the draw was announced in the accompanying advertisement.

REAL CLEARANCE SALE.

Ottawa, Jan. 8.—The sale of hardware conducted by W. G. Charleson, who took over the store and stock of C. P. Wright, and which is being advertised as "a real clearance sale," is going along well. Mr. Charleson announces that "having purchased the hardware business of C. P. Wright, 332 Rideau Street, we are going to dispose of the entire stock at 25 per cent. discount. Must be sold by January 31."

Large crowds have attended the sale and the stock is being cleared out satisfactorily.

SOME BELATED ADVERTISING.

This page is devoted to "progressive" methods, but a word of warning may not be amiss on the score of the very "unprogressive" methods of advertising adopted by a great many hardwaremen. The writer has before him a score or so of ads. dated from December 29 to Jan. 9. Some of them are very well written and present an attractive appearance. The only thing wrong with them, is that they are all advertising Christmas bargains ! They have been gleaned from papers in all parts of the country, and some of the firms guilty of this negligence have the reputation of being both progressive and successful. Further reference to this matter will be found on the editorial page.

A. C. LESLIE'S RINK AND CHILDREN'S HOSPITAL PROVE WINNERS.

Montreal, Jan. 10.—The last end of a curling match, played to-day at the Caledonia rink, decided who should pay for a barrel of meal, which, it had been arranged, was to be given the children's hospital by the losers. The rink from A. C. Leslie & Co. won out, but by the narrowest possible margin, the curlers from Dale & Co.'s Marine Insurance Co. being in the fight to the end.

The rinks were :—

A. C. Leslie & Co., W. S. Leslie, T. H. Jordan, E. H. Copland, F. B. Leslie (skip), 9. Dale & Co., A. G. Shaw, R. J. Dale, J. L. McCullough, C. G. Ross (skip), 8.

H. A. Malcolm has joined the sales departemnt of Lewis Bros., Montreal, and will be in charge of the sample room.

Overend & Lowrey, who are opening up a hardware business in the City of Orillia, to be known as "The City Hardware Store," spent a week in Montreal purchasing supplies.

Current News of Canadian Hardware Trade

Elected Reeve.

Leamington, Ont.—H. Lendon, formerly of Wallaceburg, and now a hardware merchant here, was elected reeve.

Joins Winnipeg Concern.

Montreal, Quebec.—Theodore Korb, formerly with Lewis Bros., and well known to the hardware trade both in Canada and the United States, has joined the staff of Merrick, Anderson & Co., Winnipeg.

Orillia By-law Lost.

Orillia, Ont.—Although 741 votes were polled for the by-law granting a fixed assessment to the National Hardware Co. and only 71 against, the by-law did not carry, as the vote was not large enough. To carry the by-law 1,003 votes were required.

Get English Contract.

Guelph, Ont.—The Louden Machinery Co. have been awarded the contract for supplying fixtures to be used in the stalls and pens of the barn, which is being erected on the Woking Park Emigration Training Farm, at Woking village, Surrey, England.

Marshall Hardware Sold.

Medicine Hat, Alta.—W. B. Marshall and the Mitchell Bros. have purchased the business of the Marshall Hardware Co., and are now in charge. The business is an old established one. The members of the new firm are all pioneer residents of Medicine Hat.

Doubled Store Capacity.

Saskatoon, Sask.—S. T. Kempthorne has doubled the capacity of his store and very materially increased his facilities for doing business. He states that the prospects for business in that section are indeed bright—much brighter than at this time last year.

McClary Branch in New Quarters.

Montreal.—The Montreal branch of the McClary Manufacturing Co. has now moved into the new building situated on the corner of Wellington and King Sts. The office is not thoroughly equipped as yet, but it is evident that it affords the extra room which has been so badly needed.

Hardwareman Married.

Sturgis, Sask.—The marriage of Frank Weikle, hardware dealer of this place, to Miss L. Gibney, took place at Yorkton, Rev. Father Bagoney, performing the ceremony. J. McCormick supported the groom. Mr. and Mrs. Weikle gave a reception and dance on New Year's night to friends here.

Renovating Store.

Salmon Arm, B.C.—Alterations are being made in the lower portion of the McGuire & Leonard building, which will be occupied by Ford Tyler & Co. as a hardware store. The floor is being lowered on a level with the street and a new front is being put in. Ford Tyler & Co. expect to open to the public this week.

Napinka Store Burned.

Napinka, Man.—The hardware store of Dewitt & Co. was almost totally destroyed by fire altogether with most of the contents. The store building was valued at $5,000 and insured for $3,000. A stock to the value of $9,000 was destroyed, with insurance to the extent of $8,700. The origin of the fire has not been ascertained.

Leamington Business Sold.

Leamington, Ont.—C. A. Willitts & Co. have sold their business to Alfred Dobbyn, of London, and Mr. Willitts has purchased a hardware business in that city. Mr. Dobbyn has been a traveling salesman for some years with the D. H. Howden Co. He will take possession about the middle of the month. Earl Weeks will occupy the position of business manager.

Tinshop Burned Out.

Saskatoon, Sask.—A fire broke out in the tinshop of Wismer & Holmes, Second Ave., caused it is thought by the stove. The shop, which was a frame structure covered with galvanized iron, was almost completely gutted, and considerable damage was done to the machinery and tools. Insurance to the amount of $2,500 was carried, and it is believed that the loss will exceed this.

E. B. Marvin Dies.

Victoria, B.C.—Word has been received here of the death in Southern California of E. B. Marvin, a pioneer business man of this city, at the ripe age of 81 years. For four decades he had been at the head of the ship chandlery firm of E. B. Marvin & Co. When 37 years ago he started in the ship chandlery business, his step-son, Frank Adams, who has lately had charge of the firm's business, joined with him, and about twenty years ago, the late Captain J. G. Cox joined the firm. In addition to establishing the successful business on Wharf St., he was one of the pioneers of the sealing industry, the schooner E. B. Marvin being named in his honor.

Space Being Snapped Up.

Montreal, Quebec.—Satisfactory progress is being made with the arrangements for the exhibition of hardware goods to be held in connection with the convention of the hardware section of the Retail Merchants' Association. Though this exhibit is not to be held until the three last days of February and the first of March, more than half the booths have already been taken up. Letters received indicate that there will be a lack of booths experienced rather than a superabundance. The manufacturers are only too anxious to get space in which to display their products to the retailers, and to the architects, contractors, and mechanics, who are to be invited to inspect the booths.

Business Changes.

Drayton, Ont.—The hardware and stove business of O. B. Henry & Co. is being advertised for sale.

Toronto, Ont.—A. Litwin, hardware dealer, has moved his store to 509 Queen St. W.

St. Aldwyn, Sask.—The firm of Henderson & Battersby, hardware dealers, has been dissolved. Mr. Battersby will carry the business on.

Wakaw, Sask.—A store has been opened here by the Wakaw Hardware & Implement Co.

Rush Lake, Sask.—R. T. Storrey has started in the hardware business here

Strome, Alta.—Max. Knoll has started in business here.

Gregg, Man.—J. W. Wake has started a hardware and general store here.

Brampton, Ont.—R. J. McClelland has purchased the implement, carriage and roofing business of Thomas A. McC[illegible]

Morden, Man.—Atkins & Beatty have disposed of their hardware business, which will be carried on in future by Atkins Bros.

Personal Notes.

Scott C. Ball, of Sergeant & Co., New York, was in Montreal on business this week.

E. A. Esbach, of the Fawcett hardware store, Tweed, Ont., spent the past week at his home in Walkerville.

E. C. Hall, of Linton & Hall, Calgary, is spending the holiday with his people at Campbellford, Ont.

The many friends of A. T. Linton, of Linton & Hall, Calgary, will be glgd to hear that he has completely recovered from his recent attack of typhoid fever.

Henry Smith, of Porcupine, a former hardwareman of Tweed, Ont., has been paying a visit to friends in that place.

W. S. Painter, formerly chief architect of the Canadian Pacific Railway, is in Montreal, on a visit to his branch office, which is being managed by Mr. Swailes. The firm's name is "Painter & Swailes." Mr. Painter speaks in glowing terms of the West, and already has the "Fever," or Western Craze.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 56.

MARKETS IN BRIEF.

Montreal.

Lead—Down 10 to 25 cents a cwt.
Spelter—Up 25 cents a cwt.

Toronto.

Tin—Down 1 cent.

MONTREAL.

Montreal, Jan. 12.—Though tin is still demanding a great deal of attention, the somewhat short stocks of pig iron features the market this week, as far as local handlers and users are concerned. There is no great amount of iron to be had, and some of the handlers are being hard put to it to fill their orders.

Tin is still somewhat of a mystery. The decline which came so swiftly last week has not ceased. True there have been no £10 drops in the last few days, but the downward tendency has not ceased. As yet the pendulum has not swung back, though this is confidently expected.

The decline in copper, slight though it is, is considered rather significant. It seems to show that the metal has gone up too fast. The latter rises have not been great enough to please the speculators, and yet the present position of the metal is good.

Somewhat the same thing may be said of spelter, though the exact position of this is a little hard to understand since the very dealers who are quoting a low figure are anxious to buy stock from Canada.

Rise is Still Expected.

Tin.—Straits' tin on the three months' contract, has dropped in England to £187, yet that is not proving the feature of greatest interest at the present time. A scarcity of spot tin is such more important. This is being keenly felt in New York, and affects in some measure the Canadian handler.

What is causing the low prices is hard to say. But perhaps the very prediction that there would be a tight market in January has led syndicate to take this step. There seems no doubt at all that the present low figures will be but short lived. It could hardly be otherwise when spot tin is becoming so scarce.

Lead.—This metal is plentiful. Trail is now to be secured. The manufacturers are up with their orders and a lower level of prices has resulted. In other parts trade conditions are said to guarantee higher prices, but the demand is so light that these are not being struck. Locally there will hardly be any change now for some time to come.

Copper Stocks Depleted.

Copper.—This metal has sunk in valu somewhat. The production has increased in the last week, while the consumption has been somewhat less than was expected in view of the talked of large orders. Stocks are depleted now, that is, they are smaller by far than they were, but indications are that the production of the next few months will tend to make these stocks larger. On the other hand, the producers declare that the extra demand which has arisen will guard against all over stocking. The situation is somewhat complex, but it would seem that a much higher level, or indeed any higher level at all, is not likely to be seen for some time.

Spelter Both Lower and Higher.

Spelter has been advanced by the smaller handlers, yet the general trend of the market lately has been downward. Some little time ago East St. Louis was quoted as high as $6.85. Now it is at $6.35, and that figure is considered a far more proper one. It must be remembered, of course, that while the moderate sized handlers have adv[illegible] the price, they did not do this when spleter was high. Then they were selling much metal which they had secured on a more advantageous market: but now, while spelter is quoted lower, they have to sell what their depleted stocks required them to buy at the recent high figure.

Iron. — The scarcity of pig iron noted last week is demanding more attention. The handlers are short. Some of them failed to bring in heavy supplies, the good demand of the past few weeks, therefore, has found them unprepared. Some Scottish iron is coming in. For this a higher price has to be charged to cover the extra railway freight.

Some of the handlers have fair supplies of iron on hand. They will be able to meet the immediate needs, but there will be no great surplus stock on hand when river navigation opens.

TORONTO.

Toronto, January 12. — There is a brisk tone to the metal trade here. Buying has started again with a steadiness which speaks well for future possibilities. The largest buyers of metal have for the most part been running on light stocks for some weeks back, and they are now in the market for large requirements.

Tin is Down.

The feature of the week has been the continued slump in tin. The downward movement which began a fortnight ago is still in evidence. The London quotations have shrunk appreciably since last writing, and local jobbers accordingly have chopped a cent off their price, making the price prevailing here 46 cents.

The price developments in tin are surprising, as somewhat of a shortage has developed in spot tin. Local stocks are light. The demand here has been consistently heavy.

Lead Supplies in Sight.

Lead.—Trail lead is now on the market in good bulk and local jobbers report that there is plenty of lead in sight to meet the current demand. It is anticipated that no further difficulty will be met with on the score of supply. There is a firm tendency noted in price.

Tinplate Higher?

Plates and Sheets.—It is understood that some are quoting a higher price on tinplates. A tendency towards greater strength is noted in all plates and sheets. Demand is good.

Copper Coming Down.

Copper.—The price of copper has weakened on the primary markets, but no change has yet been made locally. The lower level of the metal is due to the increased production coupled with a rather unaccountable falling off in the demand. Although the demand has been quite active, it has fallen short of the mark set, and this is exerting a deterrent effect. A quick revival in copper is looked for, however.

Spelter is Stronger.

Reports of advances in the price of spelter are heard from other points, but so far no change has been made here, although the price is firm. Spelter is in active demand and there is every reason to suppose that this activity will be continued.

Pig Iron.—There is an active buying movement in pig iron, coupled with stocks rather lighter than usual at this time of year. Prices remain firm, as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $2[illegible] respectively.

NEW WELLAND INDUSTRY.

C. J. Laughlin, jr., who some time ago announced that The Pittsburg Nut & Bolt Co. would build in Welland, was in Buffalo on Tuesday looking after the final clinching of the new firm.

On Wednesday Mr. Laughlin authorized the statement that the company would build there in the opening of the spring without fail. The site has been obtained in Industrial park, Crowland township, adjoining Welland.

HARDWARE MARKETS

BUSINESS PICKS UP.

The sharp weather of the past ten days has brought about a temporary revival in heaters. Oil stoves have been much in demand. The gas range industry is now coming to the fore and it is anticipated that spring demand will be exceptionally heavy.

MONTREAL.

Montreal, Jan. 11.—Stock-taking is to the fore in the hardware trade at present. Retailers are busy making their inventories. As a result, they are not ordering at all largely, and the wholesalers, who are making out their stock sheets too, are quite satisfied that it should be so.

Trade is quiet, there is no denying that. The usually January lull has set in, a lull which has been only partially disturbed by the activity coming as a result of the cold weather. The papers, in their humorous columns, are making fun of the people who a little time ago objected to the moderate weather, and who are now protesting against the cold. These merry quips have no reference to the hardwareman. He is delighted with the turn things have taken. The weather is a little severe, perhaps, but it is winter, and it has brought the demand for winter goods, which up to the present has been somewhat below par.

A Revival in Sales.

Seasonable Goods.—This week has seen a revival in sales of such articles as snow shovels, weather strip, and tar paper. True, the city's undertaking to clean all the sidewalks has somewhat curtailed the demand for shovels, but there are many paths to be cleaned, and even in Montreal some houses are set back a little from the sidewalk, requiring some shoveling to clear the way. So many shovels have been ordered. Brooms, too, are selling briskly.

Tar paper is being bought for lining sheds and back kitchens. Weather strip, of course, is needed to keep the wind from whistling through door cracks and window casements. This weather brings out every defect a house has, and it makes the resident desirous of effecting an immediate improvement.

Sleigh bells, too, have been in demand these last few days. There is no doubt that these will be needed now.

Sporting Goods in Demand.

Sporting Goods.—This is where the severe weather has most helped the hardwareman. Sleighing is here. Skating is here. Sliding is going on a-top of the mountain. Saturday afternoon is again being eagerly awaited by the skiing enthusiast. Even snow-shoeing is now possible. All that is needed is the paraphernalia, and the stores can supply that. As a result the stores are experiencing a good demand. Skates, skis, all the accessories are being bought, while the weather is making sweaters, caps, and gloves, so much needed, that they are moving rapidly too.

Household Goods.—For all this class of goods a fair demand is being experienced. Orders for spring delivery are coming in from western dealers, while from all parts of the Dominion sorting orders are being received.

Coal oil stoves, handled by many jobbers and retailers, are selling rapidly these days. The cause is not hard to seek.

Lumber Supplies.—Here business is improving. Axes have been in good demand of late, and other supplies needed in the bush, cant hooks, grind stones, cross-cut saws, and such like, are still being bought quiet largely. Chains, which will be needed when the logging work starts, are not being bought from the retailers, as yet; but some retailers, anticipating the demand, are laying in a supply.

TORONTO.

Toronto, Jan. 12.—Business is not very flourishing at the present time. Stock-taking is the order of the day in all branches of the trade and this, of course, interferes very materially with trade. The cold weather has also exercised a deterrent effect. The travelers are all out on the road now, however, and it is confidently expected that business will pick up immediately.

No price changes have been made this week. There is a general firmness noted. Collections are reported to be satisfactory in most sections.

Seasonable Goods.—Some orders have been placed for winter goods. The weather conditions have been so steadily cold that there has been a good sale of sleigh bells, blankets, mitts, weather strip, snowshovels, etc., although ordinarily the dealers are pretty well stocked up in all these lines by this time.

Demand Felt for Spring Goods.

Spring Goods.—Although the demand is not yet in any sense pronounced, there is a tendency noticed to order spring supplies. Orders from some sections have been booked for such lines as rakes, lawn mowers, shears. Dealers are showing a tendency in fact to order well in advance of the season. Although stock-taking retards matters now some, the present volume of trade points to an early resumption of activity.

Builders Still Selling.

Although the heavy demand for builders' hardware is over with, there is enough business to satisfy the jobbers. It is inderstood that retail stocks are, for the most part, light. This is probably due to the fact that there has been an unusually large demand. It is anticipated therefore, that the spring will see a heavy run on builders' hardware.

Heavy Hardware.—The demand is now nominal but some booking is being done. Price quotations are :—Discounts on carriage bolts, $\frac{3}{8}$ and less, 60 and 10 and 10 ; coach screws, 75 ; stove bolts, 80 and $7\frac{1}{2}$.

Skates Still Selling.

Sporting Goods.—The revival in the skate trade is still manifesting itself in a big demand from the retailers. Sorting orders are now beginning to arrive, showing that the retail stocks are finally being cleared out. It is expected that demand will be maintained for some time yet.

Hardware Letter Box

Lawn Seats.

W. J. Scobie, Bristol, Quebec :—"Please give me the addresses of Canadian manufacturers of lawn seats and lawn fixtures."

Stratford Manufacturing Co., Stratford, Ontario ; P. E. Shantz, Preston, Ontario ; W. F. Vilas, Cowansville, Quebec ; John Watson Manufacturing Co., Ayr, Ontario.

Brass Letters.

H. Marshall, Kingston :—"Kindly advise if you can give us the name of a firm making glass casters, saucer shape, to place under the ordinary wheel caster on a piano ? Also can you tell us the Canadian makers of brass letters and numbers ?"

The Canadian manufacturies of brass letters are : James Morrison Brass Manufacturing Co., Toronto ; Patterson & Heward, Toronto ; Martel-Stewart Co., Montreal ; Montreal Stencil Works, Montreal.

Can any reader supply information with reference to the glass casters ?

Aluminum Utensils.

W. J. Hermiston, Walkerton :—"Kindly let us know the names of manufacturers of aluminum kitchen utensils ?"

Northern Aluminum Co., Traders Bank Bldg., Toronto.; Parke & Leith, 60 Front Street, Toronto ; Griswold Manufacturing Co., Erie, Pa.

Peters' Pumps.

Phillips Bros., Kindersley, Sask.:—"Who are Winnipeg selling agents for Peters' Pumps ?"

Tudhope, Anderson & Co.

The Western Hardware Market Situation

Business is Slack on Account of the Severe Weather—Commercial and Agricultural Interests at War with the Railroads —Blue Stone Price Announced.

Winnipeg, January 8.—The severe cold weather which has been prevailing for the last two weeks throughout the length and breadth of the west has had a material effect upon decreasing the volume of trade transacted during this period. This combined with the season of the year which is always a quiet one has rendered conditions very quiet and wholesalers have taken the opportunity of the slack season to take stock. Many firms have almost completed while others will not be through for a few days yet. When looking over the season 1911 from all sides can be heard nothing but satisfaction as to the volume of trade transacted. One large wholesaler stated this morning that the year 1910 was recognized by all as the best year in the history of the West. 1911 it was pointed out was better than 1910 and therefore could be taken as establishing a record for western Canada. 1912 he pointed out was as yet too young to offer any predictions about, but at the same time he stated that anticipation was strong and all were looking forth for a better year than ever.

In the stove line orders have been slightly less than previous and mostly for general lines or sorting-up orders. A large quantity of ranges and other lines of stoves which were not procurable in the earlier part of the season are now on hand and back orders for these are being filled up. The extreme cold weather has maintained the demand for this line a little stronger than any other line except sweaters and horse blankets.

Blue Stone Price Fixed.

The price on Blue Stone has at last been announced and is fixed at 6¼ per cent. Wholesalers in the city regard this price as being rarely lower than what the present market price warrants. The market as stated before has been very strong during the last few months and it is a speculation as to whether these prices will not have to be advanced.

At War With Railways.

A fight is being waged at the present time between commercial and agriculture interests in the West and the railroad interests. This is the direct outcome of the congestion of cars and general shortage which has seriously handicapped trade this fall in this country. While more cars are available now as a large part of the grain has already passed through Winnipeg; the estimate of the leading paper in the West, the Free Press, being over 74,000,000 bushels of wheat, yet the western populace are determined to have their rights respected and much interest is being followed in the situation at the present time.

A fair demand still continues for sporting goods such as hockey sticks, pucks, skates, sweaters, etc., in the cities but it is not expected that this will last much longer. The sharp weather has brought in a demand for heaters and foot warmers to be used in sleighs and other vehicles and a fair quantity have gone out during the last week.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 3c,

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Wire.—Prices on wire barbed and annealed and plain are all open and prices cannot be quoted. All wholesalers are open to receive enquiries on wire and it is doubtful if there is much of a contrast in prices.

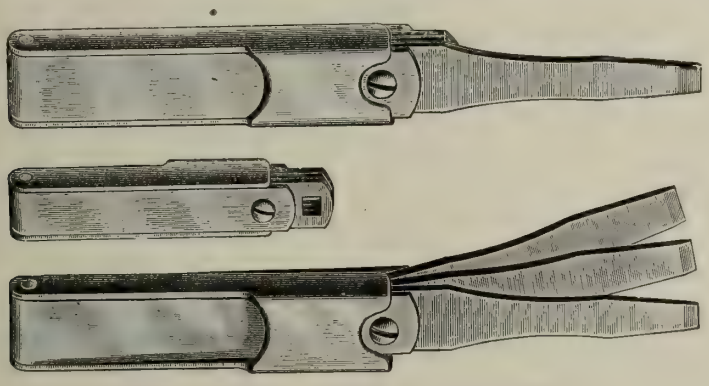
New Hardware Goods

POCKET SCREW DRIVER.

The inventor who thought of making a screw driver that can be carried in the vest pocket had a bright idea. It is a thing that, in the hackneyed term, "meets a long felt want."

Nearly every day some occasion arises when a man would give "a kingdom for a screw driver," especially as there is never a screw driver at hand. A screw driver is not usually a convenient thing to carry in one's vest pocket.

But this new device is as convenient to carry as a pocket knife. It is flat and compact, with three good steel blades that fold up into the handle and lock in.



Screw Driver Carried in Vest Pocket.

Each of the three blades has a different sized point to fit almost any size of screw. There are no loose parts and it makes a rigid substantial tool for any use to which an ordinary screw driver might be put.

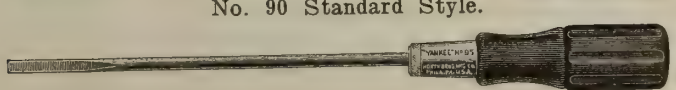
It is a good thing for hunters, anglers, motorists, machinists, carpenters, locksmiths, farmers, salesmen and repairers of typewriters, adding machines, sewing machines, or any mechanical device.

It was invented by Mr. Marble, of the Marble Arms & Mfg. Co., 528 Delta Ave., Gladstone, Mich.

YANKEE SCREW DRIVERS.

North Bros. Mfg. Co., Philadelphia Pa., have put two new styles of "Yankee" screw drivers on the market. The fastening of blade and handle is such that they cannot be loosened in use, or in even the usual abuse. The blades and ferrules are finely polished, the handle of hard wood finished in dull dead black, making a handsome appearance.

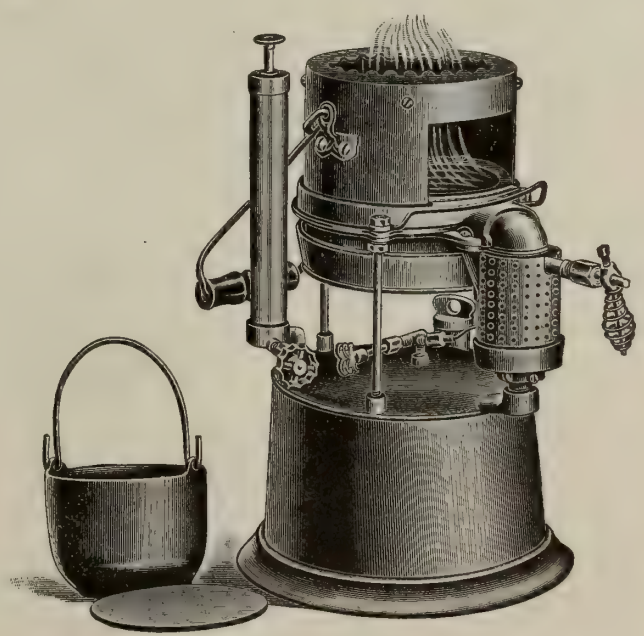
No. 90 Standard Style.



No. 95 Cabinet Style.

DOUBLE BLAST FIRE POT.

The Double Blast Manufacturing Co., North Chicago, have issued a booklet, illustrating their tinners and plumbers' fire pot. One of the chief advantages claimed for it is that it has an independent generating valve for generating, so that in case the operator does not get enough gasoline into the drip cup the first time to properly heat the generator he may open the valve again and allow more gasoline to flow into the drip cup until it is hot enough to generate. The generator is made of brass and will not rust or corrode, and has an opening of five-eighths of an inch where the generating is done. Having no small channels it cannot clog, but will always burn a blue flame. The straight brass needle passes through the orifice hole in the generator, and will not increase the size of the hole, the gas is cut off with the end of the valve stem.



Double Blast Fire Pot.

NEW MOP HOLDER.

The Theo. J. Ely Manufacturing Co., Girard, Pa., have put a new mop holder on the market, as shown in the accompanying cut.

New Ely Mop Holder.

GLASS BLOWING PLANT NOW BEING ERECTED IN MONTREAL.

Montreal, Jan. 11.—The Enterprise Glass Co., of Montreal, is now erecting a glass blowing plant at Tetreauville, one of the Royal City's suburbs. The plant, which is 100 feet square, will be ready for the start of operations in a month's time, according to the word of the president, P. Massicotte, of the Massicotte Import Co. "We are going to manufacture a variety of goods," said Mr. Massicotte. "We will turn out tumblers, milk jars, gem jars, bottles, lamp chimneys and fancy globes for lamps and electric lights."

Stoves, Furnaces and Cooking Accessories

Figures Which Help to Sell Stoves

Statistics Show That Food Waste is Very Heavy—Use of New Range Would Save Many Dollars Every Year—Fuel Economy a Potent Argument for the Store Dealer to Wield.

If you could prove, Mr. Dealer, that every householder in your district, who uses an old range, is losing enough money in spoilation of food every year to pay the price of a new stove, it would not be difficult to sell every one of them.

Unless statistics are astray—and, of course, figures never lie—this is actually what is happening. Some interesting figures were given in an address by Charles S. Prizer at the last convention of the National Association of Stove Manufacturers. He estimated that the value of food cooked during the lifetime of an ordinary range was $12,000. The fuel used during the same length of time would total somewhere around $1,000 The value of the labor expended in cooking the food and operating the range h estimated at $5,000.

Mr. Prizer goes further than that. He estimated that the spoilage of food on one range during its whole period of activity would total $1,200. Pursuing this point closer still, Mr. Prizer made the rather astounding assertion that $800,000,000 was lost every year in the United States through spoiling of food. constituting "the greatest waste of wealth occuring in the world according to economists."

These figures will bear close analysis. If the waste is as large as stated, the average household must be charged with at least $50 a year loss. How much of this could be saved if the home were equipped with a new and up-to-date cooking range? Stove dealers know that the percentage of loss due to worn-out, cheap and defective ranges is very large indeed. As soon as that fact can be impressed on the public, there will be wholesale discarding of kitchen relics in the shape of cranky old stoves.

"A new range will cost you $50 and will prove a good investment." This epitomizes the argument used by stove dealers in going after business.

"Your old range is costing you $50 a year. Can you afford to keep it," is the basis on which arguments should be given. Don't dwell on the fact that a new range will cost money; point out instead that it will save money.

The statement that a new range will pay its purchase price over several times in a very short while, is no mere empty platitude. It is based on facts. The range made to-day has countless advantages over the product of the foundries of ten or fifteen years ago. New ideas have been evolved and perfected. Cooking has been made a comparatively simple matter. There will be less food spoiled than on an old range, and this saving will soon pay for the new stove. As Mr. Prizer very strikingly puts it: "If the use of the very best and most convenient range it is possible to make will result in a diminution of only 15 per cent. in the food waste which ordinarily occurs in cooking, the housekeeper could afford to pay $180 for this best range in preference to receiving the ordinary cheap range as an absolute gift."

Saving in Fuel.

It is easier to convince the average man of the economy of a new stove by referring to the question of fuel. Food waste does not manifest itself as a drain on his pocket, but coal bills "speak for themselves." Anything that will reduce the cost of fuel will meet due consideration from pater familias.

Take Mr. Prizer's figures again. The average range eats up $1,200 for fuel during its period of usefulness. Some take more and some less. It is self evident that an old and worn out stove will require more fuel than the new and up-to-date article. A better stove would reduce the fuel bill by say, 15 per cent. Figure it out and, again, the amount saved each year will serve as a convincing argument in favor of replacing the old one.

Talk Quality Stoves.

These arguments apply with equal force when it comes to a matter of discriminating between good and cheap stoves. Some dealers neglect to talk quality to customers because they feel that the latter want something cheap. Looking at it from the proper standpoint, a cheap stove is the dearest article a person could buy. Show them that they save money by getting a good stove, that the initial price is the smallest item in the cost of a stove. The facts are not hard to get.

You can talk quality to everyone; for the quality price when sifted right down is cheapness in the real sense of the word. "You must sell cheap stoves to cheap people," was a statement made recently by a retail stove dealer. Show them how they can save on their fuel bill and cheap people will buy the cheapest stove—the quality one.

Working for Mid-Winter Stove Sales

There is a "Latent Demand" for Stoves Right Through the Winter Months—How to Stir it up—Advertising the Strongest Factor—Following up Prospects.

An article sells when conditions are such that the need for it is felt. Stoves are a good selling proposition, therefore, right through the winter months. There is certain to be some demand Perhaps it may be a latent demand, requiring the services of a vigorous salesman to stir it up and bring it to the surface. But it is there.

People usually buy their new stoves in the fall and, as they seldom buy until the old stove has given signs of failing health, one is safe in assuming that during the preceding winter these people have suffered some discomforts and inconvenience.

This brings us to the point we are driving at. Every winter a certain percentage of people are beginning to realize that the stove they have is not giving satisfaction. They may buy a new one next fall. They may leave it off still longer. But, just the same, they need a stove and an aggressive stove dealer might induce them to buy without delay. This is what might be termed the "latent demand." Every dealer can rest assured that there are dozens of families residing in his district who need a new stove now and who know it. If he goes about it the right way, he can sell quite a few of them now.

Selling stoves in the middle of winter is not, of course, the easiest of salesmanship feats. When the season has once started, people are inclined to worry along somehow until the end. They dread changing stoves in the middle of winter, believing that it will entail a certain amount of discomfort before the new stove is in working order. In addition, money is usually tight about this time of year.

Our stock of

Cooking Stoves and Ranges

together with the most modern types of Heating Stoves is still very complete and if in need of one it will pay you to call and make a selection therefrom for we know the taste and requirements of the most critical buyer can be satisfied from our showrooms. REMEMBER we do NOT handle stoves made by any but the very best makers and our prices are the lowest for quality goods.

F. S. Collacott

Phone 23 P. O. Box 640

Yorkton, Sask.

None of these arguments are real obstacles to the closing of a sale. The change can be effected in an hour's time. In any case, it is better to suffer inconvenience for a short time than to put up with the shortcomings of the old stove for the rest of the season. The terms can be made to suit the purchaser in most cases.

Advertise Well.

How to get at this lavent demand is a problem which may seem at first hard to solve. Many methods have been attempted, some with rare success. Dealers there are who canvass from door to door. Some follow up repair orders. But the basic principle, after all is said and done, is to advertise. The daily paper reaches the head of the house every evening. He sees the stove dealer's advertisement there. If it carries a direct message, he gets it. The advertiser can hammer that message home day by day.

Following Up Prospects.

A plan which yields good results is to follow up prospects. If a man called in to see your stock in the fall, it was the clearest kind of evidence that he needed a stove. If he did not buy, it was because you failed to convince him on some point. Follow up such cases now. If that man knew in the fall that he needed a stove, he is doubly sure of it by this time. If he has not bought from a rival dealer or by mail order, he will be the very best kind of prospect. A system of calls would work well with the advertising policy.

How to Advertise.

Stove advertisements for use at this time of year must have a direct message. A picture of a stove and the bare assurance that it is the greatest ever turned out, will not do. Best results will be obtained by appealing to the "latent demand."

A strong talk along these lines would prove effective :

IS YOUR HOUSE COMFORTABLE ?

The real test of a stove comes when the weather hovers around the zero mark. Is yours giving satisfaction ? Does it keep your house warm ? If not, do not delay getting a new one. A defective or worn-out stove is the most expensive you could have.

Add to that a talk on fuel economy, improved service and comfort and something, perhaps, about special terms and the most obdurate will begin to take an interest.

Dealers Are Advertising.

It is gratifying to note that dealers are awakening more to the possibilities of mid-winter trade in stoves. The writer skimmed through a batch of newspapers the other day and stove advertisements stared at him from every page. Some were good, some were bad and some were indifferent. Some showed evidences of careful thought on the subject of seasonable possibilities; others quite apparently had not been changed since the fall. The fact that so many dealers are believing it worth their while to continue the advertising of stoves right up to this late season, was the outstanding fact that impressed itself upon the writer. In past years, dealers' stove ads. in January were as scarce as hens' teeth. Are dealers taking more interest in winter sales ?

This is the "IDEAL" and it is an "IDEAL"

JOINS STAFF OF T. B. LEE.

W. J. Taylor, who is well known to every hardware man in Eastern Ontario, has joined the staff of Thomas B. Lee, hardware specialties, and will represent that firm with skates and cutlery in Ontario, east of Toronto, and the principal points in the Province of Quebec.

Mr. Taylor got his early knowledge of the hardware trade with Van Tuyl & Fairbank. Leaving that firm he took a position as eastern traveler for the Kemp Manufacturing Co., now the Sheet Metal Products Co., which position he held for upwards of thirteen years. After that, he joined the Rice Lewis & Son Co., and covered similar ground for six or seven years.

Last year he decided to make a change and try another line, but as a fish cannot live out of water, Mr. Taylor found it uncongenial away from the hardware trade, and his many friends are now glad to have him back calling on them again.

Roy Stafford Weds.

Belleville, Ont.—Roy G. Stafford, of the Stafford Hardware Co., Belleville, was married on January 1 to Miss Annie Erminie Phillips, and spent a few days in the City of Montreal visiting his friends among the hardware trade. Mr. and Mrs. Stafford left for home Tuesday, Jan. 9.

Personal Notes.

Mr. Black, of the Montreal Rolling Mills branch of the Steel Company of Canada, spent a part of this week in Hamilton and Niagara Falls.

J. F. I. Thomas, of Vickers, Limited, River Don Works, Sheffield, who has just completed the erection of a Hydro Electric power station for the City of Winnipeg, has arrived in Montreal, where he will be permanently located.

Among the retailers coming to Montreal on business this week were : M. L. Stearns, L'Orignal ; N. Rock, St. Gabriel de Brandone; Alex. Bryson, Howick, and J. B. Damour, St. Philomene.

STOVE AND HEATING MARKETS

DULL—ACTIVITY AHEAD.

Business in hardware is seasonably dull. Signs are not wanting, however, of an early resumption of activity.

As soon as the dealers have had an opportunity to complete their inventories and to estimate their probable requirements spring booking will begin with a rush.

MONTREAL.

Montreal, Jan. 11.—And still the old saying about it being an ill-wind which blows nobody good, holds, for the bitter weather of the past few days has had a good effect upon the stove business. Indeed, it has put life into many lines, which have been exceedingly quiet since the holiday season.

Oil heaters have been the most active line this week. And no wonder. The sudden drop from temperate weather to days when 20 below zero was not the extreme, found people unaccustomed to such cold. In many houses pipes were frozen, and difficulty was experienced in heating certain rooms in well nigh every dwelling in the city. As a result there was a great call for coal oil heaters, and the retailers had to send rush orders to the manufacturers. Fortunately, these had a good supply on hand, and it was possible to meet the demand.

In tinsmithing lines good activity is being shown. Now is the time when the tinsmiths have time to manufacture pails, milk cans and similar goods, and they are not allowing the opportunity to pass.

A Slight Price Change.

In this connection one slight price change has been made, namely, in tin plates. The great drop in ingot tin, which occurred last week, is the cause of this. This lower price level cannot be quoted accurately, as the manufacturers are not agreed, but they are generally quoting figures a little lower than those named last week.

Generally business is quiet, but the activities of spring are in the air. Already some goods are being shipped for the spring stocks, and orders are coming in well.

Ranges, Heaters, Furnaces.—Business in these lines is not yet at a standstill. Few furnaces are being shipped, but heaters are yet in fair demand. The call is for small lots, but the frequency with which such orders come to the manufacturers shows that the dealers are making sales. Ranges, too, are moving, though very slowly. There will be little more delivery for this winter's sale, but orders for spring will soon come in.

Gas Stoves.—This business, which has been practically dead since early November, is now reviving somewhat. Builders are placing orders for the goods they will need next summer, and the manufacturers are sending their travelers to those contractors who take gas stoves in large numbers. The travelers are also pushing this class of goods with the retail dealers. There will be a big call for gas stoves in April and May, and it is to the interest of all that the retailer should then have a stock which will enable him to meet the demand.

No Further Change Likely.

Kitchen Furnishings.—Copper and brassware advanced in price last week; remain steady now. The higher figures which are necessarily being charged do not seem to have affected the demand in the least. This is quiet, as is natural at this season, but where stocks become low retailers are ordering in good quantities. There is little likelihood of an immediate drop in the price of copper, and so the merchants see that the price of these goods in which copper is extensively used will not soon revert to the old low figures.

Tin plates, which showed a tendency to rise last week, are now showing just the contrary tendency. The great drop in the ingot is responsible, tin plates having dropped in price on the English market. Tinned iron, on the other hand, shows a tendency to rise in price.

Canada plates are still being bought quite largely. The market is strong, no sign remaining of the slump which threatened some time ago.

TORONTO.

Toronto, January 12.—The stove market is more active than at last writing. The cold weather which has prevailed all through this district for the past ten days has livened up the demand to some extent. Dealers apparently are making sales from depleted stocks, for quite a few "rush" orders are being sent in. This activity is unusual at this time of year and it is, therefore, judged to be temporary only and not likely to continue very long. "We are starting the new year well," said one manufacturer. "Just watch us keep it up."

Range Orders Scarce.

Ranges.—Usually the most active at the duller seasons, ranges have been shoved into the background. What business is being done is in the heater lines. However, some orders for ranges are being received. Northern Ontario dealers have ordered consignments for shipment this fall. This demand runs to one, two or three lots for the most part.

Gas Range Activity.

Gas Ranges.—Activity is now beginning to manifest itself in gas ranges. As the largest demand is always felt in the spring, the first evidences of an active demand are being felt. It is said that some contracts have already been placed. As there is every certainty that 1912 is going to prove a big building year, it is accepted that the spring demand for gas ranges will set a new mark.

Heaters are Selling.

The cold weather has revived the demand for heaters. It is understood that some good orders for base burners have been placed; that is, good for this season. Oak heaters are also selling rather briskly. Some orders have been received for as many as half a dozen, all for shipment instanter.

The cold weather has revived interest largely in oil stoves. People discovered that bedrooms were hard to heat during the cold spell and there was a demand for small oil heaters. Dealers are reported to have experienced a brisk demand and this, of course, resulted in a call on the manufacturers.

Furnaces Still Active.

Furnaces.—This industry still shows signs of activity. While the demand from provincial points has fallen off, there is still a lot of work being done in Toronto. One furnace man took out no fewer than eleven this week and he reports that he will need a dozen or more still. Others, while not quite as busy, have been kept hard at work and have been ordering furnaces steadily.

Small Ware Dull.

Kitchen Furnishings.—The demand here is not very heavy. Dealers are engaged in stock-taking and are not, therefore, inclined to lay in new stocks as yet.

TRIBUTE FROM SUPPLEE CO.

The Supplee Hardware Co., Philadelphia, pay a high tribute to the worth of Hardware and Metal. They say:

"We congratulate you on your issue of January 6. It makes a very handsome and readable publication."

APPOINTED CASHIER.

Hugh Jackson, treasurer of the Positive Clutch and Pulley Co., Toronto, has resigned his position to accept the post of cashier of the Canadian Fairbanks-Morse Co., at Calgary.

Methods of Retailing Paints and Varnishes

Great Possibilities in Wood Turpentine

American Experts Assert That Great Wealth Can be Taken From Stumps and Waste Wood—Something of the Cost of Wood Turpentine Production and its Uses.

Secretary Wilson, of the American Department of Agriculture, has issued a statement regarding the production and uses of wood turpentine, which will be of interest. The statement is embodied in a bulletin relating to distillation of woods :

"From this waste wood the entire output of naval stores, embracing turpentine, rosin, tars, pitch, rosin spirits, and rosin oils, having an annual value of at least $30,000,000, may be obtained without boxing or turpentining a single tree," is one of Secretary Wilson's most striking sentences.

An explanatory statement is issued by the department to the effect that "it was not Secretary Wilson's purpose to discuss the details of equipment or technique of the various processes by which this utilization of the waste wood can be achieved, as it is a comparatively simple problem for the experienced chemical engineer, but to emphasize the importance of saving the waste, if we intend to conserve the growing timber without reducing the present tremendous use of our forest products.

Extracts From Reports.

Some interesting extracts from the report are attached :

"Wood turpentine can be recovered from any of the coniferous woods, but the long-leaf yellow pine of the south, the Norway pine of the Central North and Douglas fir of the Northwest contain a sufficient rosin to justify working them.

"As far back as 1841 patents relating to this subject were issued, but the process was not developed until within recent years. The difficulty of supplying the increasing demand for turpentine has increased during the past ten years, owing to the rapid decrease of the supply of live pine timber suitable for even the most advanced system of turpentine orcharding and has turned the attention of business men and investors to devising and exploiting apparatus and processes for the recovery of the turpentine from the waste coniferous lumber.

"The Secretary referred to the census reports which shows that the production of gum spirits of turpentine in this country is on the decline, 38,500,000 gallons produced in 1900 being worth $14,960,235 and the 29,000,000 gallons in the year 1909 bringing $12,654,000, and stated that according to the best estimates the output of our mills is 16,000,000,000 board feet of southern pine, Douglas fir and Western pine ; and there is at least half that amount of waste at the mill and in the forest, or approximately 8,000,000 cords of wood available for the recovery of turpentine and rosin, the manufacture of paper, etc., from which an average of three gallons per cord may be secured, or nearly as much as the entire output of turpentine in 1909."

Monogram Published.

The Department of Agriculture has also published a monogram on the subject of wood turpentine, dealing with its production and refining qualities. It deals with the cost of wood turpentine production as follows :

"Tne cost of producing wood turpentine varies greatly in different plants and is dependent on the cost and quality of the wood obtainable for the distillation, the cost of operating and managing the plant, depreciation of the plant and interest on the investment. The cost of wood, according to information collected by the bureau, varies from $1.50 to $3 per cord for what is known as 'lightwood,' delivered at the works. This charge is made up chiefly of the cost of gathering, hauling and freight, the wood in the forest costing very little—from 15 cents to 75 cents per cord being a fair valuation. While it is the aim of the distiller to use only wood rich in turpentine and rosin, it is often difficult to get this, particularly when the wood is delivered at the works or at the railroad on contract, as the contractor does not as a rule exercise much care in selecting the best and richest wood. Better wood is undoubtedly obtained when it is selected and gathered by the distiller's own force, and, furthermore, the cost of hauling and handling is not so great as a rule as when it is done by contract. The cost of waste wood from a lumber mill averages much less, probably not more than $1.50 per cord.

"Since wood turpentine is used as a substitute for gum spirits of turpentine it should comply with the customary tests applied to gum spirits to determine its suitability for this purpose and also with specifications for gum spirits.

"Three grades have been suggested by this bureau for gum spirits, and there appears to be no reason why wood turpentine should not be graded in the same way and comply with the same specifications. These specifications are :

"Standard or No. 1 turpentine should have a specific gravity at 20 degrees C. of from 0.862 to 0.870 ; a refractive index at 20 degrees C. of from 1,468 to 1,476; 95 per cent. should distill below 170 degrees C., and a layer of not less than 200 mm. should be required to equal in color the Lovibond yellow glass No. 1. On polymerization with 38 normal sulphuric acid the residue should not exceed 1 p.c., should be reddish in color and viscous, and its refractive index at 20 degrees C. should be from 1,500 to 1,520. An unadulterated turpentine which does not agree with these requirements may properly be regarded as not of standard or No. 1 quality.

"Second quality or No. 2 turpentine should have a specific gravity at 20 degrees C. of from 0.862 to 0.875; a refractive index at 20 degrees C. of from 1.468 to 1.480; 90 per cent. should distill below 170 degrees C. and a depth of not less than 100 mm. should be required to equal the Lovibond yellow glass No. 1. The polymerization residue must not exceed 1 per cent. and must have a refractive index of not less than 1.50.

"Third quality or No. 3 turpentine should have a specific gravity at 20 degrees C of from 0.865 to 0.880 ; a refractive index at 20 degrees C. of from 1.468 to 1.485 ; 60 per cent. should distill below 170 degrees C. and a depth of not less than 50 mm.

A PAINT WINDOW.

Paint window displays are generally pretty rare at this time of year. This is due to the impression which exists among dealers that paint will not sell at this period to any extent. The fact that more paint is not sold is due, to some degree at least, to this same indifference in the matter of creating a demand. If more attention were paid to paint, the turnover during the winter months would be larger.

Some good displays of interior paints and varnishes have been arranged in hardware windows recently. In each

case the enterprising dealer who thus broke away from the routine, was rewarded by fairly liberal sales. An effective display is being shown at the present time in the store of J. H. Copeland, Queen St. W., Toronto. It is understood that good results have been obtained.

A Splendid Time for Interior Painting

People are Much at Home During the Winter, and Notice Improvements Which a Coat of Paint or a Can of Varnish Would Make—The Dealers, by Window Displays, May Stimulate the Demand for These Goods—A Montreal Merchant Has Already Secured Good Results.

Activity in the paint department is not over yet, a fact to which R. Camille Fournier, manager ol the Union Hardware Co., Montreal, bears testimony. In this universally quiet season, indeed, Mr. Fournier is experiencing a good demand, not so much for paint as for varnish. He is going after the trade, in fact is suggesting to people that this is a good time to do painting inside the house.

This is the Home Season.

This is the season of the year when people are at home than at any other time. Despite all the talk of "a homeless age," the majority of families spend many of their winter evenings in their own houses, and at this season more than any other they think of their homes, and plan improvements in them. If, therefore, they are made to see that a little varnish or a little paint will brighten up some of the floors, doors, or base boards, they will invest in the material needed, and do the work, either some evening, or on one of the Saturday half holidays.

It is the suggestion of this work which Mr. Fournier is giving through the medium of his show window. In it he has a good display of varnish, brushes, and manufacturers cards, showing people doing interior painting for themselves. The arrangement can hardly fail to attract attention, and people who know that certain parts of their home need brightening up will go inside and buy. Many, indeed, have done this already.

Time for Interior Painting.

It is a good plan which this hardware firm has adopted. The season is too far advanced to permit of much painting outside, but this is a good season for interior work. Many a kitchen floor needs a coat of paint. Many a door o bit of wainscotting is getting dull and dirty looking. All the people want is the suggestion that they can now brighten these, and they will buy. It is easier to interest people in the appearance of their home, now, when they are constantly in them, than in the spring or summer when the outdoors is making its appeal. Dealers should remember this, and make a bid for varnish and interior paint trade now.

Higher Prices Predicted in Glass

New Discount Set in Toronto on Single Thick and Double Thick—Advance in Ocean Freight Rates of 40 Per Cent. Will Mean Higher Prices for Glass This Year.

Toronto, Jan 6.—Evidences of a convincing nature are coming to hand every day that an era of higher prices in glass is ahead.

A new discount has been put into effect here on single thick and double thick glass, the figure now quoted being 30 per cent. off. This discount has been put into effect by the glass jobbers for the Toronto district north as far as North Bay and west as far as Windsor.

In commenting on the situation in glass, a Toronto jobber makes the significant statement that "the glass market of Europe is exceedingly firm at the present time and there is no hope of window glass being cheaper during the year 1912 than it is at the present time."

Increase in Rates.

A short time ago, the European manufacturers advanced their prices. In addition to this, the ocean steamship companies announced on January 2 an advance in freight rates for the open season of 1912. The advance is from 10 shillings per 1,000 Kilos, the rate charged in 1911, to 14 shillings per 1,000 kilos. This is an advance of 40 per cent. on freight rates alone. On account of the heavy weight of glass, the freight rate constitutes a large proportion of the laid down cost so that this increase will in itself, in all probability, necessitate higher prices for window glass during the coming season.

Hardware and Metal has at various times predicted further advances in glass and, from present indications, these predictions will be borne out early in the year.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Anchor Wringers.

The Lovell Manufacturing Co., of Erie, Pa., have issued catalogue No. 7, illustrating their full line of Anchor brand wringers. It contains 120 pages and is printed on heavy coated paper. Each style of wringer listed is illustrated in three or four colors. The catalogue is most highly creditable from the typographical standpoint; one of the best, in fact, received for some time.

In the introduction mention is made of the fact that it has been found necessary to enlarge the factory and equip it with all latest appliances.

In addition to the full line of Anchor wringers, a number of mangles are also listed, together with toy wringers and display stands.

House of Greener.

A comprehensive history of the famous gun-making firm of W. W. Greener, St. Mary's Square, Birmingham, England, has been received. The story of the growth of "The House of Greener" is told in an interesting way, together with a recital of the many improvements in gun-making that have been originated by members of the Greener family. The booklet gives emphatic denial to the story that a limited company had taken over the business.

Expension Bolts.

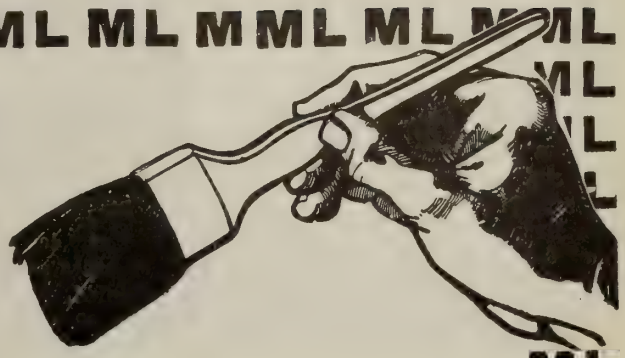
The Star Expansion Bolt Co., New York, have issued a catalogue containing a comprehensive review of their complete line of Star expansion bolts, Star screw anchors, Star toggle bolts, Star drills and Star pipe drills. Each article is fully described and illustrated.

Catalogue Garage Door Equipment.

The Richards-Wilcox Manufacturing Co., Aurora, Ill., have issued a neat booklet describing their ball-bearing garage door hangers, as well as special weather strip and guides for sliding doors. This booklet shows the many passibilities of hanging sliding doors to meet special requirements, various sizes of weights of doors, not only of much interest to architects but instructive to hardware salesmen who sell builders' hardware.

The information contained is quite comprehensive, and the illustrations are excellent. Hardwaremen should obtain copies.

There's Money in the ML Line



ML goods are made to build up trade for our dealers and ourselves. They have to be good, and they are good because we've been in business for 20 years—long enough to know that the way to succeed is to give full honest value for every dollar's worth we sell.

M L PAINTS

Under severe weather tests ML Paints have stood up better than the many "best" paints in the market. We know. You can surely entrust your most particular trade with ML Paints.

M L FLOORGLAZE

A quick drying, glossy, wear-resisting finish—good for any paint purpose. In solid and transparent effects. Many shades. Well advertised. Splendid for amateurs who want to "fix up things" themselves.

ELASTILITE VARNISH

Here's one of the best exponents of the goodness of the M L Line. A favorite with folk who know that quality pays though it seems to cost more at first. Elastilite is splendid for any varnish need, indoors or out.

Many other good members in the ML Line. Get price list, color cards and samples soon, from

PAINT AND OIL MARKETS

LINSEED OIL ADVANCES.

The feature of the paint and oil market this week has been the sharp, but not unexpected advance in linseed oil. Prices have gone up 5 cents both in Montreal and Toronto. The question is now being discussed on all sides, are further advances in sight?

MONTREAL.

Montreal, Jan. 11.—Spring does not appear to be in the air these twenty below zero days, and yet its coming is already casting its shadow before in the shape of orders for paint. The retailers have been holding off somewhat, hoping for lower prices; but now the word that there is to be no lower lever struck has been pretty generally heard. Dealers therefore are listening to the travelers who are soliciting their orders, and are, indeed, even sending in their orders by mail. The heavy ordering has not started as yet, but the manufacturers are already getting some indication of the business which they may expect in March and April.

Few Changes is Price.

The week has not seen a great change in the price asked for the various oils. Linseed has advanced considerably, but this upward tendency had made itself felt last week, being then predicted. Turpentine, too, was on the upward move last week, and is now quoted about two cents higher than for the past fortnight.

These slight changes are of little consequence, for but little oil is being bought. Neither is turpentine in great demand. For petroleum there is a good call. Indeed, this is one of the briskest lines at the present time. The cold has helped the sale of this product.

Advance Seems Less Likely Now.

White Lead.—Had pig lead advanced any more, there would necessarily have come a somewhat corresponding advance in the price of the finished produce. But lead has not climbed of late. For some seemingly inexplicable reason pig is at present quoted lower than for some time. There is enough Trail lead to be had to satisfy the demand, and so prices have somewhat decreased.

The demand for white lead is good. Orders for spring are also being taken.

Plata Crop is Doubtful.

Linseed Oil.—Reports, seemingly well founded, state that the Plata crop of flax seed is not as good as has been predicted and hoped. As a result, prices of the oil have advanced in England, and an advance has taken place here too, though not as great as the one noted in England.

Early last week prices were quoted at 90 cents and 93 cents, but in the review printed, it was predicted that 93 cents and 96 cents would likely be asked by the end of the week. This proved correct, and now another advance has been generally made. The figures quoted for the most part now are 95 cents for raw and 98 cents for the boiled oil.

Putty.—As far as this line is concerned, there is little to say. The supply is more than ample and the prices remain as for some time past.

Glass.—The sale is keeping up well. Orders coming to the handlers are only of the sorting size, but the retail carriers are selling good quantities these days.

TORONTO.

Toronto, January 12.—The paint market is beginning to show signs of activity. Although orders are not yet large or numerous, the travelers are out on the road and considerable spring business is being booked. Enquiries are also coming in by mail and it is becoming apparent that spring business will be active.

The feature of the market this week has been the sharp advance in linseed oil. The price has gone up 14 cents in two weeks—a very rapid increase, even for linseed oil.

Advance in Oil.

The price of linseed oil was advanced on January 6 to $1.00 for raw and $1.03 for boiled. The condition of the oil market at present seems to be for a positive high price for spring deliveries. Reports coming to Great Britain from the sources of their usual supply indicate that the crops are very much less than was anticipated a month a or six weeks ago. Inasmuch as reports are being received of fields of flaxseed still standing under snow in the northern parts of the western provinces, it becomes apparent that the Canadian crop is also short of earlier estimates. As a result, the Canadian crushers find themselves obliged to make higher figures than were anticipated for winter and spring supplies.

It is said that the prices now in force in Great Britain would make it cost about 5 cents per gallon above the producers' price in Canada so that there does not seem to be any relief in sight. In fact, further advances are predicted in some quarters.

Turpentine is Steady.

The price of turpentine has remained steady at 73 cents. The situation has rather puzzled those who were looking for an advance. It is quite probable that the holiday season has been responsible for the lack of interest. Reports from the southern states are to the effect that rainy weather has set in and that the supply of gum in the turpentine section has fallen off materially. It is believed that about all the supplies for this season are now in hand. If this turns out to be the case, the price of turpentine will see some advances between now and April 1.

Demand is not large but lots of enquiries are being received. Chief interest centers, however, in linseed oil. The jobbers are receiving heavy enquiries about oil.

Common Rosins Advance.

There has been an extraordinary demand during the past month for what are known as the common or dark grades of rosin. The price has advanced so that buyers have been forced to pay on an average $1.00 per barrel more.

White Lead Firm.

White lead remains firm although there does not seem any likelihood of further advances for a time at least. Demand is not very heavy, although some booking is being done.

Glass.—The same condition is found in the glass markets. Business has fallen off now although some belated orders are being filled. There is a strengthening tendency noted in glass. Ocean freight rates have advanced and overland rates are also higher. It is conceded, therefore, that the price of glass will advance during the year.

Putty.—Some business is being done but it is not heavy. Standard putty is quoted as follows: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

Spring Paint Booked.

Some booking is going on in paints, although business is not yet very large. The salesmen are now out and they report that the dealers seem inclined to estimate their requirements for the coming year on a liberal scale.

B-H "ENGLISH" PAINT

70% PURE WHITE LEAD – 30% PURE WHITE ZINC

100% PURE PAINT

There are many paints and many guarantees, but there is one recognized standard in paint making. Therefore, the only guarantee that insures quality to you is the one that shows the formula and tells you not only that standard pure raw materials were used in its manufacture, but that these standard pure raw materials were used in right proportions.

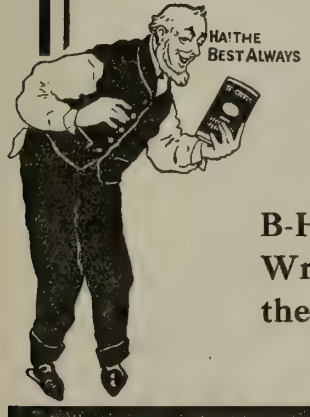
Every can of B-H. "ENGLISH" WHITE PAINT that leaves any of our factories bears the following guarantee:—

We guarantee this B-H. "ENGLISH" WHITE PAINT is made from Brandram's B.B. Genuine Government Standard White Lead and Pure Zinc White in the following proportions:—

70 per cent. Pure White Lead
30 " " Pure White Zinc
} 100 per cent Pure

Mixed ready for use with pure Linseed Oil, Turpentine and Dryer.

On every can of B-H. "ENGLISH" PAINT where the shade can be made on a white base, there is a guarantee label showing that the White Base consists of 70% Pure White Lead (Brandram's B.B.) and 30% Pure White Zinc.



B-H. "ENGLISH" PAINT gives you a good profit. You command the highest market price because of the quality—and, therefore, economy—back of the goods.

B-H. "ENGLISH" PAINT will be sold in your town. Write us to-day for 1912 Price List and details of the selling plans. Address our nearest office.

MINERVA PAINTS

COVER BETTER

WEAR LONGER

THE BRAND OF QUALITY

Backed by the most forceful and original selling-helps ever devised, that increase dealers' profits.

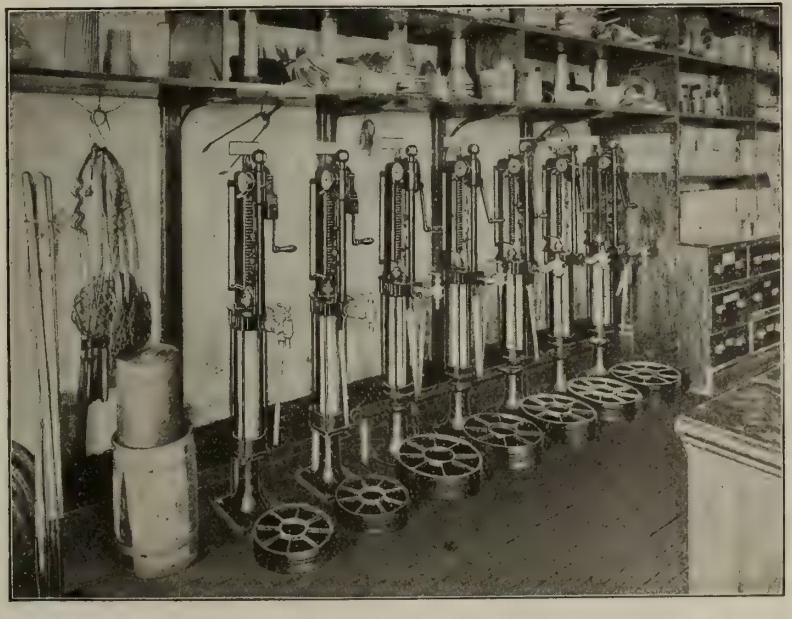
Don't overlook the "Minerva" Proposition. Write for details.
All "Minerva" Specialties put up in Full Imperial Measure Cans.

Pinchin Johnson Co. (Canada), Ltd.

ESTABLISHED 1834 TORONTO

I 70

This Illustration was made from a photograph of a Bowser installation for Mr. Samuel Hobbs, 1434 Queen St. W., Toronto, Ont.



This system handles
Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No 15.

CONGO NEVER LEAK ROOFING

HOW LONG WILL IT LAST?

Every buyer of roofing asks that question---"How long will it last?"

That question is important.

We know positively how long Congo will last and are prepared to give every buyer a *real* Surety Bond with every roll of Congo Roofing.

The bond guarantees that Congo, 2-ply or 3 ply, *will last at least ten years*, and the buyer has *absolute certainty* on that point.

This guarantee is issued by the National Surety Company of New York and is enforcible without resort to law and without delay, should Congo fail to last the ten years.

The fact that no other roofing manufacturer *can* give a Guarantee Bond like this ought to convince any reasonable buyer that Congo really is the *best* ready roofing made.

We will be glad to send you without obligation on your part a copy of the guarantee and further information.

CONGOLEUM FOR FLOORING AND WAINSCOTING

We should like to send every reader of this Paper a sample of Congoleum. It is fitted for use as a border around rugs, as wainscoting and as flooring. It is a perfect imitation of light and golden oak. Its surface has a high polish. It is unusually durable. The price is very low. Write for samples and further details

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

Paint for 1912

There will be more paint sold in 1912 than in all the years that have gone before. Let us help you to get a good big share of this trade. The old beaten paths are played out. People are tired of the played out paints, the cheap stuff that lasts for no time, the dear stuff that only hurts the pocket.

Ramsay's Paints

are your protection. They protect your guarantee, your reputation, your profit. There is profit in Ramsay's Paints, because the price is right, the quality is right. The man who won't pay the price for Ramsay's Paints doesn't want pure paints. If he wants pure paints he will take Ramsay's.

Ramsay's Paints for 1912---profit, protection, and success.

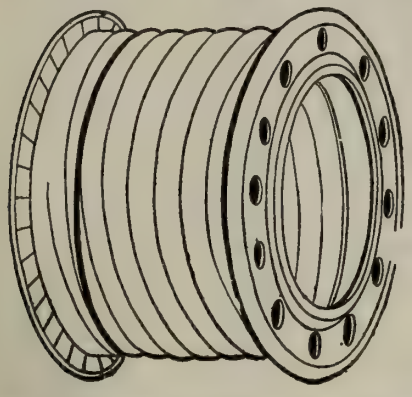
O.K. THIMBLES



Every new house in your town means a prospect for several O.K. Stove Pipe Thimbles. You should carry a good supply in stock and be ready to supply them when wanted.

O.K. Thimbles are made for both floors and partitions. They can always be put in place instantly. Your customers will prefer them to any other Stove Pipe Thimbles they can buy.

SHERWIN-WILLIAMS PAINTS & VARNISHES

Put together as carefully as a druggist's prescription. Every step in the manufacture of Sherwin-Williams Paint from the selection of pure raw materials cess of grinding and mixing to the Imperial Full Measure Car scientific care. Ask the local dealer for S W P.

THE SHERWIN-WILLIAMS Co. of Canada, Limited, Montreal, T

SHERWIN-WILLIAMS PAINTS & VARNISHES

Paint your implements before you store them for the winter. Its an easy inexpensive matter to add years to their life by the timely use of S-W Wagon and Implement Paint. Prevents rust and decay of wood and metal. Its use is a profitable investment—ask the local Sherwin-Williams agent, there is one in every town.

THE SHERWIN-WILLIAMS Co. of Canada, Limited, Montreal, Toronto, Winnipeg, Vancouver

How we help to increase your business with the farmers

The farmer as an individual uses more paint than any other class of people. His home, barns, fences, windmills, implements and vehicles all require paint protection. As the cost of lumber increases, the farmers are forced to recognize the necessity for using paint freely to prolong the life and usefulness of their property. The above are two of a series of forceful advertisements which has been appearing regularly this Fall in the leading Canadian farm and home journals. Such advertisements will continue to appear during the Winter and Spring. We know that persistent advertising to the farmer brings results.

Sherwin-Williams paint and varnish advertising has been running in the following journals, having a combined circulation (eastern and western editions) of over 404,000 each issue: The Farmers' Advocate, Toronto Sun, Montreal Weekly Star, Journal of Agriculture, Maritime Farmer, Nova Scotian, Grain Growers' Guide, North-West Farmer, Western Home Monthly, Vancouver Province.

This kind of co-operation brings business into your store. Write for S-W Agency proposition.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL

It is the central market place of the hardware trade throughout Canada.

There is always someone somewhere looking for just such proposition as you have to offer.

BUSINESS CHANCES

FOR SALE—Smart little hardware business; good turnover; stock about $4,500. Must be sold quick; owner going West. Box 593, HARDWARE AND METAL, Toronto. (39tf)

DOMINION RIGHTS for new American inventions are often offered ridiculously cheap—merely reimbursing inventors for patent fees expended. Such monopolies afford opportunities. Communicate with H. D. MacDONALD, 35 W. Congress, Detroit, Mich. (2)

FIRST-CLASS hardware, stove, tin, granite and general jobbing business. Established 30 years; doing splendid business; stock reduced to $5,000; $2,500 will handle; yearly turnover $20,000. Fine store, the best stand in the place, fine farming country. This business will stand the closest inspection. At rate in the dollar. Wish to retire. D. FERGUSON, Teeswater, Ont. (2tf)

FOR SALE—Hardware, stove and granite business. Established thirty years, doing a splendid business, stock will run about seven thousand and in fine shape. Yearly turnover twenty thousand; good store, can be rented or bought; fine farming country. This business will stand closest inspection. At rate on the dollar. Wish to retire. D. FERGUSON, Teeswater. (16tf)

FOR SALE — Hardware and Implement business in Saskatchewan. Turn-over $30,000 per year and increasing 30 % annually. No opposition for Hardware. Good paying proposition. Will sell with or without stock. Reason for selling—proprietor cannot handle with his other interests. Address Box 610, HARDWARE AND METAL, Toronto. (1)

FOR SALE—Hardware, stove and tinware business. Established twenty-two years; doing a cash business last year of forty-five thousand; stock will run about eight to ten thousand. This is a money maker to a good live man. Good reasons for selling; splendid farming community. If interested would like to show you this business. Splendid store, can be rented or bought. O. B. HENRY & CO., Drayton, Ont. (1tf)

THRIVING HARDWARE BUSINESS FOR SALE consisting of shelf and heavy hardware, stoves, etc. Located in central part of Ontario; three railroads; turnover $50,000; stock $10,000, which is being reduced. Excellent chance to buy at rate on dollar. Retiring from business. Box 618, HARDWARE AND METAL, Toronto. (52tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25 % to 75 % of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

WANTED

SIDE LINES WANTED—Traveller calling on hardware trade in Ontario wants two or three good side lines. State commission and full particulars. Apply to Box 621, HARDWARE AND METAL, Toronto. (4)

SITUATIONS VACANT

EXPERIENCED specialty salesman wanted; advertising experience desirable. This is a good position and offers splendid opportunity for advancement. State fully age, experience and salary expected. MACLEAN PUBLISHING CO., LTD., 143 University Avenue, Toronto. (tf)

WANTED — A reliable, ambitious man in every town to look after the entire circulation of our thirteen publications. Work very remunerative. MACLEAN PUBLISHING COMPANY, 143-149 University Avenue, Toronto, Ont. (tf)

MISCELLANEOUS

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE — By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THE YEAR we offer unusually good bargains in second-hand Typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. THE MONARCH TYPEWRITER CO., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

725,000 LIVE MERCHANTS use National Cash Registers. We couldn't sell them unless they saved people money. The National will guard your money too. Write us for proof. National Cash Register Co., 285 Yonge St., Toronto.

SITUATIONS WANTED

HARDWARE CLERK, with 10 years' experience in England, builders' and general hardware, wants to make a change. Good experience in the country. HARDWARE, 103 Babcock Street, Hartford, Conn., U.S.A. (2)

THOROUGH HARDWARE MAN, fifteen years' experience buying and selling. Inside or travelling. Also capable of taking charge of retail business. Box 620, HARDWARE AND METAL, Toronto. (2)

SALESMAN WANTED.

THERE IS AN OPENING ON THE STAFF OF the Canadian Grocer for an experienced salesman with knowledge of the grocery trade. Advertising experience is desirable. This is a good position and offers splendid opportunity for advancement. State fully age, experience and salary expected. MACLEAN PUBLISHING CO., LTD., 143 University Avenue, Toronto. (1)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS AND PAPER HANGERS—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paper hanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

MONTREAL TORONTO WINNIPEG

Mr. Dealer: I am Martin-Senour Paint; they call me 100% Pure for short

If you don't remember the name, you will no doubt recall my face, for you have seen me many times.

I am a friend of yours. I go out among the people of your vicinity and make friends for you, I make them tell each other about your store.

When people take me out of my can and spread me on the surface, I stick. Every dealer that has me in his store says I have the backbone to make good.

I am sorry to say that there are some of my color, but not of my class, that give a bad name to the dealer who is unfortunate enough to be found in their company. Like all black sheep they are hard to get rid of, but the longer they stay around the more trouble they bring.

Of course, Mr. Dealer, I can't make friends for you unless you give me room in your store, but believe me, if you do I will be the hardest little worker for your profit and reputation that you ever had on your shelves.

If my traveler hasn't called on you, just drop a line to me, care of

THE MARTIN-SENOUR CO., Limited

PIONEERS OF PURE PAINT

Montreal **Chicago** **Winnipeg**

HOW ARE YOU FIXED

for varnish? Are you going to carry a stock of DOUGALL VARNISH for your spring trade in order that you may be in a position to offer your customers the best obtainable?

If you sell Dougall Varnish to your customers you can let them leave the store with the full assurance that they will be well pleased with the results.

You will reap the harvest later on. Your customer will not forget that you sold him the varnish which gave him such good satisfaction, and an increased business from him will be your reward.

THE VARNISH THAT LASTS LONGEST.

The Dougall Varnish Co., Limited

J. S. N. Dougall, President

305 Manufacturers Street, - - - Montreal, Canada

Proof Pratt & Lambert Varnishes Sell

The following letter is from a house established 87 years—a house which in its time has seen plans for selling varnish for the dealer come and go. When such a house comes out with the statement that the "P. & L." Line is the ***best*** proposition they have ever had from ***both quality and selling standpoint***, that means best of not one or two lines, but perhaps of almost every line of varnishes on the market. It is your opportunity now to profit by the 87 years' experience of this firm by investigating the Pratt & Lambert Proposition from every standpoint.

THE BOOTH & LAW COMPANY
Varnishes, Paints, Brushes.
Office and Sales Rooms: 59 Crown Street. HOUSE ESTABLISHED 1825.
Warehouse: Water and Olive Streets, New Haven, Conn.
Messrs. PRATT & LAMBERT, New York, N.Y.

LYMAN M. LAW, President.
WALTER B. LAW, Vice-President.
J. HAROLD LAW, Secretary.
CHAS. WEISS, Sales Manager.
December, 11, 1911.

Gentlemen:—We want to say that your line is the best proposition we have ever had, from both quality and selling standpoint. Our future efforts, we can assure you, will be centered on the P. & L. Line.

Thanking you for your kind co-operation, we are, respectfully yours,
C/W **THE BOOTH & LAW COMPANY**

There is no reason why you cannot duplicate the success of this and other Pratt & Lambert Dealers in all parts of the United States and Canada. Pratt & Lambert advertising is creating the same kind of a varnish selling demand. This Spring this demand should be greater than ever, owing to the tremendous Pratt & Lambert Spring Advertising Campaign. Do not let this Spring go by without at least investigating what we can offer you in increased varnish sales and profits.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

The World's largest manufacturers of Pure Lamp Blacks

stand behind every pound of lamp black sold under the Bear Trade-mark shown on the accompanying illustration of label.

Less than nine years ago, this firm, *as a firm*, did not exist, although the men composing it have been many years in the lamp black trade.

Since that time we have been able to secure two-thirds of the entire lamp black business of North America.

Consistent good quality did it!

A recent addition to our plant, made necessary by the increasing confidence of the trade, makes our factory the largest of its kind in the world.

We manufacture all the Standard Grades of pure Lamp Black. Our product is sold by all reliable wholesale houses.

When "CANADA" Cement is Specified

the builder is assured of uniform strength, fineness, color and setting qualities. Rigid tests, under the supervision of our general superintendent and general chemist, maintain this high standard of quality.

Each barrel is guaranteed to weigh full 350 pounds (gross) the maximum cement barrel weight.

Mills in all parts of Canada enable us to make prompt delivery.

Being in competition with, and controlled by the market for such materials as steel, wood, clay products and natural stone, the price of cement is governed by conditions. At present these permit of a high grade material at a very reasonable price.

Specify "Canada" Cement for buildings, bridges and concrete blocks, and be sure of satisfaction.

TRADE Gillette MARK
KNOWN THE WORLD OVER

The Trade That Pays

CANADIAN purses are filling—Canadian purse-strings are loosening. An ever-increasing number of your customers are reaching that stage of prosperity where they want the BEST—and are willing to pay for it.

He is the wise dealer who, in this year of grace 1912, makes his bid for business on the ground of quality and service rather than on cheapness.

His trade sticks, in spite of lower prices for inferior goods, and in spite of reckless bargain giving, and he makes a satisfactory profit on everything he sells.

Thus it is better business, every way you look at it, to sell a man a GILLETTE Safety Razor at $5.00 or more, than it is to offer him a cheap, foreign-made makeshift, or even a cheaper razor which is well worth its price. You make more profit at the time, and you sell him something with which he is going to be more than pleased, instead of more or less disappointed.

Besides, if he buys a GILLETTE from you, he will come back—partly for new blades, but more because he will be favorably impressed with the goods you recommend.

S.M.P. Factory Milk Can Trimmings

Broad Hoop Pattern Roll Rim Bottom

ARE UNEXCELLED FOR STRENGTH AND DURABILITY

The Roll Rim has no sharp turns, therefore the grain of the metal is not broken, and having a broad wearing surface on the bottom, it cannot damage floors. Ample space is left between the bottom and the hoop for the insertion of the Body of the Can. It is the neatest in appearance and strongest in construction and is supplied with concave bottoms. By examining the cut, anyone can readily see that this style of construction makes it the strongest bottom ever produced They do not cost any more than an inferior bottom. If you want to keep ahead of your competitors, use our Roll Rim Milk Can Bottoms.

We also carry in stock Tinned Iron, cut to size for Milk Can Bodies, which we can supply promptly.

COMPLETE SETS

Comprising one broad hoop, roll-rim bottom, concave pattern; body hoop 6 inches wide, 20 gauge; top hoop 4 inches wide, 14 gauge; one cover; one pair malleable side handles with ears; one pair steel top handles.

Gallons 10 15 20 25 30 40

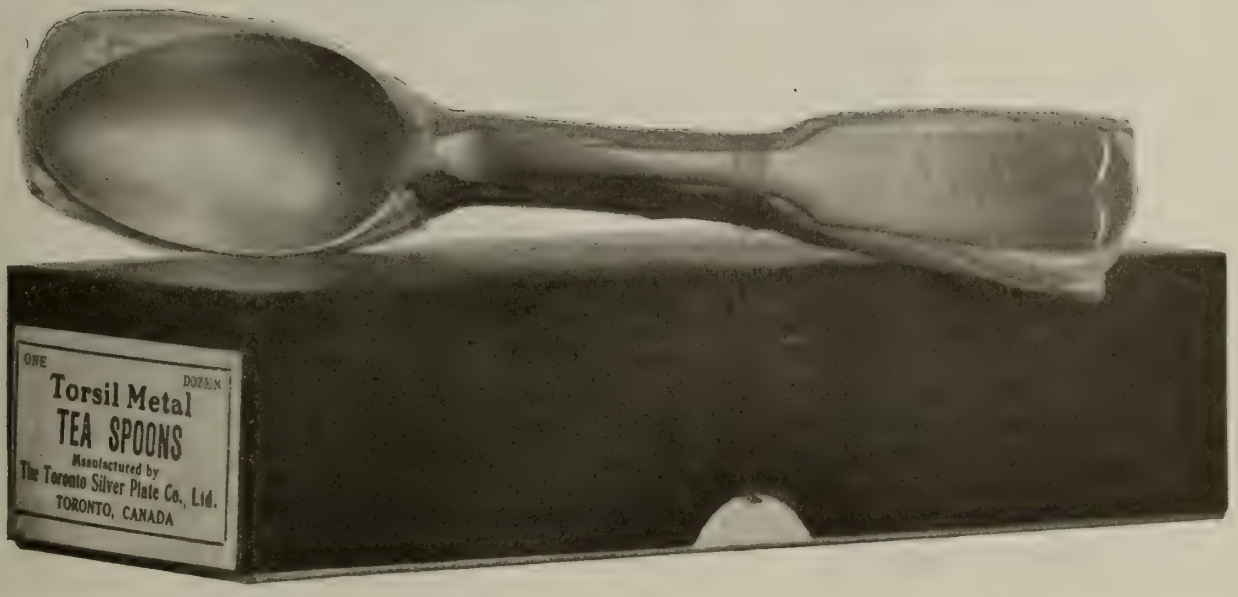
TORSIL METAL

The Stamping of Torsil Metal on Spoons and Forks conforms with the Gold and Silver Marking Act

Tipped Pattern



Spoons and Forks made of Torsil Metal are guaranteed solid Metal throughout. Torsil Metal is a solid White Metal, exceptionally hard, combining durability and strength, no coating to wear off, will not rust, for hard usage will give perfect satisfaction, fully equal in quality and in some cases far superior to British, American or other Canadian made goods, and no higher in price.

For Hotels, Restaurants and family use, where customer does not wish to go to the expense of plated goods, Torsil Metal is without a parallel.

As there is no plate to wear off, any Silver Powder, Chalk or Electroine can be used to clean them; the more they are cleaned the whiter and more beautiful they become.

Torsil Metal Spoons and Forks are tied up in sets of six with olive green ribbon, packed one dozen in an olive green box and nicely labelled and plainly numbered.

If you cannot buy this line from your Jobber write us direct for our prices and a sample spoon; the sample spoon will not cost you anything, and we would like you to try it with a file and see how hard it is, and generally to compare it with any other similar line that you may be now handling.

American Cans

IN SELECTING your **PAINT, COLOR and VARNISH** Cans use the same careful judgment and criticism that you exercise in all other purchases. "American Cans" court such a test. Cans are not all alike, even if they do seem similar and look alike as "two peas in a pod." Satisfy every one of your needs in weight, strength, manufacturing detail and appearance; then consider price, promptness of delivery and possibility of a continuous supply without interruption. On the above basis we will take a chance on securing and holding your business.

Supplee Hardware Company

PHILADELPHIA, PENNSYLVANIA

What Progress Have YOU Made in 10 Years?

FIRST YEAR
Started in business with new store, new stock and bright prospects.

SECOND YEAR
Doing a fair business, but not quite as much as had been expected.

THIRD YEAR
Same store, good location, but business hasn't grown any. Many customers not regular buyers.

FIFTH YEAR
Still at the old stand. Profits really should net higher on amount of business done.

TENTH YEAR
Can't figure out why other merchants make more money, yet charge same or lower prices than he does.

Some merchants who started business same year as you, have seen their business and profits grow bigger and bigger month after month every year. Others have done "fairly well," making a bare living. Still others have "progressed backwards."

In Which Class Do You Belong?

Have you ever stopped to figure up—to see if you are getting ahead? Your yearly turn-over is how much? Say $30,000. And you figure to net at least 10 per cent. profit. That's $3,000 a year. In 10 years you have EARNED total NET PROFITS of $30,000.

What have you got to show for it? You OUGHT to have a good part of that $30,000. Have you? And you ought to be doing a bigger business with larger profits now than ever before. Do you?

Whether You Succeed or Fail Depends Entirely on Your Methods

If you are not following the right methods you'll make no better progress this year and NEXT year than you have in the past. And your profits will still be *in the future.* You can't "get ahead" by following the methods of unsuccessful merchants. No use trying. You MUST do as successful merchants do.

Successful Merchants Put a Receipt in Every Parcel

And because National Cash Registers provide the quickest and most accurate method of issuing receipts with every transaction, most successful merchants use the NATIONAL system. Why don't you? Don't say you "can't afford it." The reason you "can't afford" a National Cash Register is *because you haven't got one.*

Ask About the New "Get a Receipt Plan," and Write for Free Booklets

National Cash Register Co.

285 Yonge Street, - - Toronto

Canadian Factory at Toronto

F. E. MUTTON, Manager for Canada

FIRST YEAR
Started in business with new store, new stock and modern equipment.

SECOND YEAR
Prompt, careful service makes business grow—needs bigger store. Customers like his methods.

THIRD YEAR
New store—more customers than ever. Gives a receipt with every purchase. No losses.

FIFTH YEAR
Profits saved in five years enable purchase of better location and erection of own building.

TENTH YEAR
Business well established in new store. His methods attract crowds. Earnings very large. Success fairly won, through better service.

This is the Metal Ceiling Season

Profit on the metal, profit on the paint, profit on the lumber, profit on the labor and work for your tinsmiths will be yours if you go after this metal ceiling business now.

The man who sits under the tree waiting for the fruit to drop just gets the windfalls.

So does the merchant who depends on his friends and the casual purchaser.

Climb the tree and go after the fruit.

Don't wait for the windfalls. Advertise, solicit, take our catalogue and go down the line, interview every storekeeper, housekeeper and trustee of public building, and drive home the advantage of a metal ceiling that will make their building look prosperous, sanitary and up-to-date. A ceiling that is ornamental, fireproof, vermin-proof, non-crackable and permanent.

Go after them one, two, three, four, and, if necessary, five times.

The first time you may not get much encouragement; the next time they will listen a little longer, and the next time they will begin to believe what you want them to believe, and the next time you will get them.

You will create business out of nothing, which spells genius, and genius is the answer for continual plugging.

Thousands are daily proving that it is the plugger that gets there.

Send us the names of the prospects and let us help you.

It Is Very Generally Admitted

that

1847 ROGERS BROS. Ware

in

Spoons, Forks, Cutlery and Fancy Serving Pieces is the standard with which all other makes are compared, and it is the heaviest triple-plated table silverware obtainable.

THE 1847 GIRL

The dealer handling 1847 ROGERS BROS. Ware should TALK QUALITY.

We stand back of every piece and ask that the dealer co-operate by giving careful consideration to any claim that may be made by a dissatisfied customer.

Remember there are other ROGERS and other makes of silverware, but there is only one 1847 ROGERS BROS.—the genuine.

Sold by Leading Dealers everywhere.

MERIDEN BRITANNIA CO.
HAMILTON, CANADA

What You Can Tell Your Customer

YOU CAN TRUTHFULLY STATE

that "1847 Rogers Bros." has been the standard silver plate for over sixty years. That it is the HIGHEST GRADE of silver plate made.

That the change in quality has not changed the price and that the list on

1847 ROGERS BROS. MERIDEN B. COMPANY **X S TRIPLE**

is exactly the same as it was on our former standard or A-1 grade.

That no higher quality can be obtained than our "Silver Plate that Wears."

No better time than the present to advertise by means of window displays and in the papers. We advertise the goods in general publications; it is for you to let the public know you handle "1847 ROGERS BROS." Ware.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. To-day these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

SAVES OIL

The writer of the following letter knows that every time an oil is used over again it loses some of its lubricating qualities, until finally it is entirely unfit for use.

We are trying to show Magnolia from a different view point in each monthly issue of our advertisements.

We have shown the **water test** by the U. S. Government; we also recently published a letter showing that Magnolia had been running sixteen years in a shaft bearing and of that time it **has run six years without a drop of lubrication** and it is still running.

We are able now to present a letter of recent date showing that the use of Magnolia effected a saving in oil of from one-third to one-half and we have quite a number of similar testimonials.

Magnolia Metal Co., New Athens, Ill.,

Gentlemen: Sept. 17th, 1911.

I have used Magnolia Metal for a good many years and I have never had a hot box or bearing and can say that it will outlast any other metal on the market to-day.

I have used from **1-3 to ½ less oil** where the Magnolia Metal has been used. I have **used the oil over and over again**, until it has been all used, without the least heating of bearing. I can safely recommend Magnolia Metal to all Engineers as the best and cheapest metal to use.

Respectfully,
JOHN J. JOHNSON, Engineer.

SOLD BY LEADING DEALERS EVERYWHERE OR BY

Partial view of Trinidad Lake. The dark spots are asphalt; the streams are water on the surface.

Genasco

The Trinidad-Lake-Asphalt Roofing

You know the value of Trinidad Lake Asphalt as a waterproofer. Its natural oils keep it full of life. They have given it power to defend itself against the sun and storms of ages.

In Genasco it gives the same lively resistance to sun, rain, wind, heat, cold, fire, alkalis, and acids, and makes Genasco permanently waterproof.

This is what we are continually telling prospective customers through the leading magazines and agricultural papers of the country.

We show them why Genasco is different from ordinary ready-roofing made of manufactured so-called asphalts, coal-tar, and "compositions," which soon lose their life, and crack, leak, and go to pieces. So they, too, know the value of Genasco, the Trinidad-Lake-Asphalt Roofing.

Think how easy it is to sell what you and your customers already know is the genuine lasting roofing.

We are helping your jobber to make selling still easier for you in many other ways.

Order Genasco from your jobber, and ask him for advertising helps.

The Kant-leak Kleet makes a weather-proof joint at roofing laps without cement, and prevents nail-leaks. Ask your jobber for Genasco with Kant-leak Kleets packed in the roll.

CAN WE HELP YOU

There are some hardware dealers living in this 20th Century who are still using 19th Century methods. They do not realize that Halifax is closer to Vancouver to-day than Montreal was to Toronto fifty years ago.

Twenty-five years ago it was a calamity for a merchant to lose a good clerk, for he knew it was practically impossible for him to get in touch with an experienced man. Such an idea as making a deal with a fellow hardware man a couple of hundred miles away either to buy a set of tinners' tools or to sell a second-hand counter or show case, did not seem practicable to even the most progressive hardware men. If a man wanted to sell his business he had to accept the highest price he could get from some one of his fellow townsmen, for no one else knew of the opportunity or had any means of finding out about it.

To-day the up-to-date dealer

CREATES HIS OPPORTUNITIES

He states his wants briefly in a "Hardware and Metal want ad." and in four days' time practically every hardware merchant, clerk, hardware manafacturer and traveler has read the proposition, and it seems reasonable that somewhere among the "blue noses" of the Maritimes or the pioneers of the boundless West someone will want just what he has to offer.

EVERY HARDWARE MERCHANT IN CANADA

can take advantage of our "want ad." page. Ask yourself:

Is there not some article I would be better without if I could get a fair price for it? If you cannot get a fair price for it by appealing to the trade throughout Canada you had better sell it for scrap

We can help you, but you must take the first step.

Surely it is worth 25c or 50c to find the one man in Canada whose wants dovetail into just what you have to offer.

Methods of Following up Stock Taking

Information Contained in Inventory Should be Used to Formulate Buying Plans for the Year—The Advantage of After Inventory Sales—Some Practical Ideas for Conducting Clearing Sales.

In a great many hardware stores stock-taking has been finished; that is, the actual counting, valuing and totalling up has been done. Most of what might be termed the "after work" is still waiting, however. The annual inventory puts the proprietor in possession of certain facts. It then devolves upon him to use this information, to give a practical application to the results of his work.

It is wise, in the first place, to apply the information obtained in taking stock, by formulating a buying policy for the year ahead. The inventory reveals weaknesses in the management during the preceding year. It shows the lines which have been slow sellers and points

Advertisement of J. P. Shannon, of Neepawa, who is holding after-inventory sale

many a moral for the buyer. By consulting his sheets, the hardwareman can tell just how much he sold during the year in each line; and, in that way, he can estimate with more exactitude the amount he should buy for the next year. Paying heed to the mistakes which the inventory has revealed, he can plan his buying campaign and avoid making the same errors of judgment again.

After-Inventory Sales.

After the inventory comes the clearing sale. Some dealers reverse the order, believing that it saves time and trouble to clear out the accumulated odds and ends before attempting to take stock. The advantage of the after-inventory sale, however, lies in the fact that it can be made more thorough and systematic. Until he knows exactly what he has on hand, the dealer cannot decide how much of it should be cleared out and what prices can reasonably be fixed. He needs the full information that only the inventory can supply.

The idea of the after-inventory sale is patent to all. No matter how well the business may be managed and how carefully the stock is tended and weeded out, there is bound to be a more or less large accumulation of odd lines or slightly damaged goods every year. Some dealers endeavor to keep their stocks free of such goods by holding regular clearance sales, but, even in such cases, the end of the year finds a large amount of stuff on the shelves which the dealer realizes he must get rid of. Stock of this description should be cleared out for two very good reasons. In the first place, the longer shopworn articles are kept, the harder they are to sell and eventually they become absolutely valueless. In the second place, they occupy valuable space which should be employed otherwise and they detract from the appearance of the store.

Logical Time for Sale.

After his inventory has been completed, the dealer knows just how much of this kind of stock he has on his premises and, if he is wise, he loses no time in getting it off his hands. The present is a particularly suitable time. General business is slack and the sale does not interfere to any extent with the regular trade. On the contrary, it serves the valuable purpose of stimulating trade at a time when the interest of the public is admittedly at a very low ebb.

Some Practical Methods.

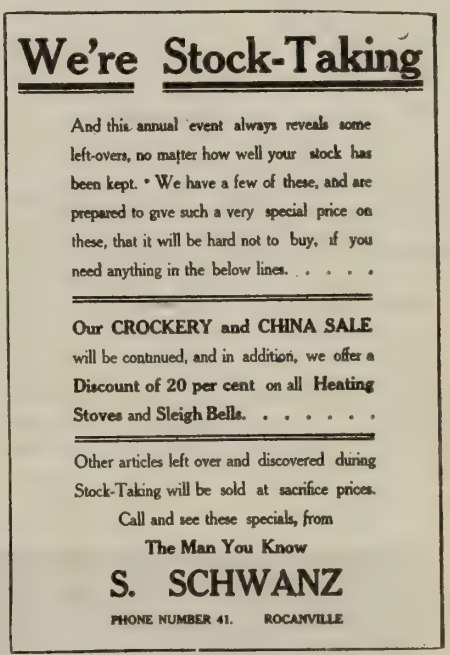
It is advisable, in conducting a clearing sale, to give it ample publicity. The dullness of trade generally at this season makes this highly essential.

The goods offered should be displayed near the front of the store. A method which is found of practical value is to arrange the goods according to price, putting all articles selling at 10 cents together and arranging the rest on the same plan. This is found even more effective, in many cases, than offering a straight discount on everything.

A stock-taking device which is found of assistance in arranging for the sales is to use small stickers for pasting on the boxes or even on the goods themselves. Each year a different colored sticker is used. Thus if a dealer finds an article on his shelves stamped with a red sticker he knows that it has been in stock since the previous year. A blue sticker denotes articles belonging to the year before that, and gives warning that all goods marked that way have been on the shelves for over two years and should be cleared out. A judicious selection of stock is, therefore, rendered possible by consulting the labels.

What Firms Are Doing.

A good many hardware dealers have already embarked on after-inventory



S. Schwanz, of Rocanville, advertises sales during stock-taking.

sales. J. P. Shannon, of Neepawa, Man., started on Monday, January 8, and will continue until the end of the present week. He is offering a discount of 20 per cent. and, it is understood, has been successful in clearing out a large amount of stock.

S. Schwanz, of Rocanville, Sask., is adopting the method this year of conducting sales simultaneously with his stock-taking. As indicated by his advertisement, he is clearing out each department as the stock lists are made out.

In Lindsay, Ontario, there is a movement on foot to hold a three-day clearing sale in which all merchants could join. It is proposed to hold this during the first week in February.

Goods Which Help to Increase General Sales

Handling Cut Glass, Brassware, Silverware, etc., in Hardware Store Leads to More Business in Other Lines—How Regina Firm Increased Their Business Fifty Per Cent.—These Goods Should be Featured the Whole Year Around.

All merchants have before them the one grand aim and object—Improvement of Sales.

When a firm can, in one season, increase their volume of business by fifty per cent., it may be taken for granted that they have employed methods worthy of emulation. One firm accomplished this feat; and it is interesting to note how they did it.

In the first place, it should be stated that the scope of the hardware business has been very materially widened of late years. New lines are carried—articles which brighten the appearance of the store and bring new trade. In the writer's opinion, the introduction of silverware, brass goods, cut glass, high-class kitchen utensils, etc., was one of the most valuable developments that the trade has undergone. It is now possible to make the store attractive and pretentious in appearance. More important still, women have put the hardware store on their list of shopping places, whereas they were once prone to leave purchases in that line to the men. There are dozens of articles in the hardware store which would never appeal to men, would never even gain notice from them in fact, but which sell very readily to women. Gaining and holding female trade has become an important phase of hardware retailing.

It is, therefore, advisable for most hardware dealers to carry a good-sized stock of such lines as cut glass, brassware, etc. There are, doutless, cases where it would not pay. In certain places, the jewelers are too strongly entrenched for the hardware dealer to get much of a foothold. In certain districts, the demand would be insignificant. It rests in the dealer's own judgment. Broadly speaking, however, the hardwareman can get a good share of the trade and, where this is possible, it pays him to stock these lines.

The truth of this has been recognized by Peart Bros., of Regina. They carry a large assortment of cutlery, cut glass, brass goods, silverware, aluminum utensils and other high-class lines. During the recent Christmas season they increased their business by making a bold and determined bid for the holiday trade. Opposition was keen, but Peart Bros. went about it the right way as the results amply demonstrate.

One advantage they found was that new customers came to them and sales were not confined to the article which had won the attention of these people. Once inside the store they saw other things, became interested, made other purchases and came back again when necessity arose.

The net result—business half as large again as during the same season the previous year.

Attractive Displays.

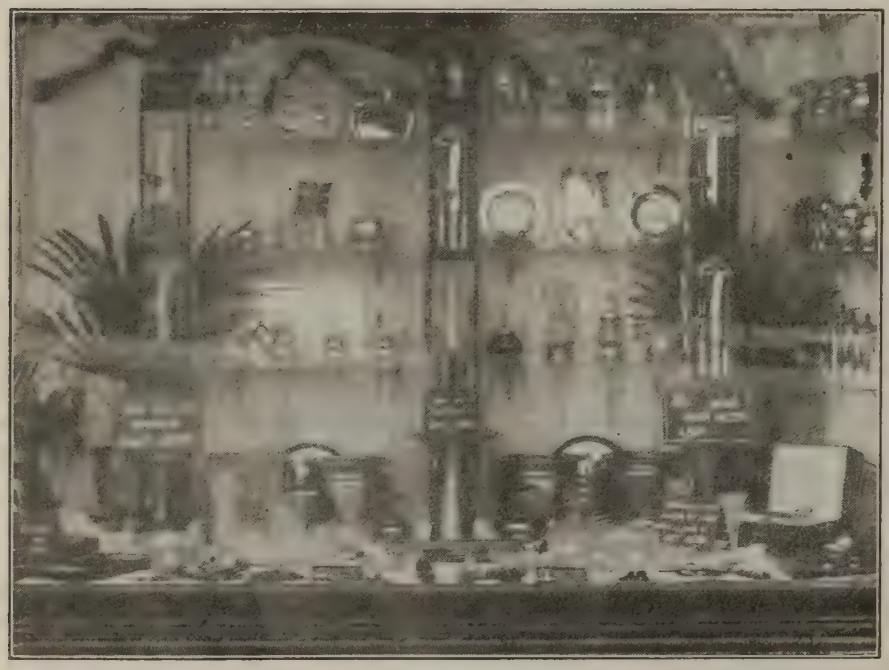
The methods employed by Peart Bros. were progressive in the full sense of the word. They advertised largely, using half or quarter-page space in the local papers and the store windows were kept attractively trimmed. One of their best window displays is herewith reproduced. The photograph does not, unfortunately, do full justice to the display, but it shows the varied line of goods carried, which were peculiarly adaptable to the holiday trade. This window, which was dressed by A. M. Nairn, proved a big seller. In dozens of cases, customers asked for articles which they had seen in the window. Mr. Nairn believes that the price cards used were a great help also, in creating a demand.

It must not be assumed that goods of the description named are for the Christmas trade only. They sell the year around. It is not at all probable that handling them would boost sales fifty per cent. at any other season; but with proper handling there would be a consistent stimulation of business.

Some dealers make the mistake of neglecting to feature these goods when the Christmas trade is over. They forget that man's liking for beautiful and useful things is just as keen at any other time of year, although he does not indulge in it as often as before Christmas. Then the wedding present demand is consistent and perennial. Cupid hustles business for the handlers of cut glass, silverware and brass goods at all seasons. The demand during the summer months is both heavy and steady.

A word about aluminum kitchen utensils. The advantages of this new line can be worked into a good selling talk. One dealer states that he has built up a steady demand among a certain class of customers in the short space of six months. He kept his stock well in sight and generally said something to attract the attention of women customers to the line. They almost invariably displayed interest and his arguments did the rest.

Aluminum ware can be sold particularly well for "kitchen showers." People who contribute to showers like to give something attractive and the aluminum articles please them mightily. This again tends to make the demand fairly regular the whole year around.



Window Display in Peart Bros.' Store, Regina, which Helped Increase Sales 50 per cent.

Time to Plan Metal Roofing Business

C. P. McMartin, of Morrisburg, Who Last Summer and Fall Equipped Many Buildings With This Modern Covering, Tells Some of its Advantages—Points Which Might Well be Used by Other Dealers to Boom Their Business.

Not a great deal of work is now possible out of doors. The mild weather has enabled some to be done, but carpenters have had to cease operations; few bricklayers are busy, and tinsmiths have to confine most of their attention to indoor work. But the time for renewing outside operations is not far off. Spring is coming, and then all kinds of repairs and all kinds of new work will be possible.

According to C. P. McMartin, of Morrisburg, it is possible to prepare for this outdoor work now, by talking with those who may want it done.

Mr. McMartin has been in business in Morrisburg for a good many years. He doesn't say how many as a regular thing. In these years he has come to know the majority of the people in the town and the surrounding neighborhood, and he therefore knows which ones are likely to need roofing work done when the snow disappears from the ground.

Some Strong Points.

It is a specialty of Mr. McMartin's, this metal roofing work. Last summer and fall he equipped many buildings, both in the town and throughout the country, with this modern covering. He hopes to equip many more during the summer of 1912, and to that end is bringing out some of the strong points of the roofing.

Mr. McMartin is an enthusiast. He thinks the metal shingle is a great thing, and has no hesitation in recommending it. The points he brings out may be of assistance to others who have recently taken up this line, so they may well be given here.

The durability of this roofing is one of its great advantages, according to Mr. McMartin. "It wears three times as long as a wooden shingle roof," he declared. "Because of that I have sold a number here. There have not been many new houses, but where the old shingle roofs become leaky there is a fine field for a tinsmith to boom metal roofing It is dearer than wood shingles, but not when its durability is considered.

The Trouble With Wood.

Shingles, some will think, are pretty long lived. There is no doubt they used to be, and in some cases are yet. But now many of these are made from second growth cedar. They are full of sap and have not a great life. The metal roof, on the other hand, will last as long as the metal endures, and good metal will live a great many years, especially if it is kept well painted.

This is another advantage of a hardware man doing roofing, as W. J. Carter, of Picton, also points out. The roof once on, the hardware man supplies the paint to beautify and protect it. It brings him further trade.

A metallic roof, Mr. McMartin declares, is a great safeguard against lightning. He has used that as an argument in selling, and has never been forced to take back water. Not one house or barn thus covered in the community has been struck.

Arguments Worth Using.

Good arguments all of these. Mr. McMartin, who meets his customers regularly, and who knows them well is able to tell about the roofing by word of mouth. To many dealers that would be impossible. Perhaps they carry on business in a large centre. Perhaps they are newcomers in a place and have not a great connection. They can use the roofing to bring trade to their store, by a proper system of advertising. Some men send out circulars, which are useful if sent to the proper people. Others use the newspapers, a more universally successful plan.

What a fine advertising campaign could be carried on in a month or two with metal roofing as the subject! Durability, handsomeness, protection from lightning, these would be points which would immediately attract the readers' attention.

FIRST AID TO THE INJURED WORK PROVES SUCCESSFUL.

Montreal, Jan. 11.—For some time men of the Montreal Rolling Mills have been receiving instruction in first aid to the wounded work. Competitions have been held at intervals, to show the progress made and to stimulate still greater interest. The last of these contests for this season took place in the recreation rooms of the Notre Dame St. plant, on Monday evening. Then imaginary burns and scalds were treated. Imaginary wounds were dressed and imaginary fractures reduced. Messrs. Cloake, Chausse and Hutt, who showed the greatest skill were awarded the prizes.

MAKING NUTS AND BOLTS.

Montreal, Jan. 18—The Canadian Tube and Iron Company, St. Patrick Street, Montreal, have now started the work of manufacturing nuts and bolts; but owing to the large variety of sizes, both of bolts and rivet screws, it will be some few weeks before a satisfactory assortment is on hand.

The bolt and nut plant is modern in every respect. Raw material goes into the forging plant, then passes into another building where the threading is done. Still another one-storey building is being used for packing.

CALENDARS RECEIVED.

Benjamin Moore & Co., Toronto, have sent out a large and handsome calendar. It will prove particularly serviceable for use in offices or stores, as the dates are printed in large letters which can be read at some distance.

T. J. Trapp & Co., New Westminster, have sent a calendar with a striking marine view, entitled "A breeze from the shore."

F. E. Myers & Bro., Ashland, Ohio, have sent a large poster calendar, copies of which have been distributed to over 30,000 dealers and friends. This is the thirtieth calendar of that style sent out by this firm. The body of the calendar shows the different lines manufactured.

BURGLARS IN B. C.

Vancouver, B.C.—Hardware merchants in Vancouver have suffered from the depredations of burglars. This winter, a large number of robberies have taken place in Vancouver, with several hold-ups. Not only have places of business been entered, but many private residences also. The store of E. Burns & Co., 138 Cordova St. W., was entered during holiday week, and so many shotguns, rifles, carbines, etc., with a large leather sheath knife were taken, that it is thought some kind of vehicle must have been necessary. On the same night, Clark & Venn, 1467 Broadway W., had their back window forced with a shovel obtained from the basement, and about $200 worth of small goods taken.

HOLIDAYING IN SOUTH.

Vancouver, B.C.—That the hardware business in Vancouver is not altogether to the bad, is indicated by the presence this winter in California of W. C. Stearman. Mr. Stearman is one of the younger merchants. About ten years ago he started in business on Granville St., in the premises now occupied, in partnership with R. C. Hodgson. Two years ago, the partnership was dissolved, Mr. Hodgson, who is a practical plumber, establishing a store on Seymour St. Things have gone along so well with Mr. Stearman, that he is able this winter to take a holiday in the balmy climate of southern California, where so many coast people go at this time of year. The colony of Vancouverites in Los Angeles on Christmas held a banquet, and Mr. Stearman replied to the toast of "Our Homeland."

EDUCATE PEOPLE TO PAY BILLS.

The subject of "business ethics" has occupied the attention of a number of daily newspapers recently. A Hamilton paper asks: "Do you owe any unpaid debts of 1911? Are you square with your grocer, hardwareman, tailor and butcher and baker and the rest?" And then proceeds to admonish its readers on the score of the unfairness of neglecting to pay bills. A Peterboro paper talks in the same strain, pointing out that the pleasure and profit, the thrift, the interests of business and the general prosperity of the city depend very largely upon the promptitude with which citizens pay their bills. Merchants and business men of all kinds are long suffering and suffering too, many of them, from lack of the money represented by long overdue bills, small and large.

It is refreshing to find the daily press taking up this subject. No force is more potent to effect reforms than the daily newspaper. It is apparent that an educational campaign is needed to bring the public to see that flagrant neglect and careless indifference in meeting bills is highly reprehensible and grossly unfair to all concerned; and, if the press can help to drive this truth home, it will render a valued service to the mercantile interests.

It is no exaggeration to say that a very large majority of failures are due to inability to collect outstanding accounts. If every merchant secured what was owing to him on time and in full, commercial failures would be few and far between. Industrial depression has its first inception in slow collections. If the money does not come in, hesitancy and lack of confidence soon manifest themselves. Business progress is halted, things soon reach a standstill, then go back and a period of "hard times" sets in. It is probable that the slow pay party, who dodges petty debts, does not realize that he is responsible when business conditions become sluggish. But he is at the root of the trouble. Eradicate the small debt dodger anl the surest means of insuring a consistent measure of business prosperity will have been found.

NEW METAL PATTERN SERIES.

The earnest desire of Hardware and Metal to give its readers the best possible service has led to the securing of what is possibly the most practical and thorough series of articles on patterns for metal workers ever published. The serial rights to a correspondence course in everything relating to metal working patterns by L. W. Koser, head of the sales department of the Galt Art Metal Co., have been purchased at a heavy expense. Readers of Hardware and Metal can as a result look forward to securing much practical information during the forthcoming year.

The author of the series got his first experience in metal working with the Berger Manufacturing Co., of Canton, Ohio. He began in the shop and worked his way up to the draughting department. From there he went to the Metal Shingle & Siding Co., of Preston, where he served in the capacity of head draftsman and estimator. On first joining the Galt Art Metal Co., he occupied the same position but has since been promoted to take charge of the sales department. His experience has been, therefore, both wide and comprehensive.

The series will consist of over forty articles and will embrace practically every phase of metal work, starting with preliminary instructions as to equipment, etc. The articles will range from a delineation of the primary principles to an explanation of the most intricate of problems and patterns. They are written plainly and clearly without being cumbered too much with technical phraseology. Each article is fully illustrated.

In presenting this series, Hardware and Metal believes that it is offering the best that could be secured. Readers interested in tinning and sheet work should follow Mr. Koser's articles closely. Hardwaremen who conduct tinshops could not do better than place subscriptions for the men employed by them in that department.

TURPENTINE SUIT ENTERED.

As a sequel to the sensational price reached by turpentine during January, February and March last year, the announcement is made that the American Government has instituted a suit against some of the largest dealers in turpentine in the Southern States. The action is under the Sherman Act and it is claimed that the parties named formed a combination in restraint of trade by reason of which they were enabled to materially affect business, advancing prices to the unprecedented level attained during March.

The case will have considerable interest for the trade and developments will be watched closely.

CHANGE IN THE CONTROL OF TIN.

From England comes word that a new tin syndicate is being formed. Were the news merely that the old syndicate is ceasing activities—the old syndicate which has held up prices for the past two years—there might be cause for rejoicing. But no such idea is to be entertained. The change, if change there is at all, is merely one of form. The new body will act in all things as the old.

The trend of the last few days does make it appear that some change is being made. In the twelve days since the beginning of the year tin dropped in England £21 per ton. Manipulation appears the only cause for such a change, since the available supply does not seem to have increased appreciably, nor the demand to have fallen off. It seems indeed that some members of the syndicate are retiring, probably satisfied with their earnings. Their holdings have been placed upon the market, and thus the price asked has sunk.

That a new syndicate is being formed seems far from sure. More likely a little new blood is being brought into the old ring. New men may be buying out the veterans.

The whole movement, while of great importance, will hardly affect the smaller buyers, except in this far, that

it seems to indicate the present low prices will not prevail for long. This new syndicate—or rejuvenated old syndicate—will soon use bull methods. The prices, it seems certain, will revert to something like their old high level.

DOLLAR-A-MINUTE MEN.

It may seem like a palpable exaggeration to assert that any paint dealer can make a dollar a minute. It is shown that such is possible, however, in an article appearing in this issue. The time when it is possible to reap this rich reward, is limited, of course. A few hours early in the spring can be utilized to such good purpose that the ultimate results will approximate as much as one dollar for every minute thus employed.

The idea is explained in full in this article but a further reference here may serve to emphasize it. To carry on a successful retail campaign in any line it is necessary to plan matters early. The dealer who takes things as they come and lets his trade policy adapt itself to circumstances, does not get the same results as the merchant who knows ahead of time what he is going to do each month and has prepared himself to meet any contingency. The application of this statement of fact to the management of the paint department, brings out in forcible manner the wisdom of mapping out a plan of campaign early in the year. A minute's thought now will bring a dollar in increased profits when the active season begins.

A dollar a minute. It looks big, but it is not too big remuneration for the man who gives thought to the future conduct of his business. "What we need is more thoughts, not more things," is the characteristic utterance of the editor of the Gimlet. The merchant who gives thought to the future and puts his conclusions to a practical application can qualify as a "dollar-a-minute man."

HARD VERSUS INTELLIGENT BUYING.

An experienced traveller, speaking of a Canadian hardwaremen, stated that he was the hardest buyer he had ever met. The hardwareman doubtless regards himself as a good buyer, but there is room for doubt if this self estimate is correct. The days when a hard buyer was necessarily a good buyer are pretty well passed.

It is intelligence rather than insistence which wins now. Undoubtedly the buyer wants to get the rock bottom price, but to get this he need not browbeat the traveller.

It is knowledge, then, which gives the buyer the greatest power of persuasion. If he knows the goods which are upon the market, if he knows at what figure he can get these, if he can tell the traveller facts about the traveller's own line and about competitive lines; then he is in a position to get the best at the best price.

This knowledge comes only with study. Many dealers now know a great many lines. But changes in style are being constantly made; also changes in price. New lines are being added. Hardwaremen must keep up to date, and to do this they can do no better than make a careful study of the advertising pages of this magazine. Here the manufacturers tell the dealer about their goods. Here new lines are introduced. A careful student of these pages enables a man to talk sanely to the travelling representatives. It enables the hardwareman to achieve one of his great objects, the buying of the best in the lowest possible market.

POINTED EDITORIALS.

Are you a dollar a minute man?

* * *

Stock-taking is not of much use unless you apply the results.

* * *

Hardware men should remember that it is necessary to get tools into the window in order to get them out of the store.

* * *

"A range suitable for a bachelor or a hotel." Rather a good line that which was used in an ad. to illustrate the wide variety of stock carried.

* * *

Educate people to pay debts and a remedy will have been found for the conditions which so regularly bring around periods of industrial depression.

* * *

There are lots of things a man doesn't have to do but which it is extremely advisable for him to do. Have respect for the law is one. Advertise is another.

* * *

The Parcels Post fight in the United States is waxing hot. Trade paper editors and prominent retailers seem to constitute the bulk of the opposition, but they are putting up a hard fight.

* * *

Those Edison cold stoves, which are guaranteed to cool off the atmosphere in any place, no matter how warm it may be, should sell extremely well in one place we have heard much of but hope never to see.

* * *

Hardwaremen in Wallaceburg have decided on closing early. Merchants in other places might well do the same. Why should the retail dealer work twelve or more hours a day when eight or nine hours is the limit elsewhere?

* * *

"Reflections" should not be confined to retired hardwaremen. Reflection on the workings of a retail business is highly necessary if best results are desired. No merchant is so busy that he cannot find time for reflection and study.

* * *

Continually dealers have been reminded that it is well to change their window trims. Possibly it would not be out of place to remark that changes in the interior arrangement of the store may sometimes be made to advantage. Variety is of value.

* * *

Dan Cupid comes in for quite a little mention in this issue. One article tells how he helped sell stoves. Another explains the part he plays in selling silverware, cut glass and brass goods. Perhaps hardwaremen should put Master Dan on their pay roll.

* * *

This is the age of "less." We have horseless carriages, smokeless powder, wireless telegraphy. The latest addition to the list of inventions which have for their distinguishing feature the utter lack of the quality which was formerly the sole excuse for the being of the article, is oilless paint.

* * *

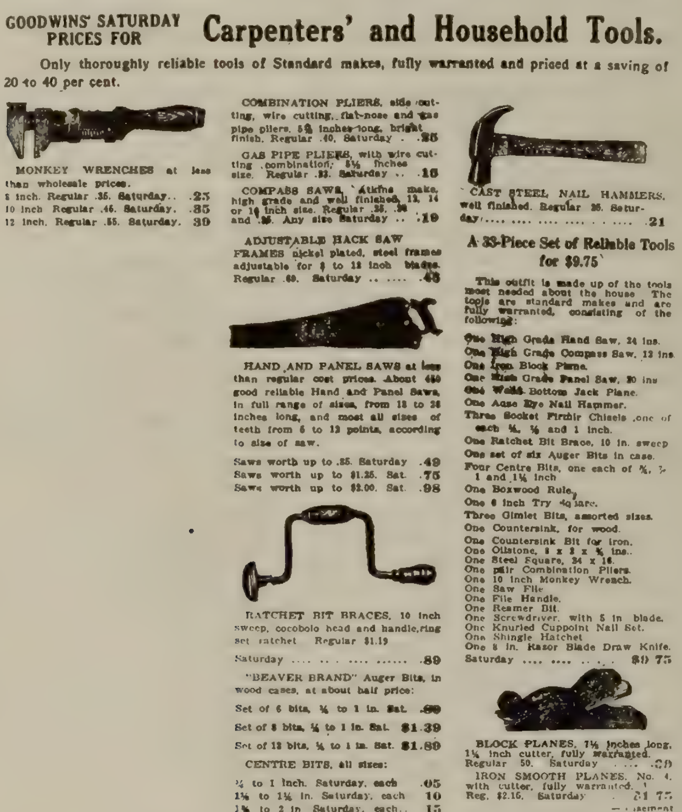
The dealer who rises above misfortune time and again and finally, by dint of earnest effort and indomitable courage, wins success, is deserving of higher credit than the man who has encountered no obstacles. There is an object lesson for all in the story of the success of C. A. Baskerville, of Winnipeg, which appears in this issue.

An Opportune Time to Boom Sale of Tools

Many Men Have Work Benches Established in Their Cellar; and Are Now Making Book Cases, Shelves, Picture Frames and Similar Articles—They Need Tools. Young Men Are Busy Building Boats—They Need Tools—Window Displays and Ads. Will Help Bring Home This Need.

Once in a while a hardwareman will arrange a display of tools in his window. Once in a while he will advertise his line of goods through the papers. Considering the results that this action regularly brings it seems a little hard to understand why the policy is not adopted by more dealers.

Complaint is sometimes made of slack seasons. "This is a slow time," it will be said. Undoubtedly, the month or months immediately succeeding Christmas are not the best of the year, but equally undoubtedly they are not months which need be regarded with misgivings by the man who keeps his eyes open—who sizes up the popular demand and then appeals to it.



GOODWINS' SATURDAY PRICES FOR **Carpenters' and Household Tools.**

IRON SMOOTH PLANES, No. 4, with cutter, fully warranted. Reg. $2.16. Saturday . $1 75

— Basement

A department store advertisement of tools. Only the regular lines are illustrated, but these are in greatest demand.

The Wide Market for Tools.

At this season, as at all others, there are a variety of goods handled in hardware stores which appeal to various classes of people. There are the sporting lines—the skates, hockey sticks, shin pads, sweaters, toboggans and other winter sporting equipment. But these are for the young. There must be something to appeal to the older men, and to the younger when they do not want to be out enjoying some of the more active sports. There is a time for everything, you know, and even the most enthusiastic sport lovers have a longing for a quiet evening now and then.

It is in these evenings at home—these Saturday afternoons spent around the house—that work is done which affords the hardware man an opportunity to market his tools.

Carpentering Not Out of Date.

Speakers have sometimes expressed the wish to lift the roofs off an entire city and see what people are doing inside the houses. If the first and second story as well as the roof were lifted, the inquisitive minded would be certain to see many men working at benches in their cellars. Carpentering has not gone out of date yet.

In every city or town where boating is popular there are now sure to be a number of young men busily engaged making crafts in which they will be able to sail next summer. Patterns for these are to be obtained. Men who made boats for last summer told their friends about them. Perhaps they took their friends for sails in them. Thus the desire to make a skiff was spread. This can be done economically. There is pleasure in the work; and more than all there is pleasure in turning out a good job—a craft which is seaworthy and which does not make its best progress leaway.

Many Boats Being Made.

It would be hard to tell how many young men are now working upon boats. In Montreal, Toronto, Vancouver—in a large number of smaller places—many do this. Their new boats are to be seen in summer. In winter these are not visible, for they are in an embryo state, down cellar or in a shed. But they are being made, and tools are needed for their making.

Perhaps the amateur builder does not know exactly what he does need. His knowledge of tools may be somewhat limited. But let him see a window display with tools as the main feature, and he is practically sure to see something which would help him in his work. If he reads a newspaper and comes upon an advertisement of tools, he is going to stop to see if he might get something at this store which would help him in his work.

But the young man is not the only one to whom the hardware man can appeal with his tools. There is the middle-aged man. The householder. The man whose great interest, outside his business, is in his home and those in it. There are plenty of things such a man can do in the carpentering line. He can plane down a door which has warped so that it will not close. He can put up shelves, make book shelves, turn out good picture frames. Some of his evenings and many an hour on Saturday will be spent at this kind of work. Work it is, but different from that to which he is accustomed, and he enjoys it.

Like Father, Like Son.

Perhaps the man has a young son who likes to drive nails and make a wide variety of things. The father will have a great time with this chip of the old block. He will get tools for him. So, for

father and for son the hardwareman can supply a need.

The great thing, therefore, is to bring all these people to see where their wants can be filled. They know in an indefinite way that tools are to be secured in every first-class hardware store. But indefinite knowledge brings indefinite results. Some will go into a store and ask for what they want, but many more will enter and ask for something which they have seen in the window, or which they have seen advertised.

Advertising Common Tools.

From time to time pictures of tool displays have been given, but advertisements of this line are more difficult to secure. Tools do not seem to have been greatly brought forward in this way. Goodwins, Limited, in Montreal, however, have advertised this line, as will be seen by the accompanying reproduction of one of their advertisements. The articls shown are those of commonest need —such tools as would be used for work around the house. The prices are given plainly, so that a man contemplating some carpentering will know exactly what the tools required to make a start will cost.

The ad., while it does not mention many of the more complicated tools, does imply that these are carried. It thus gets that cumulative value which prompts people to ask for tools which they want but do not see advertised.

Business Management—Taking Discounts

Article No. 4—(Continued.)

By H. C. Carson, F.S.S.

Having taken stock, Mr. Merchant, and closed your books, and drawn up your balance sheet, it is up to you, as a business man, to ponder well the results of the year's trading. Perhaps the net gain shows up fairly well, according to your view, and the various features of the enterprise—stock on hand, accounts receivable and payable, class of patronage, store department, and many other things—show marked improvement over the previous year.

Your standing in the community has, perhaps, been materially enhanced, your slate wiped clean at the bank, and further good conduct marks earned from Dun's and Bradstreet's. But have you done as well as you might have done? Have you realized, for instance, the importance of taking discounts on all purchases, and the power of the financial lever that this rule would give you over your competitors?

The Purpose of the Bank.

You reply, perhaps, that it cannot be done, because your capital is inadequate, but what are banks for? They are established for the purpose of lending money. They want to lend money to good clients, to be employed in good business, and the merchant is in fine shape who acknowledges no creditor, but his banker. But, you say, interest must be paid to the banker. Of course it must. That's what he lends money for. He receives money on deposit, paying 3 per cent., perhaps, for it, and he lends it to you at 6 per cent. That's where the business comes in. Banks would have to go out of business if people ceased to borrow.

Where the Merchant Gains.

Now then, if you, by discounting your bills, receive more than you pay your banker for supplying the funds, you are ahead that much, are you not? You will be surprised how it figures out.

Besides the extra profit you will make through discounts, think of the boost given your credit in the manufacturing and jobbing world—"prompt pay," "discounts his bills"— and other such favorable comments will be passed around among wholesalers, and Bradstreets will probably be compelled to concede you a first class rating.

Watching Collections Closely.

There is another important feature that must not be overlooked. It has naturally followed that in discounting your bills, you have borrowed as little as possible from your banker. In other words, you have gone after your own collections with renewed vim and energy. You have gradually increased your cash business, and your credit customers have been taught to realize that their accounts must be paid in 30 days. They know you need the money to pay your bills, and that by helping you, they are helping themselves in securing improved service and better goods, at a possibly lower price than before.

Next week the writer will lay before you, two concrete cases, which will illustrate in figures the wonderful advantage of the discounter over the time man.

Robert Lockhart, Manager of the Gurney-Massey Co., Montreal, was in Toronto on Thursday.

HOCKEY LEAGUE STARTS.

Toronto. — The Mercantile Hockey League which is in all respects governed by O.H.A. rules, and which is now in exceptionally good financial standing, opened its season on Saturday with two games, Aikenheads winning from Johnstone on Little Vic., and Howlands defeating the Brocks on Varsity ice. The score in both games was 2 to 1.

At the primary meeting it was voted to limit the league to eight teams, represented by the following:

Aikenheads—W. H. Johnston.
W. R. Brock.—Mr. McLean.
Can. General Electric.—Mr. Ship.
H. S. Howlands.—S. E. Leavitt.
W. R. Johnstons.—K. P. Symington.
Kodaks.—S. G. Bishop.
Massey-Harris.—F. H. McLean.
Nisbet & AulAd.—A. McDonald.

Mr. Aikenhead has been re-elected as honorary president; E. O. Byam, re-elected president; W. H. Johnston, vice-president; S. E. Leavett, secretary; and K. P. Symington, treasurer; and F. H. MeLean, as press representative.

The schedule for the coming season continues as follows:

Jan. 8—Massey-Harris at Nisbet & Auld.
Jan. 12—Massey-Harris at Aikenhead.
Jan. 13—Nisbet & Auld at Brock, Howland at Johnston.
Jan. 16—Brock at Massey-Harris.
Jan. 17—Nisbet & Auld at Howland.
Jan. 20—Aikenhead at Brock, Nisbet & Auld at Johnston.
Jan. 22—Massey-Harris at Howland.
Jan. 23—Brock at Johnston, Nisbet & Auld at Aikenhead.
Jan. 27—Aikenhead at Howland.
Jan. 29—Brock at Nisbet & Auld.
Feb. 2—Brock at Aikenhead.
Feb. 3—Johnston at Nisbet & Auld.
Feb. 6—Howland at Massey-Harris.
Feb. 8—Aikenhead at Nisbet & Auld.
Feb. 10—Johnston at Brock.
Feb. 12—Howland at Nisbet & Auld.
Feb. 13—Aikenhead at Massey-Harris.
Feb. 14—Johnston at Howland.
Feb. 19—Brock at Howland.
Feb. 20—Nisbet & Auld at Massey Harris, Johnston at Aikenhead.
Feb. 22—Massey-Harris at Brock.
Feb. 24—Howland at Aikenhead.
Feb. 27—Massey-Harris at Johnston.

Three Close Contests.

Montreal, January 17.—Another large crowd watched three games played in the Wholesale Hardware Hockey League last night. The team representing Canada Fairbanks-Morse Co. played dashing hockey, defeating the men from The Jas. Walker Hardware Co. by 5 to 0. The other two matches were closer, resulting as follows: Thos. Robertson Co. 2, Starke-Seybold 0; Frothingham & Workman 2, Lariviere Incorporee 0.

Veteran Figures in the Canadian Hardware Field

No. 4.—C. A. Baskerville, Winnipeg.

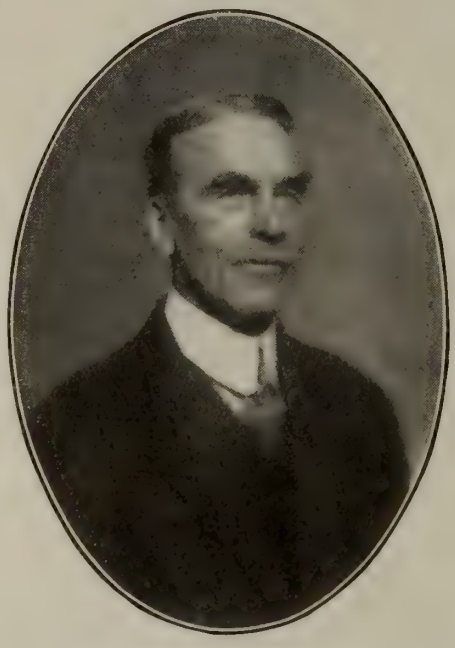
"If at first you don't succeed, try, try again," has been one of the guiding mottos of the business career of C. A. Baskerville, of Winnipeg. Mr. Baskerville has built up a retail hardware business which ranks as one of the finest in the West; but, though the course of trade has run smoothly of late years, his early career was marked by serious reverses. Twice his store was burned out, resulting in almost total losses. Each time—like the giant Antaeus who, as mythology teaches, came up stronger every time he touched Mother Earth—Mr. Baskerville went back to the point where he had started and with indomitable courage and resolution built his business up again better than ever.

He started in business in Winnipeg in 1882 in partnership with W. Brownlee. Seven years after, he bought his partner out; and one week after that the first fire occurred. His loss that time was about $6,000. Nothing daunted Mr. Baskerville went to work and in two years had built his business up again to the point attained before the fire. Conflagration No. 2 occurred then, wiping out the store and causing a total loss. The average man would probably have given up in despair after this second attack of adversity; but not C. A. Baskerville. Owing to the fact that he had won a good name in the trade and had always kept his credit good, assistance was not hard to obtain. After the second fire, he received a telegram from Benny, MacPherson & Co., Montreal, stating that they would supply him with all the goods he needed at his own terms. This offer was accepted and in a very short time the Baskerville store again opened its doors to the public.

From that time on, hard luck ceased to dog his footsteps. Everything ran smoothly, the business grew rapidly and Mr. Baskerville was able to clear off his indebtedness within a reasonable time. Since then the business has progressed rapidly. The proprietor is now selling out to Leon Abramvich, believing that, after twenty-nine years of steady work, he is entitled to a rest.

Learn the Business.

His success he attributes to several causes. One of his maxims has been to "learn every phase of the business through every available medium."



"If at first you don't succeed, try, try again," has been one of the guiding mottos of the business career of C. A. Baskerville, of Winnipeg.

Keep Credit Good.

Another tenet of his business creed is that strict attention must be paid to the buying end. "The hardwareman must keep his credit good," he declares. "There is money in the business and no reason why credit cannot be kept good. I may return to it, because I know of no business more clean and honest. I have made a life study of hardware."

Is a Tinsmith.

Mr. Baskerville's first association with the trade was as a tinsmith. He has always since kept in close touch with that department and believes that the tinshop is a valuable adjunct to any and every hardware business. From tinsmithing, he worked his way up to the position of manager of the retail department of the J. H. Ashdown Co., and from there branched out into business on his own account.

An Association Man.

Mr. Baskerville has been interested in the Hardware Merchants Association from the moment of its inception. He has served as president of that body and has contributed many valuable suggestions and ideas for the betterment of retail conditions. It is with regret that the association will lose his co-operation.

CONDITIONS SATISFACTORY.

Cleveland, O., Jan. 18.—The Iron Trade Review to-day says:—

Mill orders against contracts placed in November and December, while not as heavy as expected in some lines, continue to come in at a very satisfactory rate. Strictly fresh buying is comparatively light with only moderate tonnage involved in new inquiries. Prices on nearly all finished lines are being maintained. Taken as a whole, the market is not as active as during the last six weeks of the old year, but recent developments are not discouraging, as it was generally expected that a let-up in new buying would come about the middle of January.

Demand for billets and sheet bars is extremely heavy, the leading interest and some of the larger independents showing a big gain in mill orders during the first 15 days of this month. The Carnegie Steel Co. is operating its steel works practically full and during the week refused moderately heavy tonnage on account of the filled-up condition of its mills. The business went to smaller mills. Car builders are specifying liberally against contracts for plates, although new business is light. The markets on steel bars and shapes are quiet. Shipments of sheets and tin plate are heavy for this season of the year and mill activities have been extended. An advance of $1 a ton in prices of wire products about Feb. 1, would not be unexpected.

CLERKS ASK REFORMS.

Quebec, Que.—A delegation of retail clerks waited on Sir Lomer Gouin at the Parliament Buildings and submitted a series of resolutions which were passed at the Convention of Clerks of the Province of Quebec held in Quebec last August.

That for the health and general welfare of clerks, stores be not permitted to remain open more than 60 hours a week.

That women and children working in stores should benefit by the law regulating to labor in manufactories.

That important stores and manufactories should be inspected once a year.

That the early closing of stores, as asked in Montreal, be made general throughout the Province.

That an inspector be named for the retail stores of the Province of Quebec.

Letters to the Editor

THE CARE, ABUSE, AND VALUE OF TRADE CATALOGUES.

Editor Hardware and Metal,—A trade catalogue, with the average Hardware and Metal merchant, is about the most despised and abused article kept in his whole establishment. And yet,—how useful?

Dear reader, what kind of care are you giving this very useful information in connection with your business? Literature, which costs the manufacturer and wholesaler thousands upon thousands of dollars annually in good hard cash to produce and mail you, for mutual benefit.

Listen: Have you ever taken a real good look at the conglomerated mass of trade literature chucked behind boxes, counters, or desks, or just thrown one on top of another into an old cupboard? In fact, sometimes, without even the wrapper removed.

Now, I fancy I hear someone say:—We receive many a catalogue and pamphlet which does not concern us, either personally or in connection with our business. I don't doubt it, my friend, although as a general rule, what is done with it? I will tell you,—It is just thrown on top of those which you may wish to lay your hands on "quick," to-morrow.

For instance, a short time ago I watched a successful hardware merchant, who keeps a nice clean stock and store, spend exactly twenty-two minutes, along with his office help looking for a furnace catalogue, and you should just have watched them dive through no less than three old cupboards, and four old drawers, outside of the office. What they went through in there I cannot say, because Mr. Merchant was getting hostile about that time, so I calmly looked on at a safe distance. The customer, a shoe merchant, says to me, "I am surprised, why I can lay my hands on any catalogue or discount sheet worth keeping inside of two minutes." Of course he may be an exception in his trade also. However, after about twenty minutes the customer left. Mr. Merchant and his lady clerk were both sure they had seen it only a few days ago, and possibly they were right, for lo, behold in less than two minutes after, the pesky thing turned up.

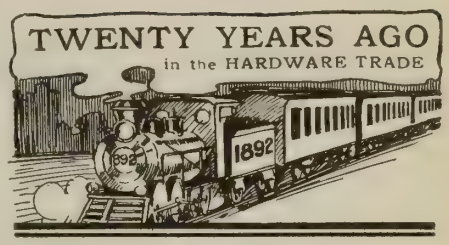
The lady clerk was then dispatched with it and the discount sheet over to the customer to find out what he really wanted. When she returned, I learned that the total sale (including express) only amounted to $2.85. What trouble and energy wasted for the possible profit derived, and all on account of not having a proper place and system for keeping this class of stock-in-trade; I hear some merchants say: The above does not apply to me, my literature of this nature is all properly assorted and kept in alphabetical order. Well, I hope so, but in order to show the trade just how "odd" a firm like that is, I cover either part or whole of sixteen counties, in western Ontario and I think my 'calls' comprise fully two-thirds of the hardware, plumbing and tinsmith, retail trade. Since January last, I have been taking notes, and up to the present, I have only found 14 firms who keep their 'trade literature' in such a shape, whereby they can promptly show a customer an illustrated 'cut' of the article he may require, and the latest price thereof, in fact (large cities barred) I only found 9 of these fourteen, who keep such literature alphabetically arranged.

Now, I want it distinctly understood that I don't consider the merchants in the hardware and metal line, are one whit more careless than those of any other lines, regarding the subject under notice. In fact there is little doubt I think but that the same 'unconcern-edness' is general. If so, then the question is, what inducement or method, can be suggested which would bring about an improvement, and thus benefit all parties concerned?

As previously stated, numerous firms spend large sums of money each year, not only in exemplifying their goods, but in really furnishing to the various trades many a "pointer," both illustrated and otherwise, which without doubt serves to make both the employer and employe a much better salesman.

In conclusion, I have the following suggestion to offer. Let the manufacturers, jobbers and wholesalers place a certain sum in the hands of Hardware and Metal each year, and let them appoint a committee of, say three or more travelers, in each province, have each man report separately, sending in the names of, say, ten firms who keep their trade literature alphabetically arranged, properly sorted, and in the most up-to-date manner, then let Hardware and Metal, at the end of each year divide the "POT" into say say three prizes. If some such scheme could be inaugurated my humble opinion is that before many "moons" they would find that money thus spent was the most profitable method of circulating advertising matter they have ever experienced.

Yours respectfully,
G. F. I.



The following items were taken from the issue of Jan. 16, 1892:

"The Dartmouth Rope Works have been transferred to the Consumers Cordage Co., of Montreal. The consideration is said to be $815,000."

* * *

"The firm whose place of business we illustrate this week is that of the Smith & Ferguson Co., Regina, N.W.T., wholesale and retail hardware merchants. The firm is composed of three former eastern business men, namely, J. H. Smith, J. W. Smith and A. B. Ferguson, who started separate businesses in that place in the year 1882. The present partnership was formed in 1891."

Editor's Note.—The firm of Smith & Ferguson is still doing business in the city of Regina.

* * *

"As usual, the McClary Manufacturing Co. presented their married men employes, and any man or boy supporting his home, with a Christmas turkey."

Editor's Note.—This practice is still carried out by the McClary Co. Many farmyards were depleated this year to supply Christmas dinners for the McClary staff.

ADVERTISING LAMP OIL.

Alliston, Ont.—The Cain Hardware Co. are making a special effort to sell lamp oil. They have secured the agency for that district for a high class oil and are announcing the fact with a three-column spread advertisement in the local papers. In arguing that it pays to buy quality goods nowadays, they say:

"The prosperity which Canada has been experiencing of late, as witnessed by her wonderful development, and the growing intelligence and discriminating taste of her people, has made possible the marketing of higher grade products in all lines of commerce. This is equally true of lamp oils as of other commodies. In fact the demand of today is for a burning oil which will offer the brightest and clearest light possible, without smoke and foul odor to destroy the eyesight and poison the sweet air of our dwelling houses."

Progressive Methods of Hardware Retailing

Toronto Firm Pay Car Fare to People Who Attend Sale—Details of Range Contest—Western Firm are Progressive Advertisers—Methods of Selling Thermometers and Lamp Oil.

HAVE EXTENDED SALE.

Victoria, B.C.—The B.C. Hardware Co., who have been holding a big clearing sale in prepartion of a move to their new store, have extended the time limit of the same. They announce the fact as follows:—

"By the courtesy extended to us by our landlord, we are enabled to stay in our present premises until the end of the present month. We have had a very successful sale up to the present, and we will still carry this on during the time that we remain in our stand on the corner, as we wish to dispose of all our stock as nearly as possible, and we offer our still well assorted stock to the public regardless of the cost."

Special bargains in certain lines are being offered each day, with the object of exhausting the stock.

PRE-INVENTORY SALE.

Vancouver, B.C.—Cunninghams, Ltd., are conducting their "January Hardware Sale," preparatory to taking the annual inventory. Their idea in holding the sale before stocktaking is to reduce the stock and lessen the work connected with the inveptory.

The sale began on Jan. 8, and will continue until the end of the present week. A fairly large discount is being given in most lines. Twenty per cent. is offered on enamelware, tinware, cutlery, silverware and brass goods. Good-sized reductions are also offered on such lines as washing machines, wringers and other household goods.

The sale up to time of writing has been a great success and a large amount of stock has been cleared out.

ARE HOLDING CONTEST.

Owen Sound, Jan. 15.—Cole and Robertson, proprietors of the "Market Hardware," have begun a series of new methods. The first step has been the offer of a range, valued at $50.00, to the winner of a contest inaugurated a week ago. With every purchase at the store a printed receipt check is given and each one of these checks entitles the holder to a guess as to the number of nails placed in a jar. This jar was filled and sealed by two prominent business men before being placed in the window. The contest will close on February 29, when the same two men will open the jar and count the nails. The person who has guessed nearest the correct number will get the range.

In the meantime, a number of special sales are being held. These sales are in various lines and are advertised to last "during the stove contest only."

PROGRESSIVE ADVERTISING.

Victoria, Jan. 15.—A firm which believes implicitly in advertising is the Hickman Tye Hardware Co., a sample

of whose efforts in this line is shown. The advertisement occupied a full page in the daily papers and attracted considerable attention. The results have been fully in keeping with the wide scope of the advertising.

A REMOVAL SALE.

Kingston, Jan. 15.—Simmons Bros. are moving into new and larger quarters. To save the work involved in moving their complete stock, they are holding a removal sale which will last right through the present month. Skates and enamelware are offered at 20 per cent. off. Tinware, cutlery, galvanized ware, sleighs, sleigh bells, hockey sticks, horse blankets, heaters and ranges are being offered at reduced prices. All articles included in the list thus offered are price marked.

A feature of the sale is the strict provision that all transactions are on a cash basis.

SELLING THERMOMETERS.

St. John, N.B., Jan. 16.—Specialties are being offered by the local firms in order to induce business. For instance, since the coming of a very cold spell of several days ago, the hardware firm of W. H. Thorne & Co. have been featuring the advantages of having a thermometer about the premises. A cut of a thermometer is presented in their ad. display, and their reading matter accompanying it is to the effect that "It is better to know how Cold or Warm you are than to guess at it." The advantages of keeping regular the temperature about one's place of business or home is distinctly set forth, and the prices in range are presented. The sale was timely, and the constant reminder produced good results. Other dealers specialized as well.

PAYING CAR FARE.

Toronto, Ont.—A ten-day mid-winter sale is being conducted at Walker's hardware store, 450-452 Spadina Ave. The sale commenced on Thursday morning, and the store will be kept open in the evenings during the ten days. Price inducements are being offered. Advertisements have been inserted in the daily papers, the most conspicuous feature being a large illustration of an axe, which is stated to be "up to the hilt in every price item in the store."

The difficulty experienced in a large city in getting people from a distance to attend the sale is being met by a coupon system. Large posters have been sent around with coupons. Anyone presenting a coupon at the store will receive their car fare. This plan is outlined in the advertisements as follows:

"Are you too busy to come? Use your telephone. Your car fare paid if you bring a 'coupon.' If you did not get one of our large posters containing a coupon, ask at the store for one."

Current News of Canadian Hardware Trade

Joins Tourtelotte Co.

Port Arthur, Ont. — L. Devereaux, hardwareman, has secured an interest in the Tourtelotte Hardware Co. He has assumed a position with that concern.

First Keg of Nails.

Milton, Ontario.—The first keg of nails made in Milton is a unique attraction in front of Nixon's hardware store. They were manufactured by the P. L. Robertson Co.

Mr. Fowler Honored.

Wetaskiwin, Sask.—A presentation took place at the hardware and general store of Fowler & Co., on Saturday evening, when the members of the staff gave Mr. Fowler a gold-headed cane.

Buys Newboro Store.

Newboro, Ont.—James V. Moriarty who has been manager for four years of the Newboro tinware and stove store, has purchesed the business. He took possession on Monday, January 15.

May Get Glass Factory.

Lethbridge, Alta.—A glass manufacturer has written the Board of Trade, and says that he is ready to bring a glass factory to Western Canada, and thinks Lethbridge is ideally located for the purpose. The industry would have a capital of $250,000.

Buys Chown Property.

Edmonton, Alta.—In behalf of a Belgian syndicate, J. D. Hyndman purchased fifty feet of Jasper avenue property at a price of $100,000, or $2,000 a foot. He purchased the frontage of the Chown Hardware Co., close to First St., from the Bank of British North America. A seven or eight story building will probably be erected on the property.

H. W. Glassford Dies.

Montreal, Quebec.—Apparently in perfect health Tuesday night, Hugh W. Glassford was found lying dead in his bed room, Wednesday morning. Heart failure was the cause of the sudden demise.

Mr. Glassford, as president of the Rockwood Sprinkler Company, was well known to many in the hardware trade.

Humphrey Store Robbed.

Vancouver, B.C.—The ubiquitous burglar is continuing his depredations, and the stores in the outlying sections of the city are being entered almost nightly. In the parts away from the business centre, the police are comparatively few, and there is little fear of apprehension on the part of those who are breaking into stores. One of the latest thefts occurred at the hardware store of W. G. Humphrey, on Granville Street near Seventh Avenue, entrance having been effected through a back window. About $60 worth of knives and razors were stolen from a showcase.

New Retail Firms.

Leamington, Ontario.—The Leamington Hardware Co. has been registered by the firm who purchased the business of C. A. Willits & Co. will be known.

Montreal, Que.—The Montreal West Hardware Co. haI been registered by Walter Douglas Otter.

Business Changes.

Southey, Sask.—J. R. Blough has bought the Perkut hardware store.

Bowmanville, Ont.—Rice & Co., hardware dealers, have suffered a loss by fire.

Montreal, Quebec.—L. P. Vinne, hardware dealer, has sold out to C. E. Melancon.

Victoria, B.C.—Brooks & Barfield have bought out the paint business of Frank Keown.

Baldur, Man.—Thomas E. Poole, has bought out the hardware business of H. Eggerton.

Prescott, Ontario.—A. Keeler is going out of business and all his stock is being sold out.

Vancouver, B.C.—J. Jackson has taken over the business of the Standard Hardware Co.

London, Ont.—Sutherland Bros., dealers in stoves and tinware, are going out of the retail business.

Macleod, Alta.—W. G. Andrews has moved his tinshop to 23rd street in the rear of his former location.

Vibank, Sask.—Weisberger & Driscoll have bought out the hardware and implement business of Edwards & King.

Moorefield, Ont.—A. Malcolmson has sold his hardware business to H. Copeland of London. Stock-taking is now in progress.

North Bay, Ontario.—After carrying on business for 20 years, the hardware firm of McDonald & Hay have sold out to G. W. McDonald, who will continue the business on the same premises.

Medicine Hat, Alta.—R. C. Black, formerly of the Prairie City Oil Co., has gone into partnership with J. J. Hewitt, hardware dealer. The business will be conducted under the firm name of Hewitt & Black.

Listowel, Ontario.—Roderick Ross, hardware dealer on Wallace Street, has sold his business to Grant Gordon, of Guelph. The store has been closed for stock taking but will be opened again at the end of the week.

Fire Losses.

Calgary, Alta.—A fire occurred in the hardware store of H. S. VanBuran & Co.

Roland, Man.—James Mowson & Co., hardware dealers, have suffered a loss by fire.

Strassburg, Sask.—Rodger Bros., who recently sustained a loss by fire have sold their entire stock of paint to Cottrell & Stutchy.

Halifax, N.S.—Cragg Bros., hardware dealers were among those who suffered in the big fire which carried away the Herald building.

Ottawa, Ont.—Walters' axe factory, Hull, was the scene of a serious fire. Overheated furnace pipes started the blaze, and damage estimated between $1,500 and $2,000 was done.

Bowmanville, Ontario.—A fire broke out here in the business section, Rice & Co., hardware dealers, being among the sufferers. An explosion of dynamite occurred in their warehouse and it was feared for a time that the entire section was doomed. Rice & Co.'s loss will be about $1,300.

Personal Notes.

Mr. Dandy, of Streetsville, visited Toronto wholesalers on Wednesday.

E. C. Hall, of Linton & Hall, Calgary, has returned after his trip to the east.

Mr. Berryman, manager of Metals Ltd., Calgary, has returned after a business trip in the east.

William Hare, formerly in the sporting wares department of W. H. Thorne Co., in St. John, but now employed with an ammunition company in Winnipeg, is visiting his old home for a few days.

J. T. McDonald, one of Calgary's prominent hardwaremen and Masons, visited a number of manufacturers and jobbers in Montreal last week.

Vancouver, B.C.—E. B. Ryan, who for a number of years was with H. S. Howland Sons & Co., Toronto, but for the past six years has been associated with Lewis Bros., Montreal, in the sales and claims department, has arrived here to assume his duties in the sales department of the McLennan & McFeeley Co., A large number of friends were at the station at Montreal to see him off.

Lesson 7--Complete Course in Cardwriting

The Edwards Short-Cut System—Demonstrating the Lower Case of the Capitals in the Preceding Lesson on Brush Stroke Roman.

By J. C. Edwards. Copyright, Canada, 1911.

MUCH has been said in favor of the brush stroke Roman lettering by card-writers. This style of show card letter can be executed very quickly and a large amount of legibility can be obtained. The accompanying plate shows the lower case or small letters which are allied with the letters of last lesson—the brush stroke Roman capitals. If you refer to the previous lesson (No. 6) you will notice the card made exclusively with Roman capitals is not so readable and neat as the card accompanying this lesson which is made with capitals and lower case letters of the same style of lettering.

There is one very important point to learn in writing the Roman, and that is the great care required in putting the spurs on the letters. This either makes or mars the letter, for the beauty rests entirely on the evenness of the spurs.

Keep in mind the absolute necessity of holding the brush properly as illustrated in the picture shown in the left hand corner of the lesson plate. Another important point to observe in Roman lettering is the fact that much greater speed can be attained by making the whole word or line of letters before adding the spurs and moreover, a much neater and more symmetrical effect can be obtained. The hand is steadier and produces better and truer spurs where it has quite a number to make all at one time, instead of adding the spurs to each letter as you go along.

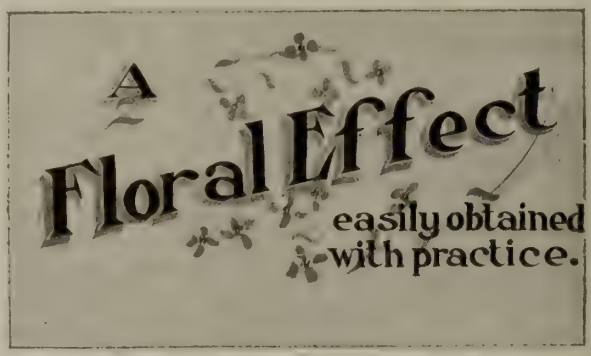
The idea in writing brush stroke Roman is to produce neat cards quickly and this is accomplished more readily when the capitals and lower case letters are used together as shown in the main line of the card "Floral Effect."

The strokes of this letter will be recognized as being the strokes that appear in the first alphabet that appeared —brush stroke block. This, one might say, is rather singular but you will find that if you have been successful with the first and have practiced every stroke and become quite familiar with each and every one, that you are on "easy street" during the balance of the lessons, whether they be for pen or brush. Your attention was drawn to this fact in the first lesson and is one of the features that the Edwards' shortcut system embodies. Of course, there are many new strokes shown in this lesson that have not been used before in former lessons.

In executing the Roman letters, the position of the brush in the hand never varies except in a few instances, and the secret of success lies in the rigid adherence to this rule. The exception is the letter "S."

The hand turns in this case to give the full breadth of the middle stroke which is necessary and could not be done if hand and brush were held in the same position as in the execution of even the top and bottom strokes of the same letter.

There are only a few minor points in this plate which will not be perfectly clear to the student, but upon close study of the strokes, these can be overcome.



Card showing application of the brush stroke Roman.

The most important is the finishing of such letters as "a," "c," "f," "r," and "s." It will be noticed that the finish is not unlike an attached "comma" and if you turn back to plate No. 2, you will find that the strokes for the comma are given along with the strokes which form a "period." Practice this part of the letter and you need have no trouble in getting it properly. The shading we recommend for this style of letter is the left hand lower shade—the same as shown in plate No. 1.

The decoration of the card here shown is simple and yet quite effective. It can be carried out in colors or in shade of grey. It serves as a relief and takes the bareness off the card without destroying the legibility. The same brush, No. 7 or No. 6 red sable flat in albata, was used to make this card throughout.

When making the stems of the flowers allow the hand to run lightly on the finger as shown in the corner illustration of the plate, holding the brush in such a manner that the edge rests very lightly on the card. Do it quickly, practice it often and don't be afraid to try. If you go at it slowly, you will get it very uneven and also get amateurish-looking curves. For lining the card, hold your brush as indicated in the accompanying illustration, letting the fingers rest lightly but firmly on the "T" square and keeping the brush even always. Do not move your hand but move the whole arm.

If further particulars are required regarding brushes, outfits, etc., write to the author, J. C. Edwards, care MacLean Publishing Co., Toronto, or to this paper.

Showing position of brush in hand while drawing straight lines.

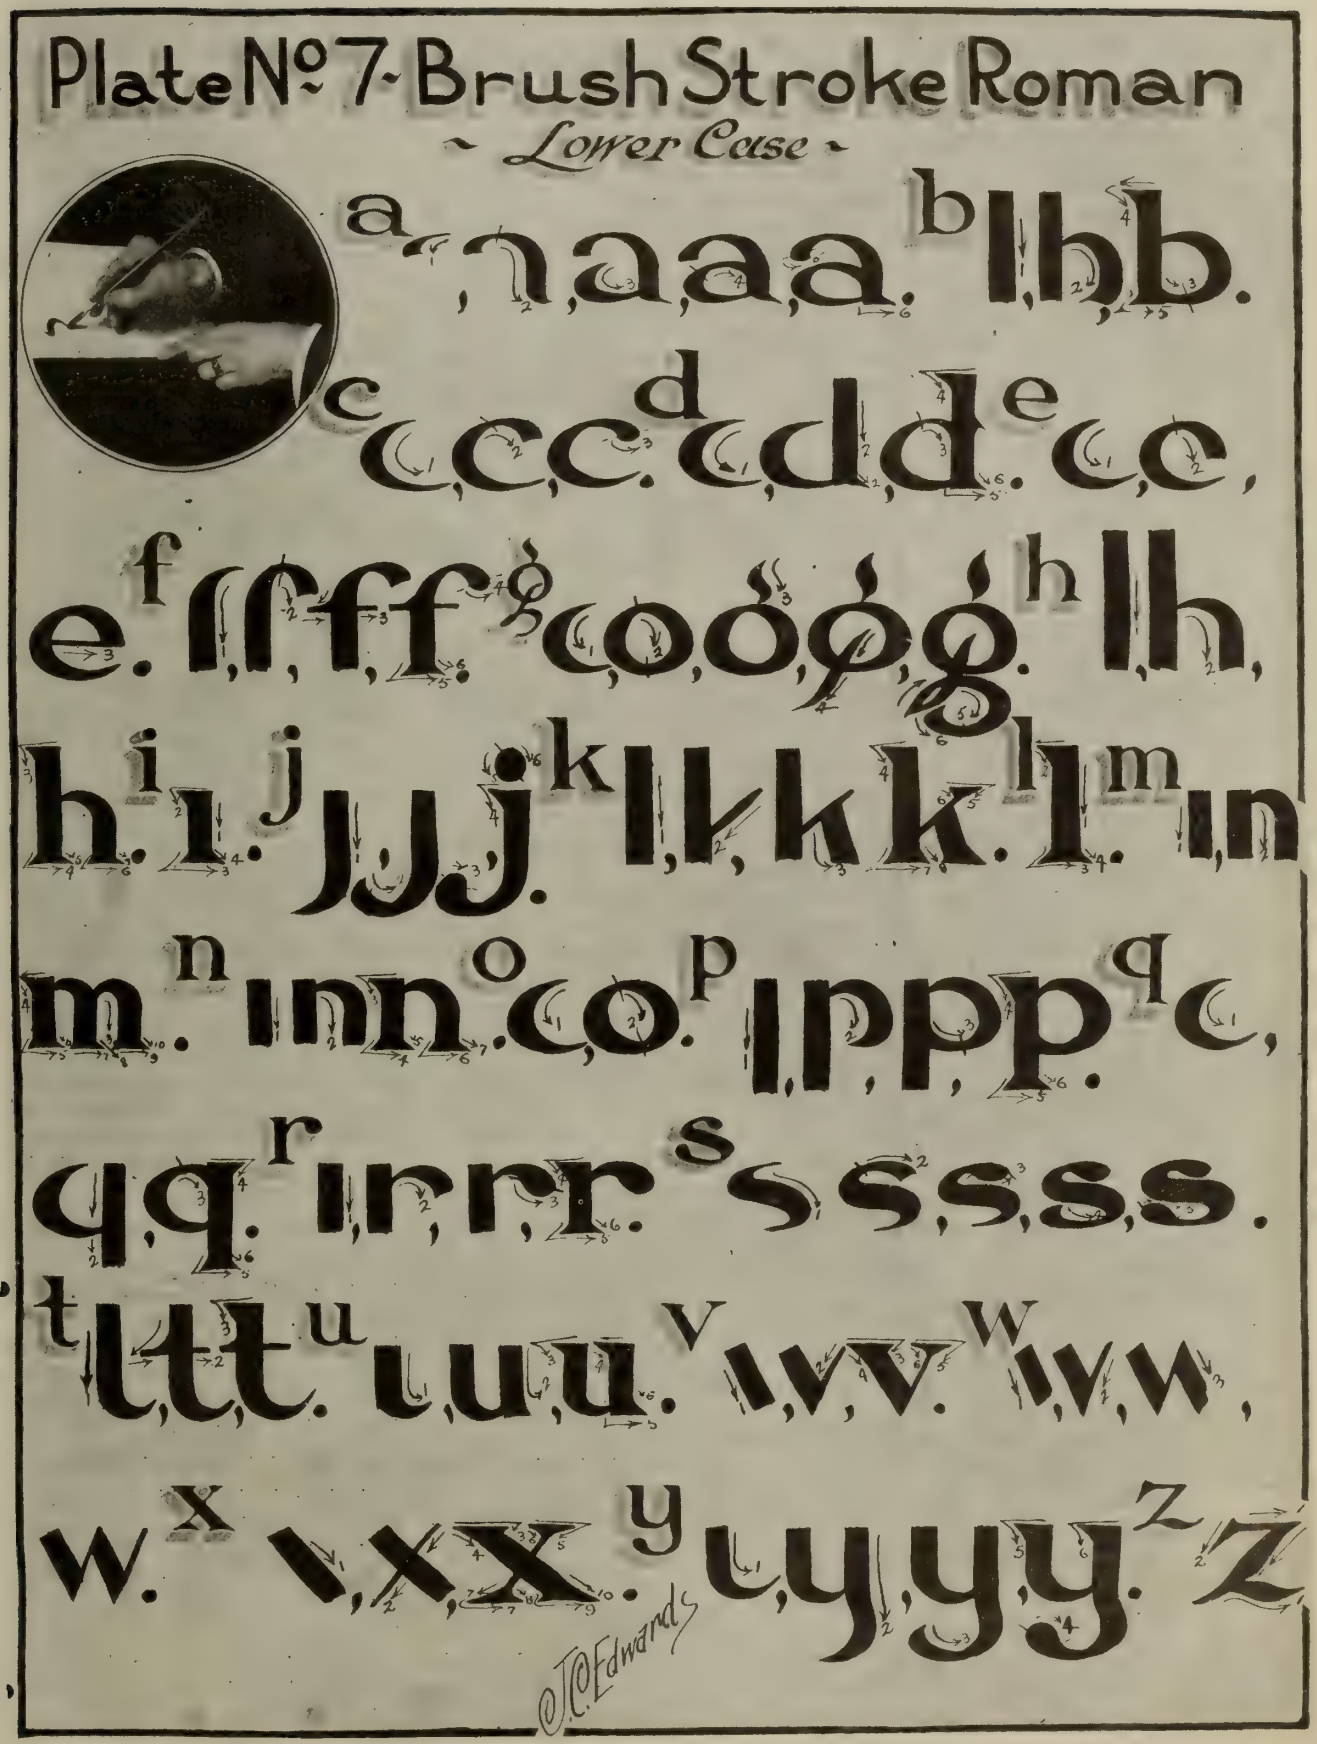


Plate illustrating brush stroke Roman, lower case. Follow arrows carefully and practise persistently.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 62.

TIN STRENGTHENS.

The feature of the metal market has been the change of control in tin, signalized by an advance in the price of that metal. On Thursday tin advanced briskly, the change being in sharp contrast to the tending toward weakness previously noticed.

Other metals have remained steady.

MONTREAL.

Montreal, Jan. 19.—Using a theatrical term it might be said that tin still occupies the centre of the stage. Upon it the spot light is focused. The metal is acting strangely, and all thought is centred upon it. Late last week there came a further drop in the primary market. Then came an advance of £6 in one day. Since drops have occurred, but not of sufficient size to offset the advance.

Rumor is rife regarding this metal. The syndicate, which has controlled it for so long, is said to be giving over the reins to a new syndicate. This would indicate that the lower level will not last much longer. A variety of opinions are held, but when all is said and done it would seem that the bottom price which tin will reach for some time has about been attained. It is hard to see what can cause a lower level. The syndicate, if it has been getting rid of its holdings, has done this now. The demand is greater than it has been for some time. Everything points to higher prices, though these may not come at once.

Copper Vacillating.

Copper has been vacilating somewhat, regaining these last few days what it lost early in the week. Spelter is strong, East St. Louis selling for $6.50. Iron is scarce. The situation with regard to this metal in Canada is serious.

Tin.—Since last week's report was written this metal has dropped. Monday the pendulum seemed to change and on the primary market metal for spot delivery rose from £184 to £190. Since there has been a fall off a little more than £1, but this is not considered indicative of another general decline. Some Montreal dealers, who had bought largely, and who were naturally somewhat chagrined that tin dropped still lower, wired selling instructions to New York. Their agents there declined to sell—claiming that money would be made, rather than lost by holding on.

A Possible Explanation.

There is no great supply of tin in sight. Locally stocks are short, while the demand is better than ever it has been before. Abroad there is a great scarcity. East India tin is practically not to be had, and now it seems possible that those who took contracts on the new agreement, which allows them to deliver East India tin, will find when their time is up, that they can not get all they need of this. They may have to buy Straits. Perhaps this is the situation the syndicate—old or new—has been striving for.

Lead.—This metal is a little more plentiful than it has been. Prices remain unchanged. The demand, for this time of year, is good.

Copper.—Really lower prices have not come here yet. Monday saw a drop in England, which was followed by a considerable advance on Tuesday, so local conditions hardly varied at all. The supply on hand in Canada is very fair. There appears little likelihood of a demand arising which the handlers will be unable to fill.

Spelter.—Though this metal has advanced across the line no change has been made here. Local stocks are good. This is practically the first time such a thing could be said, but now the handlers are well suupplied and are finding no trouble at all in meeting the rather large demands.

Iron Supplies Short.

Iron.—It is here that the pinch is being felt. As has been pointed out formerly, the stock brought in before navigation closed was inadequate. If handlers thought the demand for the metal would decrease they miscalculated. The call has been good—so good that iron is steadily being brought in now. This means extra freight, in fact the buyer has to pay $2.60 a cwt. to cover this advanced rate.

No chance of relief is in sight. The metal will have to be brought at winter freight rates until river navigation opens up once more.

TORONTO.

Toronto, Jan. 19.—The general tone is good. It is seldom that the first of the year sees such uniform activity and metal men draw the conclusion from this that conditions this year will be better than ever. Certainly there is no reason why such should not prove the case. With the industrial situation in the United States showing a great improvement and briskness manifesting itself in all parts of the Dominion, the prospects are all for increased prosperity.

Tin is Stronger.

Tin.—As usual, tin has provided the most interesting developments in the metal world. In the first place, a new syndicate has taken charge of the situation at London. This may presage a resumption of high price conditions. At any rate things have started off that way. To-day the market, which has been sagging considerably, jumped several pounds at London. Whether the new order of things was responsible is matter for speculation.

The advance on the primary market has led to an increase here of one cent, making the price 47 cents.

Lead is Quiet.

Lead seems to be falling back to the semi-obscurity from which it emerged a few months back. There is plenty of lead now in sight and stocks have been pretty well replenished. The demand is not heavy but the price of lead remains steady.

Tinplates Selling Well.

Plates and Sheets.—The demand for plates and sheets is unusually good. Tinplates are selling particularly well. Local stocks are not very heavy but such is the usual condition at this time of year. There has been some talk of lower quotations on tinplates but the only basis for the rumor was the fact that the price in England had fallen off a few shillings, in sympathy with the decline in tin. Now that tin has firmed up this tendency will be checked. No change has been made in local prices.

Copper Firm and Active.

Copper.—Despite rumors of uncertainty on the primary markets, copper has been firm and active locally. There is a good demand and things seemed to point to a continuation of like conditions. The activity of the demand has kept prices firm.

Good Demand in Spelter.

Spelter is in good demand. Stocks are now satisfactory. The price of spelter is steady.

Pig Iron.—The buying movement is fair. Prices remain unchanged as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

HARDWARE MARKETS

GOOD FOR THIS SEASON.

Business is reported good for this time of the year. In some lines there is an unusually good demand.

A few changes are noted in Montreal quotations.

MONTREAL.

Montreal, January 18.—Drops in prices have featured the hardware market this week. Generally, business is much improved, still the volume is not such that the jobbers and manufacturers are unable to handle it. The principal interest, therefore, centres in the activity caused by the cold weather and the snow, the coming of spring orders, and the lower price level fixed on shoe caulks and on horse nails.

In both cases these decreases are attributed to American competition. Trade is bad across the line. Some of the manufacturers are unable to dispose of their goods at a fair profit, so they are turning their eyes in the direction of Canada. It is to keep them from seizing a large part of the trade that the Canadian makers have dropped their prices.

Weather Strip Much Wanted.

Seasonable Goods.—Those forty or fifty mile an hour winds which blew last week and the early part of this, did not leave many cracks undiscovered. Consequently there was a great call for weather strip. Every day saw many persons asking for this, and the retailers had to send hurry up orders to the jobbers for fresh supplies.

A few shovels have been selling too, while door mats and brooms have had an active sale. Tar paper has been in large demand, and it is likely the call for it will continue, since people have been made to see what they must expect when the weather becomes intense.

Sporting Goods.—This snow and crisp weather is just what has been needed to help the hardwareman. Skates have been selling quite well. Snow shoes have been in good demand; and skis too, are being purchased. It begins to seem now that the aggressive dealer will be able to dispose of the greater part of his winter sporting goods before the season is over.

Hockey Sticks Going Well.

There is little call upon manufacturer or jobber for these lines at the present time, though hockey sticks must be noted as an exception. These are in great demand.

Household Goods.—Good orders are being received. This line is one for which the demand keeps up the year through.

Building Hardware.—Large orders are reported. One concern this week was called upon to supply one thousand dozen sets of locks. As well, a number of smaller sized orders were reported, so it appears these goods are being bought in good time. Those locks will likely be needed, too, for there is every likelihood that next year will be busier, from a building standpoint, than was even 1911.

Heavy Hardware.—This line is quiet, yet the price of horse shoe nails has been dropped. The exact figures are not given here, but will be found by reference to the current market report.

Screen Doors Being Ordered.

Spring Goods.—These lines are now coming to the front. This week a number of orders for green screen doors have been received. Spring hinges, too, are in demand. The careful hardwareman, it seems, has planned what he will want in this line, and is placing his order early so that he will run no chance of missing the early trade.

Lumber Supplies.—This line is becoming more in demand weekly. Saws are wanted. So are axes. There is a call for cant hooks and peveys, and even chain is beginning to be bought. The drop in caulks made this week is the surprising feature in this line. It is no ordinary five or ten per cent. drop, but one approaching 100 per cent. Ball Caulks, which have sold for $4.00 a thousand, are now quoted at $2.50; while heel caulks, formerly priced at $4.25 are now lowered to $2.75. Keen competition from the States has brought the lower level about. Better machinery is also said to enable the goods being turned out cheaper.

TORONTO.

Toronto, Jan. 19.—Local jobbing houses state that business at the present time is fully as good as during ing January last year. Some jobbers are inclined to believe that they have made advances but are not yet in a position to speak positively on that score.

Prices are remaining steady but they are, in some lines, on a low scale. Although a large volume of business was done last year, it was noticeable that prices became lower in these lines around the end of the year. The same quotations are holding with no immediate prospect of a return to the figures which prevailed early in 1911.

Seasonable Goods.—Some orders are being placed still for winter goods, notably for weather strip. Practically all other winter lines are showing little activity. Dealers report that their stocks are complete and that the retail demand for that matter is practically over.

Spring Booking On.

The most satisfactory feature is the large amount of spring business being booked. Orders are being placed for screen doors, wire netting, wire fencing, hose, garden tools, etc. This business is all, of course, for spring requirements and no shipments are yet being made.

Builders' Hardware Dull.

Builders' Hardware.—The demand in this department has now reached mid-winter proportions; which means, briefly, that business is very dull indeed. What is being done if confined almost exclusively to the City of Toronto.

Enquiries, however, are coming in and the jobbers state that they are most confident of a bigger year than ever in this line. Some enquiries from the West point to the probability of an demand in that section.

Heavy Hardware.—Some booking is being done. Price quotations are:—Discounts on carriage bolts, $\frac{3}{8}$ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and $7\frac{1}{2}$.

Household Goods.—A healthy demand is noted for kitchen articles, such as washing machines, wringers, tubs and woodenware of all descriptions. One firm reports that sales in these lines have approximated very largely above the business being done at this time last year.

Sporting Goods.—The demand here is not overly active, although skates can still be described as steady. Supplementary calls are now the rule. A marked tendency among late buyers of skates is to order good quality skates, pointing to a demand for quality from the public. Hockey supplies are selling briskly.

GERMAN FIRM OPENS BRANCH.

Montreal, Jan. 18.—Steffens & Nolls, of Berlin, Germany, have opened an office and sample room at 77 Beardmore Building, 59 St. Peter street. Here complete lines of carpenters' tools, machinists' tools, plumbers' tools, furniture fittings, trunk fittings, harness fittings, builders' and contractors' supplies, aluminum ware, cutlery and general hardware are carried, also plates, plain and corrugated sheets, nail wire, and all heavy hardware.

W. Steffens is manager of the Canadian branch, assisted by R. W. Bartram, for some time purchasing agent for the Allis, Chalmers, Bullock Co.

Electrical Men as Electrical Goods Salesmen

Hardwaremen Have Found That it is Wise to Have a Man Who Understands More Than the Rudiments of Electricity Handle This Line—People's Confidence is Thus Gained—They Want to Buy From Men Who Can Explain Their Goods.

"To earn more, learn more." A great deal of truth is wrapped up in these five words which form the motto of the trades unionists. And this truth may be applied in many ways, for instance, it will be seen that to sell more, the merchant and his clerks must learn more. It is not possible for a merchant to be a specialist in every line, but by a wise division of labor he may see to it, that at least one man in the establishment knows a great deal that is to be known about each special line. This is of the first importance, for there are some articles which people will not buy, unless they are convinced that the salesman knows what he is talking about Electrical goods, perhaps, stand out most prominently among this class of goods.

Need an Expert.

Electrical fixtures and specialties are more and more being handled by hardwaremen. Hardly a town of good size now but has one hardware store carrying these lines. The great majority are doing a good business; but those are succeeding best who have among their selling staff some man who is an electrical expert.

Some dealers declare that they would not handle this class of goods at all if they had not a man with a good knowledge of electricity in the establishment. W. F. MacPherson, of Prescott, has a clerk who formerly worked on the town electrical plant. This man can do practically anything in the way of electrical wiring. He can install lights, and can remedy any trouble which may occur. He knows how to explain the workings of the specialties which he is showing to customers. "I think it is practically imperative to have a skilled man to look after the electrical work," stated Mr. MacPherson. "I know we have found this a good system."

Some Install Fixtures.

A great many dealers take this same ground. Some have their men undertake the work of installing the fixtures. Some merely make it a point to refer their customers to some man who will do this work for them well. But all those who have been most successful, have as salesman of the electrical goods, men who know how to explain these; men who will be able to remedy any trouble which may arise. There is nothing which adds to a customer's confidence so much as to have the salesman remedy some little defect. There is nothing which shakes his faith and causes him to think of dealing elsewhere, so much as to find that the man who is recommending him to buy some fixture or some specialty cannot remedy a trifling fault—a burned out fuse, an imperfect connection—which may be found in it.

Electrical Men for Electrical Work.

Every month sees new dealers adding electrical fixtures to their stock. These men should remember that what other merchants have found, will surely apply to them—that is, that it is impossible to obtain the best results unless electrical goods are handled by electrical men. This does not necessarily mean a man who has had a long technical education, but it does mean a man who knows a little more than the rudiments of electricity. It means a man who through natural aptitude or education is able to install fixtures if necessary, and who is able to fix any of the simpler troubles which buyers of the electrical goods may meet.

By "Mack."

I wrote recently of making good resolutions for the year, and since some of the suggested changes and improvements in conducting store management involve perhaps, a greater strain on the will power than can be sustained until attainment is reached, it may predispose to the habit of failure if too large a task is attempted. Sitting quietly in office or at home, a plan to reform habits of many years' standing seems both virtuous and practicable, but when opposed to the friction and obstruction of business and social life, the ability to endure the unaccustomed condition is measured by the strength of will which has been developed. Upon the will showing early signs of fatigue and the hold of the mind on the project in hand weakening, the disposition to regard the object of the good resolution as too high for ordinary folk to reach, presses itself against our imagination and we cease to try, and drop back defeated.

In the circumstances of a merchant of modern time but antiquated equipment and methods the desire for betterment may cause him to register a resolve to emulate the achievement of a more efficient contemporary who has reached a higher position in the business scale through observing and obeying certain inexorable commercial laws. If he has never enumerated his resources by the laborious plan of stock-taking at the outset many irksome features of business detail are certain to rise to the surface and the inclination to return to the old conservatism may here prevail.

Should this unfortunate ending take place then the last state of that man is worse than his first, for he acquires by practice a move intimate acquaintance with failure. Added to the reform just described is another often inaugurated during the early days of the year, the transmutation of credit into cash selling for goods wanted by his customers. The inability to live up to one of these much-to-be-applauded resolutions, causes the abandonment or indefinite postponement of the other. The undertaking was much too large and that which was commendable actually become a bad resolution in its consequences.

The preliminary training of the mental powers to confront the difficulties of the work or the reform that is contemplated would have clearly shown the man what to expect and then believing all that he was able to anticipate regarding the possible tax in his capacity and fortitude, proceeded to perform the task that he has set for himself with perseverance. The same person who abandoned the work of reform in his store would be almost certain to succeed if, upon examining his personal qualities, found that for him the carrying through of the large idea was an impossibility and to outline one of less magnitude that is finishable would result more happily and give him the impulse toward efficiency that was lacking through his being unable to develop the habit of success.

A GREETING CARD.

A handsome greeting card has been received from the officers and board of directors of the Mechanics' Supply Co., Quebec.

The Western Hardware Market Situation

Business is Very Slack Owing to the Weather Conditions—Some Orders Are Being Received for Stoves—People Win Out in Fight With the Railroad Interests.

"Lying around and taking it easy," was the greeting extended by one wholesaler to-day when called upon, and when asked to explain himself, he pointed out that the continued severe weather not only had the effect of delaying shipments and orders by delaying trains, but that in many cases travelers had not yet returned to the road as it was simply impossible to travel especially in the country districts under existing conditions. During the last two weeks they have been busying themselves stock-taking and at the present time the majority of the firms in the city have almost completed this yearly task. Retail merchants in the country are now hard at work summing up their year's trade and from every corner comes the report that a record year has been established. Collections though delayed considerably are, notwithstanding, being met fairly well and it is now agreed that the west will by no means be as bad off as it was predicted some months ago.

Owing to the 30-degree-below-zero weather threshing is completely abandoned and it is the question of the day as to the best treatment to be awarded many thousands of acres of shocked grain still in the country It is expected that this important question will be dealt with on the forthcoming Grain Growers' Conventions and all are watching with great interest.

Some Stove Orders.

As stated before orders have been very light this week and very little is doing. In stove lines, however, a few late orders have been received especially for large ranges and general sorting up orders, and these have been sent out immediately. The continued cold weather has forced many to buy heaters and ranges who had contemplated waiting until next year before making this expenditure. These are about the only lines that show any movement whatever.

The People Win.

At last the western peoples' interests appear to have won out against the railroad interests of the west and these magnates have agreed to supply rolling stock to prevent any serious car shortage again. Not only this but the C.P.R. has already brought an expert from the Chicago terminals to take charge of the work of increasing the local terminals so as to prevent a congestion of cars as occurred last year. It was not till forced upon that the railroads paid attention to the yearly loss which was occurring to western farmers through their neglect.

The Storage of Grain.

The question of storing the grain at the head of the lakes is attracting as much attention as ever. Elevators are already taxed to their utmost capacity and it was hoped that some arrangements could be made whereby the railroads could grant a lower freight rate on grain to Minneapolis and Duluth, thus enabling Canadian grain holders to store their wheat in bond in these large American centres. It has been announced within the last week, however, that the interstate commission has decided that they cannot grant this reduction in freight rates as the question of lowering freight rates on grain for any cause is of such a ticklish nature that it is liable to throw the complete freight system out of gear. When further steps are to be taken is not known at the present time but the case is being watched with interest.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 3c.

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Stoves, Furnaces and Cooking Accessories

Allow Margin of Efficiency in Furnace Installations

This is Necessary to Insure Satisfaction, Declares Heating Expert, for Furnaces Are Not Going to be Tended by Skilled Men Who Can Get the Best Out of Them—The Need of Considering the Locality of a House as Well as Its Size is also Emphasized—Points Illustrated by Concrete Examples Which Will Appeal to Furnace Men.

"When it comes to penny-wise pound-foolish policies, when it comes to economy which is the worst kind of extravagance, then recommend me to the practice of putting small furnaces in houses."

The speaker was the Manager of a Montreal furnace supply house. He had received a number of complaints of cold houses, and so, obeying the rule of contrast, spoke with heat.

And what this man had to say is of great interest to every furnace man in the country. He spoke from exprience, and backed up every statement with a concrete example. What he urged was a special consideration of the needs of each building in which a heating plant is to be installed. He urged the necessity of a margin of efficiency—a margin which would enable furnace handled by an unskilled man to give the service that a smaller plant might give if tended by an expert.

Two Heating Systems.

"I put a heating system in my own house, about three years ago," remarked the Manager in question. "My neighbor, who lives in a house equally well built and of equal size, looked at my new plant with interest. 'Why you're throwing money away,' he said.

"Well," said the Manager, "I haven't got any money to throw away, but all the same, I decided I would throw some there. I want my house warm. And," he added, "my house was warm; whereas, a year ago, my neighbor came to me and asked that I get him a larger size of furnace. He had saved a little initial cost, but had been compelled to spend more for coal, and had not enjoyed the comfort of a perfectly warm house.

"Then," continued this heating expert, "there was the case of a friend of mine who bought a house on Dorchester Street. His furnace was not giving satisfaction, and he asked me to come in and look it over. I suggested a larger one.

"'Great Scott!' almost shouted the householder, 'do you think I'm running a coal mine here? I'm burning more coal than I can well afford now.'

"I said: 'what would you think if the larger furnace meant you spent less and not more on coal.'

"'If you make that a guarantee,' the Dorchester Street man said, 'I'll order that larger furnace right away.'

"We seldom do that," the furnace man declared, "but I thought this time it would be all right to break a rule. I gave the guarantee. The larger furnace was installed, and though that winter was an exceedingly bitter one, 3½ tons of coal were saved and the Dorchester House was heated properly for the first time in several years."

Here the Manager of the Furnace Company broke off, to lay the blame for the situation which he was decrying. "The trouble is with the contractors and furnace men," he declared. "They try, many of them, to make a cheap estimate on a job. They figure as closely as possible, and in many cases fail utterly to remember that the furnace is not going to be cared for by a man who knows how to humor it and get the most out of it. They don't consider location either. They seem to think what will do for a ten-room house in one district will do for a house of the same size situated in a more exposed position."

System for an Exposed House.

Again the furnace man illustrated what he meant. "An elderly couple were having a house built on the Boulevard Westmount, which as you know is about as badly exposed a spot as there is in Greater Montreal. The old gentleman came to me with his blue prints and asked me if the heating system there outlined was all right. He said: 'We are not as young as we once were, and we want to be thoroughly warm. I can afford to pay for this comfort.'

"Well," continued the critic, "I looked the system over, and I suggested that he have a larger furnace. The next day I heard from the Architect who had made the plan. The architect questioned my corrections. He said there had been an adequate system prescribed in the first place. I didn't want to interfere, but I did tell that architect that he had outlined a system which would have nicely heated a house of the size in question, had it been situated in a terrace in the heart of Montreal. But such a system would have meant a cold house on the Boulevard—a cold house when the owner wanted a warm one and was willing to pay for the warmth.

Grates Caused Trouble.

"Well, my suggestions were followed; and to show satisfaction was given, I may say that the next year, when the old gentleman was having another house built for his son, he again consulted me on the heating system."

Another point which heating engineers might well bear in mind was brought out by one more story which this man of wide experience recounted.

"It is only a little time ago," he seated, "that I got a letter from an Englishman living in St. John, N.B. This man said he was using one of our furnaces. He said: 'My house is cold, while neighors' houses, no smaller, and served by similar heating systems, are warm.' Naturally, he wanted to know how this was.

"I wrote asking for a plan of the heating system, and this is what I found. In that house there were no less than thirteen open grates. It wasn't the unlucky number which was causing the trouble, but those grates were just sucking up the hot air.

"I suggested to the complainant that he close the flues of all those grates which he was not using. He did this, and wrote me a few days later that the heating system was working perfectly."

A BUSY YEAR.

In reply to the circular letter sent out by Hardware and Metal, the D. Moore Co., Hamilton, stove and range manufacturers, say: "We have found conditions in our field very satisfactory. We have had all the business we could handle until December and shipments and sales have been considerably in excess of the year previous. We are most optimistic regarding the outlook for the coming year."

How Cupid Helped the Stove Campaign

Clerk Tells Novel Story—How a Dealer's Gift of a Range, and the Newspaper Notice of This, Brought a Number of People to the Store to Ask the Young Bridegroom for a Model Similar to the One He Had Received—They Thought He Knew a Stove When He Saw It, and Would be Sure to Get a Good One from His Employer.

"Of course," remarked the head clerk of an Eastern Ontario Hardware Store, "there are all kinds of ways of advertising stoves. But I think the boss and I accidentally hit upon as good a scheme as has ever been worked."

The head clerk chuckled, and the other hardware and stove men who were present calld for a cessation of the chuckle and a continuance of the story. Finally, after more laughter and sundry slaps on the thigh, the clerk regained his composure. "Well," he remarked, "I don't mind telling you the scheme, though the laugh is somewhat on me. It's over now though, so there's no reason why I shouldn't let you all hear."

The Start of it All.

Thus prefixing his narrative the clerk proceeded.

"I was married last spring you know," he remarked in self conscious tones.

"It happens to us all," commented a middle aged dealer, present. "Don't see what your marriage has to do with your stove advertising scheme. Get to your story."

"But I am telling the story," grinned the clerk. "My marriage was the big event, not only in my life but in our spring stove campaign. Sure it was. I'll leave it to the boss."

The boss, being thus appealed to, merely supported the clerk. "You're all right," he said. "But it's your story. Go ahead."

Stove as Wedding Gift.

"Well," continued the clerk. "Before I was married the boss gave me a stove as a wedding present.

"He gave your wife a stove, you mean," interrupted a listener.

The narrator paused, smiled a somewhat sheepish smile, and then continued. "The boss gave me or my wife a stove. I don't care which he gave it to, we've got it. But that isn't the point. The point is that the news of the presentation got into the papers—one of those pre-wedding locals you know. They gave the make of the stove and all.

"I was a little sore at the prominence or notoriety, or whatever you want to call it. But the soreness soon wore off, for reasons which you will very soon see.

"I wasn't away from the store long, and when I got back people began to ask me, 'Frank,' they would say, 'Let us see one of those stoves the old man gave you.' After this remark the clerk looked up suddenly. But "the Old Man" only smiled, so he went on.

Knew All About Range.

"Well, I took those people to see the ranges similar to the one which had been given me—or my wife. 'It must be a good stove, Frank,' they would say, 'or the Old—the boss—would not have given it to you.'

"Naturally, I could tell them all about that stove. I knew more about it than about any other. I could explain all the draughts. I could explain the points which made the somewhat high price necessary.

"How many of those stoves did we sell, Frank?" inquired his employer.

"I'm not going to say," replied the smiling bridegroom, "but I know it was a lot. You see," he continued, addressing the others, "every one in town, practically, had read that local about me getting a stove. I guess they thought, 'this fellow knows a good stove when he sees one. His boss wouldn't have the nerve to give him anything but the best.' So they believed that stove I got was the best, and they came to ask about it. They weren't so far wrong, either," commented the clerk. "The stove surely was a good one. It is giving us fine satisfaction and I guess it is doing the same for all those we sold to.

The Best Ad. Ever.

"But it was this ad. I started in to tell you about," he proceeded. "Did you ever hear of such a business-getter as that newspaper local? We never thought of it as an advertisement, but it surely worked that way. And the best of it is that its effect will probably be lasting, for those people who bought the stove because I got one given me, will tell their friends they have the best range to be had. They'll tell them how they came to get it; then their friends will come and ask for a similar stove."

ALD. CHOWN'S RECORD.

Belleville, Ont.—Ald. R. C. Chown, hardwareman, was head of the waterworks department last year, and he managed it so well that a net profit of $6,649 was shown at the end of the year. In commenting on this, the Daily Ontario says:—"The management of a heavy department like the waterworks means no small sacrifice for a busy man, but the City Council did well in selecting Ald. Chown for the job, and the report shows that Ald. Chown did well for the city."

JACK WILLIAMSON'S PLIGHT.

Toronto, Ont.—Jack Williamson, traveling salesman for the Kennedy Hardware Co., en route for home from the east last week, left his seat for a few minutes, and when he returned, found that his grip was gone. He got the conductor and they finally found the grip—empty. Before the train reached its next stop, they located a suspicious character, who was preparing to get off at Whitby. His pockets were crammed with razors and knives. He restored the goods and was summarily dropped at the first stop.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Guide for Millmen.

The Simonds Canada Saw Co., Montreal, have sent out their 1912 "Guide for Millmen." The cover contains a panoramic view of the Niagara Falls and the contents are given up to a description of the works of the company at Lockport, N.Y. The booklet makes interesting reading.

Griffin Hinges.

The Griffin Manufacturing Co., Erie, Pa., have issued a neat catalogue illustrating their various lines of hinges, butts, shelf brackets, door bolts, door hangers, track and miscellaneous hardware. The catalogue contains 66 pages, printed on coated paper. It has a complete index, which is found handy in looking up any special line.

Garden and Verandah Seats.

The Stratford Manufacturing Co., Stratford, Ont., have issued a very neat catalogue illustrating their complete line of gilding settees, park and garden seats, folding chairs and tables, suspended verandah seats, chairs for assembly seating, camp and verandah furniture, and ladders for every conceivable purpose. It has a neat green cover and is printed on coated paper. A unique feature of the catalogue is that most of the lines included in the list are illustrated by photographs of actual scenes where Stratford goods are in use. It makes a highly creditable publication.

STOVE AND HEATING MARKETS

STOVE MARKET DULL.

Business in stoves and heating goods is dull. This is the dull season, so the condition of trade does not cause any uneasiness. In some lines, in fact, trade is better at present than usual at this time of year. Manufacturers are confident of an early return of stove activity.

MONTREAL.

Montreal, January 18.—Snow, which has been falling in good quantities here this week, has not harmed business at all, while the improved sleighing has done much to make country business brisker. The cold weather, too, has had its effect upon the stove business, orders for heaters having come in rapidly.

Tin plates have been selling well. It does not seem that there will be any change in the price of these. Owing to the great drop in pig tin the price of plates has been somewhat lowered in England. But that a corresponding reduction will be made here is far from likely. The reason for this is easily understood. When tin plates were being advanced in England, owing to the rapid advance of pig tin, no higher level was fixed in Canada. And now that the lower price is being made in the old land, the former figures are being retained here. Moreover, it is not expected that the present low price of tin will endure long, so a drop could hardly be made with any likelihood of permanence.

Copper Goods Going Well.

Copper goods are moving well. The higher prices fixed seem to have had no effect in this line.

In all departments a fair demand is being experienced—in all, at least, except furnaces. Preparations for spring are being made, and the orders coming to the manufacturing places already indicate that trade during the coming months will be brisk.

Ranges, Heaters and Furnaces.—As far as the ranges are concerned the whole thought is for the future. Sales for this winter are largely over. It is only a few of the most progressive dealers who are getting sales now. The demand is largely satisfied. But the travelers are working hard for orders. They want the retailers to have some of the models on their floor, so that those doing business there will be able to examine the different styles.

Cold Has Helped Heaters.

Heaters have been moving rapidly this last week. January seems a little late for selling these, but it appears the month is never too late when the weather is cold. If people are finding difficulty in heating their houses they are only too glad to consider the purchase of a heater. So, this last few days, the retailers have been making good sales. Their reserve stock has been exhausted, and they have sent supplementary orders to the manufacturers. From the country these orders for heaters have been coming, but somewhat strangely the big demand has been from Montreal itself.

Furnaces are exceedingly quiet. Some contract work is being completed, but few systems are being installed in private houses. Repairing work is being done and the manufacturers are meeting a steady demand for parts.

Gas Stoves Becoming Active.

Gas Stoves.—After hibernating for a few months, this line is becoming active again. A few weeks and it will be possible to instal these stoves in the new houses which have been completed durthe winter. The retailers know this, and so are willing to listen to the travelers advice that they get in orders for some models. They will need these for display in a surprisingly short time now.

Kitchen Furnishings.—Of this class of goods it may be truly said that there is no off season. Some times of the year are better than others—notably spring and fall, but all the year round there is a good demand. It seems that people must replenish their culinary equipment whenever it falls below par, and as pots, pans, kettles and boilers are liable to wear out at any season, there is sure to be a good call the year through. The heavy spring demand is now in sight, moreover, and retailers from all parts of the country are sending in their orders. Some have placed these some weeks ago, and are now calling for delivery. They do not wish to take any chance of being short of supplies.

TORONTO.

Toronto, Jan. 19.—There is more activity in the stove market at present than is usual at this time of the year ; but, to be perfectly frank, that is not saying a great deal. Manufacturers never anticipate an active demand immediately after the first of the year .

It is stated, however, that already there is considerable booking being done for future delivery. The travelers are covering their territory and report better progress than usual.

Ranges.—The demand in this line has fallen off appreciably. A few lone orders are reported by the manufacturers. One or two shipments of large proportions have been made but these have been the exception, not the rule. The range trade will not be particularly active for some time now.

Gas Ranges Selling.

This does not apply to gas ranges. A good demand is now starting for gas stoves and some large orders for spring shipment have been placed. The certainty of a brisk building business this year is responsible for the early interest being manifested in the question of gas stove stocks.

Some Heaters Slling.

Th cold weather has resulted in a prolongation of demand for heaters. Even a few base burners are being sold but the demand centres in oak heaters and the smaller varieties. There has been a big demand especially for oil stoves. They are needed during severe weather for heating single rooms, offices, etc., and for two or three weeks back there has been a fairly consistent call.

Furnaces Dull.

Furnaces.—The end of the furnace season seems to have been reached pretty well. While some orders are still being placed, mostly in Toronto, it is quite apparent that the installation work is now over. Most of the orders filled during the past week were on orders placed earlier in the season.

Plates and Sheets.—Lower prices are being quoted in tinplates, due it is believed to the continued slump in the price of tin. The change is not general, however. There is only a seasonable demand for plates and sheets at the present moment.

Dairying Supplies. — Activity is reported in dairy supplies. Trimmings are being sold in large bulk. Many tinshops are now devoting full time to making up dairying supplies, and this has created a steady demand for trimmings.

Kitchen Furnishings.—There is not a great deal of business being done in utensils and cooking accessories at the present moment. Some good sorting orders are being received, however.

Piston Packing.

J. G. Sims, Little Current, Ont.—"Where can I procure Lindsay Piston Packing ? "

Can any reader give this information?

Methods of Retailing Paints and Varnishes

Paint Dealers Can Make a Dollar a Minute

One Man Did—By Giving an Hour's Consideration Early in January to His Plans for a Paint Campaign, He Increased His Business Fifty Per Cent.—Now is the Time to Make Your Plans.

"That's the fourth paint traveler who has been in here in two days," declared an Ontario hardware dealer the other day, as he turned to greet a representative of Hardware and Metal. The traveling man had just taken his departure.

"Give him an order?" was asked.

"No. I couldn't. And he had a mighty interesting proposition too. But the fact is, I haven't thought of what I'll do in paints this year yet. Until I've gone into it, I won't place any orders."

This dealer was right in one respect It pays to think out your plan of campaign ahead of time. But he was late. He should have done that mental figuring long before. The fact that four travelers had called on him was pretty conclusive evidence that the time for spring ordering had come. Those travelers were getting orders from other dealers.

Hardwaremen who have laid plans yet should get down to work without any more lost time. Collect all the available data and then start to figure out your 1912 paint campaign.

The most valuable information will be found in the lists prepared during stock-taking. Get the facts relating to the paint department and study them up thoroughly. You will find there how much stock you have on hand and, if the inventory has been a thorough one, how much you sold during the year. There will be food for thought in the figures thus supplied.

Then get whatever information is available with reference to building operations during the year. Call up someone you know in the contracting line and talk it over with him He will be able to give you a pretty good idea as to the amount of building to be done during the year. It is important that the dealer should be in a position to judge just about what the demand will be.

Went After the Painters.

The case is recalled of a Manitoba dealer. We will call him Brown. As soon as stock-taking was over last year, he gave an hour or two to each department, planning how he could improve trade in that line during the year. When he came to paints, he gave his stock lists a pretty close scrutiny. Although the total of sales for the year showed up pretty well, Brown knew that he had been getting a small share only of the trade of the master painters in the town. His opposition had managed to get the inside track somehow or other and only an occasional order had come Brown's way. He knew the other dealer was an indifferent salesman; that he depended on selling the master painters their supplies, leaving them to mix up their paint for themselves. Now Brown, himself, was a firm believer in ready mixed paints. "If I can only get the master painters to look at it my way, I can double my paint sales this year," he concluded.

Monday was never a particularly busy day, so he decided to devote an hour or two every Monday morning to calling personally on the master painters. Brown followed this idea up at once. "Nothing like starting early," he thought. The first few calls he used more to get acquainted with the painters than to talk sales. He discussed town topics, only occasionally putting in a word about paint. Gradually, however, he opened out and talked his line of paints to them with all the eloquence of settled conviction. The painters were not easily converted to his way of thinking. They had settled opinions of their own and were perfectly willing to stick up for them. He won a few of them over, however, and gained from most a promise to try his brand of paint on some of their jobs.

His spring business showed an increase of 30 per cent. During the summer months, the increase crept up around 40 per cent. and during the fall he was sailing along with a good 50 per cent. improvement. He is still making his Monday morning calls and finds that even the most obdurate of the master painters are beginning to increase their orders. What is more important, the painters are transferring their trade entirely to him and he is selling more white lead and linseed oil than he ever did before.

A Dollar a Minute.

The improvement in his paint business can be traced back directly to the hour or so that he took early in the year to figuring out plans for the year's campaign. He made considerably more than a dollar a minute that January afternoon.

An hour's careful planning ahead of time will be found more effective than continuous labor later on in the season. Mistakes can be avoided in that way which no amount of hard work can rectify after the season has advanced.

A dollar a minute can be made by every dealer who takes the time to plan out matters ahead. Sales later in the season will prove this.

After the Building Trade.

As stated before, one of the most necessary steps is to ascertain what buildings are projected. It is not difficult to secure this information. Watching the daily papers will be found effective. The newspaper reporter has the faculty of finding out the secrets of the real estate world and getting them into print bright and early. It pays the dealer to clip all items relating to building operations, which appear in the press, and keep them. This is found useful in other departments—builders' hardware, stoves and furnaces.

It will be found useful, however, to keep in touch with the builders and contractors. Information can be secured from them with reference to residences and small buildings, which the newspapers are apt to overlook.

In conclusion, it cannot be too strongly urged that it pays to lay out plans before the selling season begins. And it pays to plan early.

A POWDER PAINT.

The fact is advertised that A. L. Rice, a prominent manufacturer of Adams, N.Y., has discovered a process of making a new kind of paint without the use of oil. He calls it Powderpaint. It comes in the form of a dry powder.

This idea is not a new one, as there are already on the market a number of "dry" preparations, several of which have had good sales in Canada.

PRATT & LAMBERT CONVENTIONS.

The conventions of Pratt & Lambert salesmen at Chicago, Buffalo and New York gave the new year a proper start. This year the usual plan of bringing all men together for one meeting at Buffalo was varied, and three distinct conventions were held.

The first meeting was held in Chicago January 2 and 3, and the men from this

territory gathered at the Chicago office for the business sessions, which were followed by a dinner and a bowling contest at the Chicago Athletic Association.

Then came the convention at Buffalo on January 4, 5 and 6., which was attended by those men travelling the Buffalo territory as well as the new men and the special manufacturing salesmen from all parts of the country. The Buffalo dinner was held at the Buffalo Club and a bowling contest there also supplied the recreation and entertainment.

At the New York office the eastern men gathered on January 9 and 10, and after the business session there was a dinner, long to be remembered, at Delmonico's.

The keynote of these conventions was "Efficiency"—efficiency in manufacturing, sales and advertising. Mr. Andrews, President of the company, gave one of his inspiring talks at each meeting. Mr. McNulty, General Manager, pointed out in detail just how all lost motion in each phase of the business could be and was being eliminated. The extensive advertising campaign for the coming spring was fully outlined.

Prepare for Spring Campaign Work Now

Dealers Do Not Find Time to Make Use of Manufacturers' Literature in the Middle of the Season—Why Not Prepare Lists Now?—Discretion Must be Used.

The excuse—and a poor excuse it is—most frequently urged by retail dealers for not making more use of manufacturers' literature is that they haven't got time.

"I haven't a second's spare time," declared a hardwareman last spring. "I had intended to send out some of the circulars the ——— people supply about their paint, but how can I get out the lists when I hardly have time to snatch three hasty meals each day? I'm rushed to death."

He was. His spring stock had been pouring in on him and only part of it had been unpacked. Customers were keeping his staff of clerks busy at the front of the store. The bookkeeper was away, an attack of influenza or some other spring ailment being the cause of his absence. The sadly worried proprietor hardly knew whether he was standing on his hands or his feet; and there were those two hundred circulars that the manufacturer had sent him, waiting to be addressed and mailed out.

That the circulars were never sent out goes without saying. They finally found the waste basket in all probability. The manufacturers had spent quite a little money in getting those leaflets out too.

On the surface of it, one could hardly blame the dealer. Spring is a busy time and it is not the proprietor's fault if his help take sick in the midst of the season. The dealer was to blame nevertheless.

Avoiding the Rush.

He was to blame for this reason. Earlier in the season, during January and February for instance, he had plenty of time to look after such matters. Why did he not then make out the lists of people to whom circulars were to be sent? The chances are that he never gave a thought to paint all through the comparatively dull trade season which begins around the first of the year and ends with the first sign of spring. It never occurred to him then that he might utilize his time to good purpose and save himself that work later in the season when he could not very well spare the time. As a result, the work was neglected in the end.

What He Lost.

Procrastination is the thief of time and a wholesale purloiner of profits. In this case, it cost the dealer the extra margin of business that the circulars would have brought in. It cost the manufacturer the same. The latter was out the expense of the wasted circulars as well.

It cannot be too strongly urged that dealers should anticipate the rush of work which the spring ushers in by getting as much of it done now as possible. Do not leave it all until the very last moment.

Preparing of Lists.

The preparing of lists is a matter calling for considerable judgment. It does not do to send out circulars to the whole voting list. Some dealers do this. They mail out literature to people who have moved away, to boys living at home, and bachelor denizens of boarding houses. If the list contains the names of people who have died, it is all the same; the literature is mailed out to those names.

It should be borne in mind that only a small percentage of people are paint prospects and it devolves on the dealer to decide who they are. One of the best methods is to take a list of property owners in the district and go over them carefully, deciding just who are likely to invest in paint. Some dealers make a "paint census." That is, they have their clerks make a tour of the streets and mark down the numbers where paint is badly needed. The dealer then sends out literature to the owners.

The circular policy is one which involves considerable loss, insomuch as the literature is bound to fall into the hands of a great many people who have not the remotest prospect or intention of profiting by the information contained. It is doubly important, therefore, that the dealer should exercise care and judgment in compiling his lists.

Finally: do it NOW.

NEW PLANT NEARLY READY.

The new factory of Lowe Bros., Ltd., on Sorauren Avenue, Toronto, is now almost ready for occupancy. All the new machinery and equipment has been installed and the work of moving over from the old factory has commenced. It is expected that manufacturing will start in the new plant in a week or ten days.

The temporary offices on King street will be maintained until the office quarters at the factory have been finished.

THREE GOOD MATCHES AT OPENING OF LEAGUE.

Montreal, January 10.—One tie game, and two other exciting contests, marked the opening of the Wholesale Hardware Hockey League at the Victoria Rink last night. The good crowd which was on hand witnessed a fine evening's sport.

There seemed nothing to choose between the teams representing Frothingham & Workman, and that which carried the colors of the Canadian Fairbanks-Morse, and at the end of play the score stood one all.

The Thos. Robertson team proved a little too strong for the seven men representing James Walker & Co. The game was fast, but the Robertson men got a four goal lead in the first half and were never headed.

The Lariviere Incorporee men, newcomers in the league, showed that they have the required skill. They were beaten by the Starke-Seybold team, it is true, but that means no disgrace. The Starke-Seybold team played great hockey. The final score in this match was 5 to 1.

UNIQUE CASH PAD.

The Canada Glue Co., Brantford, Ont., have issued an attractive and serviceable cash pad to customers and friends. The pad contains imprints of the company trade mark and reproductions of their one pound packages, in the form familiarized through advertisements in Hardware and Metal.

Wise Dealers Handle the ML Line Because They are Honest Goods That Build Trade.

ML Paints—make good because they are made good—there's 19 years of practical experience mixed into them. **ML Paints** defy weather and last, and last, and last!

ML Floorglaze—a brilliant, quick drying, flint hard finish that withstands scruffing and scratches. Washable like glass. In solid and transparent colors.

Elastilite Varnish—the one varnish you can guarantee just as though you were its maker. Good for use indoors or out. Elastilite will get and hold the best varnish trade for you.

A New Year's Resolution

For the year 1912 we have made the same resolution that we made in 1911, namely, that the high quality of our goods will be maintained down to the minutest detail. We lived up to our resolution last year and we are going to do the same this year. To sell these goods we need your co-operation. We have a good proposition, one that is worthy of your consideration. Let us tell you about it.

THE VARNISH THAT LASTS LONGEST.

The Dougall Varnish Co., Limited

J. S. N. Dougall, President

305 Manufacturers Street, - - - Montreal, Canada

PAINT AND OIL MARKETS

SPRING BOOKING DONE.

The feature in paints and oils has been the amount of spring booking done. Business otherwise is dull.

Turpentine is reported down two cents in Montreal. Otherwise no price changes have been made.

MONTREAL.

Montreal, January 18.—Quietness has marked the paint market during the past few days. There has been no great activity. Neither has there been a rapid fluctuation in prices. The only change noted was in turpentine, and it was not of such a character as to arouse great interest.

The truth is that this has been a quiet week as far as paint is concerned. The heavy snow falls in this section have made traveling uncertain, and some of the travelers did not go out at all. Others could not get about with any rapidity, so the orders coming from this source fell off materially.

Large Spring Orders.

Some large orders for spring delivery have been coming in. Indeed this is where the interest centres at present. The selling being done at the present time is not great; but the thoughtful dealer, by ordering early, is securing his spring supply in good time, and is enabling the manufacturer to prepare so that supplimentary orders will receive prompt attention.

White Lead.—No material change has occurred as far as pig lead is concerned, so the price asked for white lead remains steady. There seems little likelihood of a change in this line.

The demand for white lead continues good. It has been a remarkably good seller throughout the fall and winter. Everything seems to point to a busy year's business.

Linseed Holds High.

Linseed Oil.—Here there has been some fluctuation, but little actual change. Still reports are being received about the Plata crop, and it appears that this is not to be as large as was at first hoped. In a way the scarcity will not affect Canada, for the western seed is sufficient to supply the local crushers. But if the scarcity in England forces the price up there some exporting from Canada may result which would naturally cause a higher level here. There is not the close relation between English and Canadian prices that there was, still a certain sympathy exists. Present quotations are raw, 95c., boiled in oil, 98c.

Turpentine.—A drop here from 72 to 70 cents seems without much cause. More firms are offering turpentine now than formerly. Perhaps this is producing the effect. It is not so much that the supply seems greater, as that there is a greater competition.

Future in Doubt.

The future of turpentine seems uncertain. It would appear that the prices will drop somewhat lower, but this is a hard product to understand.

Putty.—Some demand was stirred up last week by reason of the cold weather. Any chinks which there were in doors or window casements had to be closed up to keep the cold air out. In the case of cracks, putty could be used, and so the demand for it became somewhat brisker.

Glass.—The heavy ordering is over until spring. But still glass is being sold. There are continually repairs to be made. Great energy, however, is now being expended on business for the coming spring. Travelers are booking orders, and the size of these, even at this early date, indicates the general feeling that building will be carried on extensively during the coming spring, summer and fall months.

Some Big Orders.

Mixed Paints.—Orders here are coming in for spring delivery. Some concerns report fine business—orders of car load lots and quantities nearly as large. As far as present retail sales go business is quiet. Varnishes and Japans are selling pretty well, so is white lead, but paints are inactive.

TORONTO.

Toronto, Jan. 19.—Business is looking up in all lines. Booking for spring delivery is becoming more or less general and there is also a surprisingly good demand for immediate shipment. On the whole, jobbers and manufacturers are well satisfied with the trend of trade.

No price changes are quoted this week but developments in some lines are expected very shortly.

Oil Selling Well.

Although the demand for linseed oil has been small from the painters, owing to the extremely cold weather, the demand has been quite equal to the supply, due to the fact that the manufacturers have been making contracts and using considerable oil. Prices locally are firm with no change. Prices in Great Britain have declined slightly.

Turpentine is Steady.

In regard to turpentine, prices have remained steady, the advance that was expected not having taken place. This is partly accounted for by the suit instituted by the American government. Weather conditions in the southern states are such that the business of producing turpentine and rosin has been practically at a standstill since December 20. There has been an extraordinary amount of rainfall and it has been next to impossible to do any work in the low-lying lands of Georgia and Florida. If this state of affairs continues the prices of both turpentine and rosin will likely be advanced. It is claimed that the export of turpentine for the year 1911 from Savannah and Jacksonville has been about 20 per cent. more than it was in either of the years 1909 or 1910.

The demand for turpentine locally has been heavy during the past week.

Extraordinary Rosin Price.

Rosin.—A week ago the speculators in Savannah and Jacksonville ran the price up to an extraordinary figure. The same conditions that have affected turpentine the past week have affected rosin and a slight decline has taken place of about 10 to 15 cents per barrel on common rosins. The finer grades, however, do not seem to have been affected in this way.

Smaller Demand.

The demand is smaller. Dealers are showing some hesitation about ordering for spring trade and it is believed that they are holding off in the expectation of lower prices prevailing. The tendency toward easier quotations in pig lead has helped to create this impression.

Glass.—The amount of business being done is now small. Some orders have been placed but they have been largely of the sorting order. Talk of higher prices is still heard.

Putty.—The situation here shows no change, business being light. Standard putty is quoted as follows: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

Spring Booking in Paint.

Quite a little spring booking is being done but there is also quite a little interest being shown for immediate delivery.

Mr. Coleman, of Elma, a former hardwareman of Listowel, is in poor health. He is visiting at the home of his son, W. H. Coleman, Listowel.

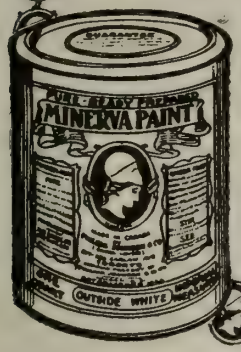
Co-operation Our Watchword

Having perfected our product and methods of distribution we have devised the most extensive and effective selling helps ever introduced, which make the

MINERVA PAINT PROPOSITION

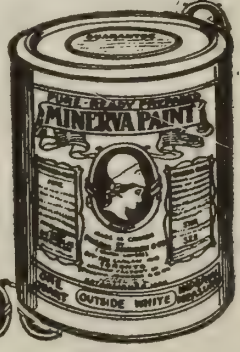
a live wire for progressive dealers.

"Minerva" Paints and Paint Specialties are backed by 78 years' reputation for quality, and each can is guaranteed and contains Full Imperial Measure. **Compare size of our cans and contents with others. They speak for themselves.**



Attractive folders, counter display cards, forceful consumer advertising, window trims, metal signs and other selling helps are provided the dealer free of all charge.

We will be at the Hardware Convention.



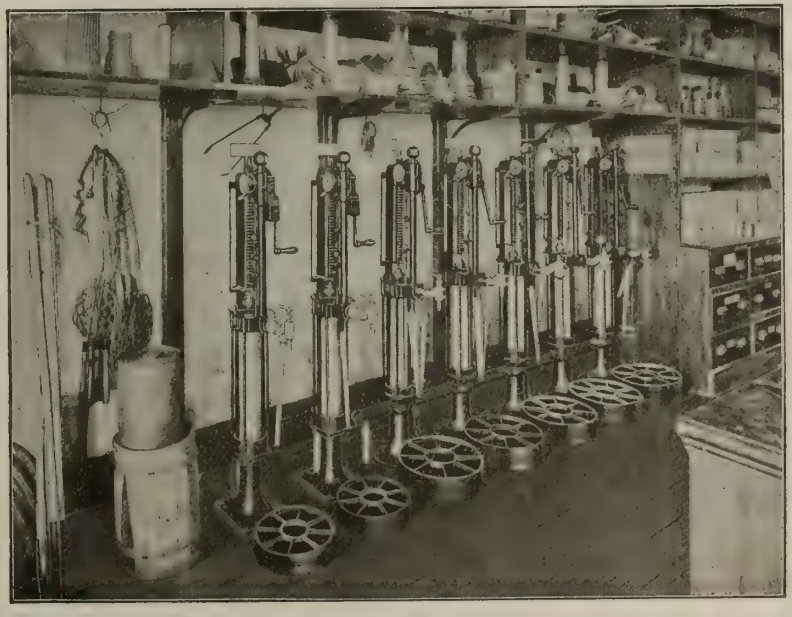
PINCHIN-JOHNSON CO. (Canada), Limited

377-387 Carlaw Avenue, - - TORONTO

Established in England in 1834

This Illustration was made from a photograph of a Bowser installation for

Mr. Samuel Hobbs,
1434 Queen St. W.,
Toronto, Ont.



This system handles

Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

Amatite ROOFING

AMATITE has a real mineral surface and therefore needs no painting.

There have been other ready roofings in the past which had a mineral surface, but they were not practical.

Amatite, however, is successful because the mineral matter is embedded in *pitch*. Pitch is very tough and has great adhesive power. Year after year these roofs will give faultless service without anybody giving a thought to them. This is the kind of roofing to have! The day of these smooth coated roofings that require a heavy coat of paint every year or two is past. They cost too much to maintain. More money can be spent on the paint alone during ten years than a new Amatite roof would cost.

A free sample of Amatite Roofing and further information can be obtained by addressing the nearest office.

Everjet Elastic Paint. A very low-priced black paint—very tough and durable. Stands heat so well that it can be used on boilers. For wood or metal, ready roofings, fences, iron work, farm implements, tanks, etc.

THE PATERSON MANUFACTURING CO., Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

We have the facilities for turning out

The Highest Grade Baling Wire and Bale-Ties

at a reasonable cost---a baling wire that allows the dealer good profits and is certain to create enthusiasm among users.

Paint Success

Always with a Ramsay Paint agency goes success. It is very simple. Ramsay's Agents carry nicely labelled goods. Ramsay's advertising prompts a quick sale. The color cards and schemes help a customer to decide. Then there is no haggling over the price. Ramsay's Paints are reasonable for pure paints, as everybody knows. The quality always satisfies, and there is a reputation and a guarantee behind them. A Ramsay Paint agency carries besides mixed Paints, those well-known lines, Ramsay's Varnish Stains, Ramsay's Enamels, Ramsay's Leads, Ramsay's Carriage Paints, Ramsay's Oil Colors, every one of them money makers and quiet satisfaction. Ramsay's Catalogue is brim full of interesting sellers. Are you interested?

LINSEED OIL MILL, WINNIPEG

Are You Making Money With Paint?

Don't be satisfied with small sales and close profits on paints and varnishes. Hundreds of successful merchants in large and small towns all over the Dominion are making good profits and increasing their sales year after year with the Canada Paint Co.'s Paints, Varnishes, Stains and Enamels. C.P. products have been on the market nearly half a century. Their quality is uniformly good and they are well and favorably known wherever paint is used. We control the production of raw materials like linseed oil, coloring pigments, etc., insuring the quality and lowering manufacturing costs at the same time. Modern facilities and an enormous output enable us to make prices that sell the goods and pay you a good profit.

THE CANADA PAINT COMPANY

LIMITED

MONTREAL TORONTO WINNIPEG

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL

It is the central market place of the hardware trade throughout Canada.

There is always someone somewhere looking for just such proposition as you have to offer.

RATES (payable in advance) :—
2c. per word first insertion.
1c. per word subsequent insertion.
5c. additional each insertion when Box Number is required.

ARTICLES FOR SALE

EIGHT-FOOT CORNICE BRAKE FOR SALE in good working order. Low price for quick move. Photo sent if interested. DUNCAN MUNN, Ripley. (6)

BUSINESS CHANCES

FIRST-CLASS hardware, stove, tin, granite and general jobbing business. Established 30 years; doing splendid business; stock reduced to $5,000; $2,500 will handle; yearly turnover $20,000. Fine store, the best stand in the place, fine farming country. This business will stand the closest inspection. At rate in the dollar. Wish to retire. D. FERGUSON, Teeswater, Ont. (2tf)

FOR SALE—Hardware, stove and tinware business. Established twenty-two years; doing a cash business last year of forty-five thousand; stock will run about eight to ten thousand. This is a money maker to a good live man. Good reasons for selling; splendid farming community. If interested would like to show you this business. Splendid store, can be rented or bought. O. B. HENRY & CO., Drayton, Ont. [1tf]

THRIVING HARDWARE BUSINESS FOR SALE consisting of shelf and heavy hardware, stoves, etc. Located in central part of Ontario; three railroads; turnover $50,000; stock $10,000, which is being reduced. Excellent chance to buy at rate on dollar. Retiring from business. Box 618, HARDWARE AND METAL, Toronto. (52tf)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited. Room 314, Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY if you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employees' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalog. International Time Recording Company of Canada, Ltd. Office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING Typewritten Letters and Real Printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Company, Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS.—Write us to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER Check Books—Especially made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for Binders and Monthly Account Systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

COPELAND-CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—By installing an Otis-Fensom handpower elevator you can use upper floor as stock room or extra selling space and increase space on ground floor. Costs only $70. Write catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS are devised to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

WANTED

SIDE LINES WANTED—Traveller calling on hardware trade in Ontario wants two or three good side lines. State commission and full particulars. Apply to Box 621, HARDWARE AND METAL, Toronto. (4)

SITUATIONS VACANT

EXPERIENCED specialty salesman wanted; advertising experience desirable. This is a good position and offers splendid opportunity for advancement. State fully age, experience and salary expected. MACLEAN PUBLISHING CO., LTD., 143 University Avenue, Toronto. (tf)

TRAVELLER WANTED — Must be experienced. Write fully, stating experience and territory covered. Good territory open with an excellent opportunity for right man. MILLER-MORSE HARDWARE CO., Winnipeg, Man. (5)

WANTED — A reliable, ambitious man in every town to look after the entire circulation of our thirteen publications. Work very remunerative. MACLEAN PUBLISHING COMPANY, 143-149 University Avenue, Toronto, Ont. (tf)

WANTED, Travelling Salesman having first-class connections with hardware and stove trade in Ontario. Must have successful previous experience. Apply Box 623, Hardware & Metal, Toronto. (3)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTFORD. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THE YEAR we offer unusually good bargains in second-hand Typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. THE MONARCH TYPEWRITER CO., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN PENS. If you have Fountain Pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. GAGE & CO., Limited, Toronto, sole agents for Canada.

PENS—The very best pens made are those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find the pen to suit you.

THE National Cash Register Company guarantee to sell a better Register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto (tf)

WAREHOUSE AND FACTORY HEATING SYSTEMS. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

SITUATIONS WANTED

HARDWARE MAN, young, energetic, with thorough knowledge of the trade, will accept position February 1st. Best references from present employer and others. Apply Box 622, HARDWARE AND METAL, Toronto.

SCOTSMAN, aged 26, who is junior partner in large London hardware store, is desirous of obtaining post with sound Canadian house, wholesale or retail, with a view to partnership or opening branch business. RANKIN, 200 High Road, Wood Green, London, England. (4)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS AND PAPER HANGERS—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paper hanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

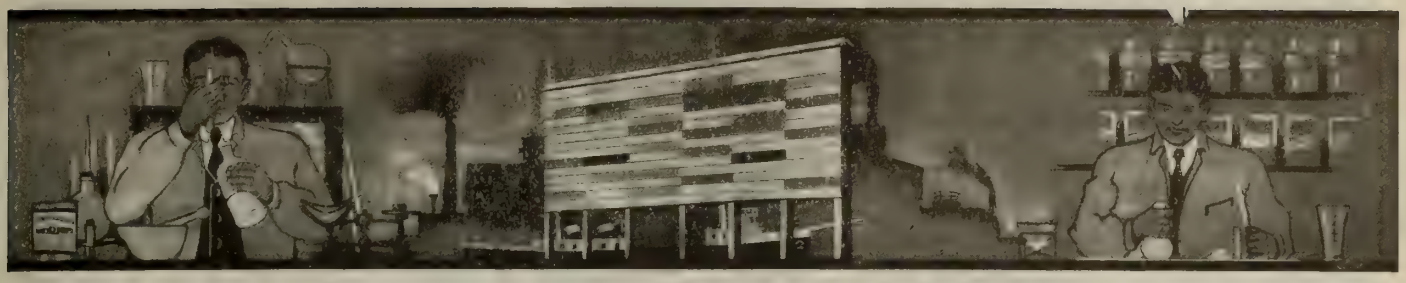
When writing advertisers kindly mention having seen the advertisement in Hardware and Metal.



Why do the Martin-Senour Paints bring customers back?

See what we are doing to keep up their quality, then answer that question for yourself.

Our chemists test all Linseed Oil and Dryers before they go into our storage tanks. If they do not test perfectly pure they are rejected. This protection for the dealer takes a slice from our net profits, but we have found it pays in the long run to co-operate with him by looking out for his interest.

The finished product is thoroughly tested to withstand the bite of inclement weather — to defy the destroying elements of sun, rain, and the gnawing tooth of time.

Martin-Senour Paints are not merely a mixed compository, but they are paints that are built upon a scientific basis — to render a given amount of service.

Permanent Color is just as important to the dealer as the durability. Even though the paint may protect the surface, if the color fades the property owner thinks the paint has lost its protecting qualities. Every shipment of dry colors is carefully tested — if it comes up to the standard it is passed on to the mills, otherwise it is rejected.

We believe you can now guess the answer very easily.
Don't you think this protection is a feature that deserves your worthy consideration, and is a very good asset to your paint business?
We also have an advertising campaign that sends you *new customers*.
Let's hitch together, we'll make a good team.

Mention this paper when writing Advertisers.

Are You Selling Paint, or Paint Value?

The dealer who sells "paint value" is thinking of his customer's profit as well as his own. He is paint wise, and believes in making continuous profit rather than the larger one-time profit. He is a "business builder."

The far-sighted dealer (the man we want to interest) looks into the future. He realizes that the great revenue of economy for his customers means a greater revenue in trade for him.

The quality of "High Standard" Paint puts a powerful selling weapon in the hands of the dealer. There are features embodied in this paint too pronounced in value for any dealer to overlook.

Once you sell a man "High Standard" Paint, he will always be a "High Standard" customer, and usually he is the kind of a man who wants and buys the best of everything you sell—a good man to have for a customer.

The "High Standard" kind of dealers would do well to write us.

The gratifying part about handling "AMPHIBIA"

(WATERPROOF)

Leather Belting

is the satisfaction of your belting customers.

"AMPHIBIA"

is especially made to run in damp or wet places, such as laundries, breweries, bleacheries, etc. It will never come apart or lose its efficiency under action of moisture.

You should carry a stock of the smaller standard sizes and be prepared to fill "hurry up" orders promptly.

See to the ordering of that stock NOW and be prepared for the Spring trade—the biggest time in the belting trade.

Get the Local agency for "Safelock" Wire Fence

You will find "Safelock" the best selling line of fence you ever handled, because you can prove by actual demonstration that it really is the strongest fence made.

Look at this little cut—note how the stay wires interlock where they wrap the strand wire. You simply cannot make a "Safelock" stay slip in any direction. And, as the strand wires are not kinked, at the lock, every wire retains its full strength.

Better write us to-day about getting an exclusive "Safelock" agency for your locality

LOWE BROTHERS PAINT GIVES BEST RESULTS

HIGH STANDARD

THE PAINT OF PERFORMANCE

Value in paint means a great deal more than purity, quality, materials and price.

As paint is made to use, it's results that count—what it will do—*performance.*

Compare "High Standard" Paint with any other paint, and you'll understand how the hiding power, uniformity of covering, and spreading qualities, add to value—because they add economy and satisfaction to the consumer.

The best evidence of "High Standard" merit is the number and character of the Hardware Dealers who have recently taken up the "High Standard" Agency.

These men compared the relative value of different paints. They know that "High Standard" Paint meets every requirement of most people's definition of the word *best*—best in performance rather than in assertion.

They entertain no doubts—no uncertainties. These far-sighted dealers know that the quality of "High Standard" Paint is a powerful selling weapon.

They realize that in addition to quality, the advantages and strength of the unique "selling helps" back of "High Standard" Paint, will do much toward the *upbuilding* of their business.

Other far-sighted dealers in territory not already taken up should investigate this "High Standard" Proposition—this paint of performance

Send us a postal, and learn about the "High Standard" way of business building.

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any one of them will tell you Big Ben is the best selling alarm that's ever been put out.

In broken and dozen lots, $2.20 less 5%. In lots of 24, $2.10 less 5%.

The Western Clock Co., La Salle, Ill.

THIS is the Carborundum Four-Drawer Display Case. There should be one on your counters. It is one of those displays that attracts attention, stimulates sales, and shows your patrons that you are a Carborundum dealer — that you sell the quickest-cutting, most uniform, and durable stones made or mined.

The case has four spacious drawers—just right for keeping a good stock of stones. It is richly finished and well made. The four-drawer display case is one of a line of splendid displays offered free to the dealer with a stock of Carborundum Stones. The triangular quartered oak, glass paneled case is another.

Suppose you write for the complete details regarding these and other Carborundum trade helps.

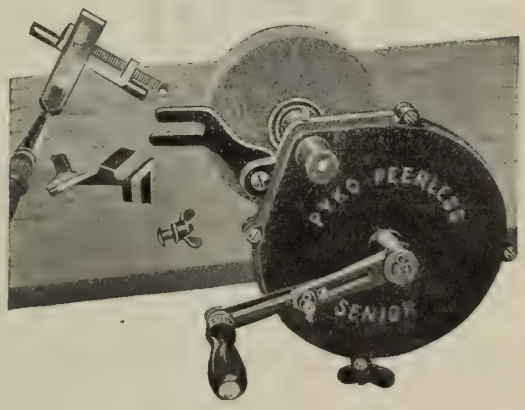
PIKE GRINDERS

For Tool Sharpening

PIKE PEERLESS SENIOR

THE Peerless line of hand tool grinders stands absolutely without an equal on the market to-day. There are no other competing machines which combine in one article so many attractive and useful features. The patented tool rest and chisel guide enables even the veriest amateur to sharpen chisels, plane irons, shears, twist drills, etc., with but little practice. Gears are cut from steel blanks, pinions are case hardened and the casings are machine turned.

It is equipped with a 6 x 1¼" Pure Corundum Wheel, manufactured especially for all-round grinding.



PIKE PEERLESS JUNIOR

THE Junior Model is exactly the same pattern as the Senior except it is smaller in size. All the attractive features of the larger grinder are retained in the Junior. It is equipped with a 5 x 1" Pure Corundum Wheel.

PIKE HOUSEHOLD

A WONDERFULLY well built little machine. Extremely useful where there is not a great deal of grinding to be done but where there are some dull edges to be sharpened. It is especially desirable around the house, and the addition of one of our Polishing Outfits makes it an ideal home sharpener. It is equipped with a 4" Pure Corundum Wheel and the range of work that can be performed is truly remarkable.

The Facts About Rope

Why not consider some of the common-sense reasons why PLYMOUTH Manila rope is a good investment for you — a profit-maker in every sense of the word? These facts have started hardwaremen thinking:

PLYMOUTH ROPE
"The Rope You Can Trust"

1st. *Gives more pounds of satisfaction to an ounce of weight than any other rope made.* Isn't it reasonable to expect that when a rope gives good value for the money, the buyer will come back for more?

2nd. *Outlasts all other ropes.* When the marked durability of rope will convince buyers that they want no other, isn't their steady trade fairly well assured?

3rd. *Is the best possible advertisement.* When you get the reputation of handling a *very fine rope*, isn't it natural that you get customers that would otherwise go elsewhere?

Is it good business to offer your customers cheap rope when you know that PLYMOUTH Manila gives them more for their money and at the same time helps to "boost" your trade? Why not ask your jobber to send you PLYMOUTH next time?

Keen Buyers

of Horse Clipping Machines

BUY THE BEST MACHINES. IT'S MERELY A MATTER OF BUSINESS—NOT SENTIMENT

It really makes no difference to the hardware dealer where the machine was made. He is in business to sell ***good*** goods—goods that satisfy customers and bring more business. The merit of a machine lies in what it will do—how long it will last—and how much it costs.

ON THE STRENGTH OF ITS MERITS

Stewart Horse Clipping Machines

are being used by horse-owners and sold by dealers in every civilized country on the globe.

One concern pilfered the idea on our Stewart No. 1. Of course, it was rather a clumsy adaption, but it was visible acknowledgment of Stewart superiority. The "counterfeit" machine resembles the Stewart in appearance—but the similarity ends right there. They couldn't steal the manufacturing process, because it may be imitated, but it is ***not*** equaled. Again, the Stewart has gears made of cut steel made file hard—not mere cast steel.

We fit the Stewart No. 1 with plenty of high grade flexible shaft and equip it with the famous Stewart tension one-nut clipping knife. We guarantee it to please the user better than any other machine made, or it can be returned to us at our expense and money will be refunded.

Send for details of our plan which helps dealers sell more horse clipping machines and which includes individual advertising.

You're Mistaken —That Was A Two-Dollar Bill I Gave You!

When these angry words from a customer ring in your ears, how do you feel? What do you do?

You search your cash drawer for the bill he gave you. An argument follows. There is an angry discussion. But no matter how much you apologize, or what you do to show your regret, you have offended—maybe lost—a customer.

A National Cash Register Positively Prevents All Errors in Making Change.

It protects both you and the customer against such disputes. Provides you with a system that makes it a pleasure for your customers to deal with you. Insures absolute accuracy in every transaction. Cares for your money in a way that no other system does.

You can cut out forever the worrying hours you spend at your store after closing time, looking for the elusive "cash balance." With a National Cash Register, there is always a cash balance—you can tell at a glance the exact amount in your cash drawer. The machine balances your cash for you as each sale is made.

The day you install a National Cash Register you'll notice an increase in your cash receipts. Some retailers tell us that it brings them as much as four dollars a day more. Here is the reason: In every store not protected by a National Cash Register, there are money losses that you can't see. A dime here, and a quarter there—mistakes that can easily occur in the rush of waiting on customers.

A National Cash Register Will Keep Your Books, Check Your Stock, Stop All Disputes, Mistakes, Losses, Protect Your Money, Etc.

as thoroughly as if it were in a safe-deposit vault, and enable you to do without a cashier and serve customers quicker.

More than 1,000,000 merchants the world over use National Cash Registers. They tell us they would not—could not—do without them. For they protect the thing they are in business for—money.

You Can Pay for a National Cash Register Out of the Money It Saves You—In Less Than a Year.

Write for Booklet and Full Information to

THE HALTER

We are going to use this whole page to tell you about this one Halter, and we believe that it is worth it. It is a $1\frac{1}{4}$ inch Halter, all Double and Stitched, and weighs about 23 pounds per dozen without shanks. It embodies, we believe, the most real Halter value ever offered for the money.

Connected with this Halter there is a little factory History. A Western dealer wrote us giving us a description of such a Halter and asking for a quotation. We made a run of one dozen through the factory and quoted them but could not believe our own figures. We then ran a quarter gross through the factory to verify the figures and proved that they could be made for the price. Our travellers are now showing the line, but if you are interested don't wait for them; let us send you a sample order at once. We would remind Ontario dealers that this is just the kind of Halter which will be in steady demand for the next three months for shipping horses to the West.

THE PRICE

PER DOZEN

$9.50

OR

WITH LEATHER SHANK

$12.00

On account of the extra freight Western Jobbers will be forced to charge a little more.

WE ARE STILL OPEN FOR A FEW MORE DISTRIBUTORS IN TERRITORY NOT YET REPRESENTED.

What You Can Tell Your Customer

YOU CAN TRUTHFULLY STATE

that "1847 Rogers Bros." has been the standard silver plate for over sixty years. That it is the HIGHEST GRADE of silver plate made.

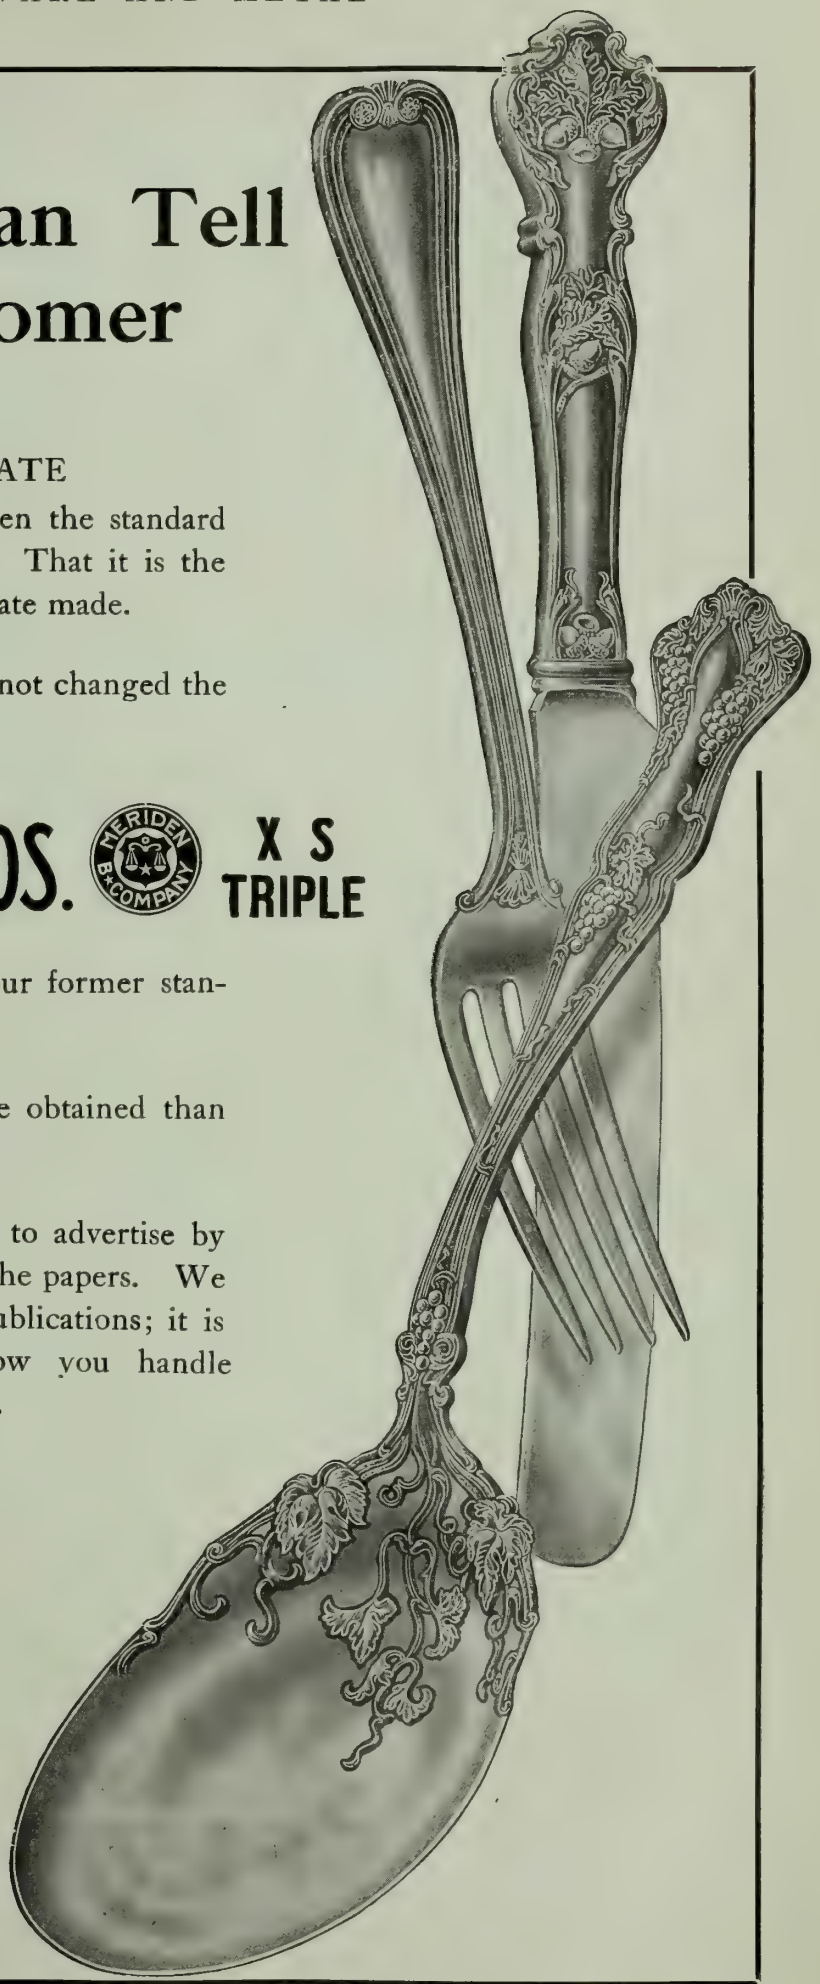
That the change in quality has not changed the price and that the list on

1847 ROGERS BROS. MERIDEN B. COMPANY **X S TRIPLE**

is exactly the same as it was on our former standard or A-1 grade.

That no higher quality can be obtained than our "Silver Plate that Wears."

No better time than the present to advertise by means of window displays and in the papers. We advertise the goods in general publications; it is for you to let the public know you handle "1847 ROGERS BROS." Ware.



Meriden Britannia Co.

Hamilton - - - Canada

It Is Very Generally Admitted

that

1847 ROGERS BROS. Ware

in

Spoons, Forks, Cutlery and Fancy Serving Pieces is the standard with which all other makes are compared, and it is the heaviest triple-plated table silverware obtainable.

THE 1847 GIRL

The dealer handling 1847 ROGERS BROS. Ware should TALK QUALITY.

We stand back of every piece and ask that the dealer co-operate by giving careful consideration to any claim that may be made by a dissatisfied customer.

Remember there are other ROGERS and other makes of silverware, but there is only one 1847 ROGERS BROS.—the genuine.

Sold by Leading Dealers everywhere.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. Today these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

"COLUMBIA"

The Choice of the Battery Users Who Know

Columbia Batteries are the choice because they have a high quality that ensures an exceedingly long life and highly efficient service.

Put to comparison with other makes they always win out.

Do not sell your customers an inferior kind when the best is procurable at a very reasonable price.

The Columbia is a high-grade intermittent cell. It is made particularly for all forms of open circuit or light drain work like that of telephones, alarms, electrical toys, wireless telegraph, etc.

Columbia Ignitor is an ignition battery. For strong sparking current, long life and quick recuperation it has a world's record. Its special field is ignition on automobiles, motor boats, gas or gasoline engines, etc.

Merrick-Anderson Co., Winnipeg, Agents for Manitoba, Saskatchewan and Alberta
Geo. D. Horsman, 838 Granville St., Vancouver, Agent for British Columbia.

CAN WE HELP YOU

There are some hardware dealers living in this 20th Century who are still using 19th Century methods. They do not realize that Halifax is closer to Vancouver to-day than Montreal was to Toronto fifty years ago.

Twenty-five years ago it was a calamity for a merchant to lose a good clerk, for he knew it was practically impossible for him to get in touch with an experienced man. Such an idea as making a deal with a fellow hardware man a couple of hundred miles away either to buy a set of tinners' tools or to sell a second-hand counter or show case, did not seem practicable to even the most progressive hardware men. If a man wanted to sell his business he had to accept the highest price he could get from some one of his fellow townsmen, for no one else knew of the opportunity or had any means of finding out about it.

To-day the up-to-date dealer

CREATES HIS OPPORTUNITIES

He states his wants briefly in a "Hardware and Metal want ad." and in four days' time practically every hardware merchant, clerk, hardware manafacturer and traveler has read the proposition, and it seems reasonable that somewhere among the "blue noses" of the Maritimes or the pioneers of the boundless West someone will want just what he has to offer.

EVERY HARDWARE MERCHANT IN CANADA

can take advantage of our "want ad." page. Ask yourself:

Is there not some article I would be better without if I could get a fair price for it? If you cannot get a fair price for it by appealing to the trade throughout Canada you had better sell it for scrap

We can help you, but you must take the first step.

Surely it is worth 25c or 50c to find the one man in Canada whose wants dovetail into just what you have to offer.

RATES: *(payable in advance)* **2c per word first insertion. 1c per word subsequent insertions. Box Number, 5c additional each insertion.**

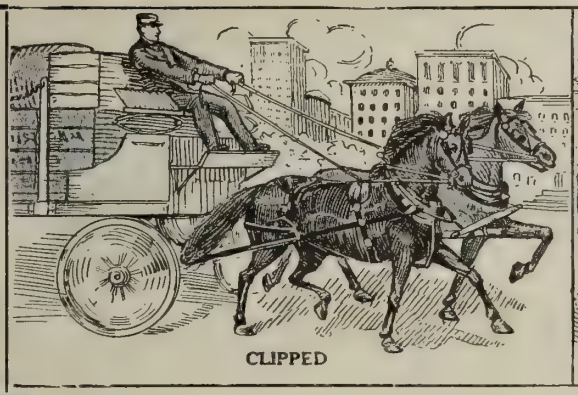
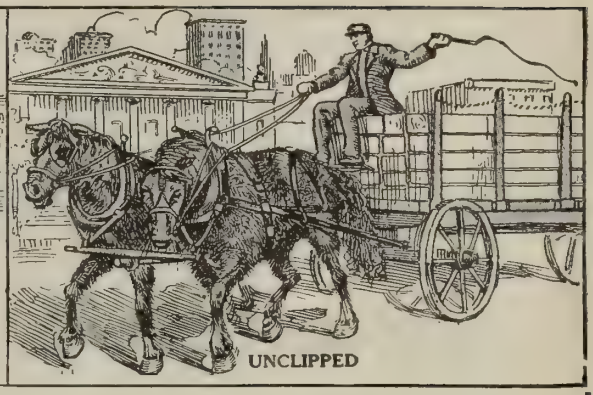
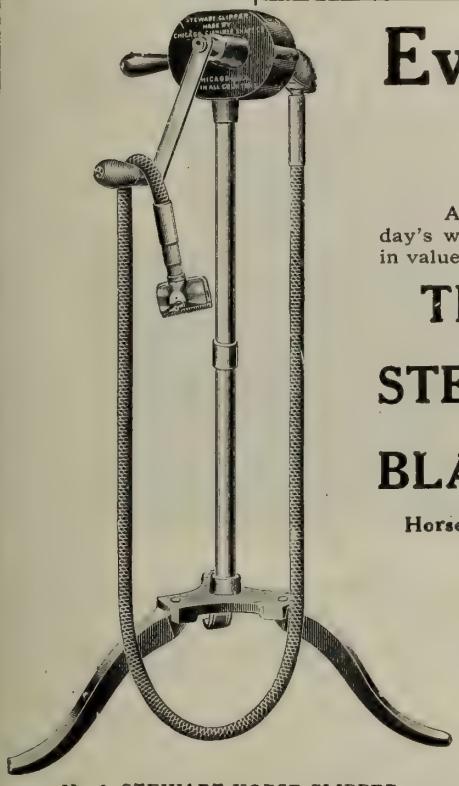
A Comparison which is a Convincing Argument in favor of Clipping



CLIPPED



UNCLIPPED



No. 1 STEWART HORSE CLIPPER

Every Horse Worth Keeping Is Worth Clipping

A clipped horse looks better, feels better and works better. He dries out quickly after the day's work, rests well and his food does him good. He is more easily kept clean and increases in value.

That is why You can sell, this Spring, our

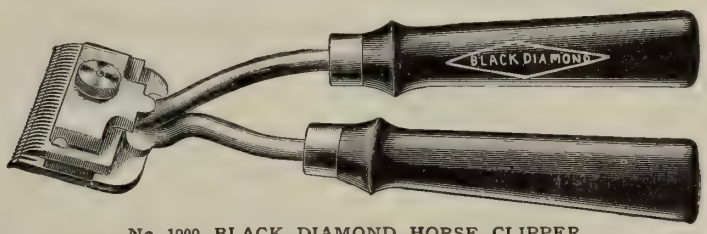
STEWART HORSE CLIPPING MACHINES

and

BLACK DIAMOND HAND CLIPPERS

Horse Clippers are used extensively by Dairymen for clipping the flanks and udders of cows

One dairy near Chicago has 100 Stewart Horse Clippers for use on its cows.



No. 1909, BLACK DIAMOND HORSE CLIPPER
Ball Bearing: Nickel Plated; Ebonized Handles.

The Flexible Shaft of No. 1 Clipper can be used on the No. 8 Shearing Machine, and the jointed shaft of the No. 8 Shearing Machine can be used on the No. 1 Machine; Therefore by possessing either machine, it can be adapted to Clipping or to Shearing by buying the other Shaft required.

With a Good Sheep Shearing Machine 20 cents' worth more wool can be gotten from every sheep and it is cut evenly from over the body.

No second cuts are put into your clipping as is the case with hand clippers.

It Pays to Shear Sheep with a Machine

From now to May is the best selling season on the above lines

We are the largest Jobbers of Clippers in Canada

Does it Pay to Rent Vacuum Cleaners?

A Topic of Particular Interest to Trade Discussed From all Standpoints—The Conclusion is Voiced That Renting Should be Done Only With a View to Creating Sales—Some Advantages and Disadvantages.

Is the renting of vacuum cleaners advisable? Is it in the best interests of trade?

These questions are being debated at the present time by both manufacturer and retailer. The complaint has been voiced that the renting of vacuum cleaners has, in some cases at least, restricted sales. As the matter is one of vital importance to the trade, an effort has been made by Hardware and Metal to gather facts and opinions from every standpoint.

It is generally conceded that the practice of renting out machines has very serious drawbacks. It tends to keep people from buying machines of their own. "How many people," asks one manufacturer, "are likely to pay from $25 to $150 for a cleaner when they can rent one for 50 cents or $1 a day? Undoubtedly a great many people would be inclined to look at it that way. Instead of purchasing a machine, they would invest a dollar or two occasionally to rent one.

This plan, if followed by a majority of people, would mean a loss all around. The manufacturer would lose because there would not be as large a demand for his goods; the retailer would lose the comfortable margin of profit which accompanies the sale of a machine and would have for consolation the smaller sums made by renting; the householder would miss the opportunity of keeping the house clean every day of the year and would have to be content with an occasional "clean up."

Some dealers complain that renting machines leads to a heavy demand around housecleaning time and slackness at all other seasons—a disadvantage certainly.

A Wrong Impression.

The greatest fault to be found with the renting system, however, is that it has helped to create a false impression. People are thereby encouraged to use the vacuum cleaner on rare occasions only, for instance during spring and fall housecleaning. In reality the vacuum cleaner should be used in every home regularly. Semi-annual use does not insure cleanliness the whole year around. The efforts of the hardware dealers should be devoted to bringing people to a realization of this fact. But renting has a directly opposite effect. People will not rent machines once a week. It is only by working for sales that the dealer can hammer home the fact that the cleaner is intended for daily use in the home. It follows that the plan of working for sales opens up a wider future for the vacuum cleaner and, consequently, for the retailer who markets it.

DOES RENTING PAY?

The renting of vacuum cleaners has become rather general and, in view of the fact that the advisability of the step is doubted by many, it has developed into a problem of vital interest to the trade. Manufacturers of vacuum cleaning machines without exception question the wisdom of adopting the renting system as a permanent policy. It is contended that it would hamper sales and turn probable purchasers into renters of machines instead. It is conceded, however, that renting may be made a valuable publicity measure—if limited to that. The accompanying article should be carefully perused.—Editor.

The Other Side.

There is, however, another side to the question. The vacuum cleaner is a comparatively new article. Its virtues are not known to all. Many a housewife plies her broom industriously every day in ignorance of the fact that science has provided an easier and more thorough method. To others, the cleaner is a new thing; and they will have to be convinced of its worthiness before they will try it.

Renting serves the purpose of making known the good points of the machine. People rent first, become convinced and then buy. As one manufacturer puts it: "Many will use them in this way and gradually get into the habit of using them and become educated to the advantage and improvement of this method of cleaning. Many will ultimately buy a machine."

There is another advantage from the standpoint of the retailer. Many people will rent who would never lay out a large enough sum to purchase a machine; the retailer gains in such cases. It is doubtful, however, if what he makes in this way counterbalances what he loses on customers who would buy if it were not possible to rent.

Sales the Main Object.

Summing up the situation, one comes to the conclusion that the renting of machines can be carried on profitably if handled judiciously but that it should be done only as a means to effecting sales. Many dealers make no effort whatever to create sales. They keep a couple of cleaners in stock for renting only. This policy cannot be too strongly condemned. It precludes all possibility of sales and restricts the profits of the retailer to the narrow limits of the rental price. The dealer who pursues this plan can have no thought for the future.

All hardwaremen concede that the greatest profits are made by selling machines but they find that sales are hard to make. Undoubtedly, it takes a good salesman and one thoroughly acquainted with the article, to sell a machine which costs as much as a vacuum cleaner. The difficulty will be lessened as time goes on and the vacuum cleaner becomes more generally recognized as a necessity in the home. The time is not far off when the cleaner will be regarded as quite essentially a part of household equipment as a heating system. The dealer should do his best to bring this nearer by educating his customers to the fact that a cleaner is needed for daily use. Renting of machines should be undertaken then, only with a view to making converts to its great practical value and thereby creating a demand.

If carried on from this standpoint, the renting of machines can be made a strong factor in promoting sales.

A Good Plan.

One hardwareman has evolved a plan worthy of emulation. He rents out machines to people once but strives not to repeat. When they come back—and they all do—he takes it as the surest kind of proof that they have found the cleaner a good thing and that they need it. They have become, therefore, good prospects and he tries his best to sell them a machine. If they are not prepared to invest the money then, he allows them to rent one. He never loses sight of them but keeps plying them with arguments to show that they would be wiser to buy. They come to it ultimately; for it soon becomes apparent to them that they need a cleaner in the home all the time.

In conclusion, it might be said that renting, as a means of effecting sales, can be made profitable. But as a permanent policy, it should be discouraged.

Displaying Belting in Window Pays

C. O. Gervais and Frere, St. Johns, Quebec, says That This Lets the Mill Owners, the Wood Cutters, and the Machine Operators See Where They Can Replace a Defective Belt—One Hardwareman has Arranged Rack for His Belting—This Might be Used by Western Dealers who do a Large Business in This Line with the Threshers.

Hardware men are not the only ones who have to prepare for spring. Manufacturers do this too, and because such is the case the hardware man must study the future closely, that he may not miss any business.

Many manufacturers keep their plant running all winter, but the pressure is not then as great as it is during the spring and summer. So, as the cold weather disappears, an effort is made to get the machinery in perfect order, and a good deal of belting is then purchased.

The Men to be Reached.

It is not every hardwareman who can successfully handle this line. Belting is like all other goods in that respect. Some manufacturers place their orders direct. They must have belting in large quantities and get big supplies from the makers. But there are smaller manufacturers who buy from the dealers. There are mill operators in New Ontario who buy a hundred feet or more. There are wood dealers, in all parts of the country, who must have the belting to run their machinery. Whenever a break occurs these men must get a new supply, but before spring comes many of them make a special inspection of their plants, and then, if the belting is found defective, a change will be made.

Sight of Belting Suggests Use.

Because of this it is to the hardwareman's interest to let the small manufacturers, the mill owners, and the wood yard operators, know that he carries belts. Perhaps this fact can be advertised. C. O. Gervais and Frere, of St. Johns, Quebec, obtains the desired result by placing various sizes in the window. Mr. Gervais sells a good deal of this, and says it pays to bring it to the front.

Perhaps other handlers might follow this course. They may think all their customers know where to get the belts, but the sight of this in the window will snuggest that a few feet might well be used on a certain bit of machinery.

Expose Belts in the Store.

If the window is not used—and of course it can hardly be devoted to this line for long at a time, the belts should be visible. There is no use hiding them in the store. One man who handles this class of goods in large quantities has installed a rack. This is divided into sections, in each of which belts of a certain size are rolled. When smaller quantities are carried this need not be done, but by using the various sized belts an attractive pyramid may be formed on counter or shelf—a pyramid which draws the attention of those coming to the store, and which takes but little of the precious room.

"I find it a good idea," said one handler, "to keep lacing well to the front, too. It is only to the smaller manufacturers and the machine operators that we can sell belting, but even the large producers sometimes need lacing. Their supply may get low, and they need a fresh stock at once."

Vital Question for Westerners.

Western dealers are especially interested in this question of display for they have a greater demand for belting, perhaps, than have the great majority of dealers in the older provinces. Their great business comes in the early summer, when the threshing gangs are starting out. Many a traction engine needs new equipment, and this is generally secured from the hardware man of the district. The rush of business in the west, as has been said, comes early in summer, but the wisest dealers do not leave their ordering until then. They plan ahead—considering what they sold last year, and whether they will be likely to need much more. Some of these men are sending in their orders already. They are the wise ones. They will not be harassed by a demand which they have no means of filling.

OPEN WESTERN BRANCHES.

Owing to increased business in the West, the Garlock Packing Company, of Hamilton, Ontario, have opened up branches in Winnipeg and Vancouver, where a complete stock of Garlock Packings and Mill Supplies will be carried.

The Winnipeg branch is located at 117 Market street, with W. J. Usher, as Western manager, to the mountains. With Mr. Usher, are associated B. E. Dalzel and E. C. Medland.

The Vancouver branch is under the management of Arthur R. Bell, who will be assisted by George Cook.

Further Advance in Copper and Brass Goods?

During the past few months, there has been a steady advance in the price of ingot copper which has necessitated a corresponding advance in the price of sheet copper and brass used in the manufacture of many housefurnishing articles.

Brass is manufactured from ingot copper and spelter and advances correspondingly with the increase in price of ingot or raw copper. The manufacturers of sheet copper and sheet brass have advanced their price four times in the past sixty days and the increased price over and above the existing price last June, amounts to approximately twenty per cent. and, in consequence, many dealers manufacturing brass and copper goods have notified their customers of a ten per cent. increase of price, as already recorded in Hardware and Metal.

It will be well for dealers who are handling housefurnishing goods manufactured from brass and copper, particularly such articles as chafing dishes, coffee-machines, trays, bathroom furnishings, etc., who are in a position to place orders for future delivery at the prices existing before the first of January, to do so as information has been secured from a number of well-known manufacturers that in the event of a future increase in the price of raw material to them, the prices will have to be re-adjusted all along the line. A word to the wise is sufficient.

BROWN-BOGGS CO. EXTEND.

The Brown-Boggs Company, of Hamilton, Ont., manufacturers of tinsmith and canning machinery, are contemplating an extensive enlargement of their plant, and for that purpose are negotiating for the purchase of six acres of land in the eastern part of the city on the line of the G. T. R. and T. H. & B. railways.

The company is at present located at the corner of King William street and Victoria Avenue, and if present plans go through, will move from that section of the city as soon as the east end plant is erected. The capital of the concern will be increased to $500,000 and it is the intention to install an up-to-date plant and pay more attention to the manufacturing of larger tools, presses, shears, etc.

Parcels Post Problem to the Fore

Notes of the Coming Ontario Convention—Arangements Being Made to Supplement Hotel Accommodation—Members of Parliament Invited to Attend—Toronto May Make Bid for 1913 Convention.

Toronto, Jan. 25.—The arrangements for the annual convention of the Ontario Retail Hardware and Stove Dealers' Association at Guelph from February 19 to 23 are being carried on by the officers. The plans mapped out at the last meeting of the sub-executive are being put into effect.

Activity is being shown in Guelph and steps are already being taken to insure sufficient accommodation. There are a number of good hotels in Guelph, but, if they should prove unequal to the demand accommodation will be offered in private homes. The city of Guelph has become accustomed to handling extremely large crowds every year at Winter Fair time and the plan then followed is for citizens to let rooms to the visitors. Publicity officer McDonald is now getting up a list of fifty or more homes where rooms will be obtainable during exhibition week. This should relieve any congestion.

It is desired to provide adequate accommodation in the way of meals. It goes without saying that the hotel dining rooms will be crowded and the delay thus caused leads to a corresponding delay in getting the meetings started. If it were possible to enlarge the accommodation, so that all could get their meals within the hours of adjournment, greater promptitude could be shown in getting back to the meeting hall.

With this end in view, some arrangement may be made with local caterers to provide meals on the days of the convention.

The Exhibition.

It is not yet possible to give out the ground floor plan of the manufacturers' exhibit. While spaces have been allotted to those who have already made application, the recent withdrawal of some of the firms has necessitated a rearrangement. The spaces are being rapidly filled up, however.

The secretary has been making an effort to secure prizes for the progressive euchre party which has been fixed for Friday night. Already a number of manufacturers have donated valuable prizes.

The programme will be along the same line as last year. The Question Box discussion will come on Wednesday night and one afternoon will be set aside for an open meeting at which manufacturers, jobbers and travelers have an opportunity to join in the discussion.

It has not yet been definitely settled as to what will be done in the matter of window displays. The committee will take up this matter later on.

Parcel Post Question.

One of the most important topics to be discussed will be the problem of Parcels Post. It is felt that there is a grave possibility of some action being sprung by the powers that be in the very near future. That the association will take a firm stand against is practically assured.

Invitations have been extended to the members in both the Dominion and Ontario house, who represent the hardware trade, to attend the convention. As both houses will be sitting, it is doubtful, however, if many of the members will be able to respond to the invitation in person. This is to be regretted as their presence would have assisted very much in bringing the feeling of the association before both legislative bodies when occasion arises.

The 1913 Convention.

Who will get the 1913 convention?

This is now one of the moot questions in association circles. President Chown is out for Belleville and he will undoubtedly get the support of the eastern members. There is some talk of opposition but whether this will materialize remains to be seen.

There was some talk of St. Catharines putting in an invitation but this idea has practically been abandoned. The secretary paid a visit to St. Catharines and found that the situation of the armories presented a difficulty which could not very well be overcome. The building is some distance from the centre of the city and the heating arrangements would not be of the best.

The latest development is the rumor that Toronto may put in an invitation to the association for 1913. Some difficulty may be experienced in finding a suitable place for holding the convention but, if the armories can be obtained, it is quite possible that the invitation will be put in.

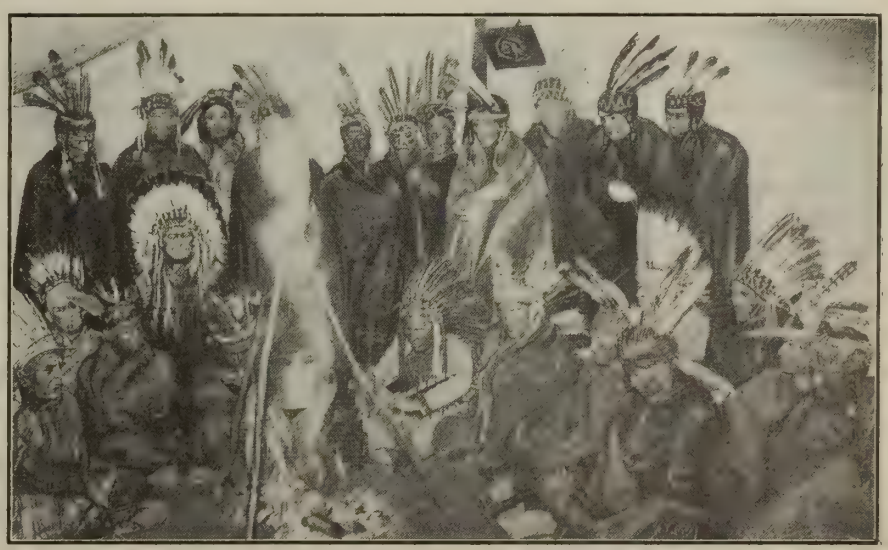
This would provide a spirited contest. President Chown would have a strong argument in the fact that expenses in Belleville would be considerably less.

Convention Number.

Hardware and Metal will issue a convention number on February 17 which will contain a full outline of the programme and the convention arrangements and will contain in addition many interesting articles and features. No member should fail to secure and carefully read this number.

FIRST COUNCIL MEETS.

In a recent issue Hardware and Metal gave an account of the inauguration of the Eeh-Nis-Kim, an order involved in much mystery, the members of which are made up of hardware dealers and clerks and the sales force of the Carborundum Co. The accompanying illustration shows the first council meeting of the Medicine Lodge.



The first Council Meeting of the Medicine Lodge of the Eeh-Nis-Kim.

THE QUALITY DEMAND.

Demand for quality is now the dominant note in some lines of trade. People are beginning to realize, as they have never done before, that it pays in the end to buy right. They do not allow the opportunity to save a few cents at time of purchase to prevent them from realizing on the greater satisfaction and the longer length of service that the quality articles gives.

This is particularly true with respect to cutlery. The day is past when people are content with "any old thing." The cheap jackknife, guaranteed to carry an edge for all of two days, is passing out of favor at the same time as the pewter spoon and other inferior articles. The point of view of the average person has broadened sufficiently to preclude any desire to purchase the cheapest grades. A Western hardwareman made the statement the other day that he sells more jackknives around $2.50 in price now than he does of the cheaper grades.

This tendency should not be lost sight of. The dealer who succeeds is the one who gives the public what it wants. If people demand the best quality, they go to the store where they can obtain it and the establishment which caters to cheap trade will suffer accordingly. The buying and selling ends of the business should be made to work in unison with the object in view of establishing what might be termed a "quality tone."

RECIPROCITY NEEDED IN STAMPS.

That phrase, "Please send six cents in stamps to cover cost of mailing," is becoming a regular bugaboo, not only to the one from whom the stamps are wanted, but to the one to whom the stamps come. The trouble, of course, is caused by the proximity of two countries—two countries with different postal systems.

An illustration of the nuisance which the interchange of stamps causes, comes to hand this week, a manufacturer of the United States writing that he has Canadian stamps to the value of $60, and asking where he can get United States stamps, or money, for these. His trouble is but an example of that experienced by many business men.

The manager of a Montreal concern, speaking of this matter, states that he undertakes to exchange stamps for his customers. Thus, if a dealer in the United States has a number of King Gorge stamps sent him, to defray the expenses of mailing some catalogue or other he will pay face value for these. If a Canadian, on the other hand, gets a number of U. S. stamps he will take these and dispose of them later.

By such means much of the inconvenience is obviated, but how much better it would be if there were a recognized method, whereby a Canadian, getting a number of stamps of the United States, could exchange these for stamps of Canada, and vice versa. There would not have to be any ratio of exchange. Both stamps have the government of a great country behind them. Both are worth their face value.

So much has been said for, and so much more against reciprocity—in Canada at least—that the word seems something to be avoided. Yet what a boon it would be to business men if there were reciprocity in stamps—if a man getting a number of these from the States, could send his office boy to the nearest post office and have them exchanged for an equivalent of the Canadian issue. No one would be the loser. The exchange between the Canadian and United States Post Offices Departments could be carried on as easily as is the ecxhange of bills between various banks. No one would be the loser. Who can say how many would gain?

PUBLICITY SERIES STARTED.

In recognition of the part that publicity plays in modern merchandising, a strong series of articles will appear in Hardware and Metal during the forthcoming year, taking up every phase of retail advertising. The articles will be prepared through the joint efforts of the editorial and advertising staffs. An earnest effort will be made to render the series eminently practical and useful from the standpoint of the retail hardwareman.

The first article, which appears in this issue, deals with the subject in an introductory way, defining the words publicity and advertising and giving the fundamental reasons why advertising is necessary. The series will be continued throughout the year and will take up every specific form of publicity—newspaper advertising, circulars, hand bills, catalogues, church programmes and novelties. The bulk of the articles will deal with the question of newspaper advertising, and, among the various topics taken up in that regard will be: How much space to use; Making the advertising specific; Laying out the advertisement; The headline, Introduction, Slogan and name plate; The use of illustrations; Type, borders and ornaments; The danger of over-crowding; Changing copy regularly; Language; Honesty in advertising; Supplementing manufacturers' advertising; Results; Free advertising. Interspersed throughout the series will be a number of timely articles on seasonable advertising, containing criticisms and suggestions.

It will thus be seen that the problems of publicity will be most comprehensively exploited and explained. Each article, while complete in itself, will fit in with the others according to the details of a plan mapped out for the whole series. We suggest that all who are interested in the subject of advertising—and who is not?—follow the articles from the outset, giving each chapter careful study and consideration.

THE FUTURE OF GLASS.

The future of glass is worth considering. Only recently a somewhat higher price level was established, and immediately there came a certain amount of complaint from the retailers. There has also been a feeling of expectancy—expectancy that the lower level will come back with the spring. But expectancy, to be of

real value, must be the result of a careful analysis of the situation. The expectation that glass will fall in price does not seem to be so founded.

At the present time local handlers are paying 6 per cent. more for their Belgian glass than they did last summer. The Belgian makers have come closer together. They have decided they were selling too cheaply. They have changed their policy.

But this higher price paid by the buyers is not the only thing which makes lower prices far from likely. There is a coal strike called in England. Let this be of long duration and the English glass works will be affected. A curtailing of the English supply would mean a much greater demand for the Belgian product. Every one knows what comes as a result of an unexpectedly large demand. It is not a lower level of prices.

All things considered, indeed, it would seem that dealers will next year have to sell glass which they bought at a fairly high figure. But they are not likely to suffer because of this. Glass is a thing which must be had. The days of small windows have passed. People want light, and to get it they will pay for the material which gives it. Even at a higher level, moreover, glass is cheap enough.

THE TIPPING EVIL AGAIN.

The tipping evil and the great need there is of suppressing it is again brought to the fore by some rather startling figures presented by an American contemporary. Last year the Pullman company carried 623,182,757 passengers. There are no statistics to show how many of them paid their tips like little men and how many had the courage to resolutely walk off the car without contributing to the quarter hoard of the obsequious but lynx-eyed porter. The stony stare of a supercilious official "makes cowards of us all." Most men would rather pay a quarter than suffer the occularly expressed contempt of the dusky czar of a pullman. It is, perhaps, safe to assume that not more than one in four, who ride in pullmans, escape paying tribute. That would make the amount paid out in tips last year $116,844,266.

The figure is astounding but probably not very far from the real facts. There is a ludicrous side to it after all. The men of America pay over one hundred million dollars annually rather than break what has become more or less of a custom! Where does all that money go to? We doubt if the recipients of it could tell. If Pullman porters were a thrifty tribe each individual one of them would be riding in a motor car of his own.

This is one source of "economic waste" which could be effectually remedied. When will traveling men find and enforce that remedy?

POINTED EDITORIALS.

The dealer who nails his selling colors to the mast of quality will never have to strike them.

* * *

"Hitch leather belting to your business and get greater trade velocity," is the characteristic advice of one who has tried it.

* * *

The question of Parcels Post should receive considerable attention at the hands of the members of the Ontario Association when they meet in convention next month.

Continuity and persistency. Mighty good words both of them. Apply them in your selling plans and the result will spell increased profits—also mighty good words.

* * *

The statement of a copper and brass goods manufacturer that the tendency in prices in that line is toward firmness is worthy of consideration.

* * *

Firm holding a two weeks' wringer sale. It should be possible to wring good profits out of them at this time of year.

* * *

Start an automobile department and you'll soon have profits enough to own one of your own, is the advice of a western hardware dealer.

* * *

In Montreal two men recently broke into the house of a St. Lawrence Boulevard locksmith. Burglars appear to be no respecters of persons or locks.

* * *

Publicity is as much a necessity in the retail business as the capital to start, the brains to manage and the will to persevere. The modern shopper shares with the Missourian a desire to be "shown." Show him.

* * *

The result of the Christmas window contest will be announced shortly. The judges say that they never saw a better lot of window displays. The contest was in every respect a record breaker.

* * *

Paper bag cookery has attained quite a vogue in the eastern provinces. The idea is gradually spreading west and lots of people are now serving their meals a la ermaline.

* * *

As all your New Year resolutions are probably smashed beyond recognition by this time, how would it be to formulate a few plain, sensible ones, which, with a little effort, could be steadily lived up to? Here is one: To plan the spring campaign bright and early and to endeavor to sell the best quality goods always.

* * *

Recently a distracted looking man entered a Montreal banker's house demanding money. He emphasized his demand by a pistol, which turned out to be a pop gun, and a bomb, which was later shown to be a chocolate Easter egg. Men have been held up for eggs before this, but with an egg is a different thing.

* * *

In Montreal the scarcity of carters is still being felt, the city's street cleaning department and the ice cutters now bidding against one another for the services of the men and teams. Fortunately for the manufacturers and wholesale men, this situation was not so acute when they were shipping heavily. Even without the ice and the snow they had difficulty enough getting transfer facilities.

Go straight ahead and advert i i i.
You'll find the stunt the best to u u u.
And one neglect cannot ex-q q q.
A silent business soon de-k k k.
Don't stick with these old-fashioned j j j.

—Cleveland Leader.

Hardware Store Publicity

Chapter 1. Advertising a Necessity

A man might subsist without paying any heed to the first rules of health maintenance. But he would live longer and more comfortably if he took better care of himself.

Some business men, who have not kept pace with the times and whose methods are the ways of yesterday, do not believe in telephones and still carry on their correspondence by long hand : They manage to get along ; and consequently scoff at new ideas. But their profits would be bigger and their labors would be lightened, if they were to discard their conservatism and their belief in things obsolete and avail themselves of modern labor saving devices.

It is the same with publicity. Some business men get along without advertising ; and consequently are prone to believe that the benefits of advertising, so loudly proclaimed, are mythical. They do not realize that the business they are doing is the minimum and that advertising would improve it in direct ratio to the extent and effectiveness of their publicity efforts.

The non-believer in advertising has but one defence to offer. He is an advocate of the doctrine of let-well-enough-alone. "I have been in business twenty years," he proclaims. "My father was in business before me. He never advertised. I have never advertised. We both made the business go and we made money. Why should I change now ?"

Twenty years ago this dealer walked to his store every morning. The lost time did not hurt the business ; but he takes the street car now. Why ? Twenty years ago, he heated his house with a wood stove. It always seemed comfortable enough. But he has steam heat now. Why ?

If his advocacy of the stagnation theory of let-well-enough-alone were really sincere, he would have tabooed street cars and clung loyally to his old wood heater. He had managed to get along well enough. But he adopted the new ideas ; and probably wonders now how he managed at all before.

There is no denying the fact that many retail dealers have managed to get along without doing anything to put their names before the public. Many will continue to do so in the future. But they have been suffering, and will continue to suffer, from the handicap thus imposed.

A Definition of Publicity.

What is publicity ? Briefly, it is the effort a business man makes to get business. It is not limited to the use of printer's ink. It includes every phase of progressive merchandising—store arrangement, window displays, newspaper advertising, distribution of circulars and catalogues. Publicity begins where business stagnation ends. Every step that the merchant makes, which is calculated to win attention even in the smallest degree, is a publicity feature.

Every dealer does something in the way of publicity ; his profits reflect the extent. He does not realize, perhaps, that newspaper advertising is akin to measures which he has always adopted with the best success. He looks on newspaper advertising as a radical departure, when in reality it is only another phase of the policy which he has found absolutely necessary. It is logical to assume that, if window displays are profitable, newspaper advertising must also bring good results.

What advertising Has Done.

It is not the intention to enter upon an exhaustive defence of publicity. It is not necessary to do so, inasmuch as the benefits are universally conceded. Something might be said, however, with reference to the one contentious phase of the question—newspaper advertising.

The advertising apologist (the term is misleading in a sense), has but to point to the success of the mail order house to prove his case. The mail order house has had but one lever to move in securing trade—advertising. It has drawn orders from the remotest corners of the back concessions by the one trade magnet—advertising. It has made the local dealer step to a livelier tune and in some cases has seriously jeopardized his business by persistent, effective and heavy use of the same powerful factor—advertising.

The departmental store and the mail order house in their methods and their results, represent the highest development of modern merchandizing. Their success can be traced and attributed absolutely to the most thorough application of publicity methods.

What makes the T. Eaton Co. such a big factor in the mercantile life of Toronto and surrounding points ? The fact that the policy of that concern has been directed to impressing their many advantages on the public. This is not confined to their newspaper propaganda, although that has been the strongest factor, perhaps. The same policy has been shown throughout in the store methods delivery system, and window displays. This policy has been the antithesis of the old adage that "everything comes to him who waits." In other words, publicity has been responsible for the wonderful development of the T. Eaton Co. business.

Finally, let it be said that the T. Eaton Co. could probably have managed to get along without advertising ; but where would it have been to-day ? Still struggling, no doubt, in the crowded ranks of mercantile mediocrity.

It should not be necessary to adduce other instances to prove the truth of the statement that advertising pays. Dozens of cases, which could be cited as further proof, come to mind. Practically all are retail hardware men and in some instances, their experiences have already been related in Hardware and Metal.

Publicity—viewed in its broadest sense—is the most essential feature, perhaps, of merchandising. No merchant succeeds who does not give adequate publicity to his business in some ways. Newspaper advertising, as one phase of publicity, may not be absolutely necessary to carry on business ; but it is an essential feature of every successful and growing business.

EVOLUTION OF STERNAUWARE.

Under the heading "The Evolution of Sternauware," a neat folder has been issued to the trade, in which S. Sternau & Co. announce the celebration of their twenty-fifth anniversary and extend thanks to their many friends for the assistance given them during that time. Starting in a small shop, a quarter of a century ago, the business has been built up until it now occupies a ten-story structure at John and Gold streets, Brooklyn.

PAINT FROM CACTUS.

Santa Rosa, Cal.—Luther Burbank told members of the California Fruit Growers' Association that paint can be made from the leaves of the spineless cactus. Mr. Burbank said he was negotiating with one of the largest paint houses in the world to supply it with cactus leaves for paint purposes.

Burbank also said the fibre of the plant was an excellent substitute for rubber in the manufacture of automobile tires. He added that this same fibre would also be an excellent substitute for wood pulp in the manufacture of paper.

"One leaf," he said, "will make ten gallons of paint. The mucilage of the cactus leaf will not dissolve in water, but it will dissolve in alcohol." This mucilage will readily take oil colors and is easily handled.

"I am not as far advanced in my experiments with the cactus leaf as a paint product as I am with its possible use as a whitewash, but nevertheless I am sure of its practical value.

Veteran Figures in the Hardware Field

No. 5—J. S. Moir, Arnprior.

There is wisdom in a multitude of counsel, and, according to some merchants, at least, there is profit in a multitude of lines. Most hardwaremen are converts to this business axiom, as the nature of their stock amply attests. "Hardware," once declared a well known dealer, "includes everything that is neither eatable nor wearable." This definition would appear to be broad enough but a few dealers are already skirting beyond its wide margins. Some are handling jewelry, while others sell sweater coats, thus skipping the "wearable" clause. We have yet to hear of an out and out hardware store handling goods which would agree with the digestions of any living being, but the goat or the ostrich; but it may come at any time now.

At the head of the list of dealers who handle everything in hardware "and then some" is J. S. Moir, of Arnprior. No article is too advanced or too obsolete for J. S. Moir to carry. The customer who has heard of, or at some remote period seen, an article which he desires to secure on the strength of a vague description should go to Arnprior and ask J. S. Moir. He'll have it. His stock is like the wonderful box which some conjurer or other used once upon a time and from which he could produce anything asked for.

Mr. Moir handles shelf and heavy hardware, paints, oils, glass, stoves. At the word stoves we must halt for a moment. The fact that he had stoves in stock suggested to him some time ago that there was no reason why he shouldn't handle that which goes into stoves. Accordingly he established a coal department. It has been a success and now he has a team drawing coal the whole year round.

Retail hardware dealer, house furnisher, tinsmith, plumber, steamfitter, coal dealer and automobile agent.—Can any one beat the business repertoire of J. S. Moir?

To the mind of the ingenious dealer one article always suggests another. The fact that he sold door knobs, window cords, etc., suggested to Mr. Moir that he might with profit to himself carry window shades, wall paper, housefurnishings, etc. He acted on the idea and now has a live and flourishing department devoted to such household goods.

Contractors' supplies and tools figure in his stock, of course, and this brought forward another suggestion—cement. He now handles large quantities of cement, having sold in one season as many as 6,000 barrels.

He has handled gasoline in large quantities. Develop the thought of selling gasoline and it gradually suggests the idea of selling automobiles. Mr. Moir is now handling E.-M.-F. motor cars and is doing a big business in accessories and automobile supplies.

From the outset he has had an efficient tinsmithing staff and now is handling a plumbing and heating department as well. Just recently he completed the plumbing and heating contract for the new Arnprior high school.

The outline thus supplied of the business carried on by the aggressive subject of this sketch, gives an idea of the wide possibilities of hardware. Retail hardware dealer, house furnisher, tinsmith, plumber, steamfitter, coal dealer and automobile agent—can any one beat the business repertoire of J. S. Moir?

Twenty-five Years' Experience.

Before proceeding any further, it should be explained that Mr. Moir is a veteran only in point of length of time in the business. Personally he is in the prime of life, not having reached the limit which Dr. Osler marked out for human usefulness, and then amended. But it is a quarter of a century since he first started in business for himself. In 1887 he opened his hardware store in Arnprior, necessarily starting in a small way. Since that time he has given his

An exterior view of the business premises of J. S. Moir, Arnprior.

The Management of a Retail Business

No. 5—CASH DISCOUNTS

By H. C. Carson, F.S.S.

We will suppose that two men are about to start in business, as competitors, each with the same amount of capital, which we will fix at $3,500, and equal in other respects, such as location of store, popularity, organization, and general knowledge of the goods handled.

As the purpose of the article is to show, in figures, the advantage of discounting bills, we will assume that both merchants start free of debt, and with a new stock worth $2,500, of well selected goods, the remaining $1,000 being invested in fixtures and equipment. Management and other expenses of operation will be assumed as being the same in both cases, with selling prices and volume of business averaging about the same say for the first three months. The only difference is that No. 1 has determined to sell for cash as far as may be possible, to insist on prompt collections each 30 days, where cash can not be secured, and to lose no opportunity to discount his bills of purchase, while No. 2 intends to take trade as it comes, without any preconceived ideas as to collections or discounts.

End of First Month.

No. 1 has found it difficult to sell for cash, while No. 2 sells at the same price on credit, so that the turnover has been about the same, say $1,000, one third for cash, and the balance on credit. Purchases have been $500, in each case, and No. 2 finds his position as follows :—

Cash in hand, after paying $150 running expenses	$183
Accounts Receivable	667
Owing to Creditors	500

No. 1, at the very start, foresaw that he would have to borrow, if bills were to be discounted ; and had therefore laid the state of his affairs before his bank, and arranged a line of credit of $1,000. On this he had borrowed $125 each week, or $500 in all, each note at 30 days costing him 73c at 7 per cent. per annum. With the proceeds of each note he had discounted bills at 2 per cent., making $2.50 on each, or $10 cash discounts taken at a cost of $2.92, equivalent to $7.08 net gain in discounts. His running expenses had been the same as No. 2, and the first note being due, it is paid, showing his position as follows :—

Cash in hand after paying $150 running expenses, and $125 note to bank	$ 65.08
Accounts reivable	667.00
Bank indebtedness	375.00

Thus far No. 1 has beaten No. 2 by $708 actual profit, and only owes the bank, while No. 2 has already begun to strain his credit in the jobbing market.

Second Month.

During the first week, No. 1, having sent out his accounts promptly, has collected say $400 of his outstandings, while No. 2, less aggressive, has gathered in $250. Business, in the meantime, is extending, and the sales, in each case, for the second month have reached $1,500, No. 1, in pursuance of his cash policy, as far as possible taking in $900, with $600 in accounts, while No. 2 collects $500 cash, with credits of $1,000.

Purchases have also increased to say $1,000 in each case, for the second month. No. 2 had cash in hand $183 at the beginning of the month, he collected $250 during the first week, and a further $150 during the month, which, with $500 cash sales, makes a total of $1,083. He has paid his merchandise accounts of the first month $500, as indeed he had to do, to insure his further orders being filled, but no discounts have been taken, and a further $150 has been paid out in expenses, leaving his position as follows :—

Cash in hand	$ 433
Accounts receivable	$1,267
Owing to creditors	$1,000

No. 1, on the other hand, has met his bank notes promptly at maturity, and discounted a further $300 for 30 days, which amount, together with cash sales and a further $150 collected from last month's accounts receivable, has been adequate to enable him to take his cash discounts of 2 per cent. on $1,000 purchases. He, likewise, has paid expenses of $150, and stands as follows, at the close of the second month.

Cash in hand	$308.33
Accounts receivable	717.00
Owing to bank (not due)	300.00

No. 1 has made $18.25 in discounts, after paying bank charges, which places him $25.33 ahead of the other merchant, but his accounts are more satisfactory, for he owes no one outside of his bank. He finds, however, that his accounts receivable are larger than he had intended, and prodeeds, even more energetically, to their collection. He explains to his customers that prompt payment is necessary, and asks their support in placing his business on a cash basis. Within the first 10 days of the third month he has reduced his accounts receivable to $300, and collected a further $200 during the month, leaving his outstandings at $100, which he finds difficult to collect. No. 2 has likewise collected about half of his accounts receivable, and applied the funds to the reduction of his indebtedness. Business is going on however, and the third month's business shows $2.000 each in sales, but while No. 1 has sold two-thirds of the amount for cash, his competitor has been content with one third cash, his credits being increased by the balance. Purchases in the meantime have amounted to $1,500 in each case, and No. 1 finds that although he has paid the bank, he must again borrow, this time $150 to enable him to discount.

End of Third Month.

At the end of the first quarter's business, No. 2 finds that his accounts stand as follows :

Cash in hand	$ 582.00
Accounts receivable	1,967.00
Owing to creditors	1,500.00

No. 1, however, has discounted every bill at 2 per cent., making $29.12, after paying bank charges on his new loan of $150, and exhibits the following statement :

Cash in hand	$487.45
Accounts receivable	766.00
Owing to bank (not due)	150.00

Being the end of the first three months business, both merchants use their cash in hand so far as possible or necessary in paying off indebtedness, adjusting the accounts to the following basis :—No. 2 with no cash in hand, owes his creditors $918, and has accounts receivable to collect $1,967, while No. 1 owes nothing, has $766 in accounts receivable, and $337.45 in cash.

He has earned an excellent reputation in the wholesale trade, gained a good name at his bank, and made $54.45 more than his competitor. No. 2 is, of course in good financial condition, but dependent upon his customers to make ends meet.

What Balance Sheet Shows.

Next week we will traverse the next three months of the business introducing special features. Thus far their balance sheets are as follows, the sales, amounting to $4,500, at say 25 per cent. profit and the purchases amounting to $3,000 in each case :

No. 1.

Assets.	
Cash	$ 337.45
Stock	2,125.00
Account rec.	766.00
Fix., etc.	1,000.00
	$4,228.45
No Liabilities.	
Gain	$728.45

No. 2.

Assets.	
Stock	$2,125.00
Ac. rec.	1,967.00
Fix., etc.	1,000.00
	5,092.00
Liabilities.	
Account payable	918.00
	$4,174.00
Gain	$674.00

full attention to the business and it has grown steadily and surely. To-day he has—well, one of the finest stores, if not the finest, in the Ottawa Valley. He carries probably the largest stock in that section, and certainly there are none who can present a wider range of goods.

His business has grown to such an extent that two stores are now occupied, as will be noted in the accompanying illustration, one being given over to the plumbing and heating end of the business.

Mr. Moir has taken Hardware and Metal for seventeen years and has been a close reader of this paper.

Hardware Letter Box

Keen Kutter Goods.

H. N. McArthur, Toronto,—"Would like to know the address of the 'Keen Kutter' Co., an American firm."

"Keen Kutter" is the trade mark of the Simmons Hardware Co., St. Louis, Mo.

Glass Casters.

In the January 13 issue of Hardware and Metal enquiry was made for the makers of glass casters. The Onward Mfg. Co., Berlin, Ont., manufacture the Onward sliding furniture shoe, which is made of glass, and metal as well.

Wood Mantels.

W. A. Mitchell, Kingston.—"Kindly send us the addresses of manufacturers of wood mantels."

Barton Netting Co., Windsor; R. S. Muir & Co., 257 St. Catherine St W., Montreal; Robt. Reid, 125 Alexander St., Montreal; Burton & Baldwin Mfg. Co., Hamilton; Christie Woodworking Co., St. John, N.B.; Cushing Bros Co., Calgary; Fox Bros. & Co., Windsor; James Leigh & Sons, Victoria, B.C.; Lemon, Gonnason & Co., Victoria, B.C.; Malcolm & Souter Furniture Co., Hamilton; T. W. Murray Co., Winnipeg; Rathbun Co., Deseronto; Schultz Bros. Co., Brantford; Winnipeg Paint & Glass Co., and many others.

Prism Light Glasses.

N. G. Lenon, Saskatoon.—"Advise us of any firms who are manufacturing prism lights and glasses in Canada."

Hobbs Mfg. Co., London; Consolidated Plate Glass Co., Toronto; Toronto Plate Glass Importing Co., Toronto; Winnipeg Paint & Glass Co., Winnipeg; Luxfer Prism Co., Toronto; John Watson & Son, Wellington St., Montreal.

Wood Shelf Boxes.

W. G. Butler, Perth, Ont.—"Do you know of any firm making wood shelf boxes?"

Cameron & Campbell, 578 Queen St. West, Toronto; J. D. Warren & Co., 55 State Street, Chicago; Walker Bin & Store Fixture Co., Berlin; Jones Bros., Adelaide St. West, Toronto.

Verity Plows.

F. Parks & Co., Cranbrook, B.C.—"Will you advise us of name and address of makers of Verity Plows?"

Verity Plow Co., Brantford, Ont.

Metal Polish Paste.

Albert J. Hanglin, Plessisville, Que.—"Can you give me the name of the firm making tandem metal polish paste, also Axoline brass cleaner? Can you tell me what firms sell black lead, such as is used for manufacturing stove polish?"

The Matchless Metal Co., of New York, make the Mexoline brass cleaner, which may be the article desired. Can any reader supply information as to the makers of Tandem metal polish paste? All the paint jobbing houses handle black lead.

White Graniteware.

H. Oppertshauser & Sons, Stony Plain, Alta.—"What firm in Canada jobs or import Swedish white graniteware?"

W. Drysdale, Outremont, Quebec, is agent for Austrian graniteware.

The same firm asks for the names of companies jobbing musical instruments. Whaley, Royce & Co., Toronto, and R. S. Williams & Sons. Co., Toronto.

The addresses of firms manufacuring window shades. Geo. H. Hees & Son, Toronto; Turner Co., Peterboro; Daly Morin, Montreal; Chambers & Chambers, Craig St. West, Montreal.

Where can English linoleum be obtained? Harvey Bros., Winnipeg, are agents for John Williamson & Son, of Manchester.

Paper Presses.

A. Sweet & Co., Winchester, Ont.—"Where can a press for waste paper be obtained?"

Davenport Mfg. Co., Davenport, Ia.; Wm. R. Perrin & Co., Toronto.

Catalogues
and
Booklets

GARLOCK PACKING.

The Garlock Packing Co., Hamilton, Ontario, have issued a catalogue illustrating their full line of packings. It runs 112 pages, is printed in coated paper and has a two-color embossed cover; it is, in fact, one of the most creditable catalogues from every standpoint seen for some time.

Each variety of packing is illustrated, described and priced. The catalogue will serve as a handy reference.

GURNEY MEN IN CONFERENCE.

The representatives of the Gurney Foundry Co. in the Montreal and Winnipeg districts have been in Toronto this week conferring with the officers of the company and preparing for the year's campaign.

BISSELL'S ANNUAL MEETING.

The annual meeting of the stockholders of the Bissell Carpet Sweeper Company was held January 18, at the general offices of the company, Grand Rapids, the following directors being chosen for the ensuing year: Mrs. Anna Bissell, T. W. Williams, Melville R. Bissell, Jr., Irving J. Bissell, William E. Gill, F. M. Deane, R. E. Shanahan.

The directors elected the following officers: Mrs. Anna Bissell, president; T. W. Williams, vice-president; Melville R. Bissell, Jr., vice-president; F. M. Deane, treasurer; R. E. Shanahan, secretary and general manager.

The business of this company for the year 1911 was the largest in its history.

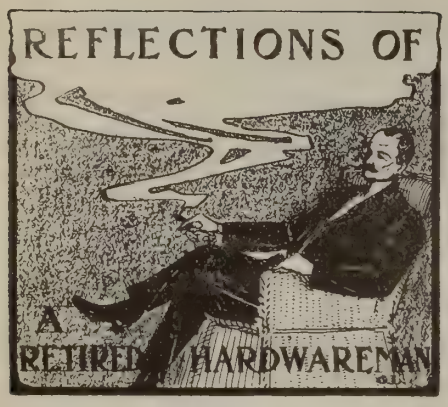
TO BUILD WAREHOUSES.

Fort William, Ontario.—A big deal has gone through which involves the transfer of a large block of land bounded by Simpson, Hardisty, Finlayson and Ogden streets. This property will be used for the erection of warehouses. Among those interested in the matter are the Fife Hardware Co. It is also likely that Tees & Persse of Winnipeg, will have a location in that vicinity. It is the intention to lay a track from Hardisty street at the intersection of Ogden through the block midway between Simpson and Hardisty, with short spurs running from this track to each warehouse, thus giving each company its own track.

HOWLAND'S WON AGAIN.

Toronto, Ontario.—H. S. Howland Sons & Company's hockey team, won their fourth consecutive victory of the season, when they defeated the fast seven of the Massey-Harris Company, at the Excelsior Rink, by the score of 3—0.

It was a very strenuous and hotly contested game. The winning team led at half time by a score of 2—0, and added another shortly after the continuation of play, and although the Massey-Harris boys pressed hard they were unable to beat Marshall, Howland's star goal tender. Marshall played the game of his life, and stopped almost impossible shots.



By "Mack."

An occupation that fills the hours of many dealers during the stormy days of January such as we are now enduring with as much decorous patience as possible, is that of scrutinizing the list of delinquent debtors that appear on the pages of the ledger. Customers are not likely to interrupt the train of thought caused by the contemplation of these overdue accounts and the offending patrons of other days. The roads are impassable and the extremely low temperature prevailing prevents the city and town trade from going out of the house except for actual necessities, and therefore I assume that the inevitable happens and business is temporarily suspended.

Two or three hours spent in inspecting the books gives exercise to the mind that will probably strengthen the powers of resistance to the beguiling request for credit later when returning Spring activity relaxes the anxiety of the sterner winter introspection of ourselves and business conditions. If such a development ensues the time and disagreeable reflections spent in examining this debtors' black list will likely show profitable results in future restrictions of credit extension or in its total abolition.

You turn up a name and what memories arise! For years, perhaps, the man whose name appears before you was an exemplary and valued customer, always conducting his personal purchases on a basis of cash settlement. That was long ago, and now all the powers of moral suasion or coercion are alike unavailing in the endeavor to obtain payment. Time glides by and the debt becomes old, the erstwhile honored patron leaves the district and becomes an unpleasant memory, the sum of his unpaid balance going to swell the total of lost debts, or bad debts as generally designated. The manner in which one of this class originally obtains credit when it is known that he is expected to be held exclusively to the cash plan at the time of exchange reflects the general usage of the type. The entering wedge of credit, which ultimately cuts into the closest cash businesses and weakens the proprietor's fortitude in continuing his efforts to collect money for his wares when some one wants them, without indefinitely waiting, is found sometimes to date from the times the early morning messenger of the country blacksmith, or other mechanic, arrived at the store before it is opened for business. The clerks are placed in a quandary and, under the compulsion of various influences, fill the order and explain afterwards when Mr. Hardware Dealer enters upon the scene later, their numerous reasons why they felt justified in breaking the cash law which was in force. That precedent established, the next incident of a like nature finds resistance on the part of the store's helpers diminished and another is added to the credit accounts.

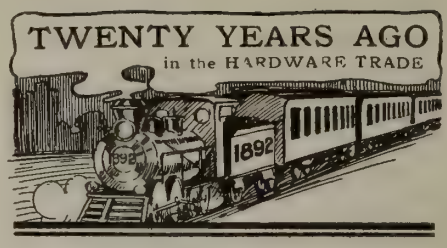
Occasionally the merchant himself is the culprit and victim united. Some very amiable people will buy goods for a protracted period, always causing the cash register to respond to their visits, usually exchanging greetings and pleasantries with the head of the firm before leaving for home. This satisfactory condition proceeds until the juncture of time when he is approached with the proposition to be allowed a month's credit on an article of considerable value. This danger signal is not interpreted properly and after the goods are loaded on the sleigh or wagon, as the season demands, it usually happens that visits from that particular client are less frequent and another refractory account passes to the wrong side of the ledger. The moral—prevention is better than cure.

SELLING SPIRIT LAMPS.

Montreal. Jan. 24.—These are the days when the cup of tea, coffee, or chocolate are especially appreciated; these therefore, are the days when it is possible to find a ready sale for those spirit lamps, which make the making of this tea, coffee, or chocolate, possible. Nestor Fagnan of St. Catherine Street East has realized this and is now displaying lamps in his window—lamps, low in cost but high in efficiency. The display, though not large, is attractive, and is bringing results.

NO MERGER FORMED.

The announcement in a recent issue of Hardware and Metal to the effect that a merger had been completed which included the James Smart Manufacturing Co., of Brockville, was premature. Assurances have been received that no such amalgamation has taken place and we gladly place this information before the trade.



The following items have been gleaned from the issue of January 23, 1892:

"The Hamilton Electric Light Co. have just closed a contract with the Haworth Belting Co., Toronton, for two large engine belts to be used in their new power station; each belt is four feet wide, three-ply thick and 115 feet long. When finished, these will be the largest leather belts in use in the Dominion."

Editor's Note.—The firm of Sadler & Haworth is well known as among the largest manufacturers of leather belting to-day.

* * *

"W. H. Rowley, manager of the E. B. Eddy Co. has shaken off the sickness that clung to him for above a month and has gone to recruit his strength in the Bahamas."

Editor's Note.—Mr. Rowley has remained in charge of the E. B. Eddy Co. operations and has seen that business grow to its present large dimensions.

* * *

Editor's Note.—Perusal of the pages of Hardware and Metal leads to the conclusion that trade conditions were not very brisk at this particular period in Canada's history. In the one issue, no fewer than eighteen failures are recorded. Several were men who afterwards made a fresh start in the hardware business and are to-day quite prosperous. A number of wholesalers are on the list.

* * *

"The manufacturers of tacks have come to a joint understanding as to the discounts upon tacks. The firms included in the agreement are the Pillow & Hersey Manufactuing Co., Montreal Rolling Mills Co., Peck, Benny & Co., and The Ontario Tack Co. The list is unchanged; the only alteration is in discounts, some of which have been greatly reduced."

NAILS REMAIN AT PRESENT PRICE.

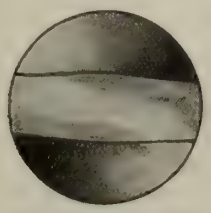
Montreal, Jan. 25.—A meeting of those interested in the manufacture and sale of nails was held here yesterday, the present prices being confirmed.

New Hardware Goods

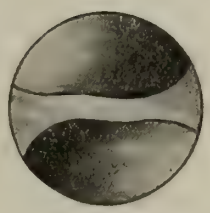
NEW AUGER BIT.

The Tobin Arms Manufacturing Co., Woodstock, Ontario, have placed on the market a high-speed auger bit. The special points in connection with the new bit are the double point and the extra

New Tobin Auger Bit, Showing Double Point.



Cross Section of Ordinary Bit.



Cross Section of Tobin High-Speed Bit.

large chip clearance. Instead of one thread there are two and instead of one point there are two—flattened and pointed downwards in such a way that when the bit is given a turn the points slip in under the fibre easily and naturally.

The second new point obtained in the construction of this bit is the clearance for the chip which is absolutely necessary to take care of the fast feed—in fact, the first attempts to use the double thread feed were found impracticable until this clearance was designed and patented. It will be noticed in the two cross-section views shown, that the ordinary bit, when cut in two horizontally reveals on both sides a convex bulge that causes the chips to "jamb" against the sides of the hole. That is why it is necessary to withdraw it frequently to free it. This difficulty has been overcome by the Tobin bit in a very simple manner. Instead of having a bulge, the cross-section, as the illustration will show, is not only very thin but is concave. This construction serves a double purpose. It not only reduces the resistance, but affords a channel up which the chips make their way, as the bit turns, without any restraint or "jambing."

WILL MAKE FLY SCREEN CLOTH.

The Canada Wire & Iron Goods Co. have let contracts for a large addition to their premises.

The additional floor space is for the the manufacture of fly screen cloth. The purpose of providing accommodation for company will have their looms (which are at present under construction) operating by the 1st of July, placing them in a position to take care of business for the season of 1913.

During the four years the company have been operating, their efforts in their wire weaving department have been devoted to the heavy grades of wire cloth with the result that they have equipment installed which places them in a position to take care of the trade.

HANDY DIE STOCK.

The Handy die stock is a new pipe-threading tool, put upon the market by the Handy Manufacturing Company, of Bridgeport, Conn., and handled in Canada by Henderson & Richardson, Board of Trade building, Montreal.

Though showing the style of the tool, the accompanying cut does not indicate all its strong points; it does not show how the one set of dies thread the different sizes of pipe; it does not illustrate how the dies are held rigid or how they can be quickly released; it does not indicate that the die stock cuts both right and left-hand threads.

The tool is light in weight. May be easily carried, and by its simplicity and

easiness of setting, should be of value to those who work with pipe.

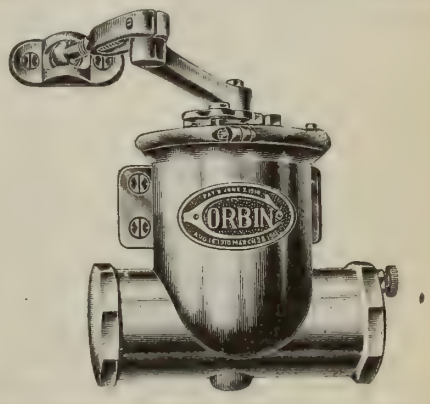
NEW MARLIN RIFLE 29.

The Marlin Firearms Co., New Haven, Conn., have sent out circulars illustrating their new model 29 rifle. Model 29 rifles are take-down, have trombone action and handle 15.22 short, 12.22 long or 11.22 long-rifle cartridges at one load-are made with 23-inch round barrel only. The frame and rifle buttplate are blued while the buttstock and forend are of black walnut. They are equipped with metal bead front sight and flat top rear sight.

The model 29 has the solid top and side ejector and a visible hammer that can be cocked or uncocked at will.

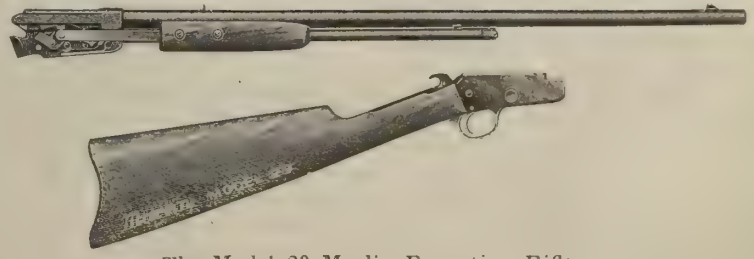
CORBIN DOOR CHECK.

P. F. Corbin, New Britain, Conn., have placed their door check and spring



1911 model on the market. Some points in connection with the same will be of interest. The new check is adaptable for right hand and left hand doors without change. It is supplied with or without the hold-back attachment. The hold-back attachments can be adjusted to stop the door at any point. The spring used is long and resilient, reducing the crystallization to a minimum and giving a quick action. The spindle has a lower bearing which absolutely prevents side pressure or friction and gives rigidity to the check. The rack and pinion in the check give control to the door at all points from the wide-open to the closed position. The movement in closing is steady, without shock or jar at any point.

The liquid used is one which has been carefully compounded with a view to securing immunity from changes due to difference of temperature. It is non-freezing and not affected by extreme heat.



The Model 29 Marlin Repeating Rifle.

Progressive Hardware Retailing

Western Dealer is Now Handling Automobiles—A Two Weeks' Wringer Sale —Montreal Firm Selling Spirit Lamps—Cragg Bros., Halifax, Lose No Time After Fire.

TAKING UP AUTOMOBILES.

Toronto, Jan. 15.—A visitor at the office of Hardware and Metal this week was L. F. Heartwell, of Rosetown, Saskatchewan, who has the well-deserved reputation of being one of the most aggressive hardwaremen in the West.

Mr. Heartwell is in the East on a business trip. He went on to Montreal and made a number of business calls there. In speaking of business conditions in the West, Mr. Heartwell is most optimistic. He reports that everything now points to a splendid year in all lines of industry and trade.

The interesting announcement was made by Mr. Heartwell that he has decided to launch into the automobile business. There has been a good opening for this in Rosetown and, as he has been carrying accessories and supplies, it occurred to Mr. Heartwell that no one had a better right than himself to take advantage of it. He reports that he already has six good prospects and expects to sell a good many motor cars this year.

MERCHANTS PLAN AUCTION SALES.

Wallaceburg, Ont.—A plan for attracting farmers to town, which is reported to have worked well in many American cities, is being undertaken here under the auspices of the Board of Trade. Free auction sales will be held regularly at Cramer's feed barns, stuff of all sorts being auctioned off without any charge whatever to the farmers.

The Board of Trade has made an initial grant of $25 toward the scheme, and T. D. McGuire has been appointed auctioneer. Ex-Mayor H. A. Stonehouse, who first urged the scheme, together with S. D. Crothers, J. W. Woolcott and D. A. Husband, have been named as a committee to look after arrangements.

It is expected that the auction sales will bring a large share of farm trade to the town.

SOME GOOD RESOLUTIONS.

The editor has received copies of special numbers of the "Hardware Store News," published by Dewar & Ryan, hardware dealers, of Pembroke. The first is the Christmas number and contains a colored cover and many very handsome colored advertisements. The second is called the "Good Resolution Number" and, as the name implies, takes up largely the question of New Year's customs. Some of the good resolutions offered are:—"Don't economize on your hardware." "Don't shiver—buy an oil heater," and "Give us a chance." One particularly good hint is

Some good advice contained in Dewar & Ryan's "Hardware Store News."

with reference to the necessity of preparing now for future needs. The article referred to is wire fencing and good advice for farmer customers is given.

BIDDING FOR TOOL TRADE.

Montreal, January 25.—With a carefully prepared window display, Beauvais Freres of St. Lawrence Boulevard, are bidding for the custom of mechanics, and of those who have work to do about their houses these winter days. All kinds of tools are shown, kalipers, saws, wrenches—tools that would only be required by skilled workmen, and tools which would be needed by amateurs doing odd jobs.

In another window this firm shows specialties, dog collars, toys, flash lamps. Both displays are bringing results.

This store front has one striking feature—that is, that the window does not begin some three feet up from the sidewalk as is usual. The floor of the regular window is that high, but below this is a glass front behind which are displayed various classes of kitchware copper and aluminum pots, sauce pans and kettles.

TWO WEEKS' WRINGER SALE.

St. John, N.B., Jan 23.—Business continues quiet with local dealers, but all are exerting themselves to secure as much of the trade as can be possibly gotten. Sales of various kinds are in progress among the different firms, with the hope of inducing buyers. Having quite a stock of odd sizes in skates left over after their Christmas business, the firm of T. McAvity & Sons are featuring a sale of this kind, in which "all skates offered for sale are practically given away, so reasonably can they be purchased." As there were quite a number of persons, owing to the soft weather, who deferred buying skates before the holiday season, the returns from the sale were effective.

A practical idea was put into force by the firm of Emerson & Fisher in featuring a "Two Weeks' Wringer Sale." In both cases the fact that the firms found themselves over-stocked with certain lines, or left with odd lots, on hand was brought prominently before the people, in order not to allow them to think that old or "shop-worn" goods were being offered.

The S. Hayward Co. held their annual meeting this week, and elected G. C. Weldon, president, H. N. Coates, treasurer, and G. H. Hunter, secretary.

Fred A. Fisher, son of W. S. Fisher, and manager of the Enterprise Foundry, in Sackville, N.B., will leave this week for New York, whence he will go to the West Indies to represent the New Brunswick Board of Trade on the excursion being taken to these islands.

Current News of Hardware Trade

Defeated Paint Men.

Toronto, Ont.—Geo. Mathewson's hockey team defeated the seven of the Imperial Varnish & Color Co., at Riverdale rink by one goal. These teams are old rivals.

Heaters Out on Strike.

Montreal.—A number of heaters, working at the Montreal Rolling Mills, have gone out on strike, claiming that their wages are too low. The management declares that the men are better paid now than similar workers in other places.

A Welcome Visitor.

Harry C. Marlatte, Canadian representative of the Union Arms Co., Toledo, spent several days in Montreal last week. He did not forget to visit the Montreal office of Hardware and Metal, which was brightened by his arrival. Whether they have orders for him or not everyone is glad to see Mr. Marlatte.

Moss' Store Robbed.

Renfrew, Ontario.—The hardware store of H. D. Moss was broken into at an early hour Saturday morning. Access was gained into Mr. Moss' store by the side door, which was forced open. Here the thieves secured a flash light lamp, an automatic revolver and a box of cartridges, some razors, and the loose change in the till.

J. B. Peck Hurt While Ski-ing.

Montreal, Jan. 22.—While ski-ing at Ivry, near St. Agathe, Saturday afternoon, J. B. Peck, of the Peck Rolling Mills, fell and sustained serious injuries. At first it was feared that the spinal cord had been injured, but a close examination by St. Agathe surgeons and by Dr. Armstrong, of Montreal, who was rushed to the scene on a special train, proved this to be incorrect.

Mr. Peck, who is now at the Royal Victoria hospital, is badly hurt, but no permanent injury is feared.

Entertained Hardwaremen.

Gananoque, Ontario.—W. T. Sampson was recently elected president of the Wholesale Carriage Hardware Association of the Province of Quebec, and in recognition of the honor he entertained the members of the organization at dinner at the St. Regis Hotel, Montreal. The honor accorded Mr. Sampson is particularly noteworthy from the fact that it is the first time in the history of the association that the president has been other than a resident of the Province of Quebec.

To Build New Store.

Granby, Que.—P. Phoenix, hardware merchant, has purchased Dr. Lessard's fine house and lot at the corner of Main and Cowie Streets for the sum of $6,500. He will allow the house to remain, but in front of it will put up a four-storey brick building of most modern construction, with a frontage of 32 feet on Main Street and 105 feet on Cowie Street, and will occupy the whole of it with his hardware business, which has outgrown its present quarters. H? will commence building the latter part of April.

Store Damaged by Water.

Owen Sound, Ont—Broken water pipes caused damage to the extent of over $500 to the hardware store of Creeper & Griffin. The sound of the water pouring through the ceiling was heard on the street by passersby at a late hour last night, and the members of the firm being notified, an entrance was effected, and on investigation it was found that the water was coming in streams from a break in the pipes in F. Fawcett's plumbing shop, which is above the hardware store. Before the water could be turned off, much of the hardware stock was damaged, and $500 will hardly cover the loss.

Fire Losses.

Winnipeg, Man.—The tinshop of J. W. Wright, 239 Main Street, in the Conway block, caught fire and some damage was done.

Plumas, Man.—The hardware store of the Williamson Bros.-Butchart Co. was almost totally destroyed by fire. The loss is estimated at $10,000, with insurance amounting to $7,000.

Staff Changes.

St. Mary's, Ontario.—Ed. Grant, of J. M. Adam's hardware store, left last week to accept a position as traveler with the Hobbs Hardware Co.

J. Houston, who has been with Messrs. H. S. Howland & Sons for upwards of five years, and latterly as pricing clerk, has now joined the staff of Thomas B. Lee, wholesale hardware specialties, Toronto.

Business Changes.

Lethbridge, Alta.—The Lethbridge Sporting Goods Co. have discontinued business.

Birnie, Man.—John Birnie, Jr., hardware dealer, has disposed of his business to Arthur Kilborn.

Saskatoon, Sask.—G. Sackville has bought out the business of D. G. Ross, dealer in hardware and harness.

Drinkwater, Sask.—Johnson Bros. have bought out the hardware and furniture business of C. W. Thurston.

Salmon Arm, B.C.—Ford, Tyler & Co. have been unable to get their new store completed to open on the date set, but are rushing the work along and announce that they will open at an early date.

Dundas, Ontario.—The Bernhardt & Gies Hardware Co., of Preston, are about to open up a branch here to do tinsmithing, plumbing and heating. They have secured some good contracts already.

Port Elgin, Ontario.—Henry Copp has sold out to the Trading Company, ill health being the cause of his retirement. He is now selling out the stock and the company will conduct a hardware business on the premises.

Nutana, Sask.—C. W. Arrand and Wm. Pickles have purchased from J. L. Larmer the tinsmithing and plumbing departments of his business. They will conduct business under the firm name of the Nutana Plumbing and Heating Co. Mr. Larmer will retain his hardware store.

Obituary Notices.

Welland, Ont.—Oswald Hickey, of the Supreme Heating Co., was seriously burned in a natural gas explosion at his home. He died a few days afterward.

Toronto, Ont.—William Neilson, a sheet and metal worker, of 79 Lyle Ave., was instantly killed by putting his hand on a compensator of an electric switch. The accident happened in the basement of the West End Baptist church, at Queen and Callendar Streets, where Neilson was working. Neilson was 22 years old, unmarried, and was employed by W. E. Dillon, sheet and metal worker.

Grenfell, Regina.—The death occurred here of J. A. Walker, of the hardware firm of E. A. Walker & Son. Mr. Walker had been ill for a short time with scarlet fever, but his condition had not been deemed serious. He leaves a widow and three small children. He was in his thirty-third year. The deceased had always taken a keen interest in municipal affairs, having been elected a member of the council this year. He also occupied the post of president of the Board of Trade and was treasurer of the trustee board of the Methodist church.

Personal Notes.

William Thompson, hardwareman, is visiting in Whitby, Ont.

J. H. Ashdown, of the Ashdown Hardware Co., Winnipeg, has been on a trip through the far west.

W. McLeod Gill, superintendent of the tool department of the James mart Mfg. Co., Brockville, spent several days in Montreal this week.

Weekly Market Report --- Metals

LARGE VOLUME.

According to one metal man, the volume of business being done at present is "immense" for January, that is. While others may not subscribe to that statement entirely, they are quite prepared to concede that the year has started off with a swing, which augurs well.

The developments reported this week are a firmer tendency in tinplates and lead and a temporary drop in spelter.

MONTREAL.

Montreal, Jan. 26.—Though December was a remarkably fine month in metals, January has been a little slow. Those needing supplies have evidently delayed buying, hoping for a lower level. Of late things have picked up greatly. Orders for immediate delivery are not exceedingly heavy, but a good number for future shipment are being received.

Prices continue to fluctuate. There is hardly a metal which is quiet. Tin, of course, is being eagerly watched. Instead of rising, as was expected, it dropped, until Wednesday, when the price took an upward leap of a little more than £2. This advance is generally attributed to the Banca sale, which comes on this week.

Copper See-Sawing.

Copper has been somewhat lower, though it is see-sawing up and down. Spelter too has dropped a little of late. Lead has risen in price. There does not seem to be any great reason for this advance.

Tin plates, on the local market, have been advanced, the handlers now selling case lots at $8.00 instead of $7.75. The change in the price of tin, of course, would make it seem that tin plates should go down. But then it is to be remembered that these plates were made out of the tin bought at the old high level. Again the price of the raw material has not really a great deal to do with this particular advance. It is caused more by a scarcity of the supply. Tin plate is in good demand at the present time, as it is needed for the manufacture of those pails and cans which will sell so freely in the spring. The demand is good. The supply is limited. Therefore, naturally the price advances.

Wednesday, after the market had been down as low as £189, tin climbed back to £192. The advance was hailed as an endeavor on the part of the ruling body—whether it be the new syndicate or the old one—to raise prices before the Banca sale. The rumor is that some who are short will try to buy there, thus getting the material to fill their contracts. Others too are in the field, and the syndicate want to make them all buy high, as then they will become bulls too. If they buy at a high market they will naturally do all in their power to keep the price of the metal up.

Handlers here who have bought quite largely, have been wondering if they had not better sell. In response to their queries has come the following reply from New York. "Hold on. Your profit will come. Tin is going up."

Copper a Little Weaker.

Lead.—Here there is little change. On the English market the price is quoted as some three shillings higher than last week. Little buying is taking place, however. Here no advance has been made, and the buying is weak.

Copper.—Weakness in the market brings about an uninteresting situation. Some excitement is caused by a rumor that an effort is being made to form what is known as "a community of interests." That is that the Rothschilds and other European powers are to unite with the Amalgamated Copper Company, forming selling and purchasing agencies. The present good price of copper seems to make these plans unnecessary. It was really the old 12 cent. price which gave rise to this "Community of intersts" report, which somehow has sprung into life again.

Spelter.—Locally there is little sale for this metal, and prices remain as last week. On other markets there has been some fluctuation. East St. Louis, quoted last week at $6.50, has dropped to $6.40. There seems nothing to show that this lower level will continue.

TORONTO.

Toronto, Jan. 25.—The expansion of industrial conditions in Canada is reflected in the very appreciable, if steady, growth of the metal consumption. During the past year the volume of business was largely in excess of preceding years; and 1912 has started out on a larger basis still. This refers to volume particularly; in some other respects, the situation may not be quite as satisfactory.

January is not usually a heavy month in metals. Stock taking, annual meetings, conventions and end-of-year events of a like nature tend to minimize the demand. At the present moment, however, the call is both heavy and insistent, pointing to an activity which over-rides all other considerations.

Tin is Firm.

Tin.—While it may not be possible to say the same of conditions on the primary markets, tin is quite firm locally. In London, the market during the week showed a weak front which was brought to an abrupt end by an advance of £3. The situation did not seem to indicate strength, however. Locally, however, the demand was active and well sustained and the price remained firm right through.

Lead is Firmer.

Lead.—The possibility of lead receding to the former lower level is now remote. Reports of advances are heard from other quarters and, while no change has been made locally, the price is firm. Demand is now brisk. There is plenty of lead in sight to meet all requirements.

Good Demand for Plates.

Plates and Sheets.—Demand is heavy, particularly for tinplates. The market took a sudden turn this week, developing unexpected firmness after a period of indecision and rumored declines. Small advances are now reported in some quarters. It seems that the price of tinplates is not responding to the fluctuations in tin. Plates now on the market were made from stocks bought at the higher level of the tin market.

Copper—Locally copper is firm, despite the fact that the metal his seen declines on the primary market. These changes have had their origin in speculative operations and cannot be accepted as evidence of any real weakness. Certainly the demand here is heavy and well sustained and there is no reason to suppose that the call will not be maintained.

A Weakening Tendency.

Spelter.—While the week has not brought about any developments in the spelter market, a tendency toward a lower price is noted. Just why this should be is hard to say, especially as lead has been firmer. The demand here is reported to be good.

Pig Iron.—There is a good buying movement with prices firm, as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Weekly Market Report --- Hardware

AN ADVANCE RECORDED.

Hardware jobbers state that trade during the past month has been better than through January of last year. This is regarded as both satisfactory and significant, for 1911 was a busy year.

Conditions are not overly brisk, however. The January dullness, coupled with the severity of the weather, accounts for the lack of snap and vim noticeable in trade conditions.

MONTREAL.

Montreal, Jan. 25.—This always was a comparatively poor month in the hardware business. Indeed, it is to be questioned if any line of trade is just as brisk in January as at other seasons. The after-Christmas lull is pretty general.

Yet, while things are unquestionably slower just at present than ordinarily, business is not at a standstill. The retailer has been a little more put to it to create a demand, that is all. Owing to the early mild weather, skates and other winter goods did not move as well as had been hoped, but the subsequent demand has been good. Unquestionably some dealers will have a stock left on their hands, but the majority are getting pretty well cleaned up.

Looking Forward to Spring.

As far as the jobbers are concerned, these are quiet days indeed. Of winter goods the dealers now have a-plenty. Orders coming from them are largely of a sorting variety. But the spring is coming, and with the spring the spring demand. For this the wholesale men and manufacturers are working. The travelers are out, and from the reports they send in it is evident that the dealers have their thoughts not only on the disposition of their present stock, but also on getting a stock to sell later.

There have been no price changes struck during the week, though the lower level for horse nails, predicted in the last issue, was made.

Good Sales of Tools.

Household Goods—In this particular line business, from the retail standpoint, at least, is about as good as usual. Pots and pans, graniteware and similar articles are selling well. The dealers' stock in many cases is becoming depleted, and he is being forced to send in supplementary orders.

Household tools, too, are in demand. For this the dealer largely has himself to thank. He has brought the want of these goods home to the people by good advertising—either through the papers, the show window, or the display counter.

Seasonable Goods—When a season is fairly protracted, the seasonable goods become almost unseasonable before the end of the season is reached. This state of affairs has almost come now. Those who need snow shovels have bought them. Those wanting weather strip secured it during the recent severe weather. Those needing oil heaters have them already, or have determined that they can do without these comfort-bringers until next year.

Door Mats to the Fore.

But trade in this line is not quite dead. Door mats, for instance, are selling well. The wet days, which come now and then, bring home the need of these, and the demand is good—it is being stimulated by some good window displays.

Sporting Goods—Here much of the buying has been done. Skates were late in selling, but still they sold fairly well. The same applies to skis, snow shoes and hockey accessories. Now the big demand is over. The call for hockey sticks keeps up, but sales of the other classes of goods have to be stimulated by reduction sales. Some dealers question the wisdom of these, but, at least, they prevent the necessity of carrying over too large a stock.

Builders' Hardware—A good deal of spring buying is being done in this line. Little is being sold for immediate use.

Some Spring Orders.

Heavy Hardware—Here the ordering is fair. Horse nails, as stated above, have been dropped considerably. The exact figures are shown in the current market report.

Spring Goods—A few orders for hinges, wire goods, and such lines are coming in. The volume is not great as yet, but that there should be any orders at all is giving satisfaction.

TORONTO.

Toronto, January 25.—Business is not overly brisk. It has been in excess of the trade done during January, 1911, and the jobbers are quite satisfied therefore. January is never a very busy month in the hardware trade and the severe climatic conditions have served as an additional drawback.

Booking from the spring demand is quite satisfactory. The travelers report that their customers are inclined to estimate the probable demand liberally and are ordering in accordance. This tendency is not confined to any one section but seems to be pretty general.

Collections Not Good.

Although there is nothing in the situation to create alarm, it seems that collections are none too brisk. Of course, collections never are good at this time of year. Trade being dull, money moves slowly. Still, the difficulty experienced in getting the money in is not greater than is usually met with at this time of year; and no one is worrying.

Seasonable Lines.—Trade in snow-shovels, sleigh bells, robes, weather strip and similar lines have been steady this winter, starting rather later than usual and, consequently, seeing a greater prolongation than usual. Quite a little briskness is still noted in each line. Large numbers of small orders are being sent out.

Spring Booking Brisk.

Spring Goods.—The travelers' order lists now contain a fair proportion of the goods which will sell when spring arrives. Wire netting, screen doors, hose, rakes, garden utensils, lawn mowers, and even refrigerators, are now being ordered. Much of the demand is for May 1st delivery, but some specify early shipment.

Shelf Goods Brisker.

Builders' Hardware.—There is a better demand for builders' hardware and all varieties of shelf goods. Sorting orders only are received, but they are coming in so rapidly that the total is reaching proportions unusual at this season of the year.

There is likewise a healthy demand for all varieties of tools.

Heavy Hardware.—Booking is satisfactory, some good orders for spring requirements having been placed. Price quotations are:—Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Household Goods.—Trade shows reasonably brisk in all lines. Being of a staple nature, trade in household goods is maintained at a fairly even level the year around. Demand is beginning to veer toward the spring lines. It is stated that the hardware trade is showing more interest in the vacuum cleaner and that sales will be heavy this year.

Sporting Goods.—The skate trade started later than usual and has been maintained fairly steady ever since. Good orders are still being placed, although it is apparent that the end of the active demand is now close at hand. There is a brisk call still for hockey sticks and supplies but other lines are now quiet.

The Western Hardware Market Situation

Weather Has Moderated and the Travelers Are Now Able to Make Better Progress—Spring Ordering is Satisfactory, but Present Demand is Quite Light.

Winnipeg, January 22.—At last the severe weather appears to have been broken and during the last week westerners have been able for the first time in five weeks to walk about with their fur collars turned down. Snow has been conspicuous for its absence this year and in many of the cities wheels are being used instead of runners. The result of this mild weather, however, will be felt within a short time, as it is expected it will mean a livening or quickening of trade, which during this cold period and especially the last two weeks, has been very slow.

Travelers are now all on the road and are endeavoring to make up for lost time. Considerable difficulty has so far been encountered, however, and it is expected that considerable time over their regular allotment will have to be allowed them this year to cover their territories. Orders for spring lines have been very satisfactory and in one or two instances shipments have already been made. It is not expected, however, that the rush will be on for another month and in the meantime general sorting orders for all kinds of shelf goods are the ones receiving the most immediate attention. The time, however, is being utilized by preparing these later shipments so that when the movement does start all firms in the city expect to be in fairly good condition to get their goods out without the least delay.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 3c.

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Stove Orders Light.

Stoves.—Even in this line orders for immediate shipment have been light this week and no particular line appears to control the demand. Spring orders so far received are very satisfactory and it is hoped that they will increase very materially during the next few weeks. The movement for spring delivery has already started. Several car loads of through orders for points further west such as Regina, Calgary, Edmonton, and Saskatoon have already left the factories in the east and are expected to pass through Winnipeg during this week. This is the first movement of the spring rush in this line which it is expected will be very heavy this year. The local orders have been fairly heavy, in fact just enough to give the trade a bright outlook. Gas ranges are looked forward to being very popular this year and a large movement is expected this spring.

In other lines nothing new is being offered and prices are holding firm at last week's quotations.

Demand is Light.

Paints and Oils.—As in other lines of the hardware market the demand for paints and oils is very light and business at the present time is being devoted to the preparing of spring orders for later shipments. Linseed oil mills are at work and the prices as well as the trade is regarded as being firm and are holding steady at $1.05 for raw and $1.08 for boiled. Turpentine is also unchanged and firm at 95c in small lots and 85c in bulk. The amount of spring bookings so far this year are far in excess of last year and very healthy trade is expected to take place during the spring months.

F. A. Ricard Elected.

Sudbury, Ont.—F. A. Ricard, hardwareman, is a member of the council this year and has been elected chairman of the finance committee.

Methods of Retailing Paints and Varnishes

Continuity and Persistency in Paint Department

Two Qualities Which Must be Infused into the Selling Plans —Efforts to Arouse Interest in Paint Should Not be Confined to Active Seasons—Work Should be Kept up Through Winter.

Continuity and persistency are words which express much from the standpoint of the retail dealer. Continuity of purpose and persistency of effort form a combination which ensures success.

The dealer who handles his affairs with a well defined purpose, a carefully planned out policy which manifests itself in every detail and leads to general uniformity, is bound to have things run more smoothly than one who makes no effort to maintain a fixed policy. If he backs it up by never relaxing in his efforts, never allowing his interest to flag, he is bound to reap an almost unbounded measure of success. Continuity and persistency. They are splendid words, and with a deep significance for the dealer.

The necessity is felt in the paint department for a policy of continuity. System is needed in selling paints. There must be a well defined selling plan, including attention to advertising, window displays, effective interior arrangement and personal effort. The retail dealer should not be afraid to do the same thing twice. If it happens to be the right thing in the first place, it cannot be repeated too often.

Accelerated Value of Sales.

The law of acceleration applies to business methods. The writer recalls a conversation which he had some months ago with a prominent Ontario retailer. The latter was telling how he had started to hold a kitchen and laundry supply sale every February some eight years before. "Each succeeding sale has been bigger than the one which went before," he explained. "People have come to look on the sale as an annual event. They remember it, wait for it and made a point of coming to it. It will continue to grow bigger and more popular with every year."

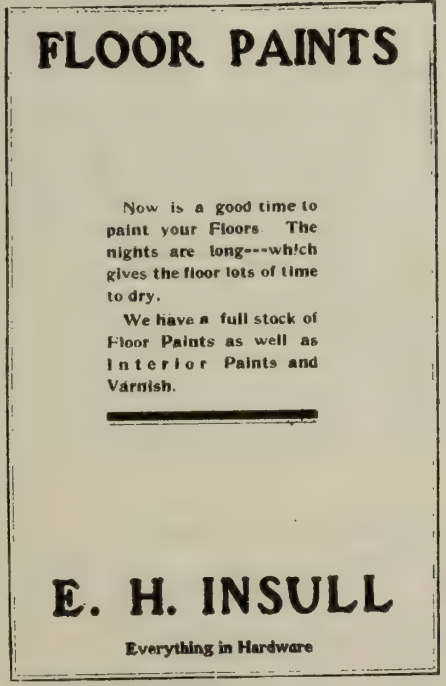
Apply the same principle to the management of the paint department and results will show. A case comes to mind where a dealer held a special sale of paints, oils and brushes every year during the week preceding Good Friday. His customers came gradually to remember this fixture and they patronized the sale in an ever increasing degree.

The continuity of policy thus shown was serving the double purpose of impressing the fact on the public that painting should be started early in the year.

The writer has spoken with dozens of persons who could tell the times of year when the Toronto departmental stores held special sales in certain lines. They had the different dates indelibly fixed in their minds.

Continuity of Service.

It would not do to omit mention of the necessity for continuity of policy in the matter of service. If the average person has come to understand that the best of service can be counted upon at a certain store, they will continue to deal there. The good effect of intelligently explaining the use of some variety of paint to a customer on his first visit and following it up by prompt delivery is completely lost if he meets with carelessness or neglect on his second visit.



A mid-winter paint ad. set in double-column space—It brought results.

"I made it a point to impress on my clerks that they must never sell paint or varnish to a customer without making sure that he understands how to apply it," declares a progressive dealer. "If he professes ignorance on any score, they must take the time to explain it to him fully. Even the best of clerks have a tendency at times to content themselves with making sales. If the customer does not ask, they let explanations slide. I now, insist, however, that they broach the question to every customer."

Keeping Up the Work.

And now as to persistency.

It is highly necessary for the dealer, who desires to improve his sales of paint, to never let up in his efforts. The average property owner is endowed with a wholesome respect for dollars and cents. He probably recognizes that his property would look better if given a fresh application of paint, but he has to be argued into spending his money for that purpose. Once will not convince him. It is only by repetition of effort and argument that he can be brought to buy. Paint selling is to quite a large extent a matter of education.

Persistency, therefore, is one of the qualities which must be infused into the paint campaign. The work must be kept up regularly. The weak point in the selling plans of a large number of dealers is that they stop when dull seasons arrive. As soon as the fall demand begins to slacken up they allow their efforts to slacken also. From that time on until the beginning of spring they probably pay very little attention to the paint department.

The chief fault to be found with a policy which excludes anything but seasonable activity, is that the public is allowed to forget the subject of paint, whereas it is necessary to keep the matter ever before them. There is some demand during the winter months—enough to justify any efforts for trade that the dealer may put forth. There is, in addition, the advantage to be obtained by keeping people interested and preparing them to buy when more seasonable times arrive. It might seem folly to a good many dealers to advertise paints at this time of year. But an advertisement nevertheless would bring results. It might even be safe to say that the results would be immediate and tangible; in other words, that sales would be made.

One Dealer's Plan.

A dealer who believes in keeping up his paint advertising right through the winter months is E. H. Insull, of Craik, Saskatchewan. Mr. Insull has been talking paint to the burghers of Craik at regular intervals and, despite the fact that the usual winter weather has prevailed there, he has had results from his advertising. A copy of one of his advertisements is herewith reproduced.

Mr. Insull is advertising for winter trade and he has prepared his copy with a seasonable application. The argument advanced is a good one; that people are kept in during the winter time and that the need for floor paint is greater as a result.

Getting Ready for Boat Repairing

Paint is Needed to Put Crafts in Commission, and J. C. Harbec, of St. Johns, is Already Preparing to Supply Ship Owners With This—He Gains by Being Prepared—Dealers in All Places Where Crafts Moor Might Profit by Having Stocks on Hand Early—They Thus Suggest Where Paint May be Bought.

It's never too late to mend, and it's never too early to get ready for mending. This is being born in mind now by some dealers who are preparing for the repair work which will shortly be started on boats and ships.

J. C. Harbec, of St. Johns, Quebec, is already getting in a supply of paint made especially for barns and boats. He is not selling much of this line at present, but by having it on hand he is suggesting to men who will later need paint, where they can get it.

A Shipping Town.

St. Johns is the scene of a good deal of shipping. Boats of considerable size are now drawn up there for the winter. They will be abandoned for some weeks yet; and then, when spring comes, there will be a rush to get these crafts in commission. Owners will be hard at it caulking and patching. And the paint pot will be in demand.

Here is where Mr. Harbec will get the trade. He is building for it now. As soon as the paint is needed the boat owners will come to his store. They know they can get what they need there.

This boat painting in St. Johns is a big thing. But there are other lines which need attention too. There are the barns and the houses. Mr. Harbec has stocks will enable him to meet the early demand in this line, and declares that this is of the greatest advantage.

Others Might Prepare.

St. Johns is not the only place where ships moor for the winter. There are cities and towns almost without number where this is so, and the dealers of these places would do well to remember that they benefit by having their stock of paint on their shelves early. There is nothing that suggests painting like the sight of paint.

This work on boats, canoes, and skiffs, is not very far removed now. As soon as the rivers and lakes begin to break up those owning crafts get to work—the ship owner in a business like fashion, the canoest almost with hilarity. To him this work of painting suggests Saturday afternoons upon the river. He will not be ready to miss any of these. With the first touch of spring he will be at work

Varnishes! Paints! Oil! Turpentine!

For House, Steamer or Yacht

We earry only a few lines, but they are the highest grade we can buy. Two-thirds of the cost of painting goes for labor, therefore the best is the cheapest.

E. B. MARVIN & COMPANY

THE SHIPCHANDLERS

1202 Wharf Street, Foot of Bastion

A Victoria, B. C., firm are trying for the ship trade in paints early—A two-column advertisement published this month.

TO MAKE WATERPROOF PRODUCTS.

An important announcement is made by Pinchin, Johnson & Co., Toronto, to the effect that they have made an arrangement with the A. C. Horn Co., New York, manuafcturers of structural waterproofing compounds, by which they become the exclusive manufacturers of the Horn products in Canada. For this purpose, they have added a department to their general paint and varnish business to be known as the waterproofing department. Among the materials to be manufactured are: Dehydratine damp-proof paints for sub and super-structural work; hydralite, a substance used for waterproofing concrete, and symentrex, a waterproof cement paint.

WOOD TURPENTINE A FACTOR.

It is becoming increasingly apparent that wood turpentine is now a factor in the United States. A publication issued at Savannah in the interests of turpentine and rosin makes the announcement that one concern located near the seaboard in the State of Georgia, have just completed a plant that will have a capacity of 400 barrels of rosin and 4,000 gallons of spirits of turpentine daily. There will be about 800 men employed, including those who will be engaged in the wood yards and camps to supply the concern with the timber to be used in extracting the wood turpentine. It is also stated that one of the large American paint companies have ordered from this company for the present year 400,000 gallons of wood turpentine.

FIRE DESTROYS WAREHOUSE.

Montreal, Jan. 24.—Fire, which broke out in the William Street Warehouse of the Hobbs Manufacturing Company about 7 o'clock last night, completely gutted the building. As yet the loss is not known.

The destruction of this one warehouse may result in the opening of a larger one which will take the place of the two which the Hobbs Company have operated in Montreal.

NEW CEMENT PLANT.

The Portland Cement Construction Company has let the contract for the immediate construction of a cement plant on Tod Inlet, Vancouver Island. The work of excavating for the buildings is now under way and it is expected that the work on the upper structure will be started soon.

Yes, Sir! Every solitary Paint Need you can think of is well and profitably filled by the famous ML Line.

ML Paints—Made just a little better and more carefully than the next best paint—they stand the weather test wonderfully well. It pays to sell paints that last—your customers blame YOU when they don't

ML Floorglaze—A self-varnishing finish in solid and transparent colors—that dries glass-hard over night. Has a non-scratchable, brilliant surface. Good for any paint use.

Elastilite Varnish—In a class by itself—so good that even amateurs get fine results. Sell it without a doubt that it will give perfect satisfaction, for any varnish use, indoors or out.

ML Flat Wall Finish—a new hot-water-proof flat finish for plaster, burlap or wood, in beautiful interior shades. Sell it to lovers of beautiful sanitary homes.

THERE'S a good proposition waiting at our office for aggressive dealers. There are samples of all our lines at all three of our depots. Get in touch with us. We are aggressive folk ourselves, and take care of our trade.

DECORATIVE AID DEPARTMENT just started, offers any dealer suggestions and assistance for house decoration free. Stencils supplied. Every aid given to get you orders. Send your problems to us for help. No charge.

Proof Pratt & Lambert Varnishes Sell

The following letter is from a house established 87 years—a house which in its time has seen plans for selling varnish for the dealer come and go. When such a house comes out with the statement that the "P. & L." Line is the ***best*** proposition they have ever had from ***both quality and selling standpoint***, that means best of not one or two lines, but perhaps of almost every line of varnishes on the market. It is your opportunity now to profit by the 87 years' experience of this firm by investigating the Pratt & Lambert Proposition from every standpoint.

THE BOOTH & LAW COMPANY
Varnishes, Paints, Brushes.
Office and Sales Rooms: 59 Crown Street. HOUSE ESTABLISHED 1825.
Warehouse: Water and Olive Streets, New Haven, Conn.
Messrs. PRATT & LAMBERT, New York, N.Y.

LYMAN M. LAW, President.
WALTER B. LAW, Vice-President.
J. HAROLD LAW, Secretary.
CHAS. WEISS, Sales Manager.
December, 11, 1911.

Gentlemen:—We want to say that your line is the best proposition we have ever had, from both quality and selling standpoint. Our future efforts, we can assure you, will be centered on the P. & L. Line.

Thanking you for your kind co-operation, we are; respectfully yours,
C/W **THE BOOTH & LAW COMPANY**

There is no reason why you cannot duplicate the success of this and other Pratt & Lambert Dealers in all parts of the United States and Canada. Pratt & Lambert advertising is creating the same kind of a varnish selling demand. This Spring this demand should be greater than ever, owing to the tremendous Pratt & Lambert Spring Advertising Campaign. Do not let this Spring go by without at least investigating what we can offer you in increased varnish sales and profits.

Weekly Market Report --- Paints

BUSINESS SATISFACTORY.

Ordering for spring delivery is now the order of the day, although some demand for present requirements is felt. On the whole, the condition of trade is satisfactory.

A slump of 4 cents in the price of linseed oil is reported at Toronto.

Some difficulty in securing certain lines is felt.

MONTREAL.

Montreal, January 26.—Little real activity is noted this week. The market is not without interest, owing to the position of turpentine, and the possible difficulty in securing glass; but no immediate price changes are causing either worry or rejoicing. Trade is quiet, on the whole, but the future does not seem to offer any cause for alarm. Generally the orders sent in by the travellers are satisfactory, and it seems that the coming business will be as great as that which has just been concluded, perhaps considerably greater.

The burning of the Hobbs warehouse in Montreal, it was feared, might limit the supply. The trouble, however, is not serious. On the whole the local supply of glass is good, so the dealers will not have to wait for their supply.

Handlers Paying More.

Many of the dealers are placing their orders for spring delivery already. They have given up the idea that a lower level will be fixed when spring comes. It is just as well that they have, for, except the lower freight rate, which is bound to come with the opening of navigation, there will be no lowering in prices. Indeed, a rise is much more likely. The handlers are already facing a rise themselves, for they have had to contract for their glass at a figure about 6 per cent. in advance of that which they have paid during the past few years.

White Lead.—Here there is little change. The pig has not altered greatly in value. Indeed, what drop there was a few weeks ago has been largely offset by the rise of this week. So, the corroders are unable to get the raw material they will need later, at any more advantageous figure. The prices on white lead, therefore, remain steady.

Linseed a Little Lower.

Linseed Oil.—Fluctuation is noted here, though this is not serious. It would appear that the reports of a poor Plata crop were exaggerated. Any way the price tendency is downward. Last week the oil was commonly quoted at .95 and .98 for raw and boiled respectively. This week a number of concerns state their ability to supply the oil, in fair sized lots, at .93 and .95.

The fear that there is to be a scarcity of oil does not seem exceedingly well founded. That the prices will revert to the higher level of last year is, fortunately, also unlikely.

Turpentine.—A certain see-sawing is noticed here. Early last week 72 cents was the common quotation, a figure which was later dropped to 70. This week the price has been generally advanced two cents, but the situation in Savannah seems to point to another reduction. At this point there are about 25,000 barrels at the present time. It is a good supply, and one which prohibits the possibility of an immediate shortage. Turpentine will likely be quoted at 70 cents within a few days.

Ordering for Spring.

Putty.—Little is being sold now. There is an ample supply on hand.

Mixed Paints.—Varnishes and Japans are being sold in satisfactory lots. This is a good season for the sale of these lines, and progressive retailers are making the most of it. As far as mixed paints go the principal thought is for the spring. The travellers are booking orders for this season, and are meeting with good success.

Glass.—Some good sized orders have been received of late, but the really heavy demand is over until spring comes again. Evidently the business then will be heavy, for every indication is that the building operations will be large.

TORONTO.

Toronto, January 25.—The paint and oil market is not giving out any evidences of great activity. There is, however, a satisfactory amount of business being done and, taking it all around, the month of January has been a little better, perhaps, than the first month of the year 1911. The travelers report that dealers are showing a tendency to order early and in large bulk. All indications point, in fact, to an exceptionally big spring trade in paints.

One manufacturer states that he secured more orders for spring business during November and December than he is doing now.

Linseed Down Four Cents.

The feature of the market has been a slump of four cents in the price of linseed oil. The change was put into effect on Monday and was due largely, so it is said, to competition rather than to anything in the market which would justify a decrease. The jobbers have since complained that the price is too low to allow a fair margin and there was some talk toward the end of the week of an advance. The price of English oil has been higher than the local quotation. There is not a great deal of oil being sold at present and what business is being done is for spring delivery.

Dullness in Turpentine.

There is a little dullness noted in the turpentine market, owing to the severe weather that has been experienced all over the American continent. About this time last year, turpentine was advancing by leaps and bounds. It is impossible to say what the course of the market will be this year. If there should be any of the usual demand for gum turpentine, the prospects are that an advance in price will take place. One element that is interfering with the speculative tendency on the primary market is the suit instituted against the big turpentine handlers under the Sherman Act. It is not anticipated, however, that the case will come to a head this year and there should not be any prolonged effect exerted, therefore, on the market on that account.

The price of turpentine has not changed locally and demand has been small.

White Lead Inactive.

The white lead market is sluggish at present writing. Dealers are not showing any marked tendency to order for spring requirement although some booking has been done. It is apparent that some dealers regard the present price as high and are inclined to wait in the hope of lower quotations. Whether this hope will be realized in extremely problematical. Enquiries received indicate that the spring demand will be heavy.

Glass.—Very little business is being done in glass now. Some orders have been filled during the last few days but they have all been of a sorting variety.

Putty.—The situation here shows no change, business being light. Standard putty is quoted as follows: Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same: Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

Prepared Paints.—The amount of booking done for spring delivery has been satisfactory. Quite a little business has also been placed for immediate requirements.

"Color Suggestion Book."—A Special B-H Selling Help.

¶ All B-H Agents are supplied with Color Suggestion Books that illustrate and describe modern methods of finishing floors, walls, ceilings and woodwork of the various rooms of the house, and give harmonious color combinations for outside painting.

¶ These Books enable the B-H Agent to place before the prospective buyer complete color schemes. The customer sees the finished effect of the different color combinations and is able to select the materials and colors best suited to his requirements.

¶ Write our nearest office for complete B-H Agency proposition.

Every can of

Minerva Paint and Paint Specialties

contains full Imperial measure of an unequalled qua ity.
This means that your customers get full imperial measure not short imperial measure.
Isn't this worth considering?
Think it over.
See us at the Hardware Convention.

PINCHIN-JOHNSON & CO. Established in England in 1834.

CONGO NEVER LEAK ROOFING

How Long Will It Last?

Every buyer of roofing asks that question---"How long will it last?"

That question is important.

We know positively how long Congo will last and are prepared to give every buyer a *real* Surety Bond with every roll of Congo Roofing.

The bond guarantees that Congo, 2-ply or 3-ply, *will last at least ten years*, and the buyer has *absolute certainty* on that point.

This guarantee is issued by the National Surety Company of New York and is enforcible without resort to law and without delay should Congo fail to last the ten years.

The fact that no other roofing manufacturer *can* give a Guarantee Bond like this ought to convince any reasonable buyer that Congo really is the *best* ready roofing made.

We will be glad to send you without obligation on your part a copy of the guarantee and further information.

CONGOLEUM FOR FLOORING AND WAINSCOTING

We should like to send every reader of this Paper a sample of Congoleum. It is fitted for use as a border around rugs, as wainscoting and as flooring. It is a perfect imitation of light and golden oak. Its surface has a high polish. It is unusually durable. The price is very low. Write for samples and further details.

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

Stark, Seybold, Limited, Montreal; Mechanics' Supply Co., Quebec; S. Hayward & Co., St. John, N.B.; Miller-Morse Hardware Co., Winnipeg; E. G. Prior & Co., Limited, Victoria, B.C.; Hobbs Hardware Co., London, Ont.; Fife Hardware Co., Fort William, Ont.

We have the finest machinery and every facility for producing best quality

WIRE NAILS AND STAPLES

These nails have perfect heads and points and we have taken special care in the drawing to obtain a regular gauge. Every keg is guaranteed to be full weight.

We also recommend our WIRE BALE TIES, and O and A WIRE as the best on the market.

Write at once for prices and full particulars.

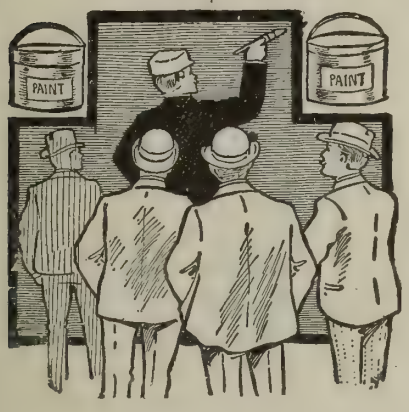
Paint Success



Always with a Ramsay Paint agency goes success. It is very simple. Ramsay's Agents carry nicely labelled goods. Ramsay's advertising prompts a quick sale. The color cards and schemes help a customer to decide. Then there is no haggling over the price. Ramsay's Paints are reasonable for pure paints, as everybody knows. The quality always satisfies, and there is a reputation and a guarantee behind them. A Ramsay Paint agency carries besides mixed Paints, those well-known lines, Ramsay's Varnish Stains, Ramsay's Enamels, Ramsay's Leads, Ramsay's Carriage Paints, Ramsay's Oil Colors, every one of them money makers and quiet satisfaction. Ramsay's Catalogue is brim full of interesting sellers. Are you interested?

An All-round Interior Varnish

THAT BRINGS EXCELLENT RESULTS

The durability of this compound in combination with its elasticity makes it especially useful for floors, linoleum, grained work and furniture.

It works with remarkable freedom, is impervious to water and will not scratch white. It may be rubbed and polished when thoroughly hard.

Our price and proposition are right—it will pay you to communicate with us at once.

A Bargain

must have two essentials in order to deserve the name—it must be useful and cheap.

Hardware and Metal

offers a real bargain in its Want Ad. Department. Here, at the lowest possible cost, you can place before the very persons most interested, **hardware men and men in the allied trades,** any respectable business proposition.

Here is Proof of the Value

SIXTY SWISS ARMY RIFLES, at $2.50 each. Box 920, HARDWARE AND METAL, Toronto. (48)

F. Y W. Braithwaite, Blind River, Ontario, who inserted this ad., says "It brought us replies from nearly every province of the Dominion."

The Cost was 39c

If you have any proposition, in which you consider hardware dealers, clerks or travellers would be interested, try a want ad. in

Selling paint to the farmer

FORTUNATE is the paint dealer who has a good trade among the farmers. They are the largest individual users of paint for houses, barns, outbuildings, wagons, carriages, implements, tools, windmills, fences, tanks, etc. The constantly increasing cost of lumber is making the farmer give more attention to the protection and preservation of his property by keeping it more carefully painted. The dealer in the small town should feature paints and varnishes for farm use in his store windows and newspaper advertising.

SHERWIN-WILLIAMS PAINTS & VARNISHES

include every kind of finish needed by the farmer. The quality and durability of each is of the highest standard. The farmer is just as appreciative of quality as any one, and S-W Quality gives him service that makes him ask for it again. We are running a strong advertising campaign in all the leading Canadian farm and home journals, from Newfoundland to British Columbia, telling the farmer what S-W Quality stands for in paint and varnish. Next spring is going to be a profitable one for the S-W small town Agents. Write for particulars and secure the Agency now.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

MISCELLANEOUS

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THE year, we offer unusually good bargains in second-hand typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS and paperhangers—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paperhanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

When writing advertisers kindly mention having seen the advertisement in Hardware and Metal.

The World's largest manufacturers of Pure Lamp Blacks

stand behind every pound of lamp black sold under the Bear Trade-mark shown on the accompanying illustration of label.

Less than nine years ago, this firm, *as a firm*, did not exist, although the men composing it have been many years in the lamp black trade.

Since that time we have been able to secure two-thirds of the entire lamp black business of North America.

Consistent good quality did it!

A recent addition to our plant, made necessary by the increasing confidence of the trade, makes our factory the largest of its kind in the world.

We manufacture all the Standard Grades of pure Lamp Black. Our product is sold by all reliable wholesale houses.

Wilckes Martin Wilckes Company

NEW YORK, N.Y. - U. S. A.

We Have Confidence

in our goods. We know exactly what goes into our varnish and we know why it is good. We know that our business is increasing and we know that this is because the public and the hardware men recognize a good thing when they see one.

Are you handling DOUGALL VARNISH? If not, you have not the best to offer your customers.

There is no better varnish than Dougall Varnish; and if you handle it, it will pay you well.

VARNISHES

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

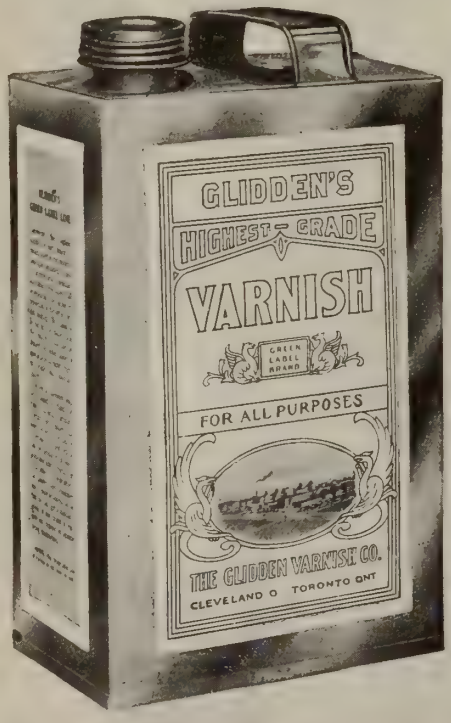
There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months'—five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.



We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

REPUTATIONS

Are built of things already accomplished

Not Mere Statements

It is all very well for a Manufacturer to endeavor to sell his goods, but he must deal with a Dealer that knows his business better than anyone else, and who is not likely to stake his reputation on another's "Say-so."

We don't expect any Dealer, particularly "A live wire," to take hold of our line unless we can show him plainly and conclusively that its sterling quality will pay him handsomely, and *keep on* paying him for years to come. When we first put

100% PURE

"The paint the people want"

on the market, some years ago, we did so without muck-raking our competitors—nor did we employ legerdemain methods—or make claims which the material in the can would not substantiate. Knowing the quality was unquestionably the best, we were perfectly willing to allow it to assert its

SUPREMACY

without courting Black art, and this it has done through all these years of unusual business success.

The making of paint when dismantled of its cloak of mystery—of the supposed magic hand that has created fortunes for some, is in reality mankind's ingenuity, developed along accurately gauged lines, gleaned from the school of actual experience, and it is just this knowledge of ours, acquired from 35 years of paint-making, that gives to the trade *satisfaction* justifying continued patronage.

While superior merit alone will sell paint after a fashion, still superior merit plus the most productive help in the way of honest, vigorous, convincing advertising will accomplish wonders. As we cannot possibly improve the honest quality of

100% PURE

"Cultivates the painter's interest"

we have been constantly hustling, thinking, working out ideas to help the trade and the way our sales have jumped ahead is substantial evidence that we have assisted our Dealers in boosting their business.

After all, business success means—Satisfied patrons. The superior quality of Martin-Senour Paint 100% Pure accumulates sales and every sale widens the way for more to follow. Lost opportunities are full of regrets, so wear that contented look by writing for our proposition *now*—while you think of it.

THE MARTIN-SENOUR COMPANY, LIMITED

Pioneers of Pure Paint

Montreal - Chicago - Winnipeg

Do You Want to Buy Something That You do Not Know Where to Get ?

EVERY week Hardware and Metal receives letters from subscribers stating that they are in the market for certain goods, but that they do not know where they can be procured.

They ask us if we can tell them from what source they can procure the wanted articles. This is a service we render cheerfully.

When you become a subscriber to Hardware and Metal this service is part of what you buy.

We have facilities for procuring information about new goods, novelty lines, articles not usually sold in hardware stores but occasionally asked for, etc., and these facilities are at the service of our readers.

We are glad to get these requests for information and no service could be more cheerfully rendered

We Spent $100,000.00 on New Plant

Because the greatly increased demand for **CHURCH'S ALABASTINE** made it necessary. The demand came because

ALABASTINE

is so greatly superior to kalsomine. Kalsomine decays on walls and ceilings; in time it rubs and scales off; and then it's such a nasty muss to wash and scrape the room when it has to be done over again.

ALABASTINE is a pure and sanitary wall-coating that will not rub off, and is ready for use in cold water. We have the equipment for filling all orders promptly. These are some of the reasons why we advise you to feature Alabastine—and to order NOW direct or through your Jobber.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

COPYRIGHTED, 1909, BY THE STANLEY RULE & LEVEL CO.

Stanley Tools

STANLEY METALLIC PLUMBS AND LEVELS are so designed as to remain true under all ordinary conditions.

The metal cases in which both the Plumb and Level Glasses are set, are machined to fit accurately the machined surface of the supports which are cast in the frame of the Level.

THE CASES are held firmly on the supports by means of the cone centers which engage each end of the case. The center lines of the cases and cones are eccentric. With this arrangement the Levels can be readily adjusted or new glasses inserted.

Only the very best of materials and highest grade of skilled labor obtainable enter into their construction, and they carry with them the guarantee of a Company which has been manufacturing high-grade Carpenters' and Mechanics' Tools for over half a century.

When "CANADA" Cement is Specified

the builder is assured of uniform strength, fineness, color and setting qualities. Rigid tests, under the supervision of our general superintendent and general chemist, maintain this high standard of quality.

Each barrel is guaranteed to weigh full 350 pounds (gross) the maximum cement barrel weight.

Mills in all parts of Canada enable us to make prompt delivery.

Being in competition with, and controlled by the market for such materials as steel, wood, clay products and natural stone, the price of cement is governed by conditions. At present these permit of a high grade material at a very reasonable price.

Specify "Canada" Cement for buildings, bridges and concrete blocks, and be sure of satisfaction.

Tobin HIGH SPEED BITS

Do The Work In Half The Time And With Half The Labor

Every hardwareman knows our reputation as **gunmakers.** We now offer you a proposition in **"Bits"** that is just as worthy of your consideration about guns. For this new Bit---the Tobin High Speed---is "different."

Double Thread Double Point, Equals Double Speed

Clearance for Chip

It's self-feeding—needs no force to get it through the wood, as does the common type of bit, with its single screw point.

The Tobin High Speed Bit has a **double** screw point, also a double thread—and a clearance so great as to amply provide for its fast cutting ability.

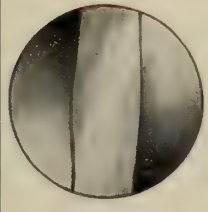

Fig. 1
Cross Section View of Ordinary Bit

Fig. 2
Cross Section View of Tobin Bit

Relative penetration of different types of Bit. Taken from actual photograph after sixty turns of each

Learn More About This Bit

To know the Tobin High Speed Bit, is to speedily realize that it's worth featuring.

No hardwareman can fail to recognize its superiority.

We are offering it, as we do our guns, on the "money-back-if-not-satisfied" plan.

The public is invited to **try** it on this understanding. **You** are invited to stock and sell it with our absolute backing.

Write us for particulars to-day.

Not only More Work---But also Better Work

With the "Tobin" there's never any jumping or clogging. It doesn't gouge—it cuts.

The toughest wood never stumps it.

Goes through the hardest grain as if the way was greased.

Cuts clean as a whistle and true as a die.

Works faster in end-grain than cross-grain.

A new and improved idea in auger-making.

The exclusive features that cause it to do **more** work, also cause it to do **better** work.

The Tobin Arms Manufacturing Company, Limited, Woodstock, Ontario

TRADE Gillette MARK

KNOWN THE WORLD OVER

Keeping Them Satisfied

NO doubt you have noticed this peculiar "kink" in human nature—that the average man is much better pleased with a purchase if he knows that thousands of others are buying and using the same article.

That is one reason why **GILLETTE Safety Razor purchasers remain GILLETTE enthusiasts.** They see big, forceful GILLETTE advertisements in all the best newspapers and magazines, and they naturally conclude that **thousands of GILLETTES** must be sold every month to make such advertising possible.

But if a man seldom or never sees an advertisement for the razor you sold him, he is very likely to conclude that it is a "dead one"—and it seems to him that it pulls harder than ever.

So you see the GILLETTE advertising is planned to serve a **double purpose.** It induces men to come to you to buy—and it **clinches their satisfaction** with the purchase. Incidentally, it brings them in again for more blades, and sends them abroad to **preach the GILLETTE'S superiority.**

As our 1912 advertising appropriation will certainly not be curtailed, you can count on keeping Gillette purchasers satisfied, and on **SELLING to their friends.**

It is with a good deal of pleasure that we are looking forward to meeting the Ontario hardware dealers and their friends again at the Guelph Convention. We always get good ideas from you who meet the shaver face to face – we try to give you some others in exchange – and we certainly do have a good time.

Strong, durable, well balanced tools, of the same high quality of material and workmanship as other "Yankee" Tools, which to-day are without equal.

The blade and ferrule are highly polished, the handle of hardwood, finished in dull black, making a handsome appearance.

Each tool is thoroughly tested and the blades positively guaranteed not to turn in the handle.

Your Jobber will Supply You

No. 90, Standard Style, Fourteen Sizes, 2 to 30 in.

Satisfied Customers

Your customers depend on YOU for the Quality of Steel in their Harvest Tools. They want to buy as cheaply as they can, but whatever they pay, they expect **Lasting Quality.**

Your interests lie in handling goods of Moderate Price, of Pleasing and Substantial Appearance—to attract the farmer—and of a **Quality that will win his favor and hold his trade.**

In view of these facts we are "standing pat" on our old reliable line of

BEDFORD HARVEST TOOLS

because we know of no better line under Factory Label or Jobbers' Special Brand.

Some Lines are Higher in Price, but None are Better Quality or Finish; Many Lines, Inferior in Quality and Finish, are held as high in price.

Compare the Handles

of our **BEDFORD** Tools, with those of Higher Priced "Special Brands."

You will find None Better than **Bedford,** and some not nearly so good.

BLACK DIAMOND

GENUINE SIBLEY GRASS SCYTHES

have attained a Wonderful Popularity, based purely on their Quality—Cutting Quality—and Correct Shape.

Every Scythe Warranted Perfect; Replaced Free of Charge if Defective.

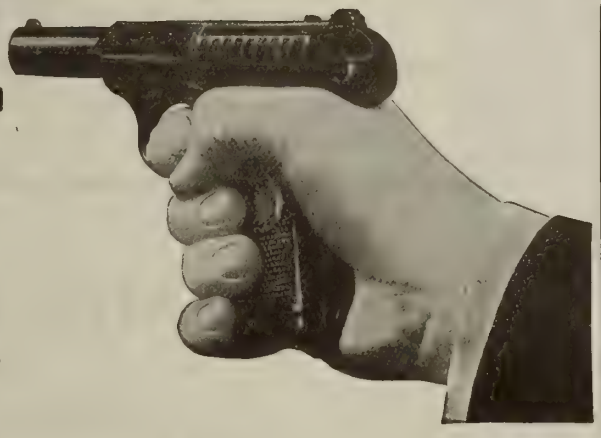
Detective Burns Carries and Endorses

THE GREAT SAVAGE TEN SHOT PISTOL



Whole police forces are now being armed with this wonderful defender.

Banks are equipping their Tellers and Messengers.

By placing a cartridge in barrel, capacity can be increased to 11 shots at one loading.

.32 Calibre.
Blued Finish.
Length Over All, 6½ inches.
Weight, 19 ozs.

THE QUICKNESS OF THE SAVAGE

Think of the importance of quickly and easily getting a pocket gun into action. When a gun is needed, it is needed quickly. When life and death hang in the balance and the fraction of a second will decide the issue, there is no time to operate slow, stiff, complicated and awkwardly placed safeties. No time to get your fingers around a clumsy, bulky, wrist-straining grip. No time to think of any of these things or to have the attention distracted.

With the SAVAGE this is not necessary.

The safety of the SAVAGE is placed where the thumb will fall on it naturally.

Here's the Machine

---that competitors are copying

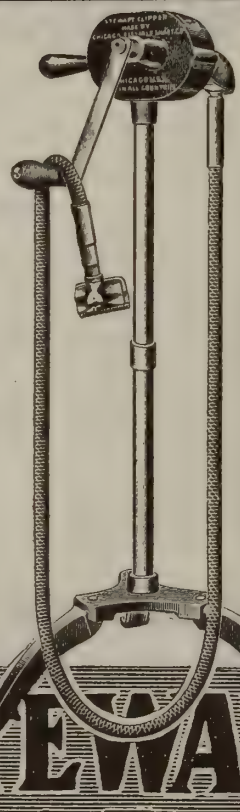
The superiority of our Stewart No. 1 over all clipping machines on earth caused one manufacturer to pilfer the idea. It was a steal—but, without a perfect result. The shape of the "counterfeit" resembles the Stewart; so does some of the mechanism. But the real principle of construction—the process that put the Stewart in the lead—they only guessed at. Don't sell "guesswork" machines. Sell the original machine—the machine that's backed with a **quarter-century guarantee.**

Why the Stewart?

We don't ask "shrewed buyers" to buy our machine because it was made in a certain country. We have more respect for their common sense. We just want horse-owners and dealers to know why the Stewart machine is the **best** machine.

CHICAGO FLEXIBLE SHAFT CO.

Write at once for our big free catalogue



---the Stewart No. 1

Horse Clipping Machine

The Stewart No. 1 has gears made from cut steel, hardened file hard, working parts enclosed in an oil bath and is equipped with plenty of best quality flexible shaft and the world famed Stewart one-nut tension knife.

We help the dealer

We are willing to give individual advertising to dealers who believe in square dealing and who want to sell more horse clipping machines. Write ***at once*** for particulars of our co-operation policy with hardware men.

It's to your interest as well as ours to sell the **Stewart,** because it's to the best interest of the **user** to **own** and operate one.

Is your profit keeping pace?

Cement has become one of the farmer's daily necessities. His demand for it, active twelve months in the year, is growing by leaps and bounds.

The demand is being stimulated by the most energetic educational campaign ever undertaken in Canada.

A $3,600 prize Contest for farmers was conducted in 1911, and the second contest will be held this year. Advertisements in newspapers and farm journals — The book, "What The Farmer Can Do With Concrete"—A quarterly magazine, "Farm Improvements."—Booklets on every phase of concrete work—Lectures to farmers at agricultural colleges. These are some of the means now being employed to increase the demand for concrete."

Are you getting your share of the profits from this publicity?

We are anxious to help you get it. We will send you wall files, handsome steel signs and copies of all publications. Our Publicity Department is always glad to answer any inquiries you desire to make. In addition to this service, we send you the names of those farmers in your community who have inquired about concrete, giving you valuable "tips" on prospective purchasers.

Last, but not least, dealers who handle "Canada" Cement are building up a permanent trade on this newly-awakened demand, because they sell the Cement that always gives satisfaction.

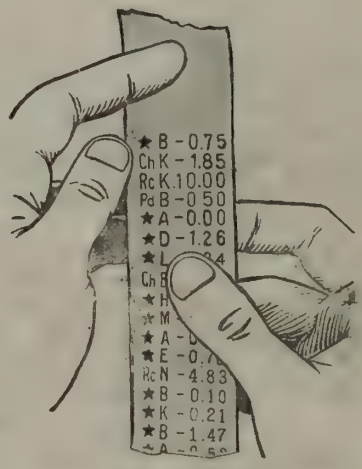
HOW DO YOU KEEP TRACK OF THE DETAILS OF YOUR BUSINESS



THIS WAY or THIS WAY

There are innumerable questions for which you cannot find an answer.

Maybe there is a shortage—and you cannot account for it. Someone paid a bill—and you have no record of it.

You paid someone else's bill—you cannot remember which it was.

You never know how much money *ought* to be in your cash drawer.

You are not sure that all goods sold on account were properly charged for.

You do not know which clerk made the mistakes—or which clerk sold the most goods.

You are trusting too much to luck—depending too much on your memory.

The National Cash Register keeps track of all the detail for you.

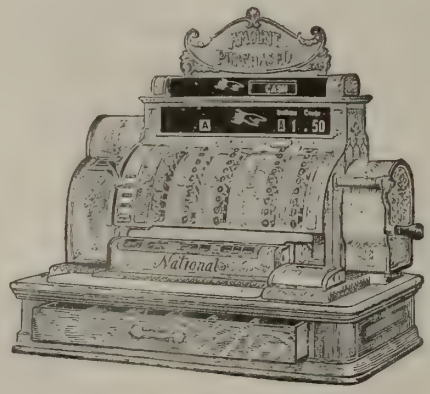
You can see at a glance—any time during the day—a printed record of every transaction that has taken place in your store.

How many cash sales have been made.
How many charge sales have been made.
How much money has been received on account.
How much cash ought to be in the cash drawer.
How much goods each clerk has sold.
How many times your cash drawer was opened—by whom—and why.

Keeps you in absolute touch with every detail of your business, to a penny, every day.

Balances your day's business in five minutes. Stops all guess work. Takes care of all the details, giving you time for the important things.

The National Cash Register compels everyone in your store to make an accurate record of each transaction.



You can pay for a National Cash Register out of the money it saves you. Investigate. Write for booklet.

METALLIC CONTACT

When a bearing is not lubricated, or the oil film has broken down and the shaft rests directly upon the bearing, they are in metallic contact.

It is a common occurrence for the weight of the shaft to squeeze out the oil film over night, and when the Engine is started up, heating and abrasion take place before the trouble is discovered. An ordinary bearing metal can be used successfully if kept thoroughly lubricated, but as this is difficult, unless the lubrication is forced, it is neither safe nor economical to use such metals. We recently published a letter showing that Magnolia Metal had been running on a motor drive head shaft for sixteen years, and for six years of that period it had not received a drop of lubrication. We also recently published a letter showing 50% saving in oil, because the engineer had been able to use his oil over and over again "until it was all used up" and everybody knows that filtered oils lose their lubricating qualities. We also published test made by the United States Government using **water** as a lubricant.

These letters and test, and many others, of similar character, go to show that Magnolia is largely independent of lubrication, and therefore is not liable to injury from scant or inferior lubrication and stands up where other bearing metals go down. The use of Magnolia will end your bearing troubles.

SPECIAL OFFER

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2000 subjects. Price 40c. post paid. We do not aim to make a profit on these books. We buy them in large quantities as an advertising medium and give Engineers benefit of low price. They are highly spoken of by Engineers. Address Montreal office.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. Today these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

We have just closed one of the largest year's

Business in our History

¶ This is concrete evidence of the growing popularity and demand for the Bissell Sweeper.

¶ Ever since the advent of vacuum and suction cleaners on the market there have been many who were ready to sound the knell of the carpet sweeper industry, but the growth of our business shows how inaccurately they have gauged the public demand.

¶ It is obvious that the Bissell cannot be displaced by any other sweeping device, as it is always handy, runs easily, cleans thoroughly without injury to carpets or rugs, raises no dust, is noiseless, and comes at a price within the reach of every pocketbook.

¶ The Bissell sweeper is sold under a policy of fixed prices that insures a good profit to every dealer, and with a consistent demand has become a **staple specialty** for the dealer to handle.

We will be glad to mail you a copy of our early Spring Announcement, setting forth the free advertising aids we furnish to dealers

Import GLASS

Mr. Hardwareman

All Import orders for sheet glass taken by us are placed with none but reputable manufacturers.

Our buyer visits Europe twice yearly and personally placed orders, therefore having first hand knowledge of the quality of glass manufactured by the various factories.

This compared with methods adopted by some of placing all orders by mail, not knowing to any degree of certainty just what quality of glass will be supplied until it was delivered, gives our customers a very great advantage.

Why Not Place Your Import Order With Us

And let us prove the above statement.

Hits the Mark

Among the thousands of readers of Hardware and Metal it seems reasonable that someone wants what you have to sell, or that someone has to sell what you have tried in vain to buy, that someone is hunting the opportunity you have to offer.

The want ad. columns of Hardware and Metal are the simplest form of simplified advertising. No ad. writer need be employed, no drawing or cut need be made, no knowledge of display type is necessary, for display type will not be used in these columns. All that you have to do is state your wants, state them simply and clearly and send to any of our offices along with remittance to cover cost of advertisement. No accounts opened in this department.

Don't despise the want ad. because of its small size or small cost. Don't forget that practically all the hardware merchants, clerks, manufacturers and travellers read our paper each week.

RATES:—

2c. per word first insertion.
1c. per word subsequent insertions.
5c. additional each insertion for box number.

A Personal Chat With You About Ourselves

MAILING LIST VERSUS SUBSCRIPTION LIST.

A few days ago a manufacturer remarked to one of our representatives that a competitive paper had shown him a list which seemed to him very complete. They intimated that a copy of their paper was sent to this list each month, and as they offered a rate a little below what we were asking, he was rather inclined to give them an order.

This man failed to realize that what we were selling him was not type, or ink, or paper, but rather the regularity with which the trade look for our paper and read it each issue.

An advertiser has only one chance of getting any benefit from his advertisement in any paper, and that is when the dealer actually takes up this paper to read it.

We could hand over our mailing list to any of our competitors, and it would be of very little use to them. They might send copy of their paper to every one of our subscribers, but they would not read it, and, therefore, the advertiser would get very little benefit from this circulation.

Dealers who will not pay the subscription price for a paper would not read it if it were sent free, in fact, most of them would not agree to take the time to read these papers in which they are not interested for ten or twenty times the value of subscriptions.

Many of our subscribers have been regular readers of our papers for periods ranging up to 25 years. The reading of their trade newspaper giving ideas from which they can increase their sales has become part of their regular routine work of the week.

A few days ago one of our subscription representatives came across a hardware dealer who intimated he had made $600 through seeing an advertisement for a certain line of rifles in Hardware and Metal. He answered this advertisement and a little later on placed a large order and found these guns specially adapted to his district, with the result that his profits totalled the figure mentioned above.

Almost every one of our subscribers can point to some instance during the past few years where they had secured ideas through some one of our papers, which meant increased sales and increased profits for them. It is because dealers have secured such practical benefit from our papers that they continue to read them regularly.

It is such points as these that constitute the good-will of trade newspapers. It is not the number of copies sent out each issue that really counts, but the reception a paper gets from its readers.

About two years ago the good-will of a trade newspaper in United States with a circulation of about 15,000 per issue, sold for one and a quarter million dollars. There are probably half a dozen trade newspapers in the United States with average circulation of less than 15,000, the good-will of any one of which would bring at least one million dollars. There are also trade newspapers claiming circulation of anywhere from 15,000 to 50,000, the good-will of which would not bring $25,000.

This may seem peculiar, but every manufacturer of high-grade goods has much the same experience. As soon as he makes a success of his line, a dozen firms spring up with imitations closely resembling the original article in appearance. The original article was probably sold on a small margin of profit with the expectation that the real profit would be made on repeat orders. The imitators, however, in most cases make their goods as cheaply as possible, and secure a big margin of profit, as they know they cannot fool the same people twice.

Our competitors may be in the same position some day that we are but it will take years for them to build up this reputation, and they will have to give a better service than we are giving before they will be able to induce any of our subscribers to drop any of our papers in preference for theirs.

A PAPER THAT IS CAREFULLY READ.

Some idea of the eagerness with which the coming of Hardware and Metal is awaited, and the care with which it is read, was given the Eastern Editor of the paper who recently visited Smiths Falls.

It was about 10 o'clock on Saturday morning that the editor called upon R. Hawkins. In the course of conversation, Mr. Hawkins said something about the price of turpentine. "Where did you hear that?" asked the editor. "Why, I saw it in Hardware and Metal this morning," replied Mr. Hawkins.

The paper had only reached the store an hour before. The Editor, who had been traveling for several days, had not seen the issue just out, so Mr. Hawkins was able to give him this information about the Toronto Paint Market.

A moment later, in talking to C. Frank Ready, Mr. Hawkins' chief clerk, something was said of window dressing. Mr. Ready thereupon picked up the newly arrived Hardware and Metal and asked for some explanation of a sketch illustrating a unique window trim in F. C. Lariviere's Montreal store. Mr. Ready had studied the paper as carefully as the short time it had been in the store would allow, and he had picked out the article of especial interest to him.

Comment is hardly necessary. Any advertiser will see that a paper read thus eagerly and carefully is the kind of medium in which it pays him to talk of his goods. What he has to say in the advertising pages will receive careful attention, when careful attention is given the editorial section.

CAN TELL CLERKS WHO READ HARDWARE AND METAL.

J. S. Mitchell, of Sherbrooke, recently paid an unsolicited tribute to Hardware and Metal.

"I am trying to get all my clerks to read the paper regularly," he said. "In a month I can always tell which ones have been studying it. There are in the editorial pages many good ideas for the clerks as well as for the heads of departments and the managers."

"Young men need such inspiration as Hardware and Metal gives them," added Mr. Mitchell. "I am not one of those who think the young man of to-day is not as good as the young man of a generation ago, but now as always there are some who think more of what they are going to do to-night than of what they are going to do five or ten years hence. They need the enthusing which your paper gives."

SERVICE MEANS SATISFACTION

After all the value of any vacuum cleaner depends on the manner in which it does the work—the way it cleans carpets. There is no value in the machine which works poorly and does service badly. For easy operation and satisfactory results one has only to try the

February the Month for Special Sales

Trade is Dull Ordinarily, but Can be Revived by Featuring Certain Lines—Cutlery and Silverware Can be Made ActiveSellers—The Experience of one Dealer.

February is one of the best, if not the very best, month in the year for the holding of special sales. This applies to all branches of trade and with particular force to hardware. The reasons are both numerous and obvious.

In the first place, business is always dull during February. Trade flickers fitfully throughout January and dies down to the mid-winter minimum in the month that follows. The necessity is greater then to take some measures to stimulate business activity.

Secondly, a sale can be conducted best during periods when the regular business of the store is light. More attention can be paid to the sale and the regular business does not suffer. February is the zero month in the trade calendar and is selected, therefore, as the best time to conduct special campaigns in certain lines.

The Rule Followed.

Having thus picked out the best time, it devolves upon the hardwareman to select the best lines to be featured. The rule followed by dealers who carry on special sales is to select the lines which are not called for much in the ordinary course of trade at that time. It is not necessary, for instance, to hold special sales of screen doors in early summer or snow shovels after the first fall of snow. The demand is there and does not need to be brought to the surface by special efforts. There are other seasons, however, when these goods are not in demand; and then it is advisable to hold sales.

To illustrate, watch the advertising columns of any large newspapers during January and see how persistently the dry goods and departmental stores feature "whitewear sales." The idea is somewhat incongruous. Whitewear does not seem a good line to feature for sale during January frosts and storms. That is just the point. There is no natural demand for whitewear and consequently the big stores set out to create it. All doubts as to the success of their efforts would be dispelled by one glimpse of the throngs of befurred and warmly bundled women who attend these sales.

The working out of the same idea has led to the vogue of February furniture sales, August overcoat sales and other regular fixtures in the average big store calendar.

What Lines to Feature.

The hardware dealer could safely follow this plan in deciding what to feature during February. Pick out a number of lines which carry a good profit but which are not actively in demand.

One of the first considerations would be a sale of cutlery and silverware. Although cutlery sells more or less steadily the whole year around, there are some seasons which are comparatively dull; and February is one of them. Demand is keyed up to a high pitch before Christmas, and a certain reaction sets in during January and February. The dealer knows that activity will return in a short space of time but, if he is fully awake to trade possibilities, he will not be content to let the demand revive of its own accord. He will take steps to bring it along and will bridge across the break in his cutlery and silverware profits. The sure way to accomplish this is to hold a special sale, featuring the goods as strongly as circumstances will allow.

Methods to be Employed.

The methods to be employed in this connection can be summed up in the one word: advertise. People are not likely to extend their shopping during February beyond the limits of sheer necessity, unless the man who has goods to sell employs some unusual means to break through their indifference. The average person will buy only if he feels it is to his distinct advantage to do so and it devolves on the dealer to prove that such is the case.

The newspaper is the most potent factor to be used in this connection. The store window is a big help but the weather man must be overcome here. A well frosted window has no attraction for the passers-by. If the weather is cold, people hurry along with their faces buried in mufflers and coat collars, looking neither to right nor left. But the merchant makes up what he loses in this way by the fact that people stay in more during the evenings and study the daily papers longer and more attentively. It is through the medium of the newspaper, therefore, that the dealer should strive to create an interest in his February sales.

The next step is to display the goods to the best advantage. This can be done by appropriating a front position in the store. A show case or two should be utilized for the goods on sale, flanking a table on which some of the more popular lines could be shown. Price tickets are an essential feature of the special sale. Double interest can be aroused in goods which are clearly and distinctly priced.

In the matter of price reductions, it is impossible to set a rule which all should follow. Some contend that it does not pay to give any reduction, urging that, by doing so, the dealer's ability to secure his regular price at other times is seriously impaired. This may be true, but the fact remains that a reduction, no matter how small, is an inducement which few people can resist, and this is one of the main reasons why special sales of unseasonable goods can be made so successful. If the fact is made reasonably plain that the price is a special one, which cannot be expected at any other time, the ability of the dealer to secure the regular figure at all other seasons should not be seriously interfered with.

However, this is a matter which every dealer must settle for himself. No dogmatic rule can be laid down. A discount might make the sale a brilliant success in one place and yet prove a bad policy elsewhere.

Other Special Sales.

There are a number of other lines which could be very successfully sold during February on the special sale basis. Paints, tools, dairy supplies, laundry accessories, are among the first to suggest themselves.

The writer is acquainted with a hardwareman who arranges one special sale every week during February. He decided to adopt this policy three year ago, the compelling circumstances being the extreme dullness of trade during that month. "I figured that I couldn't lose," he explains. "My clerks didn't have much to do anyway and the sales would not interfere with the regular business. I took a leaf out of the book of the departmental store and started to boom the lines which were not selling to any extent. The system has proven a 'howling success.'"

He holds each sale two days, Friday and Saturday. His advertising campaign is conducted with spirit and people attend, literally, in droves. The revenue from these sales constitutes over 50 per cent. of his total turnover for the month of February. The real point of it all is that the goods thus featured were formerly among his slowest February sellers.

Lesson 8---Complete Course in Cardwriting

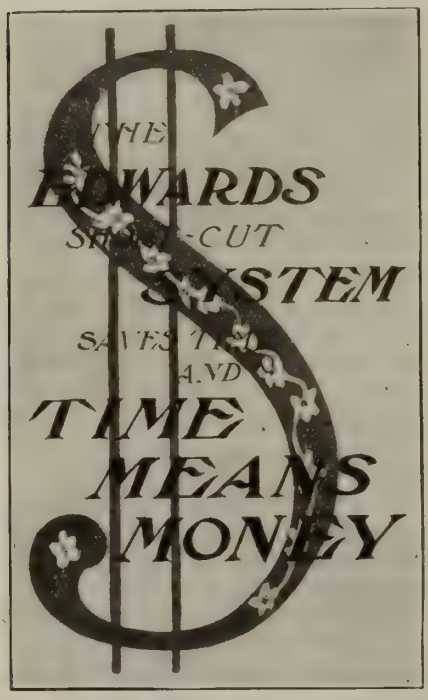
The Edwards Short Cut System --- Showing One of the Speediest Brush Stroke Letters Used in Modern Cardwriting --- The Slant Roman

(By J. C. Edwards. Copyright Canada, 1911.)

The greater speed a cardwriter can attain and yet turn out a neat, clear card, the more valuable he is, for in this day of hurry and scurry, the man who gets there first is the one who wins his spurs first.

In the accompanying plate we show the fastest practical lettering that the cardwriter of to-day will be called upon to do and yet it is as legible as its mate, the Brush Stroke Roman.

The greater speed lies in the slant which is the natural tendency or posi-



Card showing application of letter here described.

tion for fast forward movement. For instance, a bicycle rider leans as far forward as he can when he is racing ; a horse, in running, leans in the same way and it is so in most things when speed is desired. However, this gets away from card-writing and from the real reason why this lettering is more quickly made than the straight style.

When you first started lettering, did you not find your lettering had an almost irresistible tendency to lean over to the right ?

This is accounted for by the hand taking its natural untrained course as regarding card-writing and its training from infancy in writing.

Now that the student has mastered the straight up and down style of showcard lettering so far, we will give a little instruction in the more speedy brush work.

The beauty of this style lies almost entirely in the degree of success in getting a uniform slant to the letters and in the sharp clean spurs.

The best way to start is to take your practice paper and rule it in a series of pairs of lines. Then note the angle of the first stroke in letter B, not A, for the first stroke in A is necessarily at a greater slant than is necessary in most of the other letters owing to the two slanting lines coming together to form the letter face. Place your square or any ruler on the card or practice paper at the same angle as the above mentioned 1st stroke B, and draw parallel lines faintly between each pair of cross lines at intervals of two inches or so. This will give you guide lines to regulate your angle until you get it thoroughly fixed in your mind. Practice making parallel lines with the brush at the above slant. Don't be afraid to practice.

You will notice that, while this style of lettering is very much the same as the preceding brush stroke Roman of plate 6, there are a few points of difference which tend to add speed.

Take for instance the letter C and compare the brush stroke, second, or finishing stroke, in the above plate with the corresponding stroke in plate 6, and try to make both. You will find it requires more effort on your part to manipulate the brush to execute the last one.

Then look at the centre stroke (No. 5) in the E and compare it with the series of strokes (5, 6, 7 and 8) in E of plate 6. The same applies to F. You also gain time on stroke 2 of the J, strokes 2 and 3 of the S, and stroke 3 of the G.

It will be noticed that a few of the details are worked out in the lower right hand corner of the plate. This shows the spurs in detail, also the formation of the top of the T, E and F.

The shading shown in this plate is the right hand lower style, and is one that is not commonly used but is merely demonstrated here to give variety.

It is harder than the left hand lower as shown in plates 6 and 7, and is also more difficult than the right-hand top shading previously shown. We do not advocate its use on this style of lettering as it is not speedy enough. However, practice makes perfect and speed is the result of perfection.

The brush must be held always at the same angle to ensure correct shading. You must take for granted that the light falls on this letter from the left hand top corner of the card which would throw a shadow as indicated on the plate.

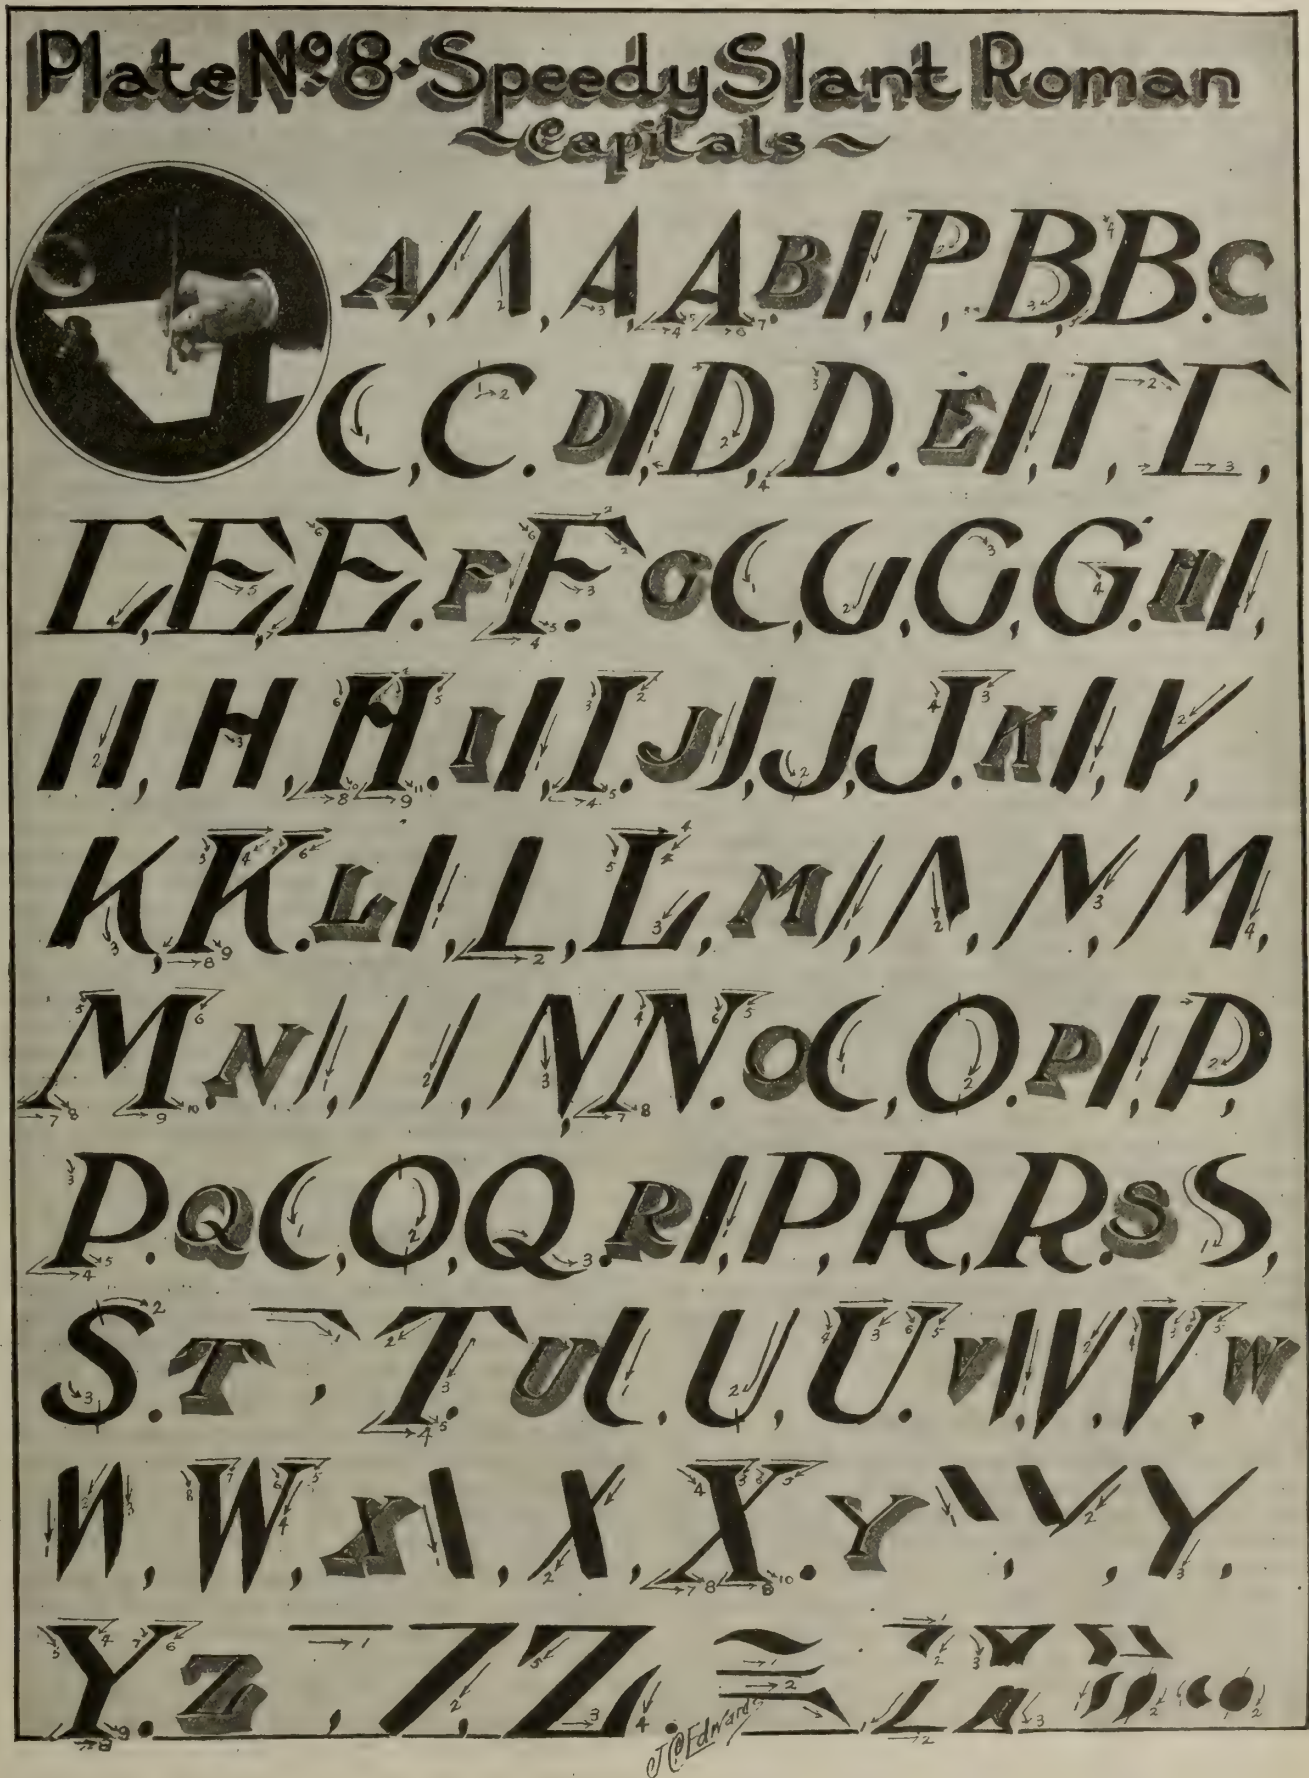
The accompanying card shows the speedy slant Roman put in actual use. The decoration consists of a large $ mark in grey, forming a relief for the lettering.

The dollar mark carries out the idea of the inscription and strengthens it to some degree.

The speed slant lettering is particularly well adapted for use on price cards and general quick store work. Practice the straight slant strokes until you have perfected them, and got the angle firmly fixed in your mind.

For particulars regarding brushes, etc., write to Hardware and Metal, or to the author, J. C. Edwards, care of MacLean Pub. Co., 143 University Ave., Toronto.

Showing position of brush in hand while lettering.



Cut illustrating Speedy Slant Roman. Follow the arrows and practice carefully. See article.

FIGHT PARCELS POST.

Does the average retail dealer realize to the fullest extent the danger that the Parcels Post movement spells for him? Although there is nothing definite in the way of legislation now pending in Canada, the movement has not subsided. Many of the members of the present House of Commons are strong advocates of Parcels Post and are only waiting an opportunity to force the issue. It may not come during the session now in course, but there is no certainty that it will not. Like the sword of Damocles, it hangs over the head of the retailer in Canada, suspended by a thread.

Much depends on the outcome of the fight now being waged so briskly in the United States. If the agitators of the measure win there, it will not be long before the question comes up in this country. That contingency may arise, of course, before the question has been fought out to a finish by our American cousins.

In the meantime, the Canadian retail dealers should not for a moment lose sight of the matter. The old saying, "in times of peace prepare for war," might well be applied. Continuous, unremitting, emphatic voicing of the strong reasons why Parcels Post would have a bad effect, will go a long way to defeat the movement. The hardwaremen who assemble at Guelph in annual convention from February 19 to 23, should not let the opportunity slip to put themselves on record as irrevocably opposed, and with just cause, to the measure.

THE VALUE OF IDEAS.

Recently, the first installment of a sketch telling of the rise of a merchant, appeared in the Saturday Evening Post. The story is supposedly true, and tells of the rapid climb of a lad from general helper in a hardware store, to sales manager of a great New York concern. The secret of the climb was ideas. The youth deliberately worked to get ideas, and these, once to hand, he harnessed.

There is food for thought in that sketch. Some of the illustrations may not apply to present day conditions; but the general statement that ideas are what count, is absolutely true—when it is also borne in mind that the ideas must be worked and not allowed to lie fallow.

It is ideas which make for success. There is a retailer in Montreal who moved there some sixteen years ago with practically no money. He had to take a small and unimportant stand. It seemed he must fail. But he worked to get ideas, and he worked the ideas when they came. He would take an article and bring its use home to those passing, in some startling way. He has been known to sell two hundred dozen of a certain class of mouse traps while his opposition, further down the street, was selling, perhaps, a tenth that number. He used his head, and it is the man who is going to do that who succeeds.

ATTEND TO COLLECTIONS NOW.

It is some time now since anything has been said in these columns on the score of collections. This temporary avoidance of the topic has not been due to any lack of material; for at the present moment collections are very much in order.

The merchant who meets with the fullest measure of success, judged from a purely financial viewpoint. is the one who either conducts his business on a cash business or sees to it that his credit customers pay up promptly and in full. Collections are in order all the year around. This is one of the particular seasons, however, when it is most urgently necessary to get outstanding accounts settled.

In the first place, the dealer has finished stock taking, has closed his books for the old year and is starting the business of the new. It is highly desirable that the start be made on a sound basis. The carrying of heavy book debts is by no means conducive to soundness and the first of the year should see the inauguration of a brisk and determined collection campaign. As an additional reason it might be urged that the dealer has plenty of time on his hands just at present to look after it. Letters should be sent to every person on the books of the firm and, in cases of extreme obduracy, it would pay the merchant to make personal calls. Finally, the hardwareman is in need of the money now. This need is felt the whole year around for that matter but ready cash will be found particularly desirable at this juncture. The hardware dealer is entering upon his heaviest buying season and good collections now will considerably lighten his financial burdens later.

FOR THE FUTURE, WHAT?

Metals are causing no little uneasiness to those handling them just now. There seems no telling what will happen next. Men have almost lost confidence in their ability to read the signs. They are wondering—wondering what the future will bring forth.

Tin—which dropped so remarkably some short time ago—has recovered greatly. Copper, after dropping in price, has advanced once more. Spelter refused to be cheap. But these are present conditions. They promise nothing as to the future.

Tin, indeed, some are now predicting will go considerably lower. Certainly handlers have had difficulty in marketing their future at the prices now quoted. Those needing the metal have either good stocks on hand, or are holding off. Either attitude may mean anything or nothing.

Similarly uncertain is the situation in copper, and spelter is not much better. It is nervous work dealing in metals these days of the sydnicates. But fortunately the small buyer need not worry greatly. He may lose somewhat by buying inopportunely; but he need not lose

any sleep through shame at his mistake. Men who make the market their daily study are finding it well nigh impossible to see into the coming months.

METAL PATTERN SERIES.

The announcement that Hardware and Metal had secured the serial rights to the metal pattern correspondence course of L. W. Koser was one of particular interest. The first article will appear in the February 17 issue, and the series will be continued regularly from that date on, one article being published each week.

This series is undoubtedly the most complete and practical yet published in any trade newspaper. It will cover every phase of metal pattern work from the preliminary step of selecting drafting materials to the most intricate problems that the metal worker has to face. Readers interested in metal work should make a point of reading each article closely.

KEEP CLOSE TAB ON BUSINESS.

The United Cigar Stores Company, who have retail stores all over the American continent, are noted for their systematic methods of conducting business.

In the first place the location of a new store is not made without knowledge that it will be a suitable and profitable one. Facts are first secured as to the number of possible customers passing prospective store sites. For instance, a corner in a city where many men congregate is a favorable location for a store.

Their operating system has eliminated all guesswork and drudgery. The president in New York knows at any given time just how many cigars of any brand are in stock in any store and the amount sold in any given time. This is made possible from reports from all stores which are daily placed on file. These reports show the weak and strong spots in all stores and one helps to check or advance those spots in others.

An inventory is taken every day. The United Cigar Stores carry more than a million dollars worth of stuff. The president has a book showing at any time just how the business stands. This book contains a list of heads such as "gross sales," "rent," "miscellaneous wages," "cost of lighting stores," "miscellaneous expenses," "general expense," "money spent in schemes over which the store has no control," such as special advertising, etc.

Formal inventories are taken by men sent out from the home office twelve times a year, arranged at irregular and unexpected times, and they have also daily reports of sales.

"Yearly inventories," says the president, "wouldn't be of any use to us—or half-yearly or quarterly. Too much can happen in three months. We want to know what is wrong before anybody else knows."

There are many points in the policy of this company in their system to know exactly where they stand, which would be well worth careful study on the part of retail grocers.

POINTED EDITORIALS.

Trade does not come very readily during February, but it can be brought.

* * *

Eternal vigilance is the price of immunity from the evils of a Parcels Post system.

Quality should be the main plank in your selling platform. It is solid, lasting and broad.

* * *

Too high a value cannot be placed on ideas. The man of ideas, of initiative, is the man who succeeds.

* * *

The paint dealer who makes use of manufacturers' selling helps will find that they are well worth using.

* * *

The snow may be deep in the fields but it is, nevertheless, not too early to talk wire fencing to your farmer customers. They will be buying soon.

* * *

Paris green is likely to be low in price this season. Knowing this in good time will enable dealers to use the reduced cost as a business getter.

* * *

"Hitch your wagon to a star," wrote Emerson. According to a man who has seen much of hardware ideas are the harness with which to do the hitching.

* * *

"Cutlery for Christmas Gifts." It is a good sign, but not suggestive of progressiveness as it appears in a Montreal store window on the last day of January.

* * *

Write your advertisement in two minutes and the average reader will pass it over in two seconds. Thought must be reflected from the advertisement to induce thought.

* * *

There is no royal road to learning, but initiative is the one short cut to success. A new idea will sometimes carry a man farther ahead than long and earnest application of an old one.

* * *

American traveling men are up in arms against certain practices that hotel-keepers have carried on at the expense of the traveling public. United protest and action should soon compel reform.

* * *

During February is the "psychological moment" to hold special sales. Trade is dull and there is plenty of time to feature the sales; and being dull, trade is in need of some measure of stimulation. It works both ways.

* * *

Manufacturer and dealer should co-operate in all matters tending to the improvement of trade where the manufacture profers assistance in the form of "selling helps," the dealer should not fail to avail himself of the same.

* * *

Judging from the number of enquiries and letters of commendation received, our course on card writing is one of the most popular features of Hardware and Metal. In view of the favor with which these articles are being received, it has been decided to run them twice a month, instead of once a month as formerly.

* * *

Travelers demand relief from the bodily discomfort entailed by enforced stoppage at small town hotels. They demand that better accommodation be provided and no one will say that they are asking too much. The traveling man has more reason to fear the bed and board of the average country hostelry than the dangers of travel by rail and water.

Some Criticisms of Hardware Advts.

Good and Bad Points Commented Upon—Advertising Copy Should Not be Writen in a Hurry—Careful Thought and Consideration Needed in Preparing Good Copy.

It is not an easy matter to write a good retail advertisement. The hardwareman who is anxious to get the best results from his advertising should never lose sight of that fact. Ad. writing should not be approached with overconfidence in one's ability or with under estimation of the amount of effort and concentration required to produce really readable matter.

Many merchants leave the writing of their advertisements until they can find a few spare moments when nothing else is pressing for attention. They utilize those moments by "dashing off" a few bald lines of hastily considered matter, strung loosely together and sprawled over a page of paper in some semblance of form. The sheet is then sent to the newspaper office and the printer does his best to construct an advertisement out of the material thus provided. Just how good that "best" is one can learn by glancing over the advertising section of almost any small newspaper.

The writer of an advertisement shoul bear in mind that he has such a small space to use in presenting his proposition that there is just room for the best argument he has to offer, and nothing else. Now it takes thought and careful consideration to determine what is the very strongest possible argument you can find on any one subject. The successful ad. writer is the man who finds that strong point and who uses it to the exclusion of all minor ideas and considerations.

A man cannot get right down to the root of any matter without earnest and concentrated thought, and the folly of attempting to "dash off" an advertisement becomes very apparent, therefore. The chances are that the man who writes his ads. in slap-dash fashion, utlizing the first idea that comes to mind, loses sight entirely of the main idea and wastes his space by dissertating on a side issue.

Looking After an Ad.

There is another mistake which must be avoided just as sedulously. Many dealers consider that they are through when they have written the ad. and sent it off to the newspaper office. In reality, the work only starts there. Care should be taken to see that the printer catches your idea and follows it out to the letter. If possible, it is wise also to read the proof personally and insist on the utmost accuracy. Some of the advertisements which appear on the opposite page show evidences of lack of attention in this respect.

The advertisements reproduced are not, on the whole, fairly representative of the standard of retail hardware advertising. While there are good points in some of them, there are also bad, and in some the bad points outnumber the good.

Special Sale Publicity.

No. 1 (Three column space).—The Manitoba Hardware and Lumber Co., of Virden, Man., have violated none of the first rules of good advertising and have on the whole a good ad. The heading tells its story, but the second line "lasting until January 31st," might have been eliminated profitably. Why tell the people that they have until that date to take advantage of the special values offered? Why put a premium on procrastination? In the opinion of the writer, that line seriously, crippled the effectiveness of an otherwise good ad.

The strongest point is the concise and positive way in which the prices are shown. The layout is good and is only slightly detracted from by the elaborate and antique border used.

No Prices Quoted.

No. 2 (Two-column space).—J. F. Turnbull, of Fillmore, Sask., does not take the people into his confidence enough to make his ad. an effective one. To announce reduced prices only to withhold any definite information as to what the reduced prices are,is to rob that announcement of its greatest interest for the reader. If the price had been indicated opposite each article, the selling power of the ad. would have been increased 100—yes, even 500 per cent.

No. 3 (Two-column space).—Here we have an advertisement with both good and bad points. The bad points, we believe, can be laid chiefly at the door of the printer. The Pioneer Hardware Co. of Treherne, Man., had two good talking points and they made tolerably effective use of them considering the limited space that they had at their disposal. The layout was planned well but the execution was weak. The printer gave prominence to the heading "Reduction in skates," and then took it away by building a border just as black right up around it. Why such a fancy, useless border anyway? A plain rule would have been more attractive and it would not have set itself up as a counter attraction to the words which the advertiser wanted to stand out.

The Printer Again.

No. 4 (Two-column space. — John Rhodes, of Dryden, Ont., has good reason to complain of the printer's work in laying out this ad. No fewer than five different series of type have been used in making it up! Then look at the typographical mistakes distributed with impartiality throughout the reading matter. Clothes may or may not make the man but printing work can make or unmake an ad.; and beyond all doubt, the ad. in question, has suffered sadly.

Simplicity is a rule upheld by all who have studied typographical problems. The mingling of different styles of type is now held up as a most grievous mistake. A "patchwork" ad. is produced when the printer goes in for variety of type. Advertisers should see to it that the printer maintains one series throughout an ad. as far as possible.

No. 5. (Two-column space).—Allis & Weidenhammer, of Grandview, have not made especially good use of their space. The significance of the ruled lines at top and bottom is hard to grasp. If the space thus used is neither required nor desired, why not leave it blank? White space is better than a close series of lines which most people would find trying to the eyes.

This ad. would have been much more effective had the name of the firm been placed at the bottom and the top space devoted to a good heading. Something relating to the special value or extra quality of the stock carried should have been shaped up into a strong leading line. The chief weakness of this ad. lies in the fact that the subject of price—the ad. writer's most potent argument—has been shunned completely.

No. 6 (Three-column space). — Jas. Frank has planned his ad. cleverly. The use of the white space and the single rule makes the reading matter stand out prominently and invitingly. But the printer, alas, has again taken away from the effectiveness of the copy by using different styles of type.

There is something lacking in the reading matter also. The writer has not convinced; he has failed to "hit the bull's-eye." The statement following that very promising line, "It now remains for us to prove it," falls short of expectations. The proof is left to some future time, when the reader will visit the store to receive the proof. It would have been infinitely better if some proof had been put down there and then in black and white. The object of advertising is to convince people sufficiently to bring them to the store. It does not do to leave all the convincing until after the customer comes. He may never come.

It is an Easy Matter To Make Alluring Statements

Another Matter to Prove Them

IN a recent issue of this paper we made a statement to the effect that by purchasing your Hardware from us you were saving money.

It now remains for us to prove it.

All you have to do is to make up a list of what you want, bring it along and get our prices, and it won't take long to convince you that to buy elsewhere is a loss of money, and to go elsewhere is a loss of time.

Watch next week's Ad. for special prices on Heaters.

JAS. FRANRS.

Veteran Figures in the Hardware Field

No 6—MICHAEL PHILBIN, Montreal.

Yes, the heavy fur collar shown so plainly in the picture to the right, indicates that the wearer of that collar comes from a cold country. And indications are not misleading here, for Michael Philbin—the wearer in question—has lived in Montreal for many years—even since he was born, in fact; and Montreal, though it can be temperate to say the least, can also be decidedly frosty.

Mr. Philbin has seen the Canadian Metropolis grow, and has taken fair advantage of the growth. Twice he has anticipated events. He was the first man to establish a hardware store on St. Catharine Street—the present up-town district. He was the first man to open a hardware store in Westmount. Now retail places of business have so multiplied in these sections that they can hardly be counted, but Mr. Philbin was the first. He was the pioneer.

When recently a representative of Hardware and Metal dropped in at the store of Philbin & Co., Westmount, he found Mr. Philbin busily engaged taking stock. For forty years this man has been active in the hardware business, but yet he is able to attend to details—and there he was at five o'clock, hard at it, listing goods. It was not an easy task to induce this veteran to leave the stock-taking of the articles on the shelf, to take stock. as it were, of his life. Mr. Philbin is exceedingly retiring, and shrinks from anything which at all savors of publicity.

But once started talking of the early times Mr. Philbin becomes less reticent. He likes to remember the old days—the days when Montreal was a comparatively small city, and when St. Catherine Street property sold for less than a dollar a foot. Naturally the thought of lost opportunities to make money in this real estate is associated with some regret. Yet Mr. Philbin has little cause to mourn. His two stores—one in the heart of the up-town shopping district, managed by his son, and one in Westmount, managed by himself—stand as testimony to the success of his endeavor.

Fortune in His Grip.

But if ever a man had a fortune within his grip it was Mr. Philbin. His father owned a great block of land bounded by St. Catharine, Drummond and Stanley Streets. This is now selling for almost fabulous sums, but it was lost to the Philbin family through the fault of friends, for whom the father of Michael Philbin had signed notes.

Michael Philbin was the first man to establish a hardware store on St. Catherine Strect—the present up-town district. He was the first man to open a hardware store in Westmount. He was the pioneer.

Michael Philbin, after engaging in lumbering operations along the Ottawa River for nearly ten years, started to work with Foley & Co. in wholesale hardware. Times have changed since then.

It was about thirty-five years ago that Mr. Philbin determined to start out for himself. He says he had not much money, which will be encouraging to young men of the present day. From the first he did well, though it meant hard work. Some sixteen years ago he moved to St. Catherine Street, occupying a store in the old Queen's Block, where Goodwin's large department store now stands.

People who know St. Catherine Street as it is to-day will find some difficulty in realizing that Mr. Philbin was the first hardware man to move there, and was among the first retailers. Others followed hard after, but Mr. Philbin was pioneer.

Started a Branch.

From the store in Queen's Hall, Mr. Philbin moved across the street to his present stand. Then, ten years ago, he became possessed of the idea that it would be wise to start a branch in Westmount. For five years he operated at the corner of Green Avenue, which even that short time ago was well out toward the western limits; and five years ago moved a little further west to his present stand. Both these Westmount stores have proved successful. Mr. Philbin's idea was correct. The city was growing that way, and while a lot of Westmount trade still goes past his Westmount store to his establishment in the centre of the city, yet the branch catches much business which otherwise would be lost.

In all these years during which Mr. Philbin has been actively engaged in hardware in Montreal, many changes have come about. "The whole scheme of business has changed," he says. "Now many more lines have to be carried. It is that which makes operations more difficult—that, more than the keener competition. A dealer has to keep in touch with many new lines now. He has to be ever on the lookout for these. It is the new goods, the specialties, which now yield a great part of the profits."

During the years—why, according to Mr. Philbin, it is seventy years since he became a Montrealer, though he does not look that old. Well, during these years Mr. Philbin's great interest has been business. Politics were to him taboo. He was asked several times to allow his name to go before the people, but always he thought it better to refuse. Societies find in him a friend, but not an active member. He has had his way to make, and he has worked hard to make it. And still he works. In some men the joy of doing things dies hard.

TRAVELERS' WAGE WAR.

Chicago, Ill., January 26.—Plans were made in Chicago by the directors of the National Association of Traveling Men to wage a relentless war throughout the country against the "unfair" methods used by hotel keepers, baggagemen and railroads "to the injury of the traveler." To make the war effective the travelers voted to increase the directorate from 6 to 24 members.

The traveling men charge that there are numerous hotels where it is almost impossible for a guest to get the same room twice. The price usually is "boosted."

That railroads, by limiting to 150 pounds the amount of baggage that can be carried, and by attempting to do away with the wardrobe trunk, are unjust to the traveler who uses the road once or more a week, as compared with the traveler who uses it only once a year.

By "Mack."

Politeness on the part of the officials of a great railway corporation forms the theme upon which Elbert Hubbard recently wrote a booklet.

I am given to understand it is intended for circulation amongst the employes of the road. The company believes that courteous treatment extended to patrons of the road will reflect itself in increased receipts.

Their expectations will, no doubt, be realized, for the majority of mankind appreciate attention from others.

One of the most important directions early impressed upon my mind on entering the retail business was to cultivate politeness to customers. I thought it an easily acquired accomplishment and was at some pains to extend similar instructions to the store's staff.

In practical operation in the store, daily this application of social virtue to our business operated very successfully. But on one occasion a customer was lost to the store through an excessive zeal to excel in waiting on a lady, prominent socially in the city, by one of the store salesmen.

And this is how it happened:

Many clerks, after the sale is completed and making the change is the concluding feature of the transaction, utilize the time to make various ingratiating remarks calculated to be of a friendly nature. The intention is laudable but sometimes the observations are lacking in the essential quality of tact and fail to please some sensitive listener. This was the atmosphere created when the well disposed hardware salesman addressed the well worn enquiry to the city social luminary. (I mean well used enquiry to our rural friends)! "How are the roads to-day?"

Sounds inoffensive when written, but it apparently contained some hidden inference regarding the lady's local residence which was resented by her.

We, of the store, became aware of the termination of her calls at the shop and learned the explanation from external sources some time after the event. It was what the French term a "faux pas," most unfortunate, and time is necessary to eradicate its humiliating effect. We shall all probably agree on the maxim in business that politeness pays, but when too many topics are woven into the intercourse with customers there is danger of the escape, to our loss and future embarrassment, of the undiplomatic phrase.

Moral: Discuss the weather whenever possible.

Hardware Letter Box

Neu-Tone Oil Paint.

W. H. Turnbull, Brantford.—"Who are the makers of Neu-tone, a flat oil paint in all colors?"

The Martin-Senour Co., Toronto branch 215 Victoria street.

Keen Kutter Goods.

S. J. Fraser, Bradford.—"Can you give me the name and address of the firm manufacturing the Keen Kutter line of hardware?"

Simmons Hardware Co., St. Louis, Mo.

Perkins Toe Calks.

F. E. Hendershot, Mount Forest.—"Can you tell me who makes Perkins toe calks?"

R. J. Perkins, Providence, R. I., is the manufacturer.

Water Softeners.

James Fitzpatrick, Trenton.—Will you send me the address of a firm manufacturing water softeners?

A compound to take the alkali out of water is made by the British American Oil Co., Toronto, Electric Boiler Compound Co., Guelph, and the Canadian Chemical Manufacturing Co., London, Ont.

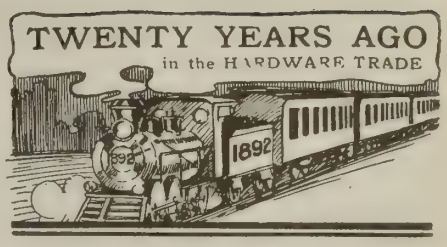
Mazda Lamps.

Bonthron & Drysdale, Hensall, Ont.—"Do you know who makes Mazda electric lamps?"

The Sunbeam Incandescent Lamp Co., Toronto.

Wood-Vallance Bonspiel.

Winnipeg, Man.—The Wood-Vallance curlers held forth at the Union Terminals rink, when three sheets of ice were kept busy and the same number of close games were played. These had an important bearing on the final result of their league, as it practically qualifies the winner to play off for the finals in the two groups. F. W. Lynde is tied with J. Feir for the top of the league in group "A" and J. C. Gillespie has four wins with one game to play in group "B," the only opponent who can tie him being T. Ching, who must win all his games to do so.



The following items are taken from the issue of January 30, 1892:

"The Travelers' Circle of Canada, has sent out an anti-treating circular to travelers and retailers advising that the custom of treating be eliminated as far as possible. It is signed by R. M. Stewart, president, and E. Fielding, secretary."

Editor's Note.—While treating is not yet done away with entirely, there has been a big improvement in this respect and business is largely done on a "dry" basis now. It is interesting to note that E. Fielding is still treasurer of the Commercial Travelers' Association of Canada.

* * *

"Clark, Kerr & Thorne, hardware merchants, St. John, N.B., have been succeeded by Burpee, Thorne & Co."

Editor's Note.—W. H. Thorne & Co. is now the style under which the business is carried on. They have one of the finest hardware stores in Canada.

* * *

"The E. & C. Gurney Works, Toronto, opened up in full blast on Saturday with 110 moulders on, after being closed down for a short time for stock-taking. They are already at work upon their John Bull steel plate ranges and Countess base burners."

Editor's Note.—The present proportions of the Gurney Foundry Co. plant are an indication of the growth, not only of that firm, but of the country generally during the intervening twenty years.

* * *

"A very pretty display of hardware—bronze and brass door knobs, etc.—may be seen in the window of M. & L. Vokes, dealers in builders' hardware, Yonge St., Toronto."

Editor's Note.—The Vokes Hardware Co., of which Miles Vokes is president, are now located in very commodious premises on Queen St. East. J. L. Vokes, who had been a partner in the old firm, is now the president of J. L. Vokes & Co., who conduct a fine hardware establishment on King St. West, Toronto.

The Management of a Retail Business

No. 5—Cash Discounts. (Continued.)

By H. C. Carson, F.S.S.

The foregoing balance sheets (see last week) of course constitute mere memoranda, being based on estimated stock on hand, but they are nevertheless useful as forming a fairly accurate indication of the state of each business at the close of the first quarter of the year.

Although the period has been short, scarcely long enough for any business to find its bearings, as it were, yet both merchants have gained some useful experience in judging human nature. They have both learned the tendency of customers to enlarge rather than diminish the amounts they owe, and that a large proportion of their present accounts receivable was incurred during the first month. No. 1 merchant is especially dissatisfied because he had planned, at the outset, to adhere almost entirely to a cash business. It is very hard, however, to live almost entirely up to any rule, and in this case it is like a horse that is almost always ready to run away. There is no comfort and some danger in driving a horse of that kind.

$10 Coupon Books.

He realizes, too, that a rigid enforcement of the cash rule would most probably reduce the volume of his trade, to the advantage of No. 2, his competitor. After due consideration, a new plan suggested itself, which, in effect, would encourage cash trading and at the same time widen the distribution of his credits and limit the amount to each customer.

Being an industrial district, his patrons mostly received their wages weekly, and he wisely concluded that accounts could be paid weekly and determined upon $10 as the limit of an individual credit. To avoid the inconveniences of book-keeping, he arranged to have coupons printed, in book form, in varying denominations from five cents to $1.00. Each book contained a promissory note for $10 in his favor, which the customer was required to sign on receiving the coupons.

Allowed Cash Discount.

The inducement for cash was 2½ per cent. discount, or $9.75 per book. Coupons representing the amount of each purchase were to be collected on delivery of the goods, and when exhausted a further issue would not be made while payment of the previous book was outstanding. Furthermore, the notes provided for interest from date of maturity, getting over a difficulty which is not met by merely printing on a statement that interest will be charged on overdue accounts. This is a common practice, but has no force in law, because it is not a contract. These coupons bore the book number, for identification, and by cancelling coupons in what was called the outstanding coupon book, prepared for the purpose, the liability on this account could be ascertained with very little trouble at any time.

Such was the plan inaugurated by No. 1 on the first day of the second quarter's business, April 1st.

Merchant, No. 2, in the meantime, had been in a deep study over the condition of his accounts. He had ample receivables to offset his payables, but collections were becoming increasingly difficult and no remedial plan had occurred to him beyond a little extra effort in collecting.

Opportunity to Replenish Stock.

Another thought occurred to No. 1 He had an established line of credit at his bank for $1,000 and it was folly to let this remain idle. He discounted $750 for 30 days, and proceeded to replenish his stock, which had been depleted to some extent. But he did not buy in the same small quantities. Special prices were securable for 5 or more case orders in some lines and these advantages he seized as far as possible, realizing the force of the trite old saying "well bought is half sold." Let us see how they stood at the end of the fourth month.

End of Fourth Month.

Merchant No. 2 sold during the month $2,500, an increase of $500 over the previous month, due to some of No. 1's customers going over to him because of his new plan, which they did not like. Only one-third of the total was sold for cash, however, but he had collected $1,000 last month's accounts, leaving $967 still to be gathered in. Of course his accounts payable, $918 had been paid in the meantime, and also some of the current month, but he was compelled to purchase rather heavily, in order to keep his stock up to standard, these amounting to $2,200, and representing an increased number of creditors. Here is the record (expenses being the same as before), which compare with last month, in previous article.

Cash in hand	$ 183 00
Accounts receivable	2,633 64
Owing to creditors	1,617 67

Merchant No. 1 had also worked on his outstanding accounts of last month, reducing the amounts from $766 to $135. Out of eighty customers he had lost ten on account of the coupon system he had inaugurated. Several new ones had also come to him, attracted by the system, so that, all in all, he had lost but little ground. He had discouraged his good customers from paying cash across the counter, realizing that the coupons were an effective means of holding trade, and consequently his cash sales, exclusive of coupons, were only $150. He had sold 240 books of coupons to eighty customers, or an average of three to each, 60 of them at $9.75 for cash, his loss on this score being $15. All but 60 had been paid for as they fell due, so that his bills receivable stood at $600. He had redeemed $1,850 coupons in sales and therefore his liability to customers was $550, or just $50 less than his bills receivable. His stock had been increased in the meantime, his purchases amounting to $3,500, on half of which he had secured a five per cent. advantage in quantity price, besides two per cent. cash discount. He stood thus:

Cash in hand	$154 83
Accounts receivable	135 00
Bills receivable	600 00
Owing to Bank	750 00
Unredeemed coupons	550 00

His bank discount cost $4.37 and loss on coupons $15, but his gain on quantity price was $87.50 and cash discounts $68.25, a total of $155.75, or $136.38 net.

What Balance Sheets Show.

Space will not permit our going into the next two months at this writing, so we will do as before, construct new balance sheets, basing the profits at 25 per cent. of the sales as before.

Merchandise Account—

	No. 1.	No. 2.
Stock on hand April 1st	$2,125 00	$2,125 00
Stock purchased during month	3,500 00	2,200 00
	$5,625 00	$4,325 00
Sales for month at 75% cost	1,500 00	1,875 00
Stock on hand	$4,125 00	$2,450 00

No. 1 has now a much larger stock, it will be seen owing to quantity buying, but in consequence it will not be necessary for him to go to market quite so often. His balance sheet now stands

as follows, a very creditable record for four months' trading:

Assets—		
Cash in hand		$ 154 83
Accounts receivable	$135 00	
Bills receivable	600 00	
	$735 00	
Less unredeemed coupons	550 00	
		185 00
Merchandise		4,125 00
Fixtures, etc.		1,000 00
		$5,464 83
Liabilities—		
To Bank		750 00
Net worth		$4,714 83
Original capital		3,500 00
Gain (4 months)		$1,214 83

No. 2 merchant shows the following balance sheet, undoubtedly solvent, but with an enlarged list of creditors and more than ever dependent upon his customers to protect his credit.

Assets—	
Cash in hand	$ 183 00
Accounts receivable	2,633 64
Merchandise	2,450 00
Fixtures	1,000 00
	$6,266 64
Liabilities—	
To sundry creditors	1,617 67
Net worth	$4,648 97
Original capital	3,500 00
Net gain (4 months)	$1,148 97

The net gain of No. 1 is only $65.86 greater than his competitor, but No. 2 has done more business, his sales from the beginning amounting to $7,000, against $6,500 by No. 1. The net gain of No. 1 in ratio to sales is therefore 18.6 per cent., compared to 16.4 per cent. by No. 2. Both rates are high, however, and it has just occurred to the writer that the withdrawals of the merchants for living expenses, etc., have not been taken into consideration. This must be adjusted in the next instalment.

Instead of designating the merchants as No. 1 and No. 2 in future it would be appropriate and justifiable to refer to No. 1 as the merchant and to the other as the shopkeeper, for they are growing further apart each month in all the essential features of progressive commerce.

STEEL BILL CARRIED.

Washington, D.C., Jan. 29.—The Steel Revision Bill, reducing the duties of the Payne-Aldrich Act from 35 to 50 per cent. passed the House late this afternoon. The bill was passed by 210 to 109, twenty Insurgent Republicans voting with the Democrats.

List of the Convention Exhibitors

Practically all Spaces in the Exhibition Hall Are Now Taken—Half Fare Rate Secured for Ontario as far West as Fort William, Quebec and the Maritime Provinces.

The time for the annual convention of the Ontario Retail Hardware and Stove Dealers' Association is drawing near at hand and all arrangements are practically completed.

Arrangements have been made with the railways for a single fare rate to Guelph for the convention. This rate will be given to all hardwaremen, manufacturers and travelers who attend and will apply, as far west as Fort William. It will apply, in addition, to Quebec and the Maritime Provinces. Delegates and visitors from Quebec and the Maritime Provinces will be able to obtain convention certificates from Feb. 15 to 21, the tickets allowing them to return any time between Feb. 22 and 27.

It is not yet possible to give a complete list of the exhibitors but the list up to date is as follows. There as still a few gaps to be filled in but it seems reasonably assured that there will be no vacant spaces when the convention opens.

List of Exhibitors.

Taylor Forbes Co., Guelph.
F. W. Bird & Son, Hamilton.
Ohio Varnish Co., Cleveland.
Dominion Register Co., Toronto.
J. Wiss & Son, Newark, N.J.
E. C. Atkins & Co., Hamilton.
Pinchin-Johnson Co., Toronto.
Pratt & Lambert, Bridgeburg.
H. W. Johns-Manville Co., Toronto.
National Equipment Co., Toronto.
Dominion Roofing Co., Toronto.
Benj. Moore Co., West Toronto.
Gendron Mfg. Co., Toronto.
Standard Paint Co. of Canada, Montreal.
Tobin Arms Mfg. Co., Woodstock.
Oneida Community, Ltd., Niagara Falls.
International Varnish Co., Toronto.
Page Wire Fence Co., Walkerville.
Cummer-Dowswell, Limited, Hamilton.
S. F. Bowser & Co., Toronto.
Imperial Varnish & Color Co., Toronto.
Boeckh Bros., Limited, 80 York Street, Toronto.
Martin-Senour Co., Montreal.
Stanley Rule & Level Co., New Britain, Conn.
Glidden Varnish Co., Toronto.
Brantford Roofing Co.
D. Maxwell & Sons, St. Marys.
Yale & Towne Co., 9 Murray St., New York.
Aspinwall Mfg. Co., Guelph.
Parker & Whyte, Winnipeg.
One Minute Washer Co.
Success Mfg. Co., Gloucester, Mass.
Lewis Bros., Montreal.
Dover Mfg. Co., Canal Dover, O.
W. C. Crawford Co., Tilbury.
Pike Mfg. Co., Pike, N.H.
Gillette Safety Razor Co., Montreal.
Lufkin Rule Co., Saginaw, Mich.
Canadian Carbon Co., Toronto.
Sovereen Mit and Glove Co. (N.B. Misener, 105 Cowan Avenue, Toronto.)
Brandram-Henderson, Montreal.
Carborundum Co., Niagara Falls N.Y.
Buffalo Sled Co., North Tonawanda, N.Y.
Ontario Lantern & Lamp Co., Hamilton.
Lowe Bros., Limited, Toronto.
Onward Mfg. Co., Berlin.
Gutta Percha & Rubber Mfg. Co., Toronto.
Steel Trough & Machine Co., Tweed.

Burrow, Stewart & Milne, Hamilton.
Northern Aluminum Co., Toronto.
Clare Bros., Preston.
Sanderson Harold Co., Paris.
Moffat Stove Co., Weston.
Harriston Stove Co., Harriston.
James Stewart Mfg. Co., Woodstock.
J. H. Connor & Son, Ottawa.
Hall, Zryd Fdy. Co., Hespeler.
McClary Mfg. Co., London.
Shurly, Deitrich Co., Galt.
Allan Hills Edge Tool Co., Galt.
Can. Brass Co., Galt.
Potato Machinery Co., Galt.
Galt Robe Co., Galt.
Goldie & McCulloch, Galt.
Galt Art Metal Co., Galt.
Kaiting Washing Machine Co., Galt.

H. S. HOWLAND'S TOURNAMENT.

Toronto.—The H. S. Howland, Sons & Co., bowlers held their annual ten pin tournament at the Athenaeum Bowling Club on Friday night, the winner turning up in J. Tucker, of the pricing department. W. Paton, the manager of ceremonies, finished second, while Lawrie, of the warehouse staff, was third. Wright of the city salesmen won fourth, and Bain of the checkers took the fifth. Hodgson of the warehouse won sixth.

Progressive Hardware Retailing

Dealer Clearing Out His Store Stock—Paint Window is Bringing Results—Skates are Being Featured by Many Dealers.

FEATURING SKATES.

Victoria, B. C.—The Hickman Tye Hardware Co. are taking advantage of the great popularity of skating this season to make a special effort to push the sale of skates. They have succeeded so well up to date that they announce the arrival of a new shipment. Considering the lateness of the season, it would appear that the firm are driving a pretty brisk trade.

Three-column advertising space is being used to advertise skates. A feature of their copy is a section devoted to giving advice on the handling of skates. Considering the fact that it was not until this year that skating and hockey became very popular on the coast, this advice is timely and is attracting considerable attention.

CLEARING OUT STOVES.

Wetaskiwin, Alta.—The Wetaskiwin Hardware Co., announce that they expect to be installed in their new store on or about February 8.

In the meantime they are holding large sales to reduce their stock as much as possible prior to moving. A special effort is being made to sell stoves, both heaters and ranges being offered at reduced prices. In a recent advertisement they give a list of the stoves they have to offer, the list ranging from an $8 heater to a $58.50 range.

A STOVE CAMPAIGN.

Galt, Ontario.—Under the caption "Buy it Now," the McMurtry Hardware Co. are conducting a stove advertising campaign. They make a special point of the economy feature of the stoves they are handling. One of their recent advertisements reads :

"Save half the coal and wood bill. If it burns 3 scuttles a day we will guarantee the "——" not to use more than 1½ scuttles to do the same work. If you use 2 scuttles per day the "——" will only use 1 and will heat just as well and bake as much. If you use 1 or 1½ scuttles we will guarantee to cut the quantity in two and do the same work. Our suggestion—Look into this fuel saving."

SECOND ANNUAL SALE.

Forest, Ont.—The Arcade Hardware Co. are holding their second annual sale. It started on Jan. 26, and will last until Feb. 10. In that space of time, they intend to cut their stock in two, announcing this in their advertisements as follows:—

"After taking stock we find invested in Arcade Hardware Store $13,558.82. We cannot do enough business to warrant a profit on so much money invested. So we have decided to cut our stock in half in two weeks."

In order to accomplish this feat they are offering big reductions and are selling for spot cash.

AN APPRAISING CONTEST.

Contests of all kinds are inaugurated by hardwaremen to stimulate interest in their stocks. One of the best varieties is an appraising competition arranged by an English hardwareman, or ironmonger, to be more explicit. The idea worked upon was to encourage people to estimate each article shown in the window. Prizes were offered for the closest estimate of the total value of the goods displayed and the result was announced in the "Ironmonger" as follows:

A Value Guessing Competition.

A novel competition inaugurated by Mr. J. Blakey, ironmonger, of Scotland Road, Nelson, terminated last week. There were sixty-eight competitors who were required to appraise the value of the goods shown in one of Mr. Blakey's windows. The actual value was 381. 8s., but the estimates varied from 31. 12s. 6d. to 1161. 17s. 6d. The winner of the first prize named 381. 15s.; the second gave 411.; the third 411. 1s. 3d.

FOURTH ANNUAL SALE.

Melfort, Sask.—For the last four years, G. B. Jameson, hardware dealer has conducted a clearing sale during January. Following stock-taking, he offers a 25 per cent. discount on certain lines of goods and in that way clears out all surplus stock. The sales have proven very successful. Mr. Jameson is is now completing his fourth sale and has met with even more success than in past years.

A PAINT WINDOW.

Regina, Sask.—Armstrong, Smyth & Dowswell, are showing an excellent window display of paint and paint brushes, this week. Although there is very little paint selling as yet the window is attracting much attention, and results are being seen.

ONE-DAY SALE.

Lethbridge, Alta.—The Hayr Hardware Co. are moving into their new store on 6th street south. As a preparatory step they held a big one-day sale of ranges and heaters, in order to clear out their stock. Special bargains were offered and, despite the fact that this is not the stove season, they had a large sale.

A CREDITABLE SHOWING.

Cleveland, O., Jan. 31.—The Iron Trade Review for to-day says:—

In point of tonnage, the iron and steel market made a very creditable showing during the initial month of the year as compared with the closing months of the old year. While there has been a decided falling off in strictly fresh buying and the market as a whole is much quieter than at the beginning of the year, specifications against contracts for finished products made a few months ago at the lower prices are considered fair and have enabled the mills to operate at a very satisfactory rate. Prices on plates and shapes are not quite as firm, but there has been no material change in the price situation.

The Carnegie Steel Co. has received a contract for 8,000 car wheels for the Pennsylvania lines east cars and 4,800 wheels for the cars to be built for the lines west. The lull in car buying referred to recently continues. The most important structural award calls for 4,000 tons of steel for the Boston & Maine railroad shops for which the McClintic-Marshall Construction Co., has the contract. The contract for the 40,000 tons of plain material for the Hell Gate bridge approaches will in all probability go to the Carnegie Steel Co.

Current News of Hardware Trade

Injury to Hand.

Taber, Alta.—Jim Douglas, of the Taber Hardware Co., was moving some heavy material when he sustained severe injuries, his hand being badly smashed.

Howland's Won.

Toronto, Ont.—The hockey teams of H. S. Howland, Sons & Co., met the Aikenhead's Ltd. seven at Varsity rink. The score at half-time was 2—2. Aikenhead's won out finally by 5 goals to 2.

A Tool Factory.

Lindsay, Ont.—Commissioner McComb is making arrangements for the establishment here of the branch factory of an American tool manufacturing company.

To Build in Weyburn.

Weyburn, Sask.—The Marshall Wells Co., of Duluth and Winnipeg, have purchased property here on Third street, for the sum of $25,000. It is intended to erect a building there in the spring.

Charleston Store Robbed.

Ottawa, Ont.—The hardware store of William Charleson, 115 Rideau street, was robbed by burglars who committed a number of other depredations. They stole about $150 worth of cutlery, knives, razors and other articles, but did not succeed in securing any cash.

Expect a Brisk Spring.

J. McIntyre, of Whitby, accompanied by his son, spent a few days in Montreal this week, picking up a supply of specialties for the spring trade. They are strongly under the impression that business will be very brisk this spring, and are making their preparations accordingly.

In Temporary Quarters.

Halifax, N.S.—Cragg Bros., hardware merchants, who were burnt out in last week's fire, have not lost any time in securing temporary quarters where they can carry on business. As the fire was some time in reaching their building they had an opportunity to have a large percentage of their stock saved, which was placed in quarters about two blocks along the same street. The goods have been assorted and removed to 25 Duke St., in the warehouse until recently occupied by the firm of Smith Bros., where the business will be conducted during rebuilding operations. Meantime orders have been sent off to manufacturers for new goods, so that the firm will very soon be in a position to supply the trade again. Mr. Cragg has been planning for sometime to build a new building on the site of the premises in which he was doing business, as the old place was cramped and the need of expansion was being felt. Mr. Cragg already has plans and there will probably be little delay. The new building will be higher than the old one and will in every way be a credit to its location on what is probably the best corner site in Halifax.

Fire Losses.

Shoal Lake, Man.—After eleven years in business, Eakins & Griffin, hardware merchants, have experienced their first fire. The fire started in a neighboring bakeshop and spread to a number of other stores. The total loss will be about $30,000, of which $12,000 is placed on the stock of Eakins & Griffin. Their loss was well covered by insurance.

Staff Changes.

Mr. W. Robinson, sampling clerk of J. H. Ashdown Co., Winnipeg, has resigned and accepted the position of traveling salesman with Peart Bros. Hardware Co., Regina. He is originally from Woodstock, Ont.

Mr. Samuel Buscombe, formerly of Wood-Vallance Co., Hamilton, is now with Peart Bros. Hardware Co., Regina.

Business Changes.

Hartney, Man.—C. Woodhull is retiring from the hardware business.

Winnipeg, Man.—Morris Tadman has taken over the hardware business of W. M. Clements.

Gainsboro, Man.—J. B. Wilson, of Brandon, has taken over the hardware business of W. E. N. King.

Young, Sask.—J. W. Pagard has started in the hardware business here.

Fillmore, Sask.—The hardware and jewelry business of D. D. Campbell has been purchased by S. Noriss.

Macoun, Sask.—W. A. Conley has taken over the hardware business of Ofton & Crawshaw.

London, Ont.—The name of McLean's Hardware, 389-393 Talbot street, which has been more or less of a trademark for years, has been changed to O'Dell & Bennett. W. A. O'Dell and Ald. Burley Bennett purchased the business about a year ago, but retained the old name up to the present.

Calgary, Alta.—A. McBride & Co., are applying for permission to change their name to the A. McBride Hardware Co., Calgary.

Cupar, Sask.—Roberts Bros & Bricker have taken over the business of the Baker & Taylor Hardware Co.

Caledonia, Ont.—The hardware firm of Clysdale & French, has been dissolved, Mr. Clysdale retiring from the business. Mr. French will carry it on in future.

Saskatoon, Sask.—George Sackville & Sons, have taken over the hardware and harness business of D. G. Ross, Cahill Block.

Personal Notes.

Geo. Dowswell, of Cummer-Dowswell, Ltd., Hamilton, Ont., is in the West on a business trip.

R. S. Bull, an old Hamilton, Ontario, boy, now with Wood, Vallance & Leggatt, Vancouver, is visiting his old home.

J. F. Middlemiss, of Middlemiss & Rankin, Mitchell, Ont., is seriously ill. Mr. Middlemiss is well known in the trade. This firm have been continuous subscribers to Hardware and Metal for fourteen years.

Mr. Dawson, of Bridgewater, N.S., accompanied by his wife, passed through Montreal last week. He and his wife intend visiting the principal Canadian and American cities before returning home.

J. R. Myers, hardwareman, of Stratford, has left for a southern tour. He will go as far south as Panama.

Mr. Pearson, of the Asbestos & Asbestic Co., of Asbestos, Que., is in Montreal, on a short business trip. He is on his way to New York.

C. O. Bower, representing Sir William Arrol & Co., of Glasgow, visited the towns between Montreal and Quebec, in the interest of his firm last week.

J. F. I. Thomas, who will look after the electric end of Vickers Limited business in Canada, left for England to bring back his wife and daughter. He expects to return to Montreal on or about March 1st, and will have his offices in the Lewis Bldg.

TO MAKE FLY SCREEN CLOTH.

In last week's issue reference was made to the addition being made to the factory of the Canada Wire and Iron Goods Co., Hamilton, Ontario. Unfortunately a couple of lines were dropped through a printer's error, making the second paragraph, unintelligible. It should have read as follows:—

"The additional floor space is for the purpose of providing accommodation for the manufacture of fly screen cloth. The company will have their looms (which are at present under construction) operating by the 1st of July."

M. B. PEART HONORED.

M. B. Peart of Peart Bros. Hardware Company, Ltd., Regina, Sask., has been elected alderman and appointed chairman of the waterworks committee.

Mr. Peart is a shrewd, intelligent business man and although he has been associated with the hardware business

M. B. PEART.

only a few years he has greatly assisted in building up one of the most successful hardware businesses in the West. He has always taken a great interest in the public affairs and the advancement of his city. His success as a business man is ample proof that he will be a credit to Regina as an alderman.

DEATH OF MATTHAN HARBSTER.

Matthan Harbster, president of the Reading Hardware Co., Reading, Pa., passed away at the age of 80 years, cause of death being affection of the heart.

He was born on May 18, 1831, in Lehigh county. At an early age he engaged with his brother William at Hamburg, to learn blacksmithing.

When he had completed the necessary apprenticeship he worked as a journeyman until 1851, when the three brothers, Matthan, William and John, became associated in business, and in a little shop, under the firm name of Harbster Brothers, was founded the immense business which is now known all over the United States and parts of Europe as the Reading Hardware Company. The three were practical business men, energetic and industrious and the enterprise was profitable from the start. Its expansion soon made more room necessary and in 1858 the concern was reorganized, William M. Griscom coming into the partnership and the firm name becoming Harbster Brothers & Company, which continued until 1862, when the present name was adopted. Of the original partners only Matthan remained, the other two brothers preceding him in death.

Interested in Other Enterprises.

In addition to his important duties in connection with this industry Mr. Harbster for a time was president of the Reading Screw Company, whose works were located in Norristown; was formerly president of the Montello Brick and Clay Company, and was also president of the Reading Land Improvement Company.

He was on the directory board of the following institutions: Farmers' National Bank, Reading City Passenger Railroad, and the East Pennsylvania Railroad.

STERNAU MEN DINE.

The members of the selling organization of S. Sternau & Co., New York, assembled "under the rafters" at Raissaweber's, the occasion being the annual dinner given by the members of the firm to the staff, as a token of appreciation of their loyal and successful efforts during the year. After an appropriate toast to the firm, the party sat down to an excellent beefsteak dinner, served on an unique plan.

During the progress of the dinner, toasts were given, speeches made and favors given to each man, with an apt verse, portraying some characteristic which occasioned much fun and laughter. The dinner was followed by dancing and a programme provided by entertainers secured for the occasion.

Prior to the dinner, the party were entertained at a theatre, filling two boxes.

REFRIGERATION PLANT IN MARKET.

Montreal, Feb. 1.—F. L. Wanklyn, of the Board of Control has a new idea. This is nothing new, nevertheless it is worthy of consideration here, for the idea relates to the subject of refrigeration, in which many hardwaremen are interested.

Mr. Wanklyn proposes that a central refrigeration plant be constructed by the city in Bonsecours market—the central market of Montreal. The installation of such a plant, the controller has estimated after careful study, would cost something like $20,000 or $25,000. It is a considerable outlay, but one upon which good interest would be paid if a proper fee were charged all users. The rate which should be asked, Mr. Wanklyn has estimated already, his opinion being that twelve and a half cents per annum per cubic foot of space rented, would not only pay a proper interest on the city's investment but would also defray the cost of upkeep.

The suggestion is to be taken before the new city council which is being elected to-day. According as this body approves or disapproves the report of the Controllers, the proposed refrigeration plant will become a fact or a memory.

V. Spencer, of David Spencer, Ltd., Vancouver, spent a couple of days in Montreal last week, making his spring purchases. Later he left for England, where he intends remaining a couple of months.

Sturnau men around the festive board.

Weekly Western Market Report

Winnipeg, Feb. 1.—Business is reported to be better in most lines. During the early part of January the severe weather interfered seriously with trade. As a result, the dealers found their supplies running short and are now in the market for immediate requirements in many lines. Jobbers report that good-sized orders are now coming in, many by mail.

In addition to that, spring booking has commenced in real earnest. The dealers are ordering for the spring trade with every evidence of confidence.

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in.,$5.45 ;1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8¼c; lath yarn, 3c.

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Demand is Light.

Paints and Oils.—As in other lines of the hardware market the demand for paints and oils is very light and business at the present time is being devoted to the preparing of spring orders for later shipments. Linseed oil mills are at work and the prices as well as the trade is regarded as being firm and are holding steady at $1.05 for raw and $1.08 for boiled. Turpentine is also unchanged and firm at 95c in small lots and 85c in bulk. The amount of spring bookings so far this year are far in excess of last year and very healthy trade is expected to take place during the spring months.

BIGGER MINERAL PRODUCTION.

Ottawa, Jan. 29.—A notable expansion in Canadian mineral production is indicated in the annual report tabled yesterday by the mines branch. The total value of mineral production in 1910, the period covered by the report, was $105,000,000, an increase of $13,209,517, or over 14 per cent.

Copper amounted in value to $7,209,463; gold, $10,224,910; pig iron, $11,265,630; lead, $1,237,032; nickel, $11,181,310 and silver $17,106,604.

While the economic utility of it appears to have been established, little progress is reported in electrical smelting during the year.

The Government peat bog at Alfred, Ont., is being satisfactorily operated, 500 tons having been turned out last year. According to reports it makes good fuel.

ATKINS PIONEERS DINE.

The third annual banquet of "Atkins' Pioneers" was held on January 27, at the Spencer House, Indianapolis. The Pioneers were formed on February 1, 1906, the membership being limited to employes who had been with the firm of E. C. Atkins & Co. twenty years or more. The membership has grown from sixty-two to one hundred and twenty-five at the present time.

The dinner proved most enjoyable and the programme which followed was in keeping. Speeches were given by Frank E. Kingsley, president of the Pioneers, who acted as toastmaster, H. C. Atkins and Michael T. Butler and selections were given by the Atkins quartette.

Fractured Ankle.

Carleton Place, Ontario.—D. Grigg, a traveler for a Toronto hardware house, fell on the pavement here and fractured his ankle. Mayor Smythe and another citizen took him to Smith's Falls and placed him on a Toronto train there.

Weekly Market Report --- Metals

MARKET IS ACTIVE.

The metal markets indicate that the industrial world has been active. All metals have been in heavy demand. Uncertainty is felt in regard to the future prices of some lines, but the uncertainty does not extend to the maintenance of demand.

MONTREAL.

Montreal, Feb. 2.—Prices, and probable future prices, are holding the interest of metal handlers this week. Tin has risen since the Banca sale. Lead has dropped somewhat. Copper, after dropping considerably, has arisen. Iron is scarce. The question in the minds of all is as to the future. Are these present higher and lower tendencies only momentary, or do they indicate what may be expected in the future?

One thing is certain, and that is that the marekt prices—the prices quoted by the brokers even—are misleading. A Montreal buyer wished to have East St. Louis spelter delivered in Detroit. This he found he could not buy at trenches price. Another handler has bought largely of March tin. He has tried to sell some of this in New York, but has been unable to dispose of it—even at a figure lower than that which he gave.

The future, indeed, seems wrapped in mystery. There is much talk of syndicates—old and new—and probably these are manipulating the market, but they are doing so in a manner which keeps their ultimate end secret.

Tin.—It is said the syndicate is selling, and that a new syndicate is getting control of the market. However, this may be tin has risen to £194 15s. on the primary market. It may be, however, that the syndicate has merely changed its operators.

The whole situation has caused some uncertainty, and even those who have bought quite largely for the future, have allowed their present stock to get low. The result is that a good price rules for this spot tin, while futures are somewhat uncertain. The quotations give tin as considerably higher than last week, but there is not a great deal of buying being done.

Consumption of Increase.

The general business of the past few months has been good. From the States comes word that the reports shortly to be issued will show a large increase in consumption of tin. Canadian handlers state that the conditions here have been as favorable. The definite announcement of these statistics will likely cause a stiff market for the time being, but that the high prices will continue is far from certain.

Lead.—Here there has been a drop in price, followed on Monday by a rise of £1 15s. Tuesday, again there came a further advance of 1s. 3d. This leaves the price slightly higher than at the end of last week, but the pendulum may turn the other direction any minute. Lead, at present, is an uncertain commodity. There seems to be some thought that those who largely control it in the States are juggling with the price so that they will be helped in their fight for more favorable tariff rates. However, this may be local handlers are making no change in price. They have a fair stock on hand, and are selling in good quantities.

Copper Tubing to Advance.

Copper.—After a rather heavy drop on the primary market, which was not entirely equalled in New York or in Canada, this metal has risen again. Today it is higher than it was last week. Those handling in small sized lots have not been compelled to raise the price, but it has been determined that an advance will have to be made in brass and copper tubing. Copper is really about 1½ or 2 cents a pound higher than a fortnight ago, and the manufacturers of the tubing cannot afford to buy raw material at that increased rate, and sell the finished product at the old figure.

Spelter.—No great demand is noticed here, which is perhaps as well since the metal is not at all easy to secure. Prices quoted are not higher than a week ago, but buyers have found difficulty in getting what they want at the market quotation.

Iron.—The supply continues short. Scotch iron is coming in and will help to meet the need. The softer metal is short as well as the hard, but an effort is being made to get along with what is here until navigation opens. Manufacturers who have more than they need are lending to others, and thus the supply is being husbanded.

TORONTO.

Toronto, February 2.—Heavy business is reported in all metals. The inevitable reaction from the dullness which prevails around the first of the year is now manifesting itself in redoubled industrial activity. The result is a steady call for metals.

No price developments have taken place during the week. There have been fluctuations on the primary markets but in no case has the local quotation been affected. This steadiness has had a wholesome effect on trade conditions. Metal men do not express themselves with any particular degree of certainty as to the future course of the market. No doubt is felt as to the probability of the demand being maintained, the industrial activity of the country precluding all possibility of that; the erratic tendency in some lines on the primary markets has set up doubts as to the permanency of present prices, however.

Tin is Firm.

Tin.—The chequered course of tin on the London market, punctuated by rapid fluctuations and rumors of change of control, has not had much effect locally. There has been a consistent and heavy demand for tin here and this has served to steady the market. The price has remained firm, quotations heard ranging from 46 to 48 cents. The future course of tin is uncertain and metal men do not profess to understand what the next week will bring forth.

Lead.—The same applies with more or less accuracy to lead. Fluctuations on the larger markets have not been followed by local prices. There is a strong demand here for lead and enquiries indicate that this condition is likely to be maintained.

Demand is Growing.

Plates and Sheets.—In no other branch of industry is the stimulation of activity so marked. The demand for plates and sheets is growing rapidly. The consumption is now much larger than it was during the early months last year and there is every indication that the increase will be kept up. Strangely enough, the heavier consumption does not seem to create any signs of shortage. The plate mills seem to have an elasticity in the matter of supply which enables them to cover the advances in demand. There have been periods when it was difficult to get supplies but no trouble is experienced on that score at the present time.

Copper is Irregular.

Copper.—The most irregularity has been shown on the copper market. The price has been unsteady, although locally, the quotations have been maintained. Demand has been good and will be better. Enquiries indicate a growing demand.

Spelter is showing a slightly easier tendency. No change has been made in price locally.

Weekly Market Report --- Hardware

BOOKING IS ACTIVE.

The demand for hardware centers in the future. Considerable business is now being done for spring requirements and the jobbing houses report that there is every indication of an exceptionally active spring trade.

A change in shot represents the sum total of the week's price developments.

MONTREAL.

Montreal, Feb. 1.—The past few days have seen a remarkable improvement in the hardware situation. Not only are the retailers getting rid of their winter goods in fine style, but orders for general lines, and for spring supplies, are coming to the jobbers with every mail. The shipping rooms of the wholesale houses are piled high with outgoing goods. These rising piles denote the rising market. It would seem the quiet days of mid-winter are nearly over.

The better ordering is not confined to any one district. From the city a good demand is being felt. So also from the townships and from the eastern provinces, while from the West are coming large bookings.

It is from the far West indeed that spring orders are principally coming. Winter is over early there. The dealers therefore must prepare to meet an early demand for spring goods. They are already getting ready for this, not only placing orders, but urging immediate shipment. They evidently intend to run no risk of missing the first business by being unprepared.

No Price Changes.

The past few days have seen no change in prices. Some, however, are predicted. Whether there is much foundation for the assertion or not is impossible to say, but there is a feeling that wire nails and similar goods will be lower before the heavy buying of the spring commences.

Household Goods.—Large orders for this class of ware are now being placed. City dealers are beginning to stock up for the spring demand. Westerners are ordering this class of goods largely So are some of the dealers in the small towns, though those who are served by water are waiting, where possible, for the opening of navigation.

Seasonable Goods.—Shovels have ceased to sell. There is little or no call for any of those lines which are needed during winter. With January over people simply will not buy such articles if they can possibly do without them. Door mats, however, are going well.

Baseball Will Be Next.

Sporting Goods.—As long as there is ice there will be hockey, and as long as hockey is being played there will be a strong call for hockey sticks. This is a class of goods which sells the season through, for it is practically impossible for a player to finish the season with the same stick with which he starts. Skates, however, have now well nigh ceased to sell. Some toboggans and snowshoes are moving. Skis also seem in fair demand, but the sale of winter sporting goods is well nigh over. Dealers are now estimating what they will need in the spring, and wholesalers are preparing to meet this need.

Builders' Hardware.—Here great improvement in the volume of business has been shown. From all directions orders have been coming in. The building season is near at hand, and all the retailers are preparing to get out after this business.

From Vancouver and the extreme West the demand for this class of goods is particularly large at present. The early spring will then enable an early start at building. There seems little thought that operations this summer will be less extensive than last.

Lumbering Supplies.—There has been a brisk demand for axes, and also for the caulks, and similar lines needed when the river drives commence.

Spring Goods.—The doors, screens, and shades needed in May, and the succeeding months, are not yet in demand [illegible] in this part of the country; but those living in the extreme West, where the season breaks earlier, are already laying in their stock.

TORONTO.

Toronto, February 2.—Despite the fact that February is generally accounted to be about the dullest month of the year, there is a fairly brisk tone to business at the present time. Dealers are ordering freely, and in good bulk. Most of the business is for spring delivery but a sufficient proportion is for immediate shipment to keep the wholesale houses busy. It is a fact that shipping work is fully as heavy when orders are small as when bigger bulk is in demand. For instance, if an order is placed for half gross of goods which are packed in gross, it necessitates breaking the package and repacking the half gross. This entails more work than if the full gross had been ordered. It goes without saying that, even in the dullest seasons, the jobber has plenty to keep him busy.

Collections are still reported to be only fair. As it is not expected that money will be easy at this season, however, no one is expressing much uneasiness.

Shot Advances.

Prices have remained steady, the only change being in shot. The price of shot f.o.b., Toronto, Hamilton and London has been advanced to 15 cents per 100 lbs. net over the Montreal quotation, which remains the same.

Spring Booking Good.

The demand for spring lines is now good and is rapidly attaining marked proportions. Manufacturers are reported to be very busy supplying stocks of dairy supplies and filling orders for the same. Considerable booking of garden tools, wire fencing, lawn mowers, netting, screen doors, etc., is being done.

Seasonable Goods.

Seasonable Goods.—The sale of winter lines has been checked during the past week although some orders have been received. Business done is purely of a sorting order.

Some Business Done.

Builders' hardware is not particularly active, although some orders are still being received. The spring revival in shelf goods is still some little distance off. One jobbing house reports having received a number of large orders but they were from city dealers in each case. There is, of course, a regular demand still for small lots.

Demand Slackens Up.

Sporting Goods.—There is a seasonable slackening in sporting goods. Hockey supplies are still moving but not in the same volume as earlier in the month. Spring goods are also beginning to sell but the demand is quite light as yet. A "between seasons" stage has been reached with the inevitable falling off at such periods.

Heavy Hardware.—Good booking is reported in practically all lines. Price quotations are :—Discounts on carriage bolts, $\frac{3}{8}$ and less, 60 and 10 and 10 ; coach screws, 75 ; stove bolts, 80 and $7\frac{1}{8}$.

Mr. Donovan, of La Tuque, was in Montreal this week making preparations to purchase his spring requirements.

Stoves, Furnaces and Accessories

Window Display of Paper Bag Cookery

Even Without a Demonstrator This Attracted a Great Deal of Attention in Montreal—People Entered Store to Ask About the New Method of Cooking, and Bought Samples to Try—The Display a Success.

Paper bag cookery is to the fore in Montreal this week, a novel display having been made in one of R. & W. Kerr's windows. Their store is situated on St. Catherine Street, in the very heart of Montreal's up-town shopping district. Hundreds of women pass morning and afternoon, and many have been attracted by the window and by the bags, so that they went inside and purchased samples.

The window itself is simple in the extreme. At one side are piled a lot of somewhat dirty pots and pans—pots and pans full of memories of hours' scrubbing, and of resulting sore hands. This pile is labeled "The Old Way."

The Old and the New.

At the other side of the window are piled paper bags for cookery. There are bags of all sizes, a regular pyramid of them. This pile, too, is labeled, the sign bearing the words, "The New Way."

Then, in the centre stands a gas range, oven door open, and on one of the racks a paper bag, filled and sealed, all ready for cooking. On other racks appear other bags. Equally ready for cooking.

Only Demonstrator Lacking.

Only one thing is lacking to the display. If there could have been a demonstrator, showing what might be done with the bags, even more attention would have been attracted. Many women, who paused and then went on their way, would have bought had there been some one showing the results as well as the method. People do love a practical demonstration.

But to get a demonstrator was found impossible. Later one will be available, but at the present time no one could be secured to show the system in the working. It was a pity, yet even without this feature, the sale proved a great success.

Above the stove was shown a placard, bearing the words, "Ermaline Bags," and under, "Paper bag cookery has come to stay."

Lower down appeared another placard—a placard bearing also the words, "Ermaline Bags," and under, "Come in and buy some to-day."

People Acted on Suggestion.

And the people did "come in." For the most part they were women, though some men also found their way into the store, and took away some samples.

Many questions were asked. Even after the educational campaign which has been carried on in the paper, people are in ignorance to some extent about these bags. Some knew about them, and merely came in to buy. Others inquired if the bags were to be greased.

"Certainly," replied the clerks.

There were more questions—questions about closing up the bags. About the time it took for certain goods to cook. Questions of all kinds.

But those in charge of the bags understood them. They could explain their use. They could explain their benefits, and could tell of the points which have to be guarded.

The sale brought the bags well to the fore. It stimulated trade.

EXTRA STOVES FOR COLD WEATHER.

Chatham, Ont.—A method of disposing of second-hand coal stoves to good advantage has been accidentally discovered as a result of the recent cold spell here.

"We have had a great rush on second-hand coal heaters, remarked one hardwareman. "Other dealers report the same thing. People who are accustomed to go through the winter with one heater in addition to the kitchen range have felt the pinch of this cold weather, and as a result have come to us looking for cheap heaters. As a result, second-hand coal heaters are at a premium."

It appears that in this section, where the real cold spell is usually brief, people don't feel like paying the full price of an extra stove which will be in use only a few weeks in the year. Such people, however, are willing to pay the comparatively low prices asked for second-hand coal heaters.

The demand may have been accentuated by the fact that the natural gas supply was cut off for a few hours on one occasion, but hardwaremen express the opinion that the demand has arisen quite independent of the natural gas situation.

A TEN DAY SALE.

Lumsden, Sask.—Donald & Thomson are holding a ten-day sale and are offering a 25 per cent. discount on stoves and heaters. They are advertising the sale as a splendid opportunity for townspeople to secure a range or stove at a mid-winter price.

TEMPORARY HEATING.

The task of temporarily heating the big armory of the 65th Regiment, Montreal, confronts those members of the Auto Club of Canada who have in charge the automobile exhibit to be held there early in February. They are wasting no time but are now having the necessary furnaces put in place.

There is practically no attempt made to heat this building regularly, but now three great hot air furnaces are being installed, and it is thought these will send out enough warmth to make the huge hall quite comfortable. If the system proves as satisfactory as is hoped it is quite likely that it will not be removed. From time to time the hall is used for these exhibitions, and it would be much more suitable for this purpose were it warmed—warmed as a building must be in Montreal to be any good in winter.

Nor is the heating problem the only one which the directors of the show are facing. They have to make the hall exceedingly attractive, and to do this have determined to turn the whole roof into a flag—a flag which will stand out in the splendor of red white and blue incandescent lights.

This means the installing of miles of wiring, and the use of many thousand sockets. Workmen are now busy on this task. It will be one of the biggest temporary jobs of electrical wiring ever carried out in Canada.

AN UNLOADING SALE.

Kelowna, B.C.—The stock of the Kelowna Hardware & Specialty Co. is being sold out at a large discount. Every article in the store is being offered at a reduced price. The fact is being advertised that half the store must be cleared by January 31, and the public is invited to "come in and see how we do it."

Sold Stoves on the Mail Order Basis

How One Dealer Convinced a Customer That it Pays to Deal at Home—The local Dealer Has a Big Advantage Over the Catalogue House If He Cares to Use it.

The mail order house is the hardest opponent that the retail stove dealer has to face. The itinerant salesman makes himself felt in some localities but he only works in certain seasons and certain sections. On the other hand, the catalogue house carries on a continuous and persistent campaign, flooding the country with literature at all seasons. No place is too remote to feel the influence of the catalogue campaign.

The home dealer has to reckon the mail order house as a constant enemy. He fears it; in many cases with just cause. The dealer who is alive to his possibilities and real strength, however, need not entertain any fear.

A man with a vigorous constitution does not dread disease. The germs can work only when the constitution has become run down and weakened. "Mail orderitis" is a disease which breaks out where the mercantile constitution is too weak to offer a vigorous struggle and thus fight off the inroads of the invader. To put the case plainly, the mail order house gains ground only where the opposition of the local dealers is not spirited and efficient.

The home dealer has a great many advantages over the catalogue firm. He is on the ground, he knows the people, he can see them personally, he can reach them through the medium of his advertisement every night. On the other hand, the catalogue house can reach the public only through the catalogues sent out at lengthy intervals. The prejudice against buying goods which have never been seen, the unpleasant feature of paying express and cartage and personally superintending installation, the delay in securing repairs, are all points which impell people to look with disfavor on mail order buying. With all this in his favor, the local dealer frequently loses out.

That is, some dealers do. The writer has met scores of stove men who have, by their energy and initiative, literally built up a wall around their district which the mail order house could not scale. Here is an instance which shows how some dealers handle catalogue opposition.

It was in A—— and the dealer in question was a salesman of real ability, handling a good line of stoves. A customer dropped in and asked to see his stock of ranges. After settling on the one he preferred, the customer asked as to the price. It was $50, the dealer explained.

"Just as I supposed," commented the other, with an expression of what might be termed triumphant disgust. "I can get a range exactly the same from a Toronto department store for $40. I was sure you would try to stick me an extra ten."

The dealer studied the man carefully a moment.

"I doubt if the range you saw was the same quality," he said. "It might look the same in the picture and yet be a cheaper kind. But I won't let those catalogue people beat me out. You can have the stove on their terms."

The customer rubbed his hands together with the pleased expression of a man who has turned a particularly neat piece of work.

"Thought you'd come down to it," he asserted. "I know something about prices, I do. Just send that stove up and put it down on my little bill."

The dealer gave him the benefit of a cold stare.

"I said you could have this stove on the mail order house terms," he declared. "Do you get credit from them? Not much. This will have to be a cash transaction."

The customer grumblingly drew out his cheque book and was preparing to write in the amount when the dealer stopped him.

"Add on two cents postage and ten cents for a money order," he commanded.

"Say," declared the man hotly," is this some practical joke you're putting up on me?"

"No. We are just doing business on a catalogue house basis. You have to send a money order to them. Now then, fifty cents for cartage. Could you put up this stove alone?"

"No," snapped the customer.

"Well, you couldn't get a man to help you for less than fifty cents Add that in. Now for express charge."

He proceeded to do a little figuring while the customer fretted and fumed. "This range will cost you exactly $50.35 on the mail order house basis," he announced. "Seeing that you are an old customer, I'll knock off the 35 cents and make it the even fifty dollars. Is that satisfactory?"

"Send it along," said the customer, sulkily. No one likes to be shown that he is in the wrong.

The dealer smiled. "Not much," he declared. "If you order a stove from the catalogue house, you wait a week or ten days before it arrives. I'll send this stove up next Thursday and, in the meantime, I'll just deposit that cheque to my credit."

It is probable that, after the lesson had thus been driven home, the dealer sent the stove up at once and let the customer see the good service that goes with home purchasing. If he was wise, he undoubtedly took this course. It does not pay to antagonize a customer, no matter how much in the wrong he may be.

The moral of this incident is that the home dealer should endeavor by every means in his power to educate the public to the advantages of home trading. The dealer has a good case; the trouble lies in the fact that he does not plead it often enough or effectively enough.

HELD CONSULTATION.

A number of the staff of the Gurney Foundry Co. visited headquarters at Toronto last week for consultation about a number of matters pertaining to the coming stove season. The meeting was in no sense a general convention, as the annual gathering of the Gurney sales staff occurs at a later date. The men who attended were: W. L. Helliwell, Winnipeg; J. K. Mills Ogg, Winnipeg; Arthur Coombs, Saskatoon; Humphrey Lockhart, Montreal; E. Mondeharde, Montreal.

HELD A SMOKER.

Three hundred employees attended the monthly smoker of the McClary Welfare League on Friday night, in the men's dining room, King Street, London. General Manager Gartshore and Superintendent Somers are taking a keen interest in these events. Those in charge of the concert on this occasion were J. McLaughlin, secretary; J. Goetz, treasurer, and George Moll, chairman. The McClary Concert Company provided the programme.

TO ADOPT THE ROSS RIFLE.

Ottawa, Jan. 23.—Following out the policy which he urged when in opposition, Hon. Sam Hughes, Minister of Militia, has announced his intention of having the Ross rifle adopted as the arm to be used in all regiments of the Canadian militia. An order recently issued states that as Ross rifles and bayonets become available Lee Enfield rifles and bayonets will be withdrawn.

Weekly Market Report---Stoves

ACTIVITY STILL FELT.

The stove manufacturers are fairly busy at the present time but, in some sections at least, the activity is due to sales of heating accessories and dairy supplies.

In other sections, Toronto notably, sales continue in stoves and furnaces. One dealer bought six ranges this week—a big January order.

MONTREAL.

Montreal, February 2.—The bitter weather has disappeared. It is cold still, but not the intense cold of a few days ago. The weather has abated, and so has the demand which the zero winds brought for stoves. In the past week, indeed, little activity has been shown in this line.

Still the business in tin plates continues. Though the price of pig tin is even lower than last week, there has been no drop in the price of these. This is to be expected, as the material from which they are made was bought at the high level of December. If the present low price continues, however, there will likely be a drop in the price of plates; but there does not seem much cause for dealers to delay buying on account of this. That tin will remain low as at present, is regarded as far from likely.

Big Demand for Enamelware.

For enamelware the big demand is being felt. The travellers are pushing this line and are finding little difficulty in securing orders. They also are booking for the spring delivery of ranges. Of course the usual number of dealers are holding off, but many are taking time by the forelock and are getting in their orders without delay.

Collections are reported good. Stock taking is being completed now, and the merchants, having made a determined effort to make their own collections, are now settling the accounts outstanding against them.

Stoves Very Quiet.

Ranges, Heaters and Furnaces.—Still some ranges are selling. A few heaters, too, are being disposed of, though the strong demand stimulated by the recent bitter weather has about ended activity in this line. As far as furnaces go things are quiet. Only in some new houses or buildings late in construction are these being installed. The heavy demand for parts needed in making repairs has also largely ceased; indeed, were it not for preparations for spring, this would be an exceedingly quiet time as far as stoves are concerned. Orders calling for late February and March delivery are being received in good numbers. These seem to indicate that the coming season's trade will be brisk.

Gas Stoves.—Orders for immediate shipment are few and far between. There are new houses which must be equipped with these, but these are comparatively few in number. Activity in this line, therefore, is directed toward the spring business. This promises to be good. There has been much building which, of course, will mean a demand for stoves. Also many old models will be replaced by new ones.

What the Travellers Say.

The factories are making special preparations to meet the demand for this line. One concern is taking the matter up with the its travellers. They have been looking over the ground for weeks, and are now being asked what they expect for the spring and summer. There answer has been "good business."

Kitchen Furnishings.—No waiting for spring is apparent here. Orders are calling for immediate shipment. Dealers in the west and east alike are after graniteware. There is a good retail demand for it now, which undoubtedly explains the large orders being received. The conclusion of stock taking also has something to do with the present satisfactory conditions. Special sales are being started to clear out the old stock, and to carry these on successfully there must be new goods on hand.

Tin ware, as well as granite ware, is being shipped. Indeed, all kitchen accessories are moving well.

Seasonable Goods.—It is tin plate for which the large demand is being felt. This is needed for the manufacture of sap pails, milk cans and the like. Some tinsmiths are putting off this work, but the great majority seem to be undertaking operations in good time.

TORONTO.

Toronto, February 2.—The stove manufacturers are busier than usual at this time of year but the activity is in other lines than stoves and heaters. Stove accessories, dairy supplies, kitchen utensils and similar small lines are now moving briskly. It must not be taken from this, however, that there is nothing doing in the way of stove sales. Some of the manufacturers report that orders continue to come in and that, considering the season, a surprisingly large number are being shipped out. Compared with the sales before the end of the year, of course, the total does not appear large.

Some Good Range Sales.

Ranges.—The range trade is of a more steady nature than in other heating lines and there is still a continuous demand. Orders received seldom call for more than two. One stove firm report that they shipped six ranges to an Owen Sound hardware dealer this week; this order is an exception, however.

Heaters.—The continued cold weather has kept up the interest in heaters of all sizes and descriptions. No large orders have been placed but there has been a continuous call for small shipments and the total has mounted up to unusual proportions—for January. Oil heaters have been in brisk demand. Several cases are cited where consignments of base burners have been sent out; indicating that the retail demand is by no means over yet.

A Good Demand.

Tinplates.—There is a first class demand at the present time for all varieties of plates and sheets. The tinsmiths are now actively engaged in making up stocks for use in the spring. Being unable to do much outside work, they need large supplies of sheets for usr in making up their stocks and this is creating a heavy demand. All talk of lower prices in tinplates seems to have dissipated. The change of control on the London tin market has had a forming up effect and this in itself has been enough to check any possibility of lower quotations being made on tinplates. There is a firmer tendency noted in other lines. English quotations on galvanized sheets are higher, although the advance has not been sufficiently large to affect local prices. Stocks are good here despite the big demand. Less difficulty than usual was encountered last year in securing prompt shipments of plates and sheets.

Dairy Supplies.—There is a heavy call at the present time for dairy trimmings.

Kitchen Utensils.—There is a steady movement in enamelware, tinware; in fact, in all varieties of kitchen utensils. A tendency toward higher prices is noted in copper and brass goods.

Furnaces.—Strangely enough, the furnace trade has retained quite a large share of its former activity. The Toronto branch of one firm secured a carload this week and disposed of the lot to local dealers. Apparently, quite a little work is still being done.

Methods of Retailing Paints and Varnishes

Making Use of Paint Selling Helps

Dealers Should Enlist the Co-operation of the Manufacturer in Improving His Paint Sales—Advertising Can be Improved in That Way—Making Use of Literature.

What use do you make of the "selling helps" supplied by your paint manufacturer?

This question is worth a little thought. Many dealers do not avail themselves in any way of the assistance proferred by the manufacturer. It is indifference or neglect on their part; not the belief that they can map out better ideas themselves. They simply do not bother to make use of the material placed in their hands.

It would be well to consider first the possibilities that lie behind the "helps" devised by manufacturers for the improvement of retail business. The manufacturer has studied the situation from every angle and viewpoint, and knows just what is needed to bring trade along. Expert men are engaged to put the resultant ideas into effect. Skillful writers plan out advertisements which can be depended upon to bring results. Artists design store cards and signs, billboards and color cards. These men are specialists in their respective lines, and can be depended upon to do their work much better than the dealer himself could do it.

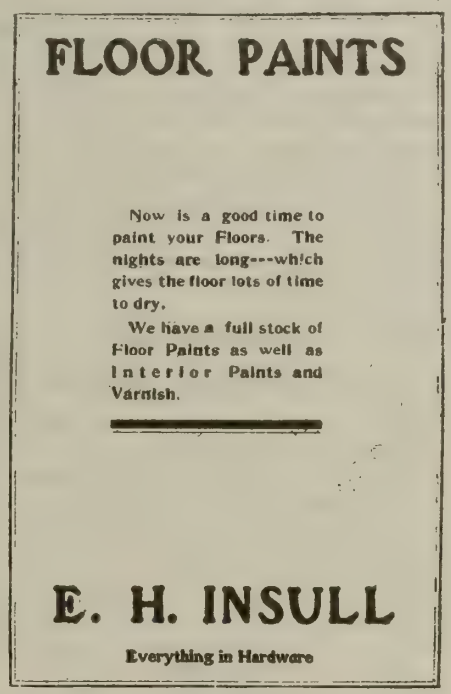
Furthermore, it should be borne in mind that just such helps are needed to put a livelier movement into the paint trade. Good ads., bright store signs, attractive color cards—these are the things which count in the paint department.

And yet many dealers neglect to make any adequate use of the material placed in their hands. Some neglect to use them in any way. Neglect—unexplainable and fatal—is the keynote of their policy, instead of aggression.

How to Use "Helps."

The dealers who pursue this lackadaisical course are, fortunately, few in number. Many hardwaremen make use of the selling helps to the fullest extent. Between these two classes we find the great mass of dealers who use the helps to some extent, but not as much as they should. The query with which this article began is addressed particularly to men of this class.

It is interesting to note the use which some of the best paint dealers make of the material supplied. A dealer in a small western town—one of those bustling junction points which grow with Jack-and-the-beanstalk rapidity—found that he had a splendid field for the sale of paint. He estimated that, if an aggressive campaign were started, he could just about double his paint sales. He enlisted the co-operation of a firm of paint manufacturers and started his



An illustration would have brightened up this copy.

campaign. A series of snappy newspaper ads. were inserted in the local paper, and literature supplied by the manufacturer was mailed to practically every property owner in town. This process was repeated several times. After the first distribution of literature, there were quite a few enquiries, and business showed a more active tone. After the second, this was still more pronounced. After the third, he had "them going"—as he himself expressed it—and his sales of paint were, as he had anticipated, practically doubled.

Use Cuts in Ads.

The one respect in which dealers are most prone to neglect their opportunities is in enlisting the manufacturer's assistance in advertising. In the first place, many of them never do any paint advertising of any kind. Those who do, in many cases, write the copy themselves, and do not use illustrations. They get results no doubt. But the results would be doubled if they had used the copy prepared by the advertising department of the manufacturer or had secured the use of some suitable illustrations.

An illustration, if it is a good one, brightens up an advertisement and ensures attention. It adds immeasurably to the attractiveness of the copy, and consequently to the selling power. In the last issue, a paint ad. of E. H. Insull, Craik, Sask., was reproduced. It was in many respects a good one. As will be seen, the ad. was well laid out, the white space giving full prominence to the reading matter. A cut would have effected a distinct improvement, however.

Interior Store Helps.

Full use should be made also of the interior store helps supplied—signs, stands, color cards, etc. A well kept up and neat paint department can be made one of the most attractive features of the store. At the same time, it should be borne in mind that the use of the helps should be accompanied by systematic efforts to have everything in keeping. A sign covered with dust, no matter how handsome it may have been at one time, will not help much in selling paints. A new sign suspended in front of shelves covered with ill-assorted, rusty-labeled paint tins is not likely to prove very effective.

In using selling helps, a little reciprocity is needed. There are certain helps which the dealer alone can supply.

B.-H. CALENDAR.

Brandram-Henderson, Ltd., have followed out their annual practice of sending out calendars to their dealers for distribution to customers. The number sent out this year will be exceptionally large.

The calendar has a colored picture on the front which combines attractiveness with selling power. The back of the card is used for literature and illustrations relating to the products of the company.

Paris Green to Sell at Lower Figure

Hostility Among United States Makers Expected to Cause a Price War—This Will Affect Canadian Prices, for the Tariff Against Uncle Sam's Product is Only 5 Per Cent.—Dealers Will Benefit by the Drop.

Much has been said about the high price of paint, of linseed oil, of turpentine. Now for a change. It is fairly certain that a lower quotation will be made on paris green.

Good news that to the farmers, and to all who do business with the farmer. The city dealers, too, have some cause for rejoicing, for they also find a fair demand for this germ destroyer.

How much the hardware dealers have to be thankful for is not known. That is, the drop in price has not yet been determined. Nor is it likely that it will be fixed for a month or more. This, however, does not necessitate any delay. The makers are receiving orders in large numbers. They are not accepting these with any price arranged, but are merely guaranteeing that they will deliver the goods as cheaply as they may be got elsewhere.

Price Dependent on U. S.

The price of paris green, is must be known, is largely dependent upon the American market. The duty on it is not prohibitive. For paris green coming from the States to Canada a duty of 5 per cent. is charged. For paris green going from Canada to the United States the impost is 10 per cent. Why the difference, is one of those tariff questions as hard to understand as Uncle Sam's schedule K. But the difference exists.

Because of this duty, which is not high enough to prohibit the entrance of American made products, the Canadian prices depend largely upon those fixed in the United States. Now the makers across the line are not at peace just at present. Indications are that they will fight one another bitterly this spring. The result will likely be cutting prices—prices cut so low that the profit will be a decimal.

Canadians Will Fight Too.

However low the United States makers go the Canadian producers will have to follow to some extent at least. They have that five-point margin—that five per cent. which the United States makers must pay to get their goods into the Dominion—but five per cent. is not much if a bitter price-cutting war starts.

Such are the present indications. That a change in the situation will arise is not considered likely. On this side the makers of the product are favorably inclined toward one another. But it is not so across the line. There no great friendliness exists. Any agreement seems far from likely. A price war seems in sight, and Canadian producers will be affected by the struggle.

Benefits the Dealer.

For the dealer, however, the situation is wholly favorable. He will get his paris green for less. He will be able to sell it to the farmer for less than last year, and still have as good a profit. He will be able to sell in larger quantities, for there is nothing which induced a free use of such a commodity like low prices.

Merchants would do well to bring this lower cost to the attention of the paris green users. They can hardly do this yet, when the reduction is not known, but they may well bear the subject in mind, and perhaps may mention the probable lower figure to farmers who enter the store to make a few purchases. A word or two will cause them to think. They will mention the change in price to neighbors. and so a greater demand than formerly will be created for paris green.

ARE FILLING ALL ORDERS.

London, Ont., Jan. 31.—J. W. Morris, secretary of the Hobbs Manufacturing Company, has returned from Montreal, where the firm suffered loss by fire last week. The salvage was small, only an overflow warehouse used for stocks of sheet and figured glass at the close of Montreal navigation. Goods en route and at other branches have been so diverted as to fill all orders.

NEW WESTERN PAINT FIRM.

A new addition to western paint firms is Lyon-Monkhouse, Ltd., of Winnipeg. This new concern is made up of the following well-known men:—G. H. Walton, G. Monkhouse, G. S. E. Lyon and H. R. Lyon. Incorporated under the laws of the Province of Manitoba, with an authorized capital of one hundred thousand dollars.

Lowe Bros.' paint products will be distributed by this company in the Provinces of Manitoba, Saskatchewan and Alberta.

G. Monkhouse, the manager, secretary and treasurer of the new organization, is well-known to the western trade, the acquaintance having been formed during his connection with the Canada Paint Co., P. D. Dodds Co., and the Winnipeg Paint & Glass Co. He has been connected with the latter concern for the past eight years, in the capacity of country sales and credit manager.

G. S. E. Lyon is also well-known, and during his nine years' connection with the Winnipeg Paint & Glass Co., has won many friends in the west. H. R. Lyon, for the past five years has also been connected with that company.

After the 1st of February, a staff of salesmen will cover Northwestern Ontario, Manitoba, Saskatchewan and Alberta, in the interests of Lyon-Monkhouse, Ltd., showing in addition to Lowe Bros.' products, brushes, glass, burlap, and also sash, door, mouldings, store fronts and roofing.

WANT LEAD ENQUIRY.

Representations have been made to the government for the appointment of a special commission to enquire into the lead zinc industry and to assist it by a proper tariff or bonus or both. The lead bounty expires in June and it is desired that in place of waiting for the tariff commission special enquiry be made meanwhile.

Catalogues and Booklets

CLOTHES WRINGERS.

The American Wringer Co., 99 Chambers street, New York, have issued a supplement to their general catalogue No. 9. This has been done for the convenience of members of the trade who prefer to handle one brand instead of a mixed stock of several brands. The company are now making every style of clothes wringer under their well-known brand "Universal," in addition to the other brands.

The booklet is very handsomely illustrated in several colors and contains a full description of the various lines manufactured.

ICE CREAM FREEZERS.

The Alaska Freezer Co., Winchindon, Mass., have issued a neat booklet illustrating their various makes of ice cream freezers, freezer tubs, freezer cans. packing tubs, packing cans, and parts for freezers.

Free Help for Every Decorator

Our new service department will help you plan the interior and exterior painting and decoration of any house or of a part. In place of a small job, you can get a big one, well planned and done. Remember the

Skilled help for every decorator or dealer to get him business right.

M-L MAPLE LEAF

Every decorative problem properly answered for best results.

DECORATIVE AID DEPARTMENT

M. L. PAINT is best-lasting exterior paint, improved during 20 years of careful tests. The kind that helps your business when you sell it. Ready to use.

FLOORGLAZE, a flint-hard glass-like and beautiful floor finish that applies easily, stands wear, resists scratches. Best interior floor finish.

is at your free service. Just send us your problem. We give you exactly the right shades and line of goods to use. We give you suggestions. Give areas and we tell exactly how much paint you need, or varnish, or flat wall color. Stencil suggestions, too. Get booklet.

ELASTILITE, an indoor or outdoor varnish that is applied easily and perfectly. You can guarantee it. It gives every satisfaction. A beautiful finish.

M. L. FLAT WALL, an easy-to-clean wall paint for plaster, burlap or wood, in beautiful interior shades. Sanitary, clean and adapted to stenciling.

Samples of the above finishes on request. The Decorative Aid Dept. supplies suggestions, estimates and stencil designs (stencils also at low cost) to any decorator, painter or dealer who wants to give his customers the best and most modern service. Freely at the service of the entire retail trade. Send your problems.

IMPERIAL VARNISH & COLOR COMPANY, LIMITED

YES 'TIS TRUE

It's going to be a great year for "High Standard"—a great year for "High Standard" dealers.

"High Standard" Paints are meaning more to more dealers every day—just as "High Standard" Paints will mean more to more consumers every day, as the quality becomes known.

The success is beyond our expectations. Every day sees new "High Standard" Agencies closed, and the character of the dealers joining the "High Standard" ranks speak volumes for the Proposition.

These dealers know the difference between *big claims* and *big values.* They were convinced by practical comparison of facts and figures---comparison of the actual service value of paints.

The only way to know the relative worth of paints is to compare them. Compare "High Standard" Paint with every other—in every way. Decide only after a careful investigation of everything the market affords.

If your purchase paint this way, we are satisfied that you will become an enthusiastic "High Standard" dealer.

Weekly Market Report --- Paints

PRICE REDUCTIONS.

The bears are in control of the market just at present. Lower quotations in linseed oil and turpentine are reported in Toronto; in the case of the former the reduction is 2 cents, in the latter 5 cents. The situation in Montreal is uncertain in these commodities, a weakness in turpentine being noted.

Lower prices are predicted in Paris green.

MONTREAL.

Montreal, Feb. 2.—Numerous and large sized orders are reported this week by all the manufacturers. It is evident that the spring activity has started. Perhaps the retailers are not yet selling paint in great quantities, but they have one ear to the ground, and hearing sounds that predict a big demand in the future, they are now stocking largely.

All the companies have their travelers hard at it. They are covering the ground as rapidly and as thoroughly as possible, and the retailers are readily booking orders. In some cases prices are left unsettled, as the manufacturers are not yet certain what it will be necessary to charge. The dealers are assured, however, that the charge will be as low as possible.

In at least one line, it appears the dealers are to get a satisfactory surprise in the shape of lower prices. Paris green, which is now being largely ordered, is unpriced as yet, but everything points to a considerably lower level for this. Those ordering are doing so in the dark, but they know they will get the regular price, and they can also rest assured that the regular price is going to be more satisfactory than that of last year.

Generally business is good. No price changes are exciting the market. Everything now centres around the spring trade, and as has been said, prospects for it are exceedingly bright.

Linseed Oil.—A quieter tone is noted here, though there is some uncertainty as to price. Last week it was stated that the oil generally sold at .92 and .95. But some handlers were then asking .95 and .98. Now the general quotation seems to be .95 and .98, though there are some who think this is a little high. The margin of profit, however, is small even with this figure fixed.

Rumors still continue to come regarding the Plata crop. The general opinion however, seems to be that this gives a good yield. Sharp changes in linseed do not seem likely for some little time.

Turpentine.—As predicted in our former report this commodity dropped to .70 cents during the closing days of last week. There the price remains now. A change may occur at any time, for the supply in Savannah has a great deal to do with quotations here. The said supply at present is good, so higher prices would not seem likely to come at once. But turpentine is an erratic commodity. It is hard to predict the future situation with certainty.

White Lead.—No change in price is announced. Nothing of note has happened during the week in fact, except a considerable increase in the orders.

Mixed Paints.—Here too the only feature is improved ordering. From all parts of the country the demand is coming, but especially from the far west where spring breaks earlier. Dealers are anticipating a good demand.

For Paris green the call has begun to come. The Canadian manufacture of this has not started yet, but within a few weeks the makers will commence operations. They say that indications are for a heavy consumption during the summer. Prices, on account of American competition, are almost sure to be lower than last year.

Glass.—Despite heavy orders, and difficulty in getting all their fall supply, owing to the shipping troubles, handlers still have a fair stock. They expect to be able to fill all orders—though they will be very glad to see navigation open early, for the spring ordering promises to be large.

Putty is going quietly. With the coming of spring and active building operations there will be a renewal of activoty in this line.

TORONTO.

Toronto, Feb. 2.—Business has picked up some, and local jobbers report that spring booking is now the order. Dealers are placing orders for their spring requirements freely. The general impression seems to be that the orders are a little larger than at this time last year; indicating that the trade is expecting a somewhat larger demand for paint this spring.

The bears have controlled the market during the past week, and there has been a downward tendency in various commodities.

Turpentine Down Five Cents.

Turpentine.—The price of turpentine has experienced two decreases in price during the past week. The first drop was from 73 cents to 71 followed in two days by a drop of 3 cents to 68. This is an unusually low price for this time of year.

The weaker state of the market is due to various causes, the most outstanding being the bearish tendencies of the speculators on the primary markets. The suits pending in the Federal courts are being accepted as an excuse for hammering down the price. A contributing cause is the fact that some supplies of turpentine are still being received at Savannah. However, the demand has strengthened up and the last reports indicated that there were 1,000 barrels less on hand than the previous week. This indicates that there is considerable going out. If the surmise is correct that heavy users of turpentine have not yet filled their requirements, a heavy consumption will result shortly. In the meantime, however, foreign consumption has not been up to the usual.

Lineed Down 2 Cents.

Linseed Oil.—The situation in linseed oil is not satisfactory from the standpoint of the jobber. A reduction of 2 cents has been put into effect, making the local quotations 94 for raw and 97 for boiled. This change can be traced probably to the lower quotations prevailing in England. It is not due to any reduction in the crusher's price, which has been maintained steadily.

There is a fairly good demand locally for oil, many orders having been placed.

White Lead Quiet.

The bearish tendency has not yet manifested itself in white lead, but as the price of pig lead has been reduced, some talk is heard of impending changes in the price of white lead. It is not at all probable, however, that any change will take place. The lead now being used by the grinders was purchased at the former high levels.

Glass.—Not a great deal of business is being done, although some orders have been placed. Enquiries denote a renewed interest in spring quotations, however.

Putty.—Business is light, and the price schedule remains the same. Standard putty is quoted as follows:—Bulk, in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same:—Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

Prepared Paints.—There is a steady tone to business in prepared paints. Dealers are booking for the spring trade in good bulk. The same applies to varnishes, japans and all varieties of paint specialties.

This handsome calendar, printed in four colors, is mailed to all property owners whose names are given us by B.-H. "English" Paint Agents.

Across the face of this attractive calendar is printed the name of the agent for B.-H. "English" Paint. On the back of the calendar is a short talk on painting and selection of harmonious colors.

Here is another Special Selling Help that brings paint customers to the B.-H. Paint Agency. You send us the names of all house owners in your territory; we mail direct to each one the attractive calendar illustrated above.

This calendar rounds out an advertising campaign which includes newspaper, poster, street-car and bulletin advertising, personal letters and store displays, all directly in the interest of the agent for B.-H. "ENGLISH" Paint in each locality.

Back of this aggressive advertising is the highest quality paint, the paint with the formula guarantee on each package, B.-H. "ENGLISH" Paint, 70% Pure White Lead, 30% Pure White Zinc, 100% Pure Paint.

The Famous British Brand of Paint

With pardonable pride we point to the fact that for 78 years

MINERVA

Paints and Paint Specialties

have held first place in the estimation of "men who know."

Quality of materials and skill in compounding "Minerva" Paints have made them a household word alike with aggressive dealers and the best painters.

Dealers handling the "Minerva" line get the advantage of the most varied and forceful selling helps ever devised to assist the merchant.

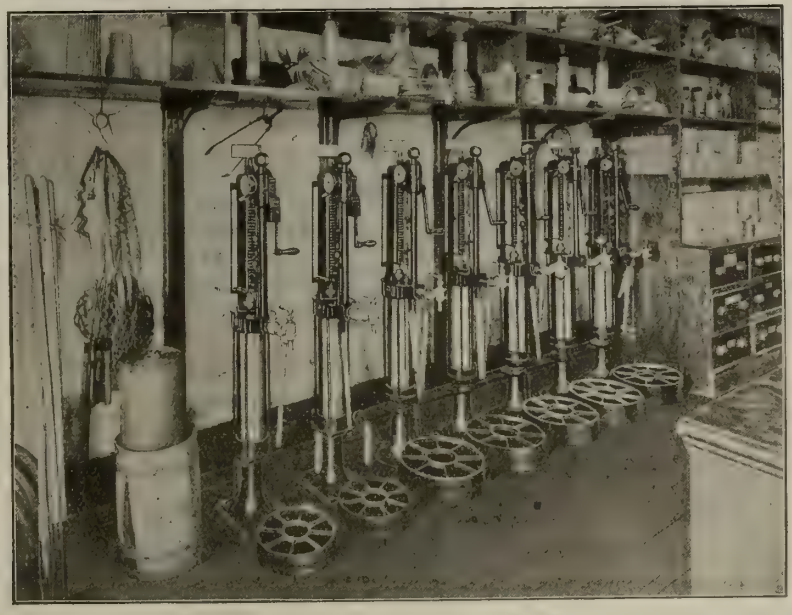
And don't forget that every can contains full Imperial measure, a splendid selling feature.

Meet us at the hardware convention.

Pinchin, Johnson & Company
(Canada) Limited

Established in England in 1834 (I-96) 377-387 Carlaw Ave., TORONTO

This Illustration was made from a photograph of a Bowser installation for Mr. Samuel Hobbs, 1434 Queen St. W., Toronto, Ont.



This system handles
Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

Amatite ROOFING

Mineral Surfaced—
Needs No Painting

EVERYTHING about Amatite appeals to the man with common sense. He can see its superiority at once—the real mineral surface *which never needs painting;* the two layers of Pitch which is the greatest waterproofing material known; the two layers of heavy Tarred Felt—all these contribute to the popularity of Amatite.

We can make Amatite better and cheaper than anyone else on account of our greater facilities, and consequently we sell it at a surprisingly low figure.

Simply the fact that it needs no painting is enough to make a man sit up and take notice—especially the man who has spent time and money in painting and repainting smooth surfaced roofings.

Every dealer should push it. Write to-day for further information.

THE PATERSON MANUFACTURING CO., Limited

MONTREAL TORONTO WINNIPEG VANCOUVER ST. JOHN, N.B. HALIFAX, N.S.

"MULE-HIDE"

High Grade Roofing

IS THE CHOICE OF EVERY DEALER AND USER WHO KNOWS.

The weather-resisting qualities of this roofing are far beyond comparison. Service has proved Mule-Hide Roofing to be the most economical on the market.

A ten-year, ironclad guarantee, of money back if not as represented, accompanies every order that leaves our works.

Our proposition spells good profits for the dealer—write for it at once.

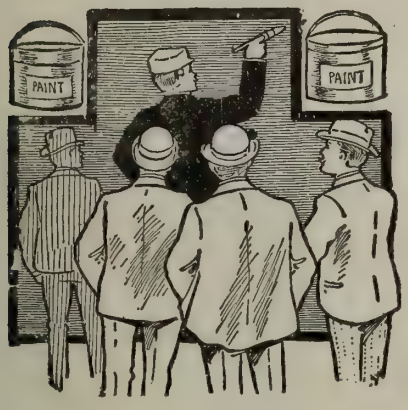
Paint Success



Always with a Ramsay Paint agency goes success. It is very simple. Ramsay's Agents carry nicely labelled goods. Ramsay's advertising prompts a quick sale. The color cards and schemes help a customer to decide. Then there is no haggling over the price. Ramsay's Paints are reasonable for pure paints, as everybody knows. The quality always satisfies, and there is a reputation and a guarantee behind them. A Ramsay Paint agency carries besides mixed Paints, those well-known lines, Ramsay's Varnish Stains, Ramsay's Enamels, Ramsay's Leads, Ramsay's Carriage Paints, Ramsay's Oil Colors, every one of them money makers and quiet satisfaction. Ramsay's Catalogue is brim full of interesting sellers. Are you interested?

An All-round Interior Varnish

THAT BRINGS EXCELLENT RESULTS

The durability of this compound in combination with its elasticity makes it especially useful for floors, linoleum, grained work and furniture.

It works with remarkable freedom, is impervious to water and will not scratch white. It may be rubbed and polished when thoroughly hard.

Our price and proposition are right—it will pay you to communicate with us at once.

"SILKSTONE"

(COPYRIGHT)

FLAT WALL COLOURS

Will Strengthen Your Hold Upon Your Paint Customers

"SILKSTONE" Flat Wall Colours have become extremely popular wherever used because they can be washed with castile or any other soap not containing lye, without impairing the delicate finish.

"SILKSTONE' sells at a price that invites buyers to your store and gives a satisfaction that means repeat orders.

YOU ARE TAKING NO CHANCES by stocking "SILKSTONE" colours as they are absolutely guaranteed, and have a record of economical and highly efficient service behind them. Get our colour cards, prices and agency proposition at once.

"GIVE TONE TO THE HOME."

Why Do Hundreds of Dealers Handle Exclusively

Jamieson's Crown & Anchor

Pure Prepared Paints?

Because—

They know them.

They know that they are honest value.

They know that once a can is sold, it never comes back; though the customer does for more.

They know that they are dealing with a reliable house which does everything possible in every way to help its customers.

If you want PAINT SATISFACTION come with us.

TESTING LABORATORY

VARNISH OVENS

SHERWIN-WILLIAMS

facilities for the manufacture of paints and varnishes of the best quality are unequalled by any other manufacturer in the Dominion. We crush our own linseed oil and carry on every process of its preparation in our own mills. Its purity and quality is conceded to be far superior to the ordinary commercial product. Our most important dry colors are produced in our big factory in London, England, and are made according to the best standards of English color making. The pictures show how well our large Montreal factory is equipped to maintain the S.-W. standard of paint and varnish quality. The maintenance of this quality and our live, up-to-the-minute sales and advertising methods have made S.-W. paints and varnishes the best selling and best known finishes on the market. Arrange now to become the local Sherwin-Williams Agent and start the New Year with the backing of the largest and most successful paint and varnish makers in the world.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

STORAGE

STORAGE, VANCOUVER, B. C.—STORAGE or space to rent, office if required; warehouse close to all wharves, with railway siding; two elevators. Martin & Robertson, Ltd., 329 Railway Street, Vancouver. (14)

MISCELLANEOUS

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THE year, we offer unusually good bargains in second-hand typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE MONEY YOU ARE NOW LOSING through not having a National Cash Register would pay its cost in a short time. Write us for proof. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS and paperhangers—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paperhanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

They Hit You Right Between the Eyes

You've got to notice those well-painted houses every-time.

That's the way they strike the other fellow, too, and if he passes that way very often he's going to get curious enough to ask what kind of paint keeps them in such good condition.

Our dealers tell us they make many sales through the recommendations of their old customers.

MONARCH PAINT
100% PURE

advertises itself wherever it is used, and sets the painter and property owner talking about its durability.

This fact hits you right between the eyes, too; you can't get around it, for it's as true as the world is round.

Monarch quality is a splendid asset to any paint business. Why don't you write us for the agency?

THE MARTIN-SENOUR CO., Limited

We Need Your Help

We want you to sell our varnish. The high quality of our goods has caused the sale of our goods to increase largely. If you are handling our line you are reaping part of the benefit; but if not, we would like to get you interested. There is no better varnish made than Dougall Varnish. It covers more surface per gallon than any other varnish made; therefore it is cheaper. It retains a most beautiful polish long after most varnishes would be worn away. That is the reason why we call it

THE VARNISH THAT LASTS LONGEST

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	NAME OF BRAND
The Sherwin-Williams Co., Montreal, Canada	"Taxite"
International Varnish Co., Ltd., Toronto Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

Chadeloid Chemical Company

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

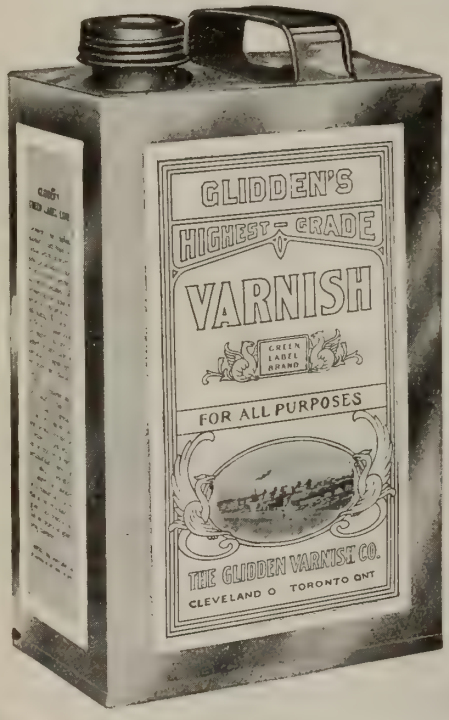
There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months'—five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.



We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

This is the Varnish Label that is well known outside the Trade.

WITH the constantly-increasing use of varnish by the general public it is not enough to have a varnish label known simply by dealers and a few painters.

That is why we have been showing the Berry Brothers' Label prominently over and over again in our big space magazine advertising.

It has become one of the best-known trade-marks of the day.

That makes it worth more to you than ever before.

Berry Brothers' Line includes every varnish, shellac and kindred product that any dealer needs to fill all his demands.

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

Knowledge is Power

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

TRADE MARK

DELTA

"CARPENTERS'"

SPECIAL

Leads In Quality and Temper

That's why we recommend them to dealers as the best value that money can buy. With weight enough to make it lasting and more teeth to the inch than any other make, it will do the work of $3\frac{1}{2}$ to $5\frac{1}{2}$ inch slim file, and obviate the necessity of carrying the full set. Carpenters' Special is a file that has all the qualities of slim, extra slim, special tapers, etc., combined. Sell the "Delta" and the buyer will be a "comeback" — not the file. Get our prices and circulars at once.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

THE SPRAY PUMP TRADE!

HAVE YOU LOOKED INTO IT?

"Success" Bucket Spray pump. All brass but the foot rest and handle

YOU'D be surprised—if you made a census of your town—at the number of citizens who own and use little bucket spray pumps. They spray their gardens, flowers, trees, etc., and use them also for washing windows, buggies, etc. This spring will see more of these pumps bought because they are adapted for so many different purposes and because public interest in spraying is greater than ever before.

Deming Sprayers

are made in more than twenty different varieties—bucket, barrel, knapsack, cart, tank and power sprayers—the most complete line of spray pumps on earth—suited for all spraying operations, whether large or small. We have a proposition to make any live dealer who wants to handle our line exclusively.

A TIP FOR 1912

Buy the Queen Square Fruit Jar

The biggest selling Lightning Style Jar in the United States and Canada. This jar is tried and true and should not be confused with the ordinary type of jar.

Made in clear white flint glass, with wide mouth, seamless rubber base and smooth polished top. Has the adjustable fastener.

Insist on the Genuine. Beware of Imitations. There is only one "Queen"

Manufactured by

SMALLEY, KIVLAN & ONTHANK

BOSTON, U.S.A.

For sale by all first-class dealers in Canada and United States.

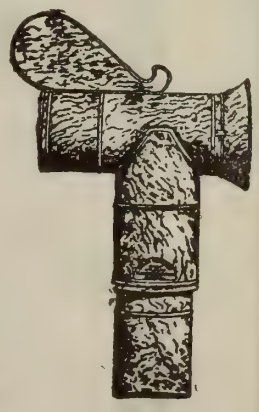
A Common Sense Talk

AIR IS CHEAP. You do not pay rates for air like you do for water, yet a big fuss is made over the impurity of water and very often no thought is taken of the impurity of the air breathed from day to day and night to night.

Crowded rooms, whether in public places, schools, opera houses or factories, require ventilation as well as the private dwellings.

HOUSE BUILDING IS A SCIENCE NOWADAYS AND NO BUILDING IS COMPLETE WITHOUT ONE OF OUR J. W. HARRIS VENTILATORS.

THE VENTILATOR ITSELF IS AN ORNAMENT and can be made to suit the character of the building, either as to size or as to quality of material.



MONTREAL, Dec. 4th, 1905

MESSRS. J. W. HARRIS MFG. CO., Ltd.
City

DEAR SIRS,—
In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,
W. CHAMPAGNE,
191 St. Paul St.

Dealers everywhere will find a double profit in handling this ventilator. Write direct for catalogue and booklet to-day.

Learn about our system of ventilating. A pleasure to send books.

PAT. FEB. 2, 1909

ROBERTSON SOCKET HEAD WOOD SCREWS

Have a decided advantage over other styles of wood screws. By having a square hole, into the centre of which a specially designed screwdriver fits snugly, it does away with all possibility of slipping, which often proves disastrous to the screw, and wastes a considerable amount of the workman's time.

They will sell on sight---get our prices at once.

We also manufacture high-grade Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any one of them will tell you Big Ben is the best selling alarm that's ever been put out.

In broken and dozen lots, $2.20 less 5%. In lots of 24, $2.10 less 5%.

LEWIS BROS. LIMITED, MONTREAL

OTTAWA TORONTO VANCOUVER

A Stock of "Plymouth" In Your Store—

Means a great deal more for your business than the profit on rope sales. PLYMOUTH Manila rope *attracts* trade and sells itself—together with the many other lines that sympathize.

"My customers drive twenty miles to get the ship trade-marked rope," a dealer writes us. "If they come for a hay-rope, they buy pulleys as well—if they want a well-rope, they also want a bucket. But it's *the rope* that *brings them.*

PLYMOUTH ROPE

"The Rope You Can Trust"

is not merely "one of the ropes" but is, instead, *the one best rope;* a high-grade specialty, offering more strength to stand strain, more length to the pound, and more durability than any other rope on the market. PLYMOUTH rope draws trade that might go elsewhere.

The heaviest demand is always for *best quality.* Many dealers have learned the wisdom of handling PLYMOUTH alone. If you have not, tell your jobber to send a few coils for you to put in stock as a test.

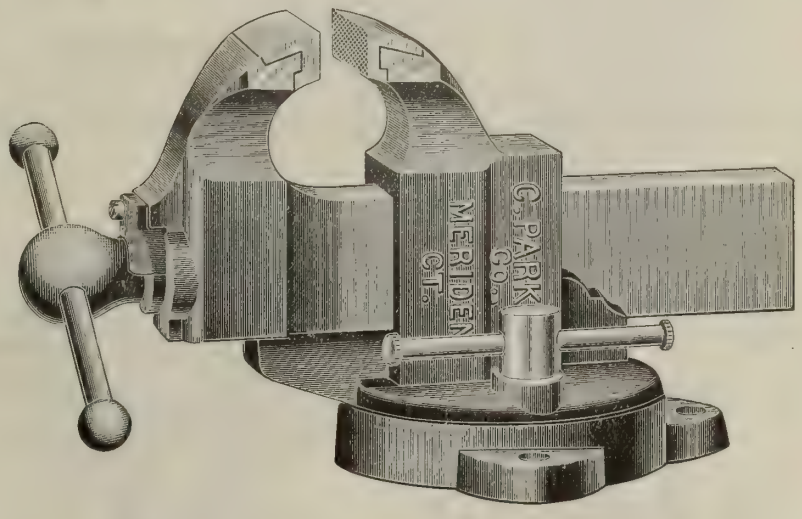
PARKER'S VISES

NEW ECLIPSE SERIES

Made to supply the demand for a strictly high-grade Vise at a moderate price.



Distinctive Parker Features

First---The steel faces are milled and fitted to the jaws, and are renewable---distinctively "Parker."

Second---The saddle or screw governor, which has been so long recognized as highly important in the working of a vise---distinctively "Parker."

Third---The absolute fit of the jaws---distinctively "Parker."

Fourth---The screw and nut are carefully threaded, and the jaws make immediate response to the action of the screw---distinctively "Parker."

The swiveling device employed on this series is a patented feature, and is operative at any and all points, and is adjustable---that is, can be converted to the use of a left-hand workman. We challenge the world to show a more positive lock, or one more easily operated.

We guarantee this series against breakage caused from any defects in manufacture or materials used.

The **ECLIPSE** Series is the best value ever offered to the trade, and is the superior of any vise on the market with the exception of "Parker" best quality. Compare it in detail with the best of any other make, and be convinced.

Number	Width of Jaw	Vise Opens	Weight
203-3½	3½ inch.	5 inch.	42 lbs.
204-4	4 "	6 "	58 "
205-4½	4½ "	6½ "	76 "

These Two Big Sellers Are Being Extensively Advertised

These two machines, Mr. Dealer, will be "best sellers" this fall and winter. There is money in carrying them. And for the very best reasons.

The Enterprise Sausage Stuffer and Lard Press is selling fast because this is a great year for profits from pork products. Hogs on the hoof are relatively low. So farmers will turn their hogs into products—lard and sausage—which will command big prices.

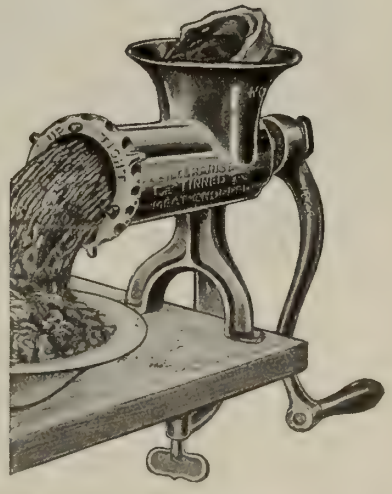
As to the Enterprise Meat and Food Chopper, more housewives are learning every day that it is the best economy aid they can have in the kitchen. The cutting principle and construction are right.

We are advertising these two big sellers in the way to give dealers the biggest volume of sales. The national publications are being used to let possible customers know that the Enterprise *lasts longest and does the work best.*

Sausage Stuffer and Lard Press

ENTERPRISE

Meat and Food Chopper



Consider these advantages of handling Enterprise goods. A score of different specialties under one brand—avoids surplus stock. Parts duplicated at any time—will fit *exactly.* Variation is impossible under our system of manufacture. Every Enterprise article gives you a profit—gives your customer satisfaction.

The big advertising campaign which we are now running in the women's, general and farm publications is giving Enterprise goods another big impetus of sales. Get your share. Follow the line of least resistance. Stock the Enterprise line.

You can easily make new customers for Enterprise Specialties in your locality. Send for our selling helps.

Your advertisement on six beautiful post cards---Free.

We are now issuing a set of six beautifully illuminated views of historic and modern Philadelphia. On the address side is an advertisement of the Enterprise Specialties, and with this we print your own firm name, so that it becomes your advertisement to be sent out to your customers.

Fill out the coupon, and we will supply you promptly.

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

Sternauware Progress Means Dealers' Profit

MANY a long-cherished ambition for developing and improving the manufacture of Sternauware can now be realized, since our fine, new ten-storey concrete factory is finished, and we shall, as usual, speak by actions rather than by words.

Our customers know that even in the old days, when we were hampered by lack of elbow room, we turned out a stream of ready-selling novelties in metal and glass. With as fine a plant as any in the country and the experience of twenty-five years to guide us, we shall hereafter give a service that will mean more sales and high profits for dealers all over the Republic and Canada.

The big advantage will come to dealers who understand that the Sternauware season is twelve months long.

If you are not on our mailing list in company with successful dealers in all parts of the United States and Canada, please let us know, so we can keep you informed regarding new styles of Sternauware soon to come from the new factory. Send for the new Blue Book of Sternauware, mailed free on request.

FORD AUGER BITS

are years ahead of competitors.

It has always been our aim to manufacture a bit that would be better than others BESTS. We've succeeded. Tests have proved it. Tests made by men who used the same bit for years—thought there was none like it—wouldn't use any other, but heard so much of the FORD and its wonderful Patented Concave Twist that they tried it—working it alongside of their favorite bit. Lo, and behold, the FORD did BETTER WORK at almost DOUBLE the SPEED. This meant money to them—money in both time and quality of work. They used the FORD again and were further convinced of its superiority. To-day these men and thousands of other discriminating workmen use the FORD in preference to all others.

Easy and Profitable to Sell

Our terms allow you a generous profit and our advertising will create a demand and make sales easy for you. Each FORD Bit is backed up with our solid guarantee, and any dissatisfaction will be speedily made right.

Ford users are profitable customers, for once you sell a man a FORD you've secured a steady buyer. We want you—we'll help you. Will you write us? We'll send you a handsome illustrated catalog, descriptive circulars, our terms to you and name of your nearest jobber.

Tobin Boy Scout Rifle

22 cal.—for short, long or long rifle—either black or smokeless cartridges—22″ barrel, increased twist rifling weight 3¾ lbs.

Hardware merchants who know the name "Tobin" and all it stands for in Gun Quality, are prepared for something good when we announce a 22 calibre rifle.

From all parts of Canada come letters---revealing a widespread belief that we have produced a "seller" worthy of a prominent place in every store that handles sporting goods.

Don't wait for "the store across the street" to try out this new line. ***You*** introduce it; we stand behind it with the same strong guarantee that goes with our shot gun.

Tobin Trade Special

(No. 35)

Possessing many features to specially recommend it to the discriminating purchaser, this new gun is to be marketed solely through the retail trade. We have neither catalogued it, nor advertised it to the public---nor shall we.

Of course "first sales" will surely lead to further sales---as is the case with all Tobin products. But those first sales---so far as this one particular gun is concerned---will be wholly a matter of "over-the-counter" salesmanship. We're going to leave it entirely to you and your clerks to put your customers "next" to this really superior gun.

Making Sign Board Without Cost

How an Ambitious Hardware Clerk Devised and Painted Handsome Signs With Discarded Material and, by Ingenious Methods All His Own—Has Found the Short Cut Course in Hardware and Metal Very Helpful.

Billboard and fence sign advertising is still carried on extensively, particularly by merchants in country towns. The more traveled roads leading to market towns are invariably marked at regular intervals by sign boards and, although the fences are not used as much for that purpose as they were in days of yore, it is still possible to find many miles of board around any town, extolling the merits of the goods carried by town dealers. A campaign of this nature, when judiciously carried out, and particularly if worked in conjunction with newspaper advertising, undoubtedly yields results. The sign board is an important feature of many national and international advertising campaigns. It detracts from the scenic beauty of the landscape, but it has a tangible commercial value.

A very effective fence sign campaign has been carried on for some time back by T. M. Nash, hardware dealer of Wellington, Ontario, through the energy and ingenuity of F. Ware, a member of his staff. Mr. Ware got out capable signs on a system invented by himself. Since the card writing course began in Hardware and Metal, however, he has been able to do his work better and with less labor.

That "necessity is the mother of invention," is a proverb which rings true. Not having any specific knowledge as to how lettering and sketching for signs should be done, Mr. Ware invented a system all his own; and it worked splendidly. In the first place, he took pieces of packing cases and nailed them together to make the boards. Then he selected from the paint stock, any tins which had become damaged or unsalable or which had been broken. Two coats of paint were applied and the boards were then ready for lettering. By this means, he made sign boards without incurring any real expense whatever, with the exception of his time. As the work was done during slack times, there was no loss from that source.

Drew Letters on Paste Board.

Mr. Ware's next step was to draw the letters on paste board. After getting them drawn to his satisfaction, he would cut the letters out, place them on the boards and pencil around them. This left the outlines on the board and he would then proceed to paint the letters in. The results were good, but the method was tedious and laborious. Mr. Ware recognized that there must be a better method and, when the card writing course was started in Hardware and Metal, he followed it closely. In writing to this paper recently, he says:

> "The Edwards short cut system in Hardware and Metal began a new era for me. Since then, I have discarded paste board letters and can work with five times the speed and ease. I am indeed thankful for the benefit and knowledge I am getting through Hardware and Metal and hope that many other clerks will take advantage of the opportunity this valuable course opens to them."

It will be seen from the accompanying illustration, which shows a number of his completed signs, that Mr. Ware has acquired considerable skill in this kind of work. That these signs were made with practically no expense is a high tribute to his ingenuity.

To Enlarge Cuts.

Mr. Ware's ingenuity went a step further. He devised a method of enlarging cuts from the advertising matter supplied by manufacturers so that they could be used on painted signs. The idea he followed out is explained in the accompanying sketch. He took the original drawing and divided it into a number of blocks. The blocks were then lined out in enlarged space to correspond to the size of drawing desired. The enlarged blocks were then drawn in, exactitude rather than artistic skill being required in following the original drawing closely. The drawing was then marked on the board in the same way as the lettering had been done and was painted in. By the use of carbon paper, the enlarged copy could be utilized for any number of signs. By this method, Mr. Ware found it possible to achieve very creditable results.

Helped to Make Sales.

Splendid results have been obtained from this form of publicity. All goods advertised by the fence signs have sold in large bulk, evidencing the fact that the signs have attracted the desired notice. Mr. Ware intends to pursue his efforts with even greater assiduity now that his facilities are so much better.

There is a double moral in this story. The first is that it pays to utilize manufacturers' selling helps. The second is that the hardware clerk, who possesses the necessary ambition can always find the means to improve business in any or all departments.

Some Signs Made and Painted by F. W are.

(See cut on page 41.)

The Management of a Retail Business

No. 6—Cash Discounts—Continued.

By H. C. Carson, F.S.S.

Refer back to last week's article, and observe that No. 1 had $135 outstanding accounts at the end of the fourth month. These he has begun to overhaul in vigorous fashion. Most of the amount was incurred during the first month, and he has found that he is not only deprived of the use of the money, but that the customers most likely are withholding further trade because of their indebtedness. He has, therefore, written each a polite, but firm letter, requesting a settlement or at least a substantial payment on account. And his appeal has not been in vain, for he has collected all but $45, and this amount he has concluded he will never collect without recourse to law. In the meantime, his coupon system has taken hold more firmly than he had dared to hope, and all but two of the coupon bills receivable had been paid at maturity. These two had applied for further coupon books, but he had held the rule of no further credit inviolate, and declined, preferring to lose the customers rather than break into his plan, which had worked so well, though only in operation such a short time. He had also discouraged, as far as possible, cash transactions across the counter, preferring to sell a book of coupons rather than make a small cash sale.

Business is Extended.

He had become known as the coupon merchant, and had bought a second horse and delivery wagon costing $225, which was necessary to meet the demands of his extending trade. Furthermore, letters had been sent to all the farmers in the neighborhood, asking them to bring in their butter and eggs, and such other produce as they might have to sell. Many of them came, and he paid them the best market rates. They, too, bought coupons, and the coupons brought them back with more produce. Some of these farmers, having taken coupons for produce, found that they were short of cash, for lines of goods which our merchant did not handle, for instance, dry goods, clothing, boots and shoes, etc. Here was a temptation to branch out into foreign lines, but he wisely concluded that this might not only lead him out of his depth, but also incur the enmity of other merchants, and perhaps induce them to add his line to theirs in retaliation.

Works With Other Dealers.

He arranged, therefore, to have one store in each line foreign to his own, redeem his coupons for merchandise, when presented by out of town customers. These dealers began trading at our man's store in consequence, and he at theirs, for his needs, to their mutual benefit and satisfaction. His business grew apace. Besides $100 cash business, he had sold during the fifth month 300 coupon books, half of them taking their 2½ per cent. or 25c. per book discount. On May 31st, his unredeemed coupons amounted to $400, so that his sales, with cash sales $100, and coupons outstanding last month $550, had been $3,250, less $37.50 discount on coupons. His purchases, including produce from his farmer customers, had been lighter this month, because of his enlarged stock at the beginning of the month, nevertheless, he had bought $1,500, securing a trade discount of 5 per cent. on two-thirds of the amount, and 2 per cent. cash discount on all.

Standing of Business.

His note at the bank has, of course, been paid, and thus far he has not made a new loan. His accounts stand thus:—

MERCHANDISE ACCOUNT.

Stock on hand May 1st	$ 4,125.00
Purchased during month	1,500.00
	$5,625.00
Sales @ 75 per cent. cost	$ 2,437.50
Stock on hand	$3,187.50

RECEIPTS AND DISBURSEMENTS.

Cash in hand May 1st	$154.83
Accounts receivable, collected	90.00
Bills receivable	580.00
Coupon books (less discounts)	2,462.50
Cash sales	100.00
	$3,387.33
Note at bank	$750.00
Horse and wagon	225.00
Merchandise (less discounts)	1,421.00
Personal drawings (5 months)	500.00
Wages and other expenses	200.00
	$3,096.00
Cash in hand May 31st	$291.33

BALANCE SHEET.

Assets.

Cash in hand		$291.33
Accounts receivable		45.00
Bills Receivable	$500.00	
Less unredeemed coupons	400.00	
		100.00
Merchandise		3,187.50
Fixtures, etc.		1,225.00
		$4,848.83

No Liabilities.

We have had to arbitrarily adjust the merchant's personal account by drawing $100 per month for the five months, provision for which had been omitted. Starting with $3,500, his net gain in 5 months thus stands at $1,348.83. His total sales to date equal $9,062.50, showing a gain of nearly 15 per cent. of sales, and 38 per cent. on capital.

How No. 2 Has Fared.

And what has No. 2 Mr. Shopkeeper been doing in the meantime? He has felt the keen edge of his competitor's superior business acumen, and is beginning to think that something must be wrong. The new delivery wagon across the way has confused him, and he cannot understand why the farmers are going to No. 1 with their produce. He has been outclassed in fresh produce, and in a number of ways he has made mental comparisons with No. 1, in all or which he has come off second best. A large number of his cash customers have left him, and while he has sold $1,200 on credit, he has only made $100 cash sales. Collections, on the other hand, despite his efforts, have been disappointingly slow, only $600 being gathered in. Several of his creditors have intimated that his limit has been reached, but he has paid off $500 of his liabilities, and made purchases amounting to $900 nevertheless.

Compares Unfavorably With No. 1.

Here are his accounts:—

MERCHANDISE.

Stock on hand May 1st	$2,450.00
Purchased during month	900.00
	$3,350.00
Sales at 7 per cent. cost	975.00
	$2,375.00

RECEIPTS AND DISBURSEMENTS.

Cash on hand May 1st	$183.00
Received on account	600.00
Cash sales	100.00
	$883.00
Merchandise accounts	500.00
Wages and other expenses	150.00
Personal drawings	200.00
	$850.00
Cash in hand May 1st	$33.00

BALANCE SHEET.

Assets.

Cash in hand	$33.00
Accounts receivable	3,233.64
Merchandise	2,375.00
Fixtures	1,000.00
	$6,641.64

Laibilities.

To sundry creditors	$2017.67
Personal accounts	300.00
	$2,317.67
	$4,323.97

The personal accounts $300, plus $200 cash drawn, equal $100 per month for 5 months, as in the case of No. 1, and his net gain is $823.97, according to the books, and supposing his receivables will be paid in full. A radical change will be necessary if Mr. Shopkeeper is to survive his first 6 months' trading. The writer has intended keeping him in business for a year, but the coils are drawing tighter and tighter about him, solvent as he appears to be, and perhaps it would be just as well to close him out next month, and see if we cannot find a more worthy competitor for No. 1.

Make Room Now For Spring Goods

Dealers Should Now Turn Their Attention to This Problem—February Sales Will Help to Clear Out Surplus Stock Before Spring Trade Starts—Plans Followed by Two Western Firms.

Frequent references have been made in recent issues to the pretty general custom of holding special sales during February. Numerous reasons have been cited why the month of February should be selected for this purpose. There is an additional reason, which applies with particular force to the hardwareman. The spring brings with it a wonderful stimulation in business and demand veers to a wide variety of goods which do not sell during the winter. The hardwareman finds it necessary, therefore to clear his store of winter lines and make room for the display of spring goods.

He can do this best, probably, by holding clearance sales, some time before it becomes necessary to re-arrange the store to meet the exigencies of spring trade. A review of the situation forces the conclusion that the best time for these sales is in February or early March.

A Western Ontario hardwareman, who has conducted a successful business for over twenty years, attributes his success to the fact that he has always kept ahead of the seasons. "I never allow myself to be caught unprepared," he explains. "I have my skate stock ready by November 1. Christmas goods are always in place by the first of December; and my stock of spring supplies is invariably on hand before the snow melts."

By keeping just a little ahead of the turn of the seasons, he has always secured the bulk of the early trade. People who cannot get what they want elsewhere come to him. It is not hard to perceive the advantages of this. The early customers go to his store and it is quite to be expected that, when they require anything more, they go back. "Every season," he asserts, "I get customers who had never dealt with me before but who were unable to secure what they wanted at their own dealers. They generally stay with me."

The early bird catches the worm. Although the proverb gives no inkling as to subsequent events, it is highly probable that, fortified by his first repast, the early bird is able to hustle more and secure a bigger share of the worms which are left than his sluggish rivals when they appear on the scene. At any rate, it is that way in business. The impetus of an early start puts the wide-awake merchant so far ahead in the race that the others cannot catch up.

Held Clearing Sale.

The Western Merchants, Ltd., hardware dealers, of Laird, Sask., believe that it pays to prepare early for the coming season's trade. It became apparent a fortnight ago that they were carrying a larger stock than would be wise when the necessity arose to feature spring goods; the fact being revealed by the making of an inventory. It had been decided, in addition, to stock a number of new lines in shelf and heavy hardware and this made the need for room still more imperative. A clearance sale was

Two-column advt. used by Western Merchants, Ltd., to feature February Clearance Sale.

held, therefore, discounts being offered on some of the bulkier lines.

This sale began in January and at time of writing was still being conducted with considerable success. This is a case where the need for more room for spring lines was anticipated well in advance of the opening of the season; and the firm in question will undoubtedly meet with splendid results.

Classifying Goods.

Another hardware firm to follow the February clearance sale plan is that of Donald & Thompson, Lumsden, Sask. They have adopted the idea of classifying goods according to price. For instance, one table has been set aside for articles which are being offered at 10 cents. Another table is stocked with 15 cent goods, and a third is devoted to articles priced at 25 cents. These tables have been placed well to the front of the store where they are seen by all who enter the store.

This is probably the best method known for clearing out a collection of small odds and ends. People will discover any number of articles which they need on glancing over a table array of stock priced at a small figure. Many of these articles are the kind which people would not visit the store for the purpose of buying. One dealer states that he keeps a table near the front of his store the whole year around for the display of cheap-priced articles. Customers will frequently buy a dozen or more pieces when they had no intention of buying anything at all of that nature. "That table is a regular clearing house," he explains.

Donald & Thompson conducted their sale for ten days, meeting with satisfactory results. During the same period, they conducted a twenty-five per cent. discount in stoves.

BUSINESS WAS GOOD.

That business in the hardware trade of Vancouver and British Columbia during 1911 was phenomenally good is the opinion of R. P. McLennan, vice-president of McLennan, McFeeley & Co., Ltd., as well as president of the Bank of Vancouver.

Discussing the business of the hardware trade for the past year, Mr. McLennan says: "In my opinion the review can be summed up in the same words for British Columbia that apparently must apply to all the western provinces at least—phenomenally good."

Hardware Letter Box

Sharpening Stones.

J. M. Ross, Lucan, Ont.—"Can you give me the names of manufacturers of sharpening stones, emery stones, etc?"

Carborundum Co., Niagara Falls; Canadian Hart Wheels, Hamilton.

Carrier Systems.

M. I. Laschinger, New Hamburg.—"Kindly give me the names of firms making cash carriers."

Hamilton Brass Mfg. Co., Hamilton; Gipe-Hazard Store Service Co., 97 Ontario Street, Toronto.

British Hay Dealers.

T. G. Barnes & Son, Hampton, N.B.—"Can you name us one or two dealers in hay in Great Britain?"

Communicate with the firm of Motherwell, Glasgow, Scotland.

Needle Cushions.

H. W. Marshall, Kingston.—"Where can I obtain strawberry-shaped emery filled needle cushions?"

Can any reader supply this information?

PUBLISHED EVERY SATURDAY.

A SATISFACTORY YEAR.

The year 1911 was a favorable year in Canada, according to statistics compiled by Bradstreets. The number of individuals, firms and corporations constituting the business community of Canada is placed at 130,446. During the year there were 1,401 failures, or less than 1 per cent., a splendid showing indeed. The causes of failures are estimated as follows: Incompetence, 226; inexperience, 41; lack of capital, 691; unwise credits, 12; failure of others, 16; extravagance, 12; neglect, 58; competition, 15; specific conditions, 204; speculation, 13, and fraud, 113.

It is one of the strongest proofs of the stability of business conditions in Canada that 83.2 per cent. of the failures can be charged to some fault in the individuals themselves, and not to any general condition. Only 15 went to the wall as the result of competition, and there are none who ascribe their failure to business depression.

There is food for thought in the big number of failures due to lack of capital. It is inevitable in a rapidly developing country that many attempts should be made to start in business without sufficient capital to warrant a start. It is equally inevitable that a certain proportion of these daring ventures should result in flat failure. The past year has seen rather a larger percentage of failures from that cause than usual.

The number of failures from incompetence is larger than one cares to find. It is rather disquieting that, in an age when specialized efficiency is sought, there should be such a large number of men absolutely incompetent to look after the business they have embarked in. Undoubtedly, business efficiency is just beginning to make itself felt. We still have a great deal to learn.

STRINGENCY IS TEMPORARY.

The financial situation in the western provinces has become somewhat strained. There is not much ready money in sight and some little uneasiness has been felt on that account. The trouble can be traced back to the lack of transportation facilities, which has tied up wheat shipments. The effect has been felt in all lines of business, as the grain growers have not realized fully on last year's crops.

The difficulty is purely temporary. It is only a matter of time until the transportation tangle will have been straightened out and the money stringency will then be relieved. In the meantime, reports from the west are to the effect that business men are not allowing present difficulties to shake their belief in the prosperity of the country, and the prospects for an exceptionally busy year. Certainly, the hardware trade is not suffering from lack of optimism. Activity is reported in all branches.

THE MARKETS AND THEIR WORK.

A traveler writes complaining that he has missed his copy of Hardware and Metal for two or three weeks. "I am dependent upon this," he says, "for some quotations."

Perhaps that word will arouse certain dealers who are inclined to become lethargic. They do not need, they think, to read the weekly market reports. The changes in prices, they say, are not great at this time of year. The travelers will advise them of any big movement anyway.

Yes, the travelers do take an individual interest in the dealers of their territory. But they cannot call upon these men weekly. They cannot therefore, advise them of the changes weekly. But there is a traveler which brings this news every Saturday. It does not tell only the changes in paint and oils, or the changes in hardware. It records every move in prices in all the hardware lines. It shows the trend of prices, and indicates often what may be expected in the future. It gives the hardware dealer advance information, and advance information has a money value.

In the last two or three weeks Hardware and Metal has recorded a drop in the prices of shoe caulks; a lower level in iron piping; a lower level in horse nails. It predicted a rise in copper goods and the rise came. It has reported the pendulum like movements of turpentine, and the somewhat similar irregularities of linseed oil. It has related the movements of the tin market, has told of the probability that glass will advance rather than decrease in price. It has given reasons for the expectancy that this spring will see a considerably lower price for paris green.

In short, the weekly markets have brought opportunities to those hardwaremen who read them carefully and consider what the facts and tendencies set forth mean for them. Many—the majority—are profiting by these weekly reviews. Even the travelers, who come in constant touch with the houses which they represent, find them of great value. It would seem, indeed, that his fellow dealer would do well to wake up, and, with his fellow dealer, grasp the opportunities which the weekly market reports offer.

THAT OUNCE OF PREVENTION.

January, the insurance men will say, was notable for the number of serious fires. Serious fires are serious to more than the insurance companies. They are serious to those who get the insurance, even if that insurance completely covers the value of the property destroyed. A fire puts a stop to active operations, and that is a great hardship in a day when connection means so much.

All this simply shows that it is worth the while of manufacturers and retail dealers to take every possible precaution against fire. A Montreal concern has adopted a somewhat elaborate system of doing this. Every night the foreman of each floor signs a paper saying that he has had all the rubbish removed. Every night the night watchman has to sign these papers, saying that he has

found the floors clear of all rubbish when he came on duty. The night watchman, also, is given a bonus if there is no fire whatever during a certain period. One conflagration and his bonus is gone.

The system is in force, of course, in a large factory—a factory in which inflammable materials are stored, and where fire is hard to guard against. But it might be taken up, in somewhat modified form, in many retail places. It is merely a system of fixing responsibility, a system of putting it up to someone to guard against fire. If it were made a part of one man's work to see that inflammable rubbish were removed from floors and cellar before the store were closed for the night, there would be less fires; and less fires would mean less loss of business to the hardwareman, and the desirable lower insurance rate.

A LESSON FROM DICKENS.

The Dickens Centenary is an event of deepest interest to all. Charles Dickens was not merely a novelist; he was an educator and reformer. As the creator of "Scrooge," he was largely instrumental in perpetuating the old Christmas customs and kindlinesses; his recital of the cruelties at Dotheboys Hall led to the suppression of a pernicious school system; his references to the "Circumlocution office" led to civil service reforms; and "Oliver Twist" has helped a great deal to eliminate the most glaring evils of the workhouse system. These are just a few of the reforms that he accomplished through the medium of his wonderful books.

It is interesting to note that Dickens has many references all replete with good advice for the retail dealer. We recall at once his allusions to that queer little ship chandlers' shop in "Dombey and Son," where "everything was jammed into the tightest cases, fitted into the narrowest corners, fenced up behind the most impertinent cushions and screwed into the acutest angles." It reads very much like a description of some hardware stores we have seen. The story of the old proprietor of this odd little shop contains a moral which cannot be passed over. His experience can best be summed up in his own words:

"But competition, competition—new invention, new invention—alteration, alteration—the world's gone past me. I hardly know where I am myself; much less where my customers are. . . . Tradesmen are not the same as they used to be, apprentices are not the same, business is not the same, business commodities are not the same. Seven-eighths of my stock is old-fashioned. I am an old-fashioned man in an old-fashioned shop, in a street that is not the same as I remember it. I have fallen behind the time and am too old to catch it again."

On the day that Solomon Gills indulged in these mournful reflections, he had had but two people enter his store—one to ask change for a sovereign and the other to enquire the way to Mile-End Turnpike. The observation may perhaps sound a little trite, but there are plenty of Solomon Gills in the retail hardware business to-day. The times are different, but the reason is the same. New ideas, new goods, new systems have come. Competitors have taken them up. But some have remained in the old rut, neglecting to keep track of changes, failing to render their premises and stock attractive to the public. Old-fashioned men in old-fashioned shops, they have fallen behind the time.

No matter how thoroughly up-to-date a dealer may be, the danger of falling behind is always there. Every day brings some change which must be noted and studied and considered. New inventions and new goods are flooding the market. Nothing can stand still, least of all, a business which counts for its maintenance on the favor of the public. The conclusion is obvious: The dealer must keep up with the times in every way, or the day will come when, like old Sol. Gills, he will see the people passing the store for better and more attractive establishments.

POINTED EDITORIALS.

It begins to look like Belleville for 1913.

* * *

Any man who adopts the word "work" as his motto is bound to succeed.

* * *

"Boost Belleville" is the slogan of President Chown and his eastern contingent.

* * *

Winnipeg retailers are out flatfooted in favor of single tax. Sir James Whitney will get them if they don't watch out.

* * *

Make your paint department up to date and the sales will double. If you don't believe it, try it and see for yourself.

* * *

Ontario hardwaremen had better send in their returns of revolver sales to the Provincial Police Department. The authorities are talking fines for all delinquents.

* * *

The single taxation theory is making many converts. Let some one come along with a plan for No—taxation and he will be fairly overwhelmned with support.

* * *

Amherstburg, Ontario, is a lively little place. Recently, the Amherstburghers decided on early closing of all stores. Now they are establishing central delivery by automobile. Keep it up.

* * *

A wholesale salesman tells of the fight he had, some sixteen years ago, to get a hardwareman to handle screen doors. Dealers, as a whole, seem to have livened up, and got more in touch with the people since that day.

* * *

The visit of the millionaire single tax advocate, Fels, to Canada does not seem to have had the "soporific" effect on the cause that might have been expected. A lively agitation in favor has been stirred up in Winnipeg.

* * *

A decade ago the only difficulty with screen doors was that you couldn't get dealers to handle them. The only difficulty now is that you can't get enough doors to satisfy the dealers.

* * *

Here is the way one hardwareman sizes up the advertising problem: "If you advertise in the newspapers, that is Faith—in your goods. When you spend your money on circulars, it is a case of Hope—that people will read them. But when you advertise in every church programme that comes along, that is nothing but Charity, and don't you forget it."

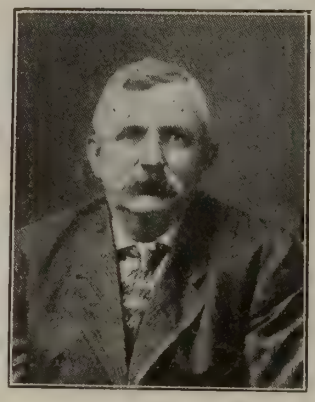
Veteran Figures in the Hardware Field

No. 7—HENRY N. MOSS, Renfrew.

The fact that he has seen thirty-seven years in the hardware and tinning business is the only thing that qualifies Henry N. Moss of Renfrew, for the title "veteran." Fifty-five years of age, he is to-day in the very prime of life and is just at the commencement of a useful public career.

It is not intended to imply by this that he has only now started to take an interest in things municipal and political. On the contrary, he has always been one of the first to take off his coat and get into the thickest of the fight. He has served in many a hard-fought battle, generally in the capacity of leader. Having now retired from business, however, he has a greater opportunity to exercise his gifts and his liking for public service.

To start chronologically, Henry Moss was born on August 22, 1857, in the town of Port Hope. At the age of 18 years he decided that it was time to start out in the world for himself and he selected the hardware business. The same wisdom that he thus displayed in the selection of his vocation was extended to choice of place. He picked on Renfrew, the home, latterly, of millionaires and hockey players. In 1887 he started a hardware, tinware and stove business in Renfrew and gradually worked it up until it has become one of the best in that section of the country. Any hardwareman will appreciate the fact that a good business cannot be built up without hard work; as Henry Moss undoubtedly worked up a good business, it can safely be assumed that he worked and worked hard. He found, nevertheless, time to keep right in the thick of public affairs. No election was complete without Henry Moss as a candidate and he had the winning habit. He was first elected to the Renfrew village council in 1893. Then they made a town out of Renfrew, and Mr. Moss ran for the post of town councillor. Annexing that safely, he decided next year to move up a step to the deputy reeveship. As the electors took his view of it, he was encouraged to stand for mayor in 1900, and succeeded in capturing that honorable post. Having now reached the top of the municipal ladder, he decided to start all over again. Accordingly he sat in the council for a few years after that and has held the position of reeve since 1909. His zealous adherence to duty won him a singular honor this year in his unanimous selection for the post of warden of the county of Renfrew.



Business competitors, political and municipal opponents have nothing but good words for Henry N. Moss.

One would suppose that running a hardware business and taking a big share in town management would be enough for even the most insatiate worker. But it didn't serve to fill out the full measure of Henry Moss' activities. He carried on a large business in the purchase of hides and took such an interest in the question of road-making that he became recognized as an authority on that subject. As a result of his activities in that line, he was appointed two years ago to the office of inspector of colonization roads for several counties. He accordingly retired from the hardware busines, leaving it with his son, H. D. Moss, who had been taken into partnership in 1906.

It goes without saying that politics have claimed a share of his time. He was selected to carry the Conservative banner for the legislature some years years ago. It was a forlorn hope, the other party being entrenched behind a majority which made the result a foregone conclusion. Nothing daunted, Henry Moss tackled the job with characteristic enthusiasm and vim and, although he did not win, he kept the other fellows busy. His party wanted him to stand for the Commons in September last but he declined, prefering to devote his time to the more modest, but equally important work entailed in municipal service.

Mr. Moss has always been a believer in individuality in business. He has infused plenty of it into the conduct of his own store and it has always been of the right kind. He is a big-hearted man whose openness of manner has made him a warm favorite with everyone. Business competitors, political and municipal opponents have nothing but good words for Harry N. Moss.

May Fine Slow Hardwaremen

Toronto, Feb. 6.—Hardware and sporting goods dealers in Ontario, who have neglected to send in returns of their sales of revolvers, had better hurry up. The provincial police authorities are contemplating drastic action.

According to the provisions of the Offensive Weapons Act put into effect last year, all dealers who make sales of revolvers, shot-guns, sling shots and hunting knives must send in reports to the Ontario Provincial Police Department on forms especially provided for that purpose. These returns are supposed to be made quarterly the dates set being within seven days after March 31, June 30, September 30 and December 31. Neglect to do so renders the dealer liable to a fine not to exceed $50 for each offense.

The Act provides that no revolvers are to be sold with the exception of those which are serially numbered. As the department is provided with a complete list of all weapons sold by the wholesale houses to the retailers, it is not a difficult matter to trace any weapon sold.

Chief Inspector Rogers complains that many dealers have been negligent about turning in their reports and he announces that he is seriously considering prosecuting the delinquents.

Hardwaremen who have neglected to make their returns would be wise to attend to the matter. The necessary forms can be obtained by applying to the Provincial Police department.

DISPOSES OF INTEREST.

William H. Evans, formerly identified with the Canada Paint Co., and for many years a director of the Toronto Lead & Color Co., Toronto, has disposed of his interest in the latter company to Toronto parties.

CARRIER COMPANIES COMBINE

The Gipe-Hazard Store Service Co., have taken over the business of the Gipe Carrier Co., and also that of the Hazard Store Service Co., both of Toronto.

Hardware Store Publicity

Chapter 2--Common Forms of Publicity

Publicity is the dominant feature of retail merchandising. It includes in its scope the whole range of retail effort. Everything that the merchant does is part, more or less, of his publicity campaign. To endeavor to explain every phase of retail publicity is, therefore, out of the question and this article will be devoted to some of the more common forms.

Newspaper advertising is the first and most important form. As succeeding articles in the series will deal extensively with the use of printer's ink, the matter can be dismissed here with a few words. It is not necessary to repeat that newspaper advertising pays; that has been clearly demonstrated and is almost universally conceded. It might be added, however, that newspaper advertising realizes the best results when used in conjunction with some of the other forms of publicity.

Use of Circulars.

A method adopted by many dealers is to issue circulars and booklets, containing advertising matter. Opinions differ on the efficacy of the circular, some contending that it can be made to pay and others asserting with emphasis that it is waste of money. The writer feels that one rule can safely be laid down in this respect. Circulars should be used only as an adjunct to newspaper advertising. In some cases, circulars can be used to good effect. If a hardwareman is doing business in a small community where there is no newspaper (such places do exist), or if he caters to only a small section of a large city, he can often obtain good results by a judicious distribution of advertising matter.

The circular is, however, a risky method. People get so much printed matter thrown in at the doors that they very frequently consign such packages unopened to the waste basket or the fire.

Hand bills share the same drawbacks. In addition, the merchant has to figure on the carelessness of his bill peddlers who cover their routes in easy fashion and get rid of a large portion of their bills by the bonfire method. It is sometimes found effective to run off bills from advertisements which have appeared in the local papers. By distributing these, the dealer adds some to the effectiveness of his advertisement, reaching people undoubtedly who had not seen the paper or had not scanned it carefully.

The Catalogue Plan.

A number of hardware dealers have adopted the plan of late years of compiling catalogues, illustrating their complete stock as far as possible. The advantage of this method was first perceived by the mail order houses. Most people will place a higher value on a catalogue than they will on circular or pamphlet matter. They keep the catalogue and refer to it as occasion arises. This custom has resulted in the building up of the mail order trade. Likewise it has helped a few progressive dealers to combat the depredations—the word is not too strong—of the catalogue houses in their sections. Still, the idea should not be adopted rashly. The printing of a catalogue entails considerable expense and, unless the possibilities have been carefully considered, the matter well prepared and the mailing list wisely compiled, the returns may not pay back the dealer for the time and money invested.

Taboo Programmes.

Next on the list is the programme advertisement; although the word "advertisement" cannot fairly be used in this connection. Every merchant has calls made upon him of this nature. If a church function of some kind has been arranged which calls for a programme, a committee is formed to go around and canvass the merchants for ads. This pernicious custom thrives on the cowardice of the average dealer who dreads to refuse such demands. He gets no adequate returns from his investment. He pays only because he thinks he may lose customers otherwise. The transaction takes on the color, therefore, of extortion.

If any hardware dealer cares to pay for advertising of this kind, all well and good. But he should not charge it to advertising. Rather, it should be credited to charity; for charity it is, purely and simply.

The objection raised to church programmes refers with equal force to all programme advertising. Dealers go down for this sort of thing, largely because competitors have done so. In some cities, the retailers have emancipated themselves from the programme evil by placing all publicity matters in the hands of a secretary. No dealer will then "go in" on an advertising scheme which has not been certified to by the secretary as legitimate.

The Yearly Calendar.

Opinions differ on the question of calendars. They constitute an expensive form of publicity. People have come to expect them, however, and they undoubtedly keep them a long time, very often the full year.

The real value of the yearly calendar is a question which the dealer must decide for himself. He will know best whether he is getting returns in keeping with the cost. Many dealers have never made it a custom and have never met with complaints.

Perhaps the most dangerous feature of it is that once the custom is started it is hard to break. When people receive a calendar from a firm one year they expect to get another the following year.

The Yard-stick.

The consensus of opinion is against one other form of gift publicity which might here be mentioned—the yard-stick. It was at one time a common method to hand out yard sticks to customers. It is not as common now, although some dealers still adhere to the idea. As a means of drawing crowds to the store, the distribution of yard sticks was effective probably; as an advertising measure, it had no value. The writer has used a ruler for the past year with more or less regularity every day. It contains advertising matter of some kind but he could not tell what it is or the name of the firm that sent the ruler. That is where the trouble lies; the yard stick is such a useful every day article that people think of using it and never of reading it.

The same objection can be urged against the free distribution of novelties and small articles. As a means to draw people to the store, they serve a valuable purpose and can therefore be classed as publicity aids. The dealer should not expect lasting benefits from the distribution, however.

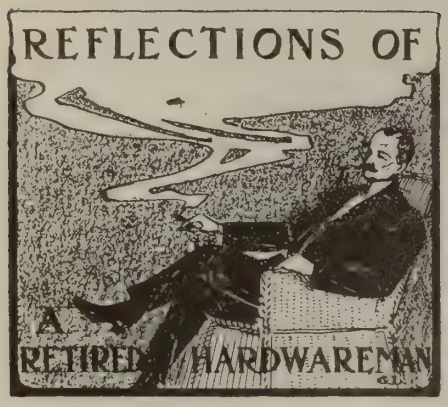
The Billboard.

And now as to the bill board. This phase of publicity can be worked to good effect. One of the best stove retailers in Canada does a great deal of advertising through bill boards. His name catches the eye of the pedestrian and street car passenger at practically every turn. It costs him money but it sells his stoves. Customers flock to his store from all parts of the city. It should be borne in mind, of course, that he does not depend on bill boards for his entire advertising. He uses the newspapers as well and has even placed canvassers out to work for him.

The bill board can be made highly effective in country districts. There are strategic points on the highways which can be utilized in this way.

The Publicity Campaign.

All these are more or less common forms of publicity. The hardwareman should take cognizance of them all, in preparing his publicity campaign. He should consider the relative merits of each and decide on his own plans according to his estimate of what would serve him best.



By "Mack."

Pessimism usually makes its appearance in a man's mental horizon upon passing within certain defined age limits.

It is an acknowledgement we make to the arrival of middle age when our conviction that the country is going to the dogs dominates the mind and a form of enjoyment is taken in exchanging this sentiment with others of like views.

The condition of retirement may conduce a gloomy foreboding if we may believe the reports from the English press which I saw recently.

Veterans on the retired list from the army and navy can see little hope for maintaining the empire if the service remains as weak as they think, in spite of the assurance of the officials in control of both these departments, that the efficiency of the army and navy was never higher.

Decending in the scale of importance as a whole, but of vital interest on account of the direct contact with the subject, is the pessimism derived from a survey of the tax schedule when it is presented for annual payment. The keenest critics that I have met are to be found in a certain retired class drawn from city and rural districts. Should their cynicism prove accurate the town will never make enough progress under the handicap of indebtedness which encumbers it, to avert ruin.

Yet we see the towns and cities cheerfully assuming these burdens and becoming each year more attractive and better governed. It is apparent to all that the city has not lost its power to lure men from the land and make them citizens with the privileges of citizenship to criticise our civic rulers and their motives upon every occasion calling for dicision and action.

Withall the pessimists of this category are entitled to praise, I think. They ask no favors when the time comes to pay their share of the city's up-keep. The money is produced at the appointed time and this is a virtue worthy of emulation in so many forms that I shall not make the application to a particular class.

Then we are sometimes entertained, perhaps unwillingly, by the individual who has been in trade. His present belief that things are not what they were in his generation is supposed to reflect discredit on modern business circumstances and he proceeds to illustrate in detail if you do not adroitly effect your escape. You should shun another chance intercourse for the sake of your own affairs if you should have any, because after receiving into your system a few of our retired philosophers' conclusions the result may prove disastrous to successful effort for the day.

That is unless you are trained to throw off the mind his pessimistic theories which more often than not are without foundation of fact. For believe this: present day conditions in the business world are the best in its history.

SHORTAGE OF SEED.

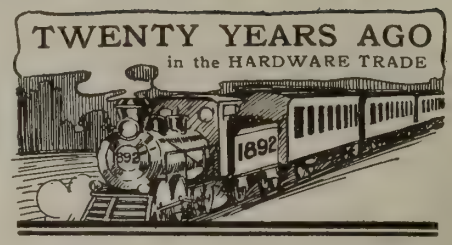
Speaking of the possible shortage of seed for sowing purposes, in Canada, the Manitoba Free Press says, under date of January 27: One of the most serious aspects of the situation is that the districts which have been most severely injured are those which are largely populated by new settlers who are not in a strong financial position. In the older districts, where the farmers have more cash or better credit, there should be little difficulty for them to secure plenty of good seed. In the newer sections appeals for government assistance are being made. Those who have good grain in many cases are selling it to the elevators rather than letting their neighbors have it for seed, as they require to make cash sales.

The crop suffering the greatest damage is flax, and there is likely to be a heavy shortage of good seed next spring. Practically all of the flax seed sown after the 1st of June last year is of low quality, and in many cases it was not worth cutting or threshing. Where the crop was sown early, fair yields of good quality have been obtained, but such cases are the exception. In the flax-growing district of southern Saskatchewan a large percentage of the flax is still unthreshed, and a great deal of it is not worth threshing.

STARTING CALGARY BRANCH.

Calgary, Alta.—Wood, Vallance, Ltd., hardware wholesalers, have decided to locate a branch in this city. The firm will erect a four-storey building on the property on Eleventh avenue between Centre and First streets east, which will have 100 feet frontage to lane. The firm at present have branches at Winnipeg, Vancouver and Nelson.

E. M. Adams will be manager of the Calgary branch.



The following items are taken from the issue of February 6:

"In the last issue of the B.C. Gazette is the notice of the incorporation of the Cunningham Hardware Co. into which will be merged the hardware business of Cunningham Bros. The capital of the concern is to be $75,000."

Editors Note.—The firm of Cunningham's, Ltd., is still one of the largest hardware concerns on the Pacific coast.

* * *

"The Montreal Rolling Mills Co. held their twenty-fifth annual meeting at the company's office on January 30, for the purpose of receiving the direcors' report."

Editor's Note.—The Montreal Rolling Mills Co. is now merged in the Steel Co., of Canada.

* * *

"Two merchants of Bond Head, Ontario, N. A. St. Clair and E. J. Carter, were burned out. The former's loss was $4,000, fully insured, and the latter's was $7,000 with insurance of $2,500."

* * *

"J. W. Bartlett, of Montreal, long known as an ardent advocate of the development of Canada's iron industry, has become general manager of the American Association at Middlesborough, Ky."

SALE OF CHAIR SEATS.

Montreal.—The to-let signs are now shown on Montreal houses. The time of year has come when those who are about to move have given notice; and when many have decided that they will occupy their present place of residence for another year. Those living in the neighborhood of Alfred Gayette's store on Mount Royal avenue are being shown how they can easily effect an improvement, for he is now showing as a specialty, chair bottoms which can be bought for 10 cents. Every one who passes that window thinks of chairs; and the great majority of those into whose mind comes the vision of a chair with a delapidated seat, go within and buy. Trade in general hardware is being kept active by this special attraction.

ELECTED COMMISSIONER.

Vancouver, B.C., Feb. 6.—Hardwaremen on the Pacific coast are to be found taking an active interest in many matters of public betterment. That they are appreciated was shown in the election of W. R. Owen, hardware dealer in Mount Pleasant, to his third term as park commissioner. Mr. Owen lives in the Fifth Ward. and beat all records in regard to the number of votes obtained. In his

W. R. Owen.

own ward he got 1,187, leading even the aldermanic candidates. This is something of a record, for the principal interest centres in the election of the aldermen, and generally attention is directed from the park commissioners. That Mr. Owen is well thought of is shown by the fact where he is best known he headed the poll.

Mr. Owen's chief hobby in his park board work is advocacy for more breathing spaces and parks in the city.

Will Fight for 1913 Convention

Belleville, Feb. 6.—This city will make a most determined effort to secure the 1913 convention of the Ontario Retail Hardware and Stove Dealers' Association. At last night's meeting of the city council it was decided that the mayor should be sent to Guelph to extend an official invitation to that organization to hold the next annual convention here. It was also recommended that, in case Belleville is selected, next year's council should make a grant of $200 to the association to help defray the expenses and to make the convention a big success.

The local Board of [illegible]s also decided to help. The president, W. B. Deacon, has been instructed to go to Guelph and represent that body. He will extend an invitation from the business men and will assure the association of their hearty co-operation and support.

The hardware manufacturers and others interested locally have expressed their willingness to take a hand and help make the convention a success.

Merchants Want Taxation Reform

Winnipeg, Feb. 6. — An important movement has been launched here, the object of which is to effect taxation reform. The retail merchants have inaugurated a whirlwind campaign to enlarge the membership of their association. When they have acquired the necessary strength to give greater weight to their demands, a determined effort will be made to bring about the adoption of a more equitable basis of taxation.

The retail merchants here object most determinedly to the present basis of taxation which is on the rental value. They contend that the single tax would be more equitable and they will urge that this change be made.

The movement will first take the form of a campaign for membership. The association now numbers 200 and it is hoped to increase this to 3,500 in a very short time. If that number of merchants can be enrolled in the ranks, the body will be large and influential enough to wield a big influence.

ENTERS THE AGENCY FIELD.

Montreal.—A change which will be of interest to hardware men in all parts of Canada has recently taken place, Edwin Schofield, for the last eight years salesman for Alexander Gibb, of Montreal, having entered the agency business. He has taken offices in the Canadian Express building.

E. Schofield.

Mr. Schofield has secured a number of first-class Canadian agencies, among them being the Allan Hills Edge Tool Co., Galt; the Canadian Tap and Die Co., Galt; The Galt Machine Screw Co.; The London Foundry Co.; the London Bolt and Hinge Works; The P. L. Robertson Manufacturing Co., Milton; the Domestic Specialty Co., Hamilton; the Columbus, Ohio, Chain Company and the Lachute Handle Company.

Progressive Hardware Retailing

Dealer Offers Three Months' Test on Stock Tonic — Amherstburg Merchants Have Organized Central Motor Delivery—Guelph Merchant Takes up Mantels and Supplies.

AMHERSTBURG DELIVERY SCHEME.

Amherstburg, Ont.—Central delivery by automobile is the latest innovation at Amherstburg, and comes as the result of dissatisfaction felt by local merchants regarding the excessive expense of maintaining horses and wagons. At a recent meeting of a number of merchants, it was decided that an auto service giving two regular deliveries a day would be preferable to the old arrangements, and it was agreed to give the idea a trial. If the trial proves that the arrangement is workable, it will doubtless be continued. The scheme is also designed to do away with the soliciting of orders, which the merchants regard as a nuisance.

SELLING MANTELS.

Guelph, Ont.—H. Occomore, stove and tinware dealer, has just completed a change in his store arrangements which has made a big improvement. He has had the flooring in the two front store windows extended backward some little distance. The backs and sides have been cased in. This has enabled him to use the windows much more effectively for display purposes.

Mr. Occomore has recently put in a stock of mantels and mantel fixtures. This is a new line for him but he has found it a profitable one already. Some orders have been secured. A window display, showing a neat, green-tile mantel helped considerably in working up a demand for this line.

THREE MONTHS' TEST.

Brigden, Ont.—The John Armstrong Co., hardware dealers, are making a special effort to sell stock and poultry tonics. In order to interest their customers in these lines, they are offering a three months' test at their expense. They are advertising the fact that "if it don't pay, return the empty packages and we will refund the money."

COLD WEATHER GOODS.

Morris, Man.—A. E. Code, hardware dealer, is making a special effort to interest the public in his cold weather goods. In a two-column advertisement, full page depth, he says:

"Naturally the question agitating the minds of most people at the present time is one of 'cold weather goods,' goods that tend to make the cold weather more pleasant that it otherwise would be. People in this district, as they become more prosperous, are, as a consequence looking for that which will minister to their comfort and enjoyment. This has been particularly noticeable in the increased sale we have had for the Coal Oil Heater. Many are now using one of these to heat a bedroom, a chilly hall, a hen-house or a cellar."

Among the other goods advertised are sanitary chemical closets, wash boilers, bath bricks, coal sifters and snow shovels.

He is using the trading card system in handling his sales.

SELLING ENAMELWARE.

Fort Frances, Ont.—The Wells Hardware Co., are holding a bargain sale of enamelware. They are advertising as follows:

"Because our stock is too large we offer a discount of 20 per cent. from the regular marked price on all enamelled or granite ware in our stock during the month of February.

"This is a splendid opportunity to sort up your kitchen outfits as our stock is large and complete and the discount applies to everything."

MID-SEASON SALES.

St. John, N.B., Feb. 5, 1912.—Local dealers in hardware are taxing their ingenuity and ability these days to induce trade outside of the ordinary run on lines which sell with regularity. There is really no unanimous suggestion of methods put forth in their efforts at present. That is to say, no two firms are featuring or offering in display lines which are similar, but are appealing from a general variety of their special stock. Razors, snowshoes, sleds, skates, snow-shovels, door-hinges, thermometers, and a countless variety of other lines will tend to show that there is no concerted effort to induce trade along any particular channel, but rather to depend on appealing to the individual taste in creating a demand for a special article.

Having a considerable stock of sleds and framers left over after their Christmas rush, the firm of T. McAvity & Sons filled one of their windows copiously with the same and displayed a large ad. sign informing the public that this week was a rare opportunity to make a purchase as "on all lines, every one of which is first-class in sleds and framers, a discount of 20 per cent. is being offered to reduce the over-stock." Many a youngster is now the happy possessor of a sled or framer through the reduction in price.

Practically the same idea, only on a more varied scale was put into force by the firm of Emerson & Fisher, who included in their discount of 20 per cent., snow-shoes, skis, toboggans, skates, and sleds, and featured the display as a "Mid-season Bargain Sale!" with the advice: "There are many remarkable bargains—make your selections early, before the best of them have been snapped up. Rather than carry these goods over till next season, we are making the above big discount."

OFFERING SEWING MACHINE.

Glen Ewen, Sask.—W. W. Winteringham, hardware dealer, is conducting a contest which he advertises as follows:

"A beautiful new sewing machine, value $50. To be given away to some one of my customers on April 1st, 1912. This New Sewing Machine is on exhibition at my store and will be given away absolutely free to the person guessing nearest to the number of nails in a one quart glass jar which is sealed and on exhibition with the machine.

"With every cash purchase of one dollar you are entitled to one guess.

"This machine is a good one and made by one of the best manufacturers of this line and is good in every respect."

GAUGE FOR SHEET METAL WORK.

James M. Henderson, of Saskatoon, has invented a gauge for use in sheet metal brakes. It can be attached to an old or new brake and, it is claimed, will enable the operator to tell at a glance what angles he is bending. Some of the points in connection with this device may be explained in an early issue.

Current News of Hardware Trade

Undergoes Operation.

Laura, Sask.—Ben. Shillington, of Shillington Bros., hardware merchants, has just undergone an operation upon his ear in the Detroit Hospital. He is recovering rapidly, and will shortly be back in the West.

A Snowshoe Tramp.

Montreal.—Thursday of last week the bachelors of Lewis Bros., Montreal, held a snowshoe tramp over the mountain. It is rumored that as a result of this tramp some of the young men will fail to qualify for the event of next year.

Furnace Company Locate.

Port Colborne, Feb. 2.—At a largely attended meeting, Mr. Baird, president of the Buffalo Union Furnace Co., stated that the only inducement that the company would ask of Port Colborne in locating a branch of their plant here was a fixed assessment of $50,000 for a period of twenty years.

Returning From Trip.

Chatham, Ont.—N. D. Storey, hardwareman, of Indian Head, Sask., is visiting old friends in this city and vicinity on his way home from an extended trip to New York State and other eastern points. Prior to locating in the west Mr. Storey was on the Westman Bros. hardware staff in this city.

Buys Business Block.

Medicine Hat, Alta.—J. J. Hewitt, hardware dealer, has purchased the Tweed block for the sum of $40,000. The structure has its frontage on Main St. and extends the full depth of the lot. (130 feet). It is built of brick and is three storeys in height. The basement and first floor are occupied by the hardware firm of Hewitt & Black. The upper floors are used as offices.

Taking Long Trip.

Montreal.—Frank W. Clarke, of the North Shore Power, Railway & Navigation Co., accompanied by J. E. Rothery, passed through Montreal yesterday on their way to Quebec. They go from there by the Government steamer to Clarke City, from which point they leave for their lumber camps. To do this it will be necessary to go by dog teams, the only way of travel in that locality. Messrs. Clarke and Rothery are combining business and pleasure.

Hardwaremen Dined.

Montreal.—Thursday of this week the hardware merchants' section, Montreal branch of the Retail Merchants' Association of Canada held their annual banquet. All—and they were many—who gathered at the Club Canadien had a splendid time. The speeches were not second even to the repast, and numerous references in these speeches made it plain that the merchants are going to make their coming convention the best that has ever been held.

A. H. S. Parkins Dies.

St. John, N.B.—Death came with much suddenness this week to a traveler for a Montreal hardware concern, A. H. S. Parkins, a representative of the Smith Manufacturing Co., of Montreal, who passed away in the Royal Hotel in St. John after having arrived but a few hours before. He was about 55 years of age, and recognized as a capable traveler, who had many friends in the lower and upper provinces who will regret to learn of his death, which is said to have been due to apoplexy.

Staff Changes.

Guelph, Ont.—John Anderson, accountant of the Guelph branch of the Traders Bank, has accepted the position of treasurer for Moran, Clancy & Gringley, wholesale hardware contractors in Edmonton.

Virden, Man.—J. A. Bottomly, of Saskatoon, has accepted the position of accountant with the Manitoba Hardware & Lumber Co.

J. Warren, who has for some time back been employed with Merrick-Anderson Co., Winnipeg, as pricing clerk, is now filling a similar position with Peart Bros., Hardware Co., Regina.

New Liskeard, Ont.—Ed. Hansman has left the employ of the Geo. Taylor Hardware Co., to join the traveling staff of W. J. Blair, who is starting in the wholesale hardware business at Calgary.

Business Changes.

Donalda, Alta.—J. R. Graham is enlarging his hardware stock materially.

Irma, Alta.—A. A. Dickson has taken over the hardware business of J. D. Elliott.

Shellmouth, Man.—Denmark & Burton, hardware dealers, have sold out to H. Adams.

Sutherland, Sask.—B. Fleming has started in the hardware and furniture business here.

Emo, Ont.—Edward Tompkins, hardware dealer, has sold his branch store at Barwick to Black Bros.

Brandon, Man.—The Hanbury Hardware Co., have sold out to the Dominion Hardware and Lumber Co.

Virden, Man.—Miller Bros., dealers in hardware, has dissolved partnership. J. N. Miller will continue the business.

Brampton, Ont.—The old and well-known hardware business of Peaker & Sons, has been taken over by Higgins & Large. The new firm will be know as the Brampton Hardware and Heating Co.

Morden, Man.—Mr. Beatty, who recently withdrew from the hardware firm of Atkins & Beatty, has gone into business at Kerrobert, Sask., with Harry Grain. Carl Atkins has taken his place, so that the new firm name is Atkins Bros.

St. Jacobs, Ont.—Henry Gilles has sold out his tinsmithing business to A. C. Thoms, who will continue in business at the rear of the Gilles hardware store. Mr. Gilles will continue to conduct his hardware business.

Wetaskiwin, Alta.—The fixtures are being installed in the Wetaskiwin Hardware Company's new store on West Railway Street. When completed this will be one of the best equipped hardware establishments in Central Alberta. It is expected that the store will be ready for occupancy in a few days.

Dundas, Ont.—The old and well-known hardware business conducted by G. C. Wilson & Co., has been sold to Ralph & Wilson. The senior member of the firm is H. W. Ralph, who for several years conducted a drug store in Dundas. His partner is Harry Wilson, son of M. S. Wilson, who has been a clerk in the store for some time. This business was sold by Mr. Wilson on account of his inability to properly attend to it and his parliamentary duties as well.

Personal Notes.

H. Pitt, of Cornwall, Ont., was in Montreal on business this week.

A. A. Bittues, of the Gillette Safety Razor Co., went to Boston on a business trip this week.

R. St. Jermane, clerk in the Skinner Hardware store, Stettler, Alta., has returned after an extended visit in Montreal and the east.

H. H. Clarke, of Lewis Bros., who makes his headquarters in Lennoxville, was in Montreal this week attending the automobile show.

Mr. Riester, of the Buffalo Specialty Co., Buffalo, N. Y., spent the week in Montreal calling on the trade, talking up Liquid Veneer and their other products.

Among the Quebec hardwaremen coming to Montreal on business this week were:—C. B. Van Antwerp, Frelighburg; A. Lemieux, Henryville; J. R. Deschambeault, Terrebonne; E. Boucher, St. Hyacinthe, and J. B. Damour, Ste. Philamene.

Weekly Market Report --- Metals

FIRMNESS—STOCKS LIGHT.

Firmness has been shown in practically all metals this week. Tin advanced 1 cent. Copper, lead and spelter advanced on the primary markets but no price changes have been made in Canada.

Shortages are developing in a number of lines, particularly in spot tin and lead.

MONTREAL.

Montreal, Feb. 9.—At present there is a scarcity, locally, of practically all metals—a scarcity which bids fair to cause serious trouble later on, unless relief comes. The situation is the result of the car shortage, apparently. Handlers have been quite unable to get the metal which they have ordered. At one house it is reported that a carload of East St. Louis spelter, ordered on January the fourth, has not reached Canada yet. Other handlers appear to be nearly as badly off.

So far no stoppage in operations has been necessary because of the shortage of metals. Those having good supplies have been lending to those less fortunate. If the car loads begin to arrive shortly all will be well, but otherwise the situation will become very serious. Some handlers are already reluctant to fill general orders. They have practically guaranteed to see that certain concerns have plenty of metal; and when there is a shortage, as at present, they do not like to let their supplies get below the quantities these favored concerns may need.

Usual Fluctuations.

The week has seen the usual fluctuations, with tin attracting the greatest attention. The metal is stronger—much stronger, and it appears it will advance still more in price. Of late this metal has been so uncertain that it was practically impossible to read the future, but now all the advice indicates that a higher level is coming. There may be temporary declines—there likely will be—but the general tendency will probably be upwards.

While handlers generally hold this opinion they are yet not backing it by heavy purchases. Tin is uncertain at present, to go short on the market is a risky proceeding.

Tin.—The rumor is that the trouble which arose between members of the syndicate has been patched up. This would appear to be so. Anyway the heavy selling has stopped. The syndicate are said to have large holdings, and it does seem that they have a fair grip on the market again. Uncertainty still prevails, but there is a general feeling that tin will advance further. In the early days of this week it did climb considerably on the primary market, on Wednesday reaching £195 10s., or £1 5s. higher than the day before.

Local Stocks Fair.

In New York there is a scarcity of tin. Local stocks are only fair.

Lead.—Following the drop of last week there has come a rise, though the American trust has forced the price down sensationally across the border. This, however, is for American lead which is little used here.

The consumption locally is good. That it is not better is regarded philosophically. This is a rather quiet season, anyway the supplies are none too good.

Copper.—While no change has been made in the local price this metal has dropped a shilling or two on the primary market. That the decline will continue seems unlikely. There is nothing to point to such a movement. Copper rose rapidly and a reversal was to be expected. Statistics, however show the demand to be good. Supplies are none too large, and that the lower level will be lasting does not seem at all likely.

Spelter Long Overdue.

Spelter.—Slight rises in the States have not had great effect in Canada. The prices here are being held steady. Indeed price is not a feature, The question here relates to the supply. It is low—there is no denying that. Unless some of the metal which has been on order for a long time arrives shortly the manufacturers will find themselves face to face with an awkward situation.

Iron.—This is another metal which is none too plentiful. Handlers are husbanding their stock. Manufacturers are eking out their supply. Both are looking rather anxiously for the opening of navigation when iron will be brought in largely.

TORONTO.

Toronto, Feb. 9.—Strength is noted in every branch of the metal industry. There has been a steady advance this week and prices now quoted on the primary markets are higher than a week ago. This applies impartially to tin, lead, spelter and copper.

This change is not due to any sudden increase in consumption; for the demand has been heavy right along. It is probably to speculation and manipulation, the bulls being in control of the market.

Local metal firms report that business is showing quite a substantial increase over last year. The consumption of all metals is heavy, this fact being accentuated in several cases by a shortness of supply.

Tin.—The price of tin has been "bounding" during the past week, to use an expression applied by a local man. The local figure has gone up one cent and is now variously quoted from 47 to 49 cents. This advance has followed the course of the metal on the London market where substantial gains have been made during the week. To complicate the situation, a shortage in spot tin has developed on this side. The shortage has been felt in New York resulting in an advance of 1 cent there.

Lead is Active.

Lead.—Advances have been noted on the primary markets but the only effect of this locally so far has been a firming up in the local price. The metal is very active and a great deal is changing hands. Stocks are light again, very light in fact. While another shortage is hardly anticipated, the activity of the demand bids fair to keep stocks light for some time at least.

Record Consumption.

Plates and Sheets.—The metal men report a record consumption of plates and sheets. The demand has been growing steadily and is now at a point where it bids fair to tax the capacity of the mills. The buying movement is stimulated in no uncertain way by the low prices prevailing.

Copper.—This metal is on the upward trend again. Consumption has been so consistently good that a full measure of confidence has been restored and the price has been shoved up on the primary markets. So far, no change has been made in local quotations. Demand continues good, this condition being assisted no doubt by the firmness of the metal.

Spelter is advancing on the American markets, quite a tidy increase having been registered in the price. The local price has firmed up as a result. The metal has always been steady and now is showing even a heavier tone. The future of spelter presents no uncertainties from the local standpoint.

Pig Iron.—The buying movement is fair. Prices remain unchanged as follows:—Canadian Foundry, No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $50.25 for Clarence No. 3, Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Weekly Market Report --- Hardware

HARDWARE BRIEFS.

It is reported that January sales showed an increase over the corresponding month last year.

The list prices on axe handles have been increased.

Collections are still reported to be dull.

Spring booking is now proceeding apace. A few new lines are rapidly coming to the fore.

MONTREAL.

Montreal, Feb. 8.—These are quiet days in the retail hardware stores—quiet that is in comparison with the rush that preceded Christmas. Still everything points to the fact that the dull times have not been as dull as they sometimes are; nor is the slow state of business to last long. Dealers have their thoughts on the coming spring now. Their orders for this period are keeping the wholesalers busy.

At present sales of skates are practically finished. Hockey sticks are still going well, but the great demand has passed. Some dealers are attracting trade by special sales and are thus being enabled to obviate the necessity of carrying their stock over the coming summer. Others, however, do not feel that they can do this. They will be left with a fairly large stock of winter goods on their hands; but the result of this will not be serious. These lines do not depreciate. They tie up capital though, and that, of course, is rather hard on the dealer. Some of the wholesalers are also finding themselves overstocked. For the present this will have little effect, but it will exert an influence on the sales of next year.

Rumor of Price Change.

During the week there have been no changes in prices. There is a rumor that a change may shortly be made in the present price of iron pipe, but confirmation is lacking

Household Goods.—In Montreal itself this line is quiet. Retailers seem to have good stocks, or else they are waiting until they feel the demand before they send their orders. In the province, too, the buying is light. In November much of this ware was shipped by boat, and the dealers are anxious to make this stock last out until navigation opens once more. From the West, however, heavy orders are being received. The merchants there are evidently preparing for an early spring campaign.

Spring Goods the Thing.

Seasonable Goods.—The question, of course, is as to what goods are seasonable. Winter lines have about ceased to move now. Spring goods, on the other hand, are commencing to forge to the front. Locally the demand is for pails, spigots, boilers and other articles needed for the coming maple syrup season. From the West the call comes for hose, lawn sprinklers, rakes—even lawn mowers are being ordered. In British Columbia the warm weather comes earlier than here, and the retailers are preparing to wage their spring campaign with the first appearance of the robin.

Sporting Goods.—As has been said business is quiet as far as winter sporting accessories are concerned. Nor has the demand for summer goods started yet. The nearest approach to a spring line which is being shown is a window of marbles and alleys arranged by a St. Lawrence boulevard merchant. The wholesalers have not yet issued their catalogues, or instructed their travelers to sell spring and summer sporting goods. This is an off season for sporting goods—about the only off season of the year.

Builders' Hardware Moving.

Builders' Hardware.—Just this week some of the wholesale houses have instructed their travelers to take out samples of this line. As yet local orders are not large, though some dealers are already getting their stock in shape. From the far west orders are good, probably because of the expectancy of an early spring, as already mentioned. In the east, too, the demand is satisfactory.

Lumbering Supplies.—This business is becoming brisker. Axes have ceased to be in great demand, but logging chain, cant hooks, and caulks are becoming more in demand

TORONTO.

Toronto, Feb. 8.—On totaling up their sales for the month of January, local hardware jobbers have come to the conclusion that it was a very satisfactory month. A good increase was recorded over January 1911 in actual sales and orders booked for the spring were more numerous and in a good many cases larger.

"The year has started out well," reports one jobber. "Our travelers report that their customers are all looking forward to a busy year and are buying accordingly. For that matter, business to date has shown a steady quality not usually experienced so early in the year."

Prices remain steady and in most lines quite firm. The only change reported is in the list price of axe handles, where an all round increase has been put into effect.

Collections are still slow. There has been no improvement in the situation since the first of the year. It must be borne in mind, however, that cash is always tight at this season of the year.

Seasonable Goods.—Winter lines are still selling but in greatly reduced bulk. The cold weather and steady sleighing has kept up demand for robes, sleigh bells, sleigh heaters and goods of that nature. There has been an exceptionally large sale this year of weather strips. The public is awakening to the fact that weather strip is well worth having and the market has widened appreciably.

Builders' Hardware Selling.

Builders' hardware and all varieties of shelf goods are selling more or less briskly; for this season of year, that is so much building work can be done right through the winter months that the demand for builders' hardware has become of an all year around variety.

Changes in the list prices of axe handles are announced this week. No. 1 axe handles, 34 and 36 inches have been increased from $3.00 to $3.40 list. No. 1 size 32 has gone up from $2.75 to $3.00 and No. 1, size 30, has gone from $2.50 to $2.75. Foy's No. axe handles have gone up from $1.60 to $1.75.

Household Goods.—There is a large demand for practically all lines of household goods. Much of it is for immediate delivery though spring booking is being done in refrigerators, ice cream freezers and other goods for summer use. The amount of booking done in these lines is really surprisingly large. Bigger interest than ever is being shown in vacuum cleaners and some good orders have been placed.

Summer Goods.—Booking proceeds apace for all spring and summer lines. Although orders are mostly dated April 1, quite a large amount is being shipped now.

Heavy Hardware.—Good booking is reported in practically all lines. Price quotations are:—Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Demand is Small.

Sporting Goods.—The present is a very quiet time in sporting goods. While not absolutely at a standstill, skates are not selling briskly. Most dealers find that the demand is now slow and they are not placing new orders except in cases of emergency. A few sorting orders have been received.

Stoves, Furnaces and Accessories

Keeping Up Furnace Activity

How Some Dealers Secure Work in Mid-winter — Toronto Man Follows up "Leads" With Consistent Success—It is Not Too Early to Start After the Spring Heating Contracts.

Furnace dealers, as a general rule, do very little work during February. Householders do not care to make any change in their heating apparatus at seasons when the temperature may go below zero at any moment. If they are managing to keep the house warm, or nearly warm, they are generally content to wait. And the furnace man has to wait too.

The writer has known a few brisk dealers who manage to get enough business to keep them busy right through the winter, despite this tendency. One of them—a Toronto man—made the statement one day toward the middle of January that he had kept his full staff of men at work, and expected to do so right through the cold season.

"How do you manage it?" he was asked.

"By digging," he declared. "There is business to be secured at all times, but nowadays you have to dig hard for it. Business does not come to you; it's a case of going after it."

He went on to explain that his method of getting business was to follow up "leads," which he had secured during the busy season. If a property owner had been interested in a furnace proposition in the fall, but had not reached any decision at that time, this dealer makes a point of calling on him now to see if the chances of closing the deal have improved. If the house contains an old furnace, the chances greatly favor the dealer, for it is likely that the occupant has discovered by this time that he needs a new one. The motive which impelled him to "pass up" the proposition in the fall, and which he thought then to be economy, has since appeared in its true colors. He realizes on looking over his coal bills that keeping his old furnace is an extravagance that he can hardly afford. Besides it is not keeping the house as warm as it should. The only thing that deters him from going right down and ordering a new one is the disinclination he feels to making a change in mid-winter.

"One of my best arguments," declares the dealer in question, "is that I can instal the furnace without causing the household any inconvenience. In most cases, it is possible to make the installation on the plans of the old one. The work is very much simplified and we rush it through. In cases where stoves only are used, they can be kept going until the furnace is ready for use."

This man is maintaining still a steady average of three or four installations every day; which constitutes the strongest kind of proof that he is able to make good his claims.

Get After Spring Business.

Not every dealer can expect to do as well as this, however. Business in most sections will be found light at this time of year. But it is not too early to begin the spring campaign. A good many new buildings are being planned. Some are already under way. The contractors will have lists of the work to be started as soon as weather conditions permit. There is a splendid opportunity, therefore, for the furnace man to begin his campaign. If he wants to get a big share of the heating contracts, he cannot start too soon now.

Good Advice From Expert.

A furnace expert, who has "made good" in the business, gives the following piece of advice which is well worth following. "Do not try to get contracts by falling in with every suggestion of cheapness that the contractor or owner cares to make," he states. "You may get more jobs that way but you make less money and have infinitely more trouble."

"Ten years ago I made the resolve," he continued, "to refuse all contracts which I was not sure would give perfect satisfaction. That year I had secured a big job for ten medium-sized houses, owned by one man. He was a real estate man who built extensively with the object of selling just as soon as he could get his price. You may be sure he was not anxious to put any more money into the construction than he could help. I fell in with his views and put in furnaces which might heat the houses nicely, but which I did not feel I could guarantee would do so. I would have preferred to put in a size larger. It was a busy season and I soon found that, had I refused the contract, I would have had no difficulty in getting other work to keep my men going.

"Well, those furnaces did not work at all well. The houses were in an exposed position and it kept me tinkering all that winter to silence the complaints of the occupants. Some of the work I was paid for but a great deal had been done gratuitously. By next fall, several of the houses had changed hands and the new owners put in larger furnaces. But none of the contracts came my way. I figured it up that I had lost a pretty substantial sum by putting in those small furnaces. So I turned over a new leaf."

In starting out after the spring business, every furnace man should make the same resolution; to refuse responsibility for installations which might turn out defective. It will save trouble, and money, in the end.

BOUNTIES RENEWED.

Ottawa, Feb. 2.—The government has decided in favor of granting substantial bounties for the encouragement of iron making in Canada. The great smelting industries at Sydney and the Soo were established largely by means of bonus aids. The last of these expired in June. These were the bounties on steel rods. There had previously been bounties on billets and other forms of iron and steel, which had expired and which ex-finance minister Fielding failed to renew.

The government has decided that the state of the industries and the prosperity of the country warrant a restoration of the bounty aid. Therefore, it has been practically decided to give a bounty of a dollar a ton on pig produced from foreign ore, and a dollar and a half a ton on pig produced from domestic ore.

These bounties will likely run until the tariff commission is appointed and has looked into the question of aid for steel works. It is likely that then the bounties will be dropped and the steel industries aided by means of tariff protection for which they have always expressed a preference.

Weekly Market Reports---Stoves

DULL PERIOD REACHED.

The lowest point in the stove industry, in the matter of sales, has been reached. There is little business being done except in the way of booking for spring delivery. This dullness in stoves is counteracted to some extent by exceptional activity in other lines.

MONTREAL.

Montreal, Feb. 8.—Preparations are in the air. Preparations for spring. It has been so for a week or more now, and it will be so from now until spring really comes. Winter business is pretty well over. Only small orders are being received from merchants who need the goods to satisfy an immediate patronage. The large orders, and there are many of them, are coming from hardwaremen who are preparing to get the early trade of March and April.

Price changes there have been none. Tin plates remain at the old price. Copper goods, which it was rumored might be further advanced, are selling at the figures struck a few weeks ago. It does not seem now that there will be any immediate change in the price of these.

The Supply the Thing.

These are busy days for the travelers. They are attempting to cover wide territories before spring comes. The mails show the results they are getting. In fact, as one manager stated, it begins to seem that the problem will be to get the goods. Manufacturers are already able to look about and see a fine stock, but they are not satisfied with this. They are still keeping the plants working to the utmost capacity.

Ranges, Heaters and Furnaces.—For the time being there is little activity in these lines. The spring will see a good demand for ranges, but the majority of dealers have a few on their floors yet, so they do not think it necessary to buy any more at once. Only isolated furnaces are being supplied, and the call for heaters has become indistinct. When spring comes, and people begin to migrate to their summer homes, there will be a certain demand for heaters—for every one knows how chilly a summer place may be without some such comfort during the early days of spring. There will undoubtedly be a good many heaters sold in the next few months, but for the time being few are moving.

Gas Stoves are Now Needed.

Gas Stoves.—New houses are about reaching completion now. All the inside work has been completed during the winter, and to render them ready for occupation it is only necessary to install lighting fixtures and a gas stove. Numbers of these will be sold shortly. Already, indeed orders are being received. The retailers realize that they must have their stock of these early.

Kitchen Ware.—From the West the demand for this class of goods is strong. There dealers seem to prepare earlier than they do in the east. Here there is more waiting for the opening of navigation. City stores seem well supplied with this class of goods. The orders from Montreal dealers, indeed, have not yet grown to great proportions.

Seasonable Goods.—Still there is an active demand for tin plates—those who are making tin pails, etc., being at their work in earnest now. The pails themselves, the spigots and the milk cans are also selling well It will be some little time, of course, before the sap begins to run, or before the cows again get out to pasture and begin to give milk more freely; but many farmers blessed with good maple groves will be laying in their supply of pails shortly. The dealers must be prepared.

Need to Prepare Early.

"I wish," remarked the sales manager for one Montreal house, "that we could get dealers to see that it is to their interest as well as to ours to place their orders early. We notice an improvement in this every year. Yet last season many did not send to us for the goods until people were coming to their stores asking for them. The dealers were greatly put out because we could not supply their wants at once, but it was impossible. I'm afraid there will be a large number who put off their ordering this year."

TORONTO.

Toronto, Feb. 8.—The situation locally shows every evidence of the arrival of the mid-winter dullness. Little business is being done in stoves and heating goods. Booking of course, is proceeding briskly.

What is lacking in the stove trade is made up, however, in the activity which is shown in other lines. Tinning supplies are moving rapidly and gas stoves are now coming to the fore.

The feature of the market, of course, is the demand for dairy trimmings and general tinsmith supplies. Being unable to do much outside work, the tinsmith turns his attention to the making up of stock and there is, in consequence, a heavy demand which will continue right through the cold weather. "We have sold more dairy trimmings since January than during any other two months that I can remember," states one manufacturer.

The same activity is noted in tinplates. There is a heavy call for plates to be used in the making up of pails, milk cans and goods of that description.

Few Stove Sales.

Ranges are selling still but the trade is at its lowest ebb. Some few orders for immediate delivery have been placed but in no case did the number exceed two or three. There is, however, a great amount of booking being done. The travelers report that dealers are placing their orders for spring requirements with every confidence. It is not possible yet to compare the amount of spring booking done with that done in past years, but the manufacturers express themselves as satisfied.

Heaters have not sold to any extent during the past week. It is quite apparent that the dealers have sufficient stock on hand to meet whatever demand there may be. It is equally apparent from reports received that the demand is of a purely incidental nature.

Oil stoves are selling still, however. One dealer placed an order for a dozen this week and others are placing orders which indicate a fairly heavy and consistent demand. Business from this source will continue, of course, as long as the cold weather lasts.

Few Furnaces Sold.

Furnaces.—The lowest point in the furnace industry has been reached. There is only a small demand noted at present time and the spring trade has not started. However, there is always a certain amount of work done and consequently a few orders have been placed during the past week.

Kitchen Utensils.—The large number of special sales of kitchen ware of all descriptions which are held this month have helped to deplete stocks considerably. The result is seen in a very satisfactory demand for these goods.

TINPLATE AMALGAMATION.

Pittsburg, Feb. 8.—Representing a capitalization of $100,000,000, the Independent Tinplates Manufacturers of the United States were granted a charter by Judge Thomas D. Garnahan late to-day under the name of the Association of Sheet & Tinplate Manufacturers.

Weekly Western Market Report

Business Has Shown a Marked Improvement, and the Jobbers Now Speak Optimistically—Will Steel Prices in West Advance?—A Good Demand Noted for Paints and Oils.

Winnipeg, Feb. 8.—With the arrival of milder weather, the optimism of wholesale hardware merchants seems to know no bonds, and as a result a pleasing greeting was extended this morning when they were asked as to their opinion of the trade at the present time. It was the consensus of opinion that business was very satisfactory and moving well. Prospects, they claimed, were bright and one large firm was hopeful enough to say that they thought conditions in the country were not quite as bad as they were predicted to be. Others failed to agree with him on this point, however, and pointed out it was necessary that steps be taken to secure the marketing of grain still in the hands of the farmers if all notes were to be met satisfactorily before next fall.

As regards the prices of the various lines there is no change whatever this week, and the tone of the entire market may be said to be firm. While our prices are holding steady, the American prices seem a little firmer on all steel products. While as yet little movement is reported, it is indicated that mills are holding firm in anticipation of advances, which they expect will take place shortly. Should this prediction be fulfilled, it will, of course, mean higher prices for us in the west, and the situation is, therefore, being watched with interest.

The Annual Bonspiel.

Next week will be heralded with a holding of the annual bonspiel, which always means a busy time for the local wholesale houses. Not only do members of the various firms participate in this event, but country merchants throughout the length and breadth of the west make it a point to visit Winnipeg at this occasion, not only to contest for honors in the art of curling, but also to pay annual visits to their various creditors in the city. As a result, local firms are busy entertaining and discussing general trade conditions with their patrons of the three provinces.

Spring goods are moving freely, and many carloads have already gone west. While the rush is by no means at is height, yet those who wish to secure their stocks early to place on shelves before the spring opens up have asked for immediate shipment, and wholesalers are endeavoring to comply with their requests. The demand so far has been for all kinds of shelf hardware lines, and no special line seems to be in a greater demand than the other this spring. Nails are going out in large quantities, and such lines for early spring work. Barbed wire is, however, still quiet, and will not be moving until May.

Prices remain as follows:—

Winnipeg Hardware Quotations.

Axe Handles.—Oval and octagon, s.g. hickory, $3.50 ; No. 1, $2.00 ; 2, $1.60 ; p.g. oak, $2.75.

Augur Bits—"Irwin" bits, 47½ ; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65 ; 7-16 and larger, 55 ; machine, ⅜ and under, 60 and 5 ; 7-16 and over, 55; machine set screws, 65 ; plough bolts, 50 ; square and hexagon nuts, cases, 3 ; small lots, 2½ ; stove bolts, 77½.

Bar Iron—Bar iron, $2.50 ; Swedish iron, $4.25 ; sleigh shoe steel, $2.65 ; spring steel, $3.40 ; machinery steel, $3.50 ; tool steel, Black Diamond, 100 lbs., $8.50 ; Jessop, $15.

Blocks—Steel, 50 per cent ; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg ; $2.35 Fort William.

Copper.—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire 3 inch gage, 24c, to 20 inch gage 29c.

Crowbars—4½c. per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87 ; 26 gauge, $4.18 ; pressed standing seamed roofing, 28, painted, $2.84 ; 26, $3.24.

Canada Plates.—Firm. Half polish, 6 and 7-inch, $3.65 ; 8-inch, $3.90 ; full polish, 6 and 7-inch, $4.40 ; 8-inch, $4.65.

Clevices—7½c. per lb.

Enamelware—Canada, 50 ; Imperial, 60 ; Premier, 50 ; Colonial, 60 ; white, 70 and 5 ; diamond, 50 ; granite, 60 per cent.

Files—American, 75 ; Black Diamond, 60 ; Nicholson's 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80 ; 18, $3.85; 20, $3.90; 22 and 24, $4 ; 6, $4.20 ; 28, $4.60 ; 30 gauge or 10¾ oz., $4.80 ; Queen's Head, 20, $4 ; 24, $4.20 ; 26, $4.60 ; 28, $4.80.

Galvanized Iron Pipe.—⅜ in., $3.25 ; ½ in., $4.05 ; ¾ in., $5.00 ; 1 in., $7.20 ; 1¼ in., $9.80 ; 1½ in., $11.80 ; 2 in., $15.30.

Galvanized Ware—Pails, 40 and 5 p.c. Other galvanized lines, 37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90 ; No. 2, and larger, $4.65 ; snowshoes, No. 0 to No. 1, $5.15 ; No. 2 and larger, $4.90 ; steel No. 0 to 1, $5.35 ; No. 2 and larger, $5.10 ; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30 ; 4, $3.80 ; 5, $2.75 ; 6 $3.30 ; 7, $3.05 ; 8, $2.85 ; 9, $2.75 ; 10 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 p.c.

Hinges—Light T and strap, 65 p.c.

Hooks—Brush, heavy, per dozen, $8.75 ; grass, $1.70.

Iron Washers—Full box, 40 per cent., smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15 ; ¼ in., $2.30 ; ⅜ in., $2.35 ; ½ in., $3.15 ; ¾ in., $3.80 ; 1 in., $5.45 ; 1¼ in., $7.45 ; 1½ in., $8.95 ; 2 in., $11.55 ; 2½ in., $18.40 ; 3 in., $24.15 ; 3½ in., $32.25, 4 in., $36.75; 4½ in., $42.50 ; 5 in., $47.50 ; 6 in., $61.50 ; 7 in., $95.50 ; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6 ; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7 coppered, $9 ; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46c; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8c; pure manila, 10¾c; British manila, 8½c; lath yarn, 8c.

Sheet Zinc—Casks, $8.75; broken lots, $9.25.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½ ; brass, 77½ ; round head, iron, 82½ ; brass, 72½ ; coach, 67½ per cent.

Terne Plate—I.C., $9.75 ; I.X., $11.75

Tin Plate—I. C., charcoal, 20 x 28, full box, $10.25 ; ½ box, $5.50; I.X., full box, $14.25; ½ box, $7.50; 20 x 39, I.C., full box, $13.50 ; ½ box, $8 ; I.X., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½ ; pieced, 25 ; japanned ware, 35.

Methods of Retailing Paints and Varnishes

Make the Paint Department Up to Date

One of the Main Considerations in Improving the sales is to Have the Stock Properly Arranged and Well Looked After—A Neat Paint Department in the Retail Store of Rice Lewis & Son, Toronto.

The winter may not be an active season in the matter of paint sales but the paint department should not be neglected on that account. Business in all lines is bound to be more or less dull during the present month. Why not seize the opportunity to house clean the store?

Start with the paint department. One of the first considerations in building up a large and profitable paint business is the maintenance of an up-to-date store. The largest sellers of paint are the dealers who have set aside a roomy section of the store for the paint stock and who have taken pains to keep that section clean and bright. Paint, if properly handled, helps to sell itself. Crowd the stock on a few dark shelves at the rear and you will sell only when customers call for paint. Place it near the front, and keep it well sorted up and the sales will almost double. That is no mere idle assertion; the statement is based on the experiences of dealers who have changed from a policy of indifference in the matter of paint to one of aggressive endeavor.

In the first place, the interior of the store should be kept painted. The present, being a slack time, could be used for this purpose. Few hardware stores see a fresh coat of paint as often as they might. Have you ever stopped to figure out, Mr. Dealer, what a help it would be if your store reflected the benefits of fresh paint? If the whole establishment radiated that freshness and attractiveness which can be attained only by the use of paint, your arguments would bear double weight. How can a dealer expect his customers to become convinced of the wisdom of using paint when he (the dealer), persistently eschews its use? The writer has known dozens of hardware men who have urged on customers that they should paint their property every year when their own stores has not seen paint for perhaps ten years. They could not hope to succeed very fully in their efforts to sell; and, as far as the writer knows, did not succeed.

Get to Work Now.

It would not cost much to give the store a new coat from top to bottom, inside and out. Every dealer has a certain amount of stock which has been on the shelves long enough to become almost unsalable or a few broken lots which he could use for this purpose.

Get to work now and have the store painted during the dull season. And do not stop there.

Try to arrange your paint department better than it has even been in the past. If it has always been in the far end of the store, rearrange your stock to give it a more prominent place. This can be done without any loss of sales-making efficiency in other lines. Perhaps some of the bulkier articles can be moved to the rear.

Make an effort to fix up the department so that the stock will show to best advantage. If possible place it where the light will fall on the shelves. Keep the rows properly sorted up with the labels turned to the front. Hang a

The Paint Department in the Retail Store of Rice Lewis & Son, Toronto.

few attractive signs and lithographs in convenient places. You will be surprised at the improvement you have effected when you get through.

It is not too early to undertake the reformation of the paint department. Although activity in the demand will not be felt for a couple of months yet, the improvement will be noted by customers. It will serve to keep people reminded during the intervening space. The most important consideration is, however, that there is plenty of time at present to look after a matter of the kind while there will not be later in the season. Postpone it until spring and there is not one chance in ten that the work will ever be done. And there is not more than one chance that the paint sales will show much of an improvement.

A Model Department.

The accompanying illustration shows the paint department in the retail store of Rice Lewis & Son, King street, Toronto. It is in some respects a model one. The stock is centralized in one part of the store. The shelving is in full view and the complete stock can be seen, as a result. A customer can inspect the goods without the usual obstruction of a counter. Paint accessories and supplies are kept in the same section, thus enabling the salesman to suggest such articles when a purchase of paint has been made and vice versa.

The smaller dealer has not the space at his disposal to arrange his paint department in such satisfactory form but it is in his power to work along the same lines. Some of the best paint departments are to be found in the smallest stores. Smallness is no impediment to neatness.

There is probably not one hardwareman in the country who is not really anxious to improve his paint trade. Too many leave it at that, making no effort to effect improvement. Why not change the old order of things this year? why not infuse a little more energy and enthusiasm and a whole lot more initiative into your work?

To such dealers as are really anxious to put things on a better basis, the best advice that could possibly be given is: Get to work now and fix up your paint department on the lines set out above. It will help to sell the goods when the active season opens.

Surprising Winter Demand for Putty

Manufacturers Have Had to Work Double Shifts, and to Increase Their Plants in Order to Secure the Necessary Production—Large Amount of Winter Building Operations the Cause—Indications are That Coming Season Will See an Even Greater Demand.

Montreal, Feb. 8.—One of the surprises of the present winter, as far as the paint business is concerned, is the great demand which there has been for putty. This commodity, usually little wanted during the cold months, has been ordered in large quantities. Reserve stocks have been exhausted, and instead of working their plants short time, makers have been obliged to stretch the working hours. One concern here has felt the necessity of putting a night gang to work. Another has made additions to the plant.

In searching for the cause which makes the putty pulse beat so excitedly at this season, when it is usually faint, manufacturers have come to the conclusion that the changing times are the cause for this changed condition. Things are not to-day what they used to be. The demand for goods is changing, not only in quantity, but also in the time during which it is felt.

Difference in Building.

As snow is to sleighing, so is building to the putty trade. Sleighing would be impossible without snow, so would the putty trade be impossible without building. It is on buildings that putty is necessary, and it is upon buildings that it is being now used. Here is noted the change from former years. There was a time—and not so long ago either—when building work was started and completed between the months of March and November. But of late there has been a change. If a contractor gets the outside walls of a structure up before snow falls, and the roof upon the structure, he is quite satisfied. The rest—the inside finishing—can be done during the long winter months. Indeed, even the outside walls do not now have to be built during the summer and fall. Steam contrivances enable even the foundations to be laid during zero weather. Indeed, building operations go on about the same winter and summer, the only real difference being that it costs so much more to do the work in winter, that only upon structures which must be rushed will contractors make the outlay—only upon structure which stand on so valuable a site that the extra expense of operations is not nearly commensurate with the money being lost through the site standing idle.

A New Winter Demand.

For the past few years this change has been coming about. But only very recently has outside work upon buildings been carried on the winter through; so the demand for putty, which the finishing of these causes, is largely a new demand. For some time it has been the practice to do the inside work upon houses during the winter; but the custom has become more common during the past few years. Now, in the large cities, an effort is made to have houses ready for occupation in September. If that aim cannot be attained, there is no rush. Houses will not be in great demand after September, until May comes around, so if they are completed by February, and ready for inspection then, all will be well.

So the finishings are carried on during the winter. The window panes are put in then. Window sills are packed. It all means the use of large quantities of putty.

More Finishing This Year.

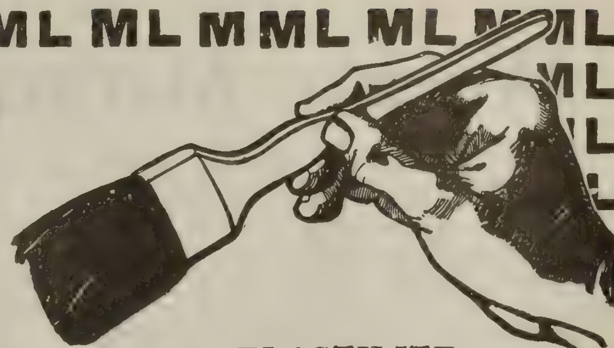
But this inside work was done upon houses last winter, and yet the demand this season is much greater than it was then. Why this is, seems to bring but one answer. There must be more building going on now—more buildings just nearing completion than there were a year ago. Anyway this is the conclusion the manufacturers of putty have reached. They say it must be so—that men this year are buying in much larger quantities than they did last.

And the manufacturers see no reason to believe that there is to be a slackening. Indeed, they expect the activity to become even greater. Buildings are being completed now, but in a few weeks buildings will be started, and the demand for putty necessary for these will be great. Everything seems to point to a greater activity in building, even than there was last year. Reports from east and west alike indicate this. No wonder then the putty manufacturers are taking steps to increase their output. The unusually heavy ordering of the winter has taken nearly all their supply. They will need now to get a stock on hand, which will enable them to fill the heavy spring and summer orders.

JOINS GALT ART METAL CO.

J. A. Gordon, for the past twelve years sales manager of the Metallic Roofing Co., Toronto., has been appointed manager of the Galt Art Metal Co., Galt. He assumed his new duties on the first of the month. Mr. Gordon is well known to the trade through his long association with the metal roofing industry.

There's Money in the ML Line



ML goods are made to build up trade for our dealers and ourselves. They have to be good, and they are good because we've been in business for 20 years—long enough to know that the way to succeed is to give full honest value for every dollar's worth we sell.

M L PAINTS

Under weather tests ML Paints have stood up better than the many "best" paints in the market. You can surely get particular trade with ML Paints.

M L FLOORGLAZE

A quick drying, glossy, wear - resisting finish—good for any paint purpose. In solid and transparent effects. Many shades. Well advertised.

ELASTILITE VARNISH

A favorite with folk who know that quality pays though it seems to cost more at first. Elastilite is splendid for any varnish need, indoors or out.

DECORATIVE AID DEPARTMENT---A Help for Every Decorator and Dealer Color schemes, and technical information given, by which any dealer may sell exactly the right paints in the right shades to properly decorate any house. Stencil designs, etc., included in information. This plan helps you get more business. Services are free. Write for Decorative Aid Booklet.

Many other good members in the ML Line. Get price list, color cards ana samples soon, from

"Creating New Business"

Mellotone

"Soft as the Rainbow Tints"

This modern interior finish opens up a new field of possibilities---a new source of profit for the Hardware Dealer.

"Mellotone" is a flat oil paint for interior use on plastered walls, metal ceilings, woodwork, burlap, etc., imparting on them that subdued artistic appearance so popular right now.

"Mellotone" takes the place of wall paper, kalsomine, water paint and enamel, being more beautiful, more sanitary and more economical. Its soft, velvet effect---its deep rich tone---its easy working qualities win for it a preference over all other interior finishes.

"Mellotone" brushes on smoothly, showing no laps or brush marks, and dries with a surface as hard as granite---a surface that is washable---sanitary.

There is a steady permanent selling power in "Mellotone" satisfaction. Have us show you how it "proves up" to the advertising now being carried on in the interests of the Dealer.

Weekly Market Report --- Paints

AN INCREASE MADE.

The paint market shows only seasonable activity, at present. Jobbers and manufacturers state, however, that trade during January was larger than during January, 1911, which can be accepted as an augury of a bigger year.

No price changes are noted.

MONTREAL.

Montreal, Feb. 9.—Slack days for the shipping departments of the various paint houses are about over. All winter long the manufacture of the various colors has been going on. Some shipping has been done. Some big orders, indeed, have been sent out; but now the supplies on hand are large enough to give the makers confidence. The orders which are coming show that the demand this year is to be heavy, but by keeping at work it will be possible to meet this.

Orders now being received call in many cases for immediate shipment. From the Maritime Provinces especially is prompt delivery asked. The dealers there are expecting an early spring, and are preparing to catch the early trade which will naturally result.

Prices have remained comparatively steady. Linseed oil, of course, has been jumping up and down in amazing style. But none of the movements have been serious, and the handlers have not thought it necessary to shift their prices either up or down.

No Money in Oil.

Linseed Oil.—There is little buying or selling of this. Indeed, the manufacturers make so little out of handling this commodity that they are not particularly eager to ship it out, except with orders for other goods. They are willing to accommodate their customers, of course, but they do not regard the oil business as exceedingly profitable.

Rumors of the Plata crop, of the India crop and of the Russian crop have kept the market swinging in one directioin and the other. The changes have been swift in England, but they have not been regarded with a great deal of interest by handlers here. All these have fairly good stocks on hand—stocks which will enable them to continue the manufacture of paint for some time, even if they buy no more. They cannot see that the changes on the primary market would justify them in changing the Canadian price either upwards or downwards. That a change in price is coming is far from certain. While the rumors that the Plata crop has been a failure do not seem correct, it is yet true that the flax seed to be secured from that source is not as great as was hoped. A lower level, therefore, does not seem to be exceedingly likely—not for the time being at least.

Oil is now being quoted at 95 for raw and 98 for boiled.

Turpentine.—Stocks at Savannah continue large, and no great jumps in price have been effected. It would seem that the handlers there are attempting to control the output, but they are not having great success in this effort. Generally turpentine is quoted as for some weeks past, at 70 cents.

Maritime Provinces Ordering.

White Lead.—Prices remain at the figures which have stood for some little time—prices which are tabulated in the current market quotations. The output is large. Especially from the Maritime Provinces do the manufacturers report the receipt of orders. That part of the Dominion appears wide awake to spring business already.

Mixed Paints.—This line has been rather quiet for a month or so. Retailers could not sell largely, but now they are beginning to feel the necessity of stocking for spring. Large orders are being received. Carload lots are quite common. It is surprising how many concerns have sent in these large orders.

Big Sales of Putty.

Glass.—Here good activity is shown. Many dealers are replenishing their supplies which have dwindled down during the winter. They will need to place larger orders later, but for the time being to get some sizes of which their stock has run low is sufficient.

Putty.—The sale of this during the winter has been remarkably heavy. Now the manufacturers are hard at it getting a supply which they think will enable them to meet the spring and summer calls. The promise of heavy building operations indicate that the demand for putty will be exceedingly large.

TORONTO.

Toronto, Feb. 9.—The cold weather has had some effect on business and orders generally have fallen off during the past week. The jobbers and manufacturers state, however, that business during January showed a neat increase over the same month last year. This statement applies only to actual sales. It is impossible as yet to estimate how the booking for spring delivery has compared with last year. Estimates place it in advance, however.

Taking it all around the situation is quite satisfactory and there is every evidence of a brisk spring demand.

A Stronger Tone.

Although no change has been made in the price of turpentine, which remains at 68 cents, there was some suggestion of an advance owing to the fact that a steady upward movement has been noted at Savannah. In a few days the price on the primary market rose 1¾ cents and fairly large sales were reported. This advance would ordinarily have resulted in a corresponding increase here but, owing to the fact that there has been very little demand locally, the jobbers did not make any alteration in their figures.

The turpentine situation is hard to size up at the present moment. Supplies at the primary points are reported lighter and the demand has undoubtedly shown a firm tone but the market price remains very low for this time of year. This may be due to the fact that the interests generally credited with bull tendencies are this year working to keep the market down.

Linseed Oil Firm.

No change has been made in the price of linseed oil. The jobbers report that sales have been small, despite the cut in price put into effect last week. It is not an easy matter to predict which way the market will go but the price at present writing seems to be firm.

White Lead Situation.

Dealers who have been holding off from ordering white lead in the hope of a reduction are "hugging a delusion." Pig lead has firmed up again and in any case the grinders are carrying stocks which they purchased at the highest level and, as this stock is entering into the manufacture of white lead, the price on that commodity must necessarily remain up. The jobbers report that there has been a fairly active tone to business.

Glass.—The volume of business is not heavy by any means. The travelers are booking orders for the spring trade and a few shipments have been made for immediate use.

Putty.—A little business is being done but it has almost reached the nominal point. Standard putty is quoted as follows :—Bulk, in casks, $2.20 ; in 100-lb. drums, $2.25 ; in 25-lb. drums $2.65 ; bladder, in barrels, $2.75. Pure putty prices remain the same :—Bulk, in casks, $2.50 ; in 100-lb. drums, $2.80 ; in 25-lb. drums, $2.90 ; bladder in barrels, $3.

B-H Paint Calendar, size 11½ in. by 8 in., printed in four colors

Mr. T. M. Nash, agent for B-H "ENGLISH" PAINT at Wellington, Ont., writes under date of January 19th, 1912, as follows:

"Am very much pleased with B-H Paint Calendar for 1912, and am sure it will be a big sales help to all B-H Paint Agents.

"I may say that I have been called on by a good many other paint firms trying to get me to take up their agencies, but I would not think of it, for I know that B-H 'ENGLISH' PAINT is the very best made. I can always bank on my customer's paint trade after he buys his first can of B-H 'ENGLISH' PAINT."

This attractive calendar is mailed to all property owners whose names are given us by B-H "ENGLISH" PAINT Agents. This calendar is part of a mail advertising campaign that we will conduct in your territory that will bring paint buyers to your store, and as Mr. Nash states in his letter printed above, "you can bank on your customer's paint trade after he buys his first can of B-H "ENGLISH" PAINT.

B-H "ENGLISH" PAINT is 70% Pure White Lead—30% Pure White Zinc---mixed ready for use with Pure Linseed Oil, Pure Turpentine and dryer and nothing else.

The Time—The Place—The Opportunity

The Time: On February 19-23, all roads for Canadian Hardwaremen will be leading Guelph-wards.

The Place: A splendid Hall, suited in every respect to the housing of a large Convention - the Armories at Guelph.

The Opportunity: To get fully acquainted with the splendid Minerva Paint Proposition--the line that aggresive dealers throughout the Dominion have proven the best in profit and satisfaction.

Don't fail to call at our booth and hear the good news our salesmen have for you.

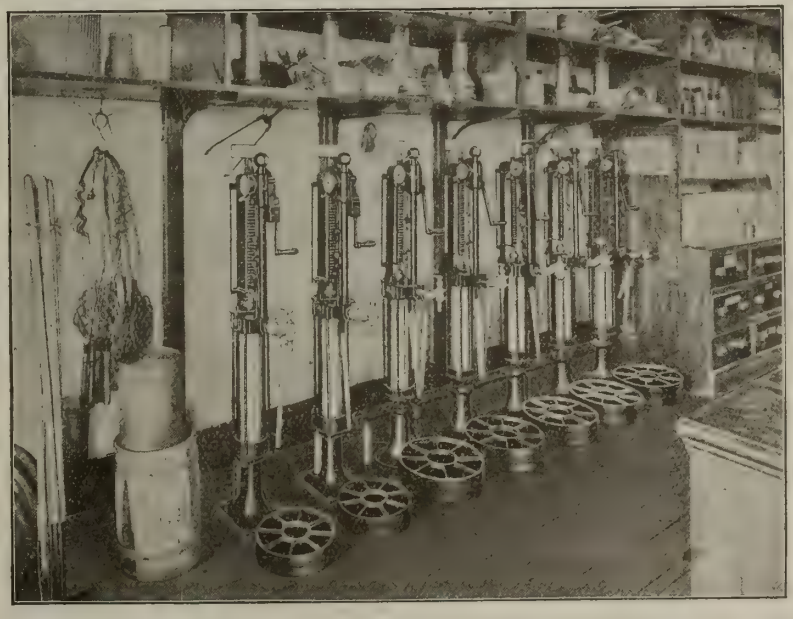
PINCHIN JOHNSON & COMPANY
(Canada) Limited

377-387 CARLAW AVENUE, - - - TORONTO

ESTABLISHED IN ENGLAND IN 1834.

I 97

This Illustration was made from a photograph of a Bowser installation for Mr. Samuel Hobbs, 1434 Queen St. W., Toronto, Ont.



This system handles
Canadian Coal Oil
American Coal Oil
Raw Linseed
Boiled Linseed
Turpentine
Gasoline
Benzine
profitably.

It pays him and it will pay you.

You Can Make a Better Profit on Paint Oils if You Handle Them Right

Now is the time to get ready for your spring paint trade. Investigate the Bowser NOW. Your fellow merchants are using them profitably—so can you. Put in a Bowser and get a bigger profit next year. Ask for book No. 15.

CONGO NEVER LEAK ROOFING

How Long Will It Last?

Every buyer of roofing asks that question---"How long will it last?"

That question is important.

We know positively how long Congo will last and are prepared to give every buyer a *real* Surety Bond with every roll of Congo Roofing.

The bond guarantees that Congo, 2-ply or 3 ply, *will last at least ten years*, and the buyer has *absolute certainty* on that point.

This guarantee is issued by the National Surety Company of New York and is enforcible without resort to law and without delay should Congo fail to last the ten years.

The fact that no other roofing manufacturer *can* give a Guarantee Bond like this ought to convince any reasonable buyer that Congo really is the *best* ready roofing made.

We will be glad to send you without obligation on your part a copy of the guarantee and further information.

CONGOLEUM FOR FLOORING AND WAINSCOTING

We should like to send every reader of this Paper a sample of Congoleum. It is fitted for use as a border around rugs, as wainscoting and as flooring. It is a perfect imitation of light and golden oak. Its surface has a high polish. It is unusually durable. The price is very low. Write for samples and further details

UNITED ROOFING AND MFG. CO., Philadelphia, Pa.

Stark, Seybold, Limited, Montreal; Mechanics' Supply Co., Quebec; S. Hayward & Co., St. John, N.B.; Miller-Morse Hardware Co., Winnipeg; E. G. Prior & Co., Limited, Victoria, B.C.; Hobbs Hardware Co., London, Ont.; Fife Hardware Co., Fort William, Ont.

"Safelock" Stays *cannot* Slip

This is a mighty strong selling point. It means that the fence will stand up to the hardest usage from animals or the elements and still keep its height and shape unimpaired. And the fact that the strand wires do not have to be kinked, owing to the positive permanent grip of the lock, means that every wire will stand its full strain. The "Safelock" is absolutely the strongest wire fence made---you can sell it as such and the test of time will bear you out to the letter. There's good money in handling "SAFELOCK." Write us about the exclusive agency for your locality. Don't put it off---Write to-day.

Paint Sales

A strong and active paint sales campaign is the result of years of the best directed efforts. Everybody knows that the biggest success lies with the Ramsay line of paints. We mean the Mixed paints, the Enamels, the Carriage paints, the Waggon paints, the Varnish Stain, and all those numerous lines that make for successful paint sales. The Ramsay line is so long and favorably known, the quality is so absolutely good and guaranteed that the name draws customers. With a reputation of seventy years, people know very well that Ramsay's Paints stand for the very best, and they know that the price is right. Ramsay's Agents are satisfied pushers. They have confidence in what they handle.

An All-round Interior Varnish

THAT BRINGS EXCELLENT RESULTS

The durability of this compound in combination with its elasticity makes it especially useful for floors, linoleum, grained work and furniture.

It works with remarkable freedom, is impervious to water and will not scratch white. It may be rubbed and polished when thoroughly hard.

Our price and proposition are right—it will pay you to communicate with us at once.

How to buy Paint

If you expect to put in a stock of paint or varnish, or if you are dissatisfied with your present stock, do not make an investment until you have found the manufacturer whose proposition satisfactorily answers these five vitally important questions:

1. **ARE THEY MADE OF THE PROPER MATERIALS?**

C. P. Paints and Varnishes are honestly made of materials of proved merit. The Canada Paint Co. make their own linseed oil and dry colors and their white lead is corroded by the best English methods, leaving no question of quality.

2. **ARE THEY PROPERLY MADE?**

The Canada Paint Company has been making and selling its paints and varnishes successfully in Canada for nearly half a century. No inferior products will sustain any business profitably for that length of time.

3. **ARE THEY IN DEMAND?**

The Canada Paint Company is one of the best known and most substantial industrial organizations in Canada. The reputation of C. P. products is the result of years of uniform good quality and satisfaction.

4. **ARE THE PRICES RIGHT?**

C. P. products are neither high nor low priced. The Canada Paint Company's facilities and enormous output enable them to manufacture at the lowest cost and establish prices which sell the goods.

5. **DO THEY PAY A GOOD PROFIT?**

This is partly answered in No 4. You make a profit on C.P. products equal to the margin allowed by any reputable paint manufacturer. Your selling cost is low because they are in demand, and the percentage of repeat sales is large.

It is the repeat sales that pay the profits. The record of the goods in the past is your safest guide for future business. Dependable Quality, right prices, a good reputation, and a generous margin of profit comprise the Canada Paint Co.'s offer to dealers. Could more be offered?

RELIABLE, AMBITIOUS YOUNG MAN wants position as manager of branch retail hardware store in the west, thorough western and eastern experience, excellent references. Apply Box 628, Hardware and Metal, Toronto. (7)

SITUATIONS VACANT

HARDWARE CLERK WANTED—WE WANT a bright young man with from two to three years' experience in the hardware business. State salary expected. John Bailes and Sons, Oshawa, Ont. (7)

TINSMITH WANTED — MUST BE ALL-round tinner and furnace man. Clerk in store spare time. Temperate, hustler, good wages. Start work April 1st. Geo. A. Laugtry, Tessier, Sask.

WANTED — EXPERIENCED HARDWARE clerk, must be able to keep books and have good recommendations. Apply stating salary wanted to J. A. Acton, 791 Bank Street, Ottawa. (6)

WANTED—A RELIABLE, AMBITIOUS MAN in every town to look after the entire circulation of our thirteen publications. Work very remunerative. MacLean Publishing Company, 143-149 University Avenue, Toronto, Ont. (tf)

WANTED—A FIRST-CLASS STEAMFITTER and plumbers' foreman to take charge of a shop, one who can figure, draw heating plans, estimate on all kinds of work and also manage men. To a really good man the best of wages will be paid. None but one who will take an interest in his work need apply. Enclose testimonials and state experience and salary to The Manville Hardware Co., Prince Albert, Sask. (7)

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms—real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

725,000 LIVE MERCHANTS USE NATIONAL cash registers. We couldn't sell them unless they saved people money. The National will guard your money, too. Write us for proof. National Cash Register Co., 285 Yonge St., Toronto.

STORAGE

STORAGE, VANCOUVER, B. C.—STORAGE or space to rent, office if required; warehouse close to all wharves, with railway siding; two elevators. Martin & Robertson, Ltd., 320 Railway Street, Vancouver. (14)

MISCELLANEOUS

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

FROM NOW TILL THE END OF THIS year, we offer unusually good bargains in second-hand typewriters. They are carefully rebuilt, work and look like new, but the price is a mere fraction of the original cost. Write for catalogue. The Monarch Typewriter Co., Limited, 46 Adelaide Street West, Toronto, Ont.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost. "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS and paperhangers—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paperhanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

They Hit You Right Between the Eyes

You've got to notice those well-painted houses every time.

That's the way they strike the other fellow, too, and if he passes that way very often he's going to get curious enough to ask what kind of paint keeps them in such good condition.

Our dealers tell us they make many sales through the recommendations of their old customers.

MONARCH PAINT
100% PURE

advertises itself wherever it is used, and sets the painter and property owner talking about its durability.

This fact hits you right between the eyes, too; you can't get around it, for it's as true as the world is round. Monarch quality is a splendid asset to any paint business. Why don't you write us for the agency?

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

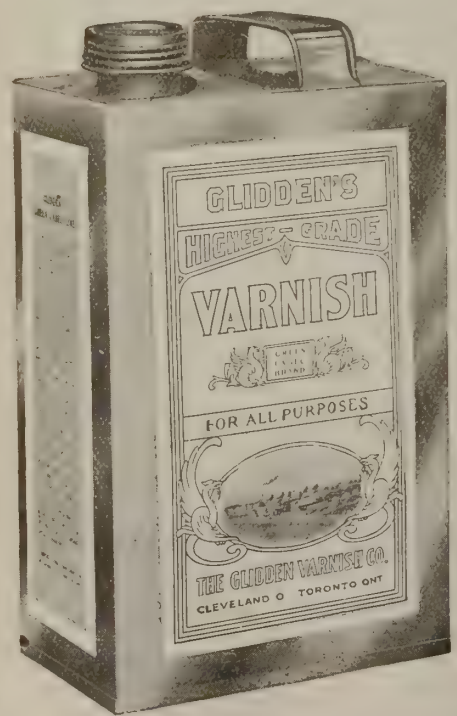
There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months'—five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.



We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

ALABASTINE

If you sell kalsomine (no matter under what name) you are familiar with complaints that it is difficult to put on, that it rubs and scales off, that it is "mussy" to remove when a fresh coat is needed. There is only one wall-covering without these defects and which is at the same time pure and sanitary—and that is **ALABASTINE.**

ALABASTINE is made from alabaster rock and is a cement which hardens into the wall, becoming part of it and never decaying or rubbing off. It is easily put on—only needing to be mixed with cold water—and a fresh coat can be put on top of the old one. No scraping or bother of any kind. Be ready for the Spring rush. Order NOW, direct or through your nearest jobber.

There's money for you in pushing Alabastine to your trade.

The Alabastine Co., Limited, - Paris, Ontario

"GOOD CHEER" Sidewall Registers

A line in four sizes, of uniform design throughout. Neat and tasteful pattern, and supplied in black japan, ordinary oxidized or full oxidized finish, with enamelled green fan. Our ordinary oxidized will about equal the more expensive full oxidized finish of other makes.

Positive acting fan—stays exactly where set, and when closed locks tight. No springs, etc., to weaken or loosen.

The price? It will pay you to inquire.

A full line of the above carried by The Jas. Stewart Mfg. Co., Limited, Winnipeg, Man.

The Jas. Stewart Manufacturing Co., Ltd.

Woodstock, Ontario

The World's largest manufacturers of Pure Lamp Blacks stand behind every pound of lamp black sold under the Bear Trade-mark shown on the accompanying illustration of label.

Less than nine years ago, this firm, *as a firm*, did not exist, although the men composing it have been many years in the lamp black trade.

Since that time we have been able to secure two-thirds of the entire lamp black business of North America.

Consistent good quality did it!

A recent addition to our plant, made necessary by the increasing confidence of the trade, makes our factory the largest of its kind in the world.

We manufacture all the Standard Grades of pure Lamp Black. Our product is sold by all reliable wholesale houses.

NOTICE THE TEETH

OF NICHOLSON-MADE FILES

They are all uniform height. This is one of the features that makes them such rapid cutters. All teeth take hold of the work at once, and then, the steel used in every Nicholson-Made File is made up to our own strict specifications and differs in grade according to the purpose for which different files are to be used. And our machinery is designed especially to make the tooth in different Nicholson-Made Files the best shape for each different purpose.

These are the favorite Nicholson-Made lines in Canada

"American"

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Vital Points About "Hercules Drills"

Tools of Quality
Trade
W&B
Mark
Bear these Marks

"Hercules" Drills retain the original toughness of the Vanadium Steel from which they are made.

The twisting while hot process leaves the steel undisturbed and adds double life to "Hercules" Drills.

Besides having little liability to snap under high speed drilling "Hercules" Drills last longer between trips to grindstone. There's economy in every inch.

The taper shanks, usually one size larger than ordinary, prevent tang troubles and give a greater driving power.

Your jobber will supply them or you can send order direct. Send for Catalog 74-B.

The Whitman & Barnes Mfg. Company

Established 1852 St. Catharines, Ont.

Stocks carried at Winnipeg and Montreal.

Stanley Tools

These Block Planes are the highest type of Block Planes manufactured. The Cutters are made of the best English steel, tempered and ground by an improved process and honed ready for use.

Nos. 9½ and 18 have an adjustable throat opening. The Cutters are adjustable both endwise and sidewise.

No. 60 is a low Angle Block Plane with adjustable Cutter and throat opening. Especially adapted for working across the grain.

No. 131 has reversible adjustment so that the tool can be used as an ordinary Block Plane, or as a Bull Nose.

No. 140 has a detachable side whereby the tool may be changed from a Block to a Rabbet Plane or vice versa. The Cutter is set on a skew.

BUTTERMAKERS DEMAND
THE "FAVORITE" CHURN

because they know it is the best. A glance at its construction—that light, but rigid angle steel frame, the bolted trunnions, the tight and conveniently arranged cover, the combined hand and foot drive, the roller bearings—these very evident advantages convince one of its superiority, which is fully proven by actual churning tests As a natural result, more "FAVORITES" are sold in Canada than all other churns combined. 8 sizes, to churn from ½ to 30 gallons.
